[TWENTY-FIFTH YEAR]

THE CHICAGO DAILY NEWS
ALMANAC
AND YEAR-BOOK

FOR

1909

COMPILED BY JAMES LANGLAND, M. A.

ISSUED BY
THE CHICAGO DAILY NEWS COMPANY

[Copyright, 1908, by The Chicago Daily News Co.]

PREFACE.

With this issue The Daily News Almanac and Year-Book completes the twenty-fifth year of its existence. The first number was for 1885 and, as heretofore noted, it was simply a little paper-bound booklet of sixty-four pages. It was necessarily restricted in scope and the subject matter handled was very much condensed. However, it met the requirements of the public in a measure and its publication was continued, such additions being made to size and contents from year to year as seemed advisable in order to increase its usefulness as a work of reference. As expansion has been the order of the day in national affairs, so progress has been the watchword of this publication from the day it first appeared a quarter of a century ago. It has grown with the country and with the state and city in which it is issued and it is believed that this anniversary number will prove that its development has been along lines tending to make it, in some degree, helpful to every person, no matter what his calling or occupation may be. As usual, every effort has been made to have the information presented up to date and thoroughly reliable, the facts wherever possible being obtained from official sources. A glance over the index, which begins on the opposite page, will give a better idea of the scope and comprehensiveness of this information than anything that might be said here.

ERAS OF TIME.

The Gregorian year 1909 corresponds to the following eras:

From July 4 the 134th year of the independence of the United States.
The year 1327 (nearly) of the Mohammedan era of the hejira, beginning Jan. 23.
The year 8018 of the Greek church, beginning Jan. 14, old style.
The year 4606 (nearly) of the Chinese era, beginning Jan. 22.

The year 5669-70 of the Jewish era, year 5670 beginning at sunset Sept. 15.
The year 2669 (nearly) of the Japanese era, beginning Jan. 22.
The year 6822 of the Julian period.
The year 2221 of the Grecian era.
Jan. 1, 1909, is the 2,418,308th day since the commencement of the Julian period.

CHRONOLOGICAL CYCLES.

Dominical Letter.....C
Epaet (Moon's Age, Jan. 1).....8
Dionysian Period.....238

Lunar Cycle or Golden Number.....11
Solar Cycle.....14

Roman Indiction.....7
Julian Period.....6622
Jewish Lunar Cycle.....7

EXPLANATORY NOTE—The Dominical letter or letters (two for leap year), or Sunday letters, indicate the day of the year on which the first Sunday occurs, the first seven letters of the alphabet being used. Thus, for 1909, the Dominical letter is C, the third letter of the alphabet, and hence the third day of the year will be the first Sunday of the year. In leap years two letters are used, the first being for January and February, and the latter, being the preceding letter, answers for the last ten months, in order to maintain the cycle. The rule for obtaining the Dominical letter for any year is somewhat complicated and for that reason is omitted here. The Golden Number is that number of a cycle of nineteen years which shows how many years have elapsed since the new moon fell on Jan. 1, for in nearly nineteen years the solar and lunar years nearly come together. The chief use of this cycle is in fixing the date of Easter, and in this same connection is used the Epaet. The Solar Cycle is the number of years that have elapsed since the days of the week fell on the same days of the year, or when there will, therefore, be a recur-

rence of the Dominical or Sunday Letter. This would be the case every seven years but for leap year, hence four times seven is the cycle, or twenty-eight years. It is the remainder found by adding nine to the year and dividing the sum by twenty-eight. The Roman Indiction is a cycle of fifteen years and is of no utility except to chronologers. It is the remainder found by adding three to the year and dividing by fifteen. The Julian Period is a cycle of 7,980 years and is the product of the three cycles, Golden Number (19), Solar Cycle (28) and Roman Indiction (15), and hence shows the time when these cycles will coincide or begin at the same time. The first of this cycle will be completed in the year 2267; it is the year + 4713. The Dionysian Period is a cycle of 532 years and is called the great Paschal cycle, being the product of a completed solar and lunar cycle (28×19). It is the remainder found by adding 457 to the year and dividing by 532, and with the Julian Period is chiefly used by chronologers. The Jewish Lunar Cycle is always three less than the Golden Number and is used by the Jews in fixing the time of their festivals.

NOTE.—To ascertain any day of the week first look in the table for the year required and under the months are figures which refer to the corresponding figures at the head of the columns of days below. For example: To know on what day of the week July 4 was in the year 1895, in the table of years look for 1895, and in a parallel

line, under July, is figure 1, which directs to column 1, in which it will be seen that July 4 falls on Thursday.

*1752 same as 1772 from Jan. 1 to Sept. 2. From Sept. 14 to Dec. 31 same as 1780 (Sept. 3-13 were omitted).—This Calendar is from Whitaker's London Almanack, with some revisions.

THE PLANETS.

See also the table of the rising, setting and meridian passage of the planets.

MERCURY will be brightest:

1. As a morning star west of the sun, March 3-8 and Oct. 25-31, rising about 1h. 15m. before the sun, being farthest west of the sun March 9, 27°, and Oct. 28, 18°.
2. As an evening star, east of the sun, April 27-May 3 and Sept. 20-26, setting about 1h. 15m. after the sun, being farthest east of the sun May 20, 22°, and Sept. 17, 27°.

Look for a very red star within the above-named intervals near the sunrise or sunset points at or near the time of beginning or end of twilight and a little up from the horizon. It is quite an event to observe this planet and be certain of it.

VENUS, the "love star" or planet, will not attain her greatest degree of brilliancy possible this year, but she will be brightest of the year at its close. (See table of the planets.) She will be a morning star until April 28 and an evening star after that date. Venus will be at superior conjunction with the sun April 28, or on that date she will rise and set with the sun, being on the farther side of the sun from the earth—or, in other words, the sun will be between us and the planet. Before that date she will be visible west of the sun and afterward east of him. In the course of her orbit about the sun she presents to us all the phases of the moon as shown in the annexed figures. These phases may be observed very nicely by the aid of a small telescope or good field glass.

As seen in the Morning

As seen in the Evening

West of sun. East of sun.

A—Fifteen days before superior conjunction, or April 13, 1900.

B—At greatest elongation west, April 23, 1910.

C—When brightest as a morning star, March 18-19, 1910.

D—Just after inferior conjunction, or Feb. 12, 1910.

E—Fifteen days after superior conjunction, May 13, 1909.

F—At greatest elongation east, Dec. 2, 1909.

G—When brightest as an evening star, Jan. 7, 1910.

H—Just before inferior conjunction, Feb. 5, 1910.

The greatest difference in the apparent size or diameter of the Venus in A and E as compared with D and H is because of the vastly greater distance she is from us at her superior conjunction. When seen as a crescent, a D or H, appearing as A or E. When she appears like D or H she will be only about 25,000,000 miles from us, and when like A or E she will be 160,000,000 miles distant, or about six times as far. Her apparent diameter actually increases about sixfold under these changed conditions.

At the beginning of the year Venus will be in the constellation Scorpio a few degrees northeast of the bright red star Antares. (See "Chart of the Heavens.") She is advancing or moving eastward past the stars and on Jan. 20 she will be close to and above the Milkmaid's Dipper in Sagittarius and on the 30th of January only 21° north of Uranus. On Feb. 19 and again on April 19 she will be in conjunction with Mercury, being at first conjunction 4° north of him in Capricornus

and 22° south on the last conjunction. In March she passes through Aquarius and enters Pisces. During April she passes through Pisces and enters Aries, being just south of the bright stars in the head of ram when last visible before her conjunction with the sun on April 28. On April 9 she will be 1° north of Saturn. On May 12 she will be about 5° below (S) of the Pleiades or Seven Stars, and on May 22 she will be close to the Hyades and only 5° north of the brilliant Aldebaran and will present a beautiful sight in the evening skies. On June 1 she will be about midway between Capella and the stars of Orion's Belt. She enters Gemini June 10 and by the 25th will be flirting with Castor and Pollux, a few degrees below or south of them, toward the brilliant Procyon. July 4 she enters Cancer and on the 10th is close to the cluster of dim stars called Praesepe. On July 26 she will be just below Regulus in the Sickle in Leo; Aug. 12 only 12' south of Jupiter. Sept. 10 she will be 20° north of Spica Virginis in Virgo, and on Oct. 18 she completes her orbit and again keeps company with red Antares in Scorpio, being only 3° north of that star. By the middle of November she will again be close to and above the Milkmaid's Dipper in Sagittarius. On and near Nov. 24 a line from the Great Cross extended southward through Aquila (Altair) will touch her nearly as far again south, passing through Uranus 2° 33' N. of Venus at the greatest angular distance east (47°) from the sun. On Dec. 10 she will be in Capricornus about 35° south of Job's Coffin and will end the year close to (10° south) the A in Aquarius.

MARS NEAREST THE EARTH.

MARS, the ruddy planet, will be brightest Sept. 18-25 as an evening star. He will be a morning star until May 13 and an evening star after that date. At this opposition in September Mars will be even nearer than in 1907.

The planet Mars will attract the attention of the world this year more than in 1907 because of the fact that he will approach nearer to us than he was then or will be again in the following fifteen years. The reason for this will be understood by an inspection of the annexed figure. When the points C (aphellon) in the earth's orbit and A (perihellon) in Mars' orbit come in line with the sun then the earth and Mars will be the nearest possible. A moderately close approach to these conditions occurs every fifteen and seventeen years. This year on Sept. 18-25 these planets will occupy the positions in their respective orbits E and F. On July 3 the earth will be at C or farthest from the sun, and on Aug. 13 Mars will be at A or nearest to the sun.

It is apparent that there must be a point between A and C where these bodies are in line with the sun, and where they will be nearest, and, as has been said, this occurs at E and F, when they will be nearer by about 33,000,000 miles than when these conditions are reversed in 1916.

The photographs of Mars that were taken in July, 1907, have not been fully developed at this

writing and therefore the full results are not known. But enough has been seen to quite confirm the belief that the so-called "canals" are such in fact, and therefore the work of intelligent beings. That they are the main arteries of a vast irrigation system seems probable. By these canals the water from the melting ice and snow masses is conveyed from either pole, alternately, to the equatorial parts of the planet.

At the beginning of the year Mars will be in Libra, about 10° north of the red star Antares in Scorpio. (See chart.) By the 6th of March he

will have worked eastward to a point just above the Milkmaid's Dipper in Sagittarius and in the Milky Way. He enters Capricornus April 23 and on June 1 will be 10° south of the ♈ in Aquarius. He enters Pisces July 17. On Aug. 23 he becomes stationary with respect to the stars and then begins to retrograde or move westward past the stars, going over nearly the same track until Oct. 26, when he again becomes stationary in Aquarius, and then advances eastward again the remainder of the year.

Neptune	34,800	2,791,600,000	60,181

The sun's surface is 12,000 and its volume 1,300,000 times that of the earth, but the mass is only 332,000 times as great and its density about one-quarter that of the earth. The force of gravity at the surface of the sun is twenty-seven times greater than that at the surface of the earth. The sun rotates on its axis once in 25.3 days at the equator, but the time is longer at the higher latitudes, from which fact it is presumed that the sun is not solid, at least as to its surface.

THE EARTH AND THE MOON.

Earth—The equatorial diameter of the earth is

7,926.5 miles and the polar diameter 7,899.5 miles; equatorial circumference, 25,000. The linear velocity of the rotation of the earth on its axis at the equator is 24,840 miles a day, or 1,440 feet a second; its velocity in its orbit around the sun is approximately nineteen miles per second, the length of the orbit being about 560,000,000 miles. The superficial area of the earth according to Encke, the astronomer, is 197,108,580 square miles, of which two-thirds is water and one-third land. The planetary mass is about 256,000,000 cubic miles.

Moon—The moon has a diameter of 2,162 miles, a circumference of about 6,800 miles and a surface area of 14,685,000 square miles. Her mean distance from the earth is 238,840 miles. The volume of the moon is about 1-49th that of the earth and the density about 3-2-5 that of water. The time from new moon to new moon is 29 days 12 hours 44.05 minutes. The moon has no atmosphere and no water and is a dead world.

VELOCITY OF LIGHT.

Light travels at the rate of 186,300 miles per second. It requires 8 minutes and 8 seconds for light to come from the sun to the earth.

NOTE—The above positions are as seen from the center of the earth, but are sufficiently exact for all places on its surface.

CHART OF THE HEAVENS.

EXPLANATION—The chart of the heavens shows all the bright stars and groups visible in the United States, Canada, Mexico, Cuba and Hawaii. Stars of the third magnitude are sometimes shown in order to complete a figure.

If a bright uncharted body be seen near the "ecliptic circle" it must be a planet. To locate the planets or moon, refer to the tables "position of planets" and "moon's place" in the almanac pages, find the proper signs on the chart on the "ecliptic circle" and an inspection of that part of the heavens, comparing with the chart, will serve to identify the planet and all the surrounding objects.

Because of the earth's motion from west to east (opposite to the direction of the arrow in the chart), the stars rise 4m. earlier each day or 30m. per week, or 2h. a month. The chart shows the

position at 9 p. m. Then if the position for any other hour be desired, as for 7 p. m., count back one month, or ahead one month for 11 p. m., and so on for any hour of the night.

A circle described from the zenith on the "zenith circle" for the desired latitude with a radius of 90° (see graduated meridian) will show what stars are above the horizon. Thus Capella is near the overhead (zenith) point on latitude 40° north Jan. 15, 9 p. m., as will be Algenib in the handle of the Big Dipper at 3 a. m. Then from Capella or Algenib all the surrounding visible groups can be identified. The "pointers" being 5° apart and always in sight may be used as a convenient unit of measure; also when visible the Belt of Orion, 3°, or the sides of the square of Pegasus. The observer is always supposed to stand under the overhead point and to face south and north alternately.

TIME AND STANDARDS OF TIME.

Various kinds of time are in use in this country:

1. **Astronomical Time or Mean Solar Time**—This is reckoned from noon through the twenty-four hours of the day and is used mainly by astronomical observatories and in official astronomical publications. It is the legal time of the Dominion of Canada, though "standard" and "mean" time are in general use there as in this country.

2. **Mean Local Time**—This is the kind that was in almost universal use prior to the introduction of standard time. This time is based upon the time when the mean sun* crosses the meridian and the day begins at midnight. When divided into civil divisions—years, months, weeks, days, etc.—it is sometimes called civil time.

3. **Standard Time**—For the convenience of the railroads and business in general a standard of time was established by mutual agreement in 1883 and by this calculation trains are now run and local time is regulated. By this system the United States, extending from 65° to 125° west longitude, is divided into four time sections, each of 15° of longitude, exactly equivalent to one hour (7½° or 30m. on each side of a meridian), commencing with the 75th meridian. The first or eastern section includes all territory between the Atlantic coast and an irregular line drawn from Buffalo to Charleston, S. C., the latter city

being its southernmost point. The second or central section includes all the territory between this eastern line and another irregular line extending from Bismarck, N. D., to the mouth of the Rio Grande. The third or mountain section includes all the territory between the last-named line and nearly the western borders of Idaho, Nevada and Arizona. The fourth or Pacific section includes all the territory of the United States between the boundary of the mountain section and the Pacific coast. Inside of each of these sections standard time is uniform and the time of each section differs from that next to it by exactly one hour, as shown on the map.

*Owing to the eccentricity of the earth's orbit and the inclination of the equator to the ecliptic, the apparent motion of the sun is retarded or accelerated according to the earth's place in its orbit. Hence, to take the actual sun as a guide would necessitate years, days and their subdivisions of unequal length. Therefore an imaginary or "mean sun" was invented. The difference between apparent and mean time is called the "equation of time" and may amount to a quarter of an hour in twenty-four hours. It is the difference between the figures in "Sun at noon mark" column in calendar and twelve hours. The figures on a correct sun dial give the apparent time.

STANDARDS OF TIME.

The following is the table of times, based upon the meridians used by the United States and Canada:

NAME OF TIME.	Degrees.	Central meridian from Greenwich.	Nearest place.
Intercolonial or Atlantic.....	60	4 hours west.....	About 3½ degrees east of Halifax, N.S.
Eastern.....	75	5 hours west.....	Between New York and Philadelphia.
Central.....	90	6 hours west.....	St. Louis and New Orleans.
Mountain.....	105	7 hours west.....	Denver, Col.
Pacific.....	120	8 hours west.....	½ degrees east of Sacramento, Cal.
Sitka.....	135	9 hours west.....	4 degree east of Sitka, Alaska.
Tahiti.....	150	10 hours west.....	3 degree west of the Island of Tahiti,
Hawaiian.....	157½	10 hrs. 31 min. west.	Near center of Molokai.

It is obvious that to express the time of rising and setting of the sun and moon in standard time would limit the usefulness of such data to the single point or place for which it was computed, while in mean time it is practically correct for places as widely separated as the width of the

continent (see note at bottom of February calendar), and persons having obtained the mean time by the rising or setting of the sun or moon may easily ascertain the correct standard time of any event by making use of the following table and map:

All the calculations in The Daily News Almanac and Year-Book are based upon mean or clock time unless otherwise stated. The sun's rising and setting are for the upper limb, corrected for parallax and refraction. In the case of the moon no correction is needed, as in the sun, for "parallax and refraction"; with her they are of an opposite nature and just balance each other. The figures given, therefore, are for the moon's center on a true horizon such as the ocean affords.

The calculations in each of the geographical divisions of each calendar page will apply with sufficient accuracy to all places in the contiguous

North American zones indicated by the headings of the divisions.

The heavy dotted lines show the arbitrary (standard) divisions of time in the United States. The plus and minus marks on either side of the meridian lines show whether it is necessary to add to or subtract from the mean time of points east or west of these lines to arrive at actual standard time. Example: Chicago is $2\frac{1}{2}^{\circ}$ east of the 90th meridian, therefore Chicago local time $- 2\frac{1}{2} \times 4 = 10$ to be subtracted from mean time to = standard time, and for Boston standard (eastern) time, 16m. must be subtracted from mean time.

THE SMITHSONIAN INSTITUTION AT WASHINGTON.

The Smithsonian Institution was established by statute in 1846, under the terms of the will of James Smithson, who bequeathed his fortune in 1826 to the United States for the "increase and diffusion of knowledge among men." From the income of the fund a building, known as the Smithsonian building, was erected in Washington, D. C., on land given by the United States. The institution is legally an establishment having as its members the president and vice-president of the United States, the chief justice and the president's cabinet. It is governed by a board of regents consisting of the vice-president, the chief justice, three members of the United States senate, three members of the house of representatives and six citi-

zens appointed by joint resolution of congress. It is under the immediate direction of the secretary of the Smithsonian Institution, who is the executive officer of the board and the director of the institution's activities. The institution aids investigators by making grants for research and exploration, providing for lectures, initiating scientific projects and publishing scientific papers. It has administrative charge of the national museum, the national gallery of art, the international exchange service, the national zoological park, the astrophysical observatory and the regional bureau for the international catalogue of scientific literature. The secretary of the institution is Charles D. Walcott.

LEGAL HOLIDAYS.

- Porto Rico**—Jan. 1; Feb. 22; Good Friday; May 30; July 4; July 25 (Landing day); Thanksgiving day; Dec. 25.
- Rhode Island**—Jan. 1; Feb. 22; second Friday in May (Arbor day); May 30; July 4; first Monday in September; general election day; Thanksgiving day; Dec. 25.
- South Carolina**—Jan. 1; Jan. 19 (Lee's birthday); Feb. 22; May 10 (Confederate Memorial day); June 3 (Jefferson Davis' birthday); general election day; Thanksgiving day; Dec. 25, 26, 27.
- South Dakota**—Same as in North Dakota.
- Tennessee**—Jan. 1; Good Friday; May 30; July 4; first Monday in September; general election day; Thanksgiving day; Dec. 25; every Saturday afternoon.

Texas—Jan. 1; Feb. 22 (Arbor day); March 2 (anniversary of Texas independence); April 21 (anniversary of battle of San Jacinto); July 4; first Monday in September; general election day; appointed fast days; Thanksgiving day; Dec. 25.

Utah—Jan. 1; Feb. 22; April 15 (Arbor day); May 30; July 4; July 24 (Pioneer day); first Monday in September; Thanksgiving day and appointed fast days; Dec. 25.

Vermont—Jan. 1; Feb. 22; May 30; July 4; Aug. 16 (Bennington Battle day); Labor day; Thanksgiving day; Dec. 25.

Virginia—Jan. 1; Jan. 19 (Lee's birthday); Feb. 22; July 4; first Monday in September; Thanksgiving and appointed fast days; Dec. 25; every Saturday afternoon.

Washington—Jan. 1; Feb. 12 (Lincoln's birthday); Feb. 22; May 30; July 4; first Monday

in September; general election day; Thanksgiving day; Dec. 25.

West Virginia—Jan. 1; Feb. 12; Feb. 22; May 30; July 4; Labor day; general election day; Thanksgiving day; Dec. 25.

Wisconsin—Jan. 1; Feb. 22; May 30; July 4; first Monday in September; general election day; Thanksgiving day; Dec. 25.

Wyoming—Jan. 1; Feb. 12; Feb. 22; May 30; July 4; first Monday in September; general election day; Dec. 25.

The national holidays, such as July 4, New Year's, etc., are such by general custom and observance and not because of congressional legislation. Congress has passed no laws establishing holidays for the whole country. It has made Labor day a holiday in the District of Columbia, but the law is of no effect elsewhere.

WEEKLY DAY OF REST IN ITALY.

Under a new law which went into effect Feb. 8, 1900, all industrial and commercial concerns throughout Italy must grant their employes a weekly rest of not less than twenty-four consecutive hours. It does not apply to public utilities, transportation lines or places of amusement. The general sense of the law is that Sunday shall be

the rest day, but it is provided that freedom from work may be given on a day other than Sunday in the case of restaurants, photograph galleries, pharmacists, undertakers, barbers, newspaper offices, bars, billiard rooms, theaters, cheese manufactories and industries of public necessity in general.

THE HOMESTEAD LAW.

Any person who is the head of a family, or who is 21 years old and is a citizen of the United States or has filed his declaration of intention to become such, and who is not the proprietor of more than 160 acres of land in any state or territory, is entitled to enter one-quarter section (160 acres) or less quantity of unappropriated public land under the homestead laws. The applicant must make affidavit that he is entitled to the privileges of the homestead act and that the entry is made for his exclusive use and for actual settlement and cultivation, and must pay the legal fee and that part of the commission required, as follows: Fee for 160 acres, \$10; commission, \$4 to \$12. Fee for eighty acres, \$5; commission, \$2 to \$6. Within six months from the date of entry the settler must take up his residence upon the land and cultivate the same for five years continuously. At the ex-

piration of this period, or within two years thereafter, proof of residence and cultivation must be established by four witnesses. The proof of settlement, with the certificate of the register of the land office, is forwarded to the general land office at Washington, from which a patent is issued. Final proof cannot be made until the expiration of five years from date of entry, and must be made within seven years. The government recognizes no sale of a homestead claim. After the expiration of fourteen months from date of entry the law allows the homesteader to secure title to the tract, if so desired, by paying for it in cash and making proof of settlement, residence and cultivation for that period.

The law allows only one homestead privilege to any one person.

WEIGHTS OF DIAMONDS AND FINENESS OF GOLD.

The weight of diamonds and other precious stones is expressed in carats, grains and quarter-grains. The grains are pearl grains, one of which is equal to four-fifths of a troy grain. Four quarter-grains make one grain and four grains make one carat. A carat is therefore equal to four-fifths of four troy grains, or 3.2.

The fineness of gold is also expressed in carats. Pure gold is said to be twenty-four carats fine. If it contains eight parts of a baser metal or alloy it is only sixteen carats fine. The carats therefore indicate the proportion of pure gold to alloy. Most of the gold used by jewelers is about fourteen carats fine, having ten parts of alloy.

DECLARATION OF INDEPENDENCE.

The unanimous declaration of the thirteen United States of America, in congress, July 4, 1776.

When, in the course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth the separate and equal station to which the laws of nature and of nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident: That all men are created equal; that they are endowed by their Creator with certain inalienable rights; that among these are life, liberty and the pursuit of happiness. That, to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed; that, whenever any form of government becomes destructive of these ends, it is the right of the people to alter or to abolish it, and to institute a new government, laying its foundation on such principles, and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness. Prudence, indeed, will dictate that governments long established should not be changed for light and transient causes; and accordingly all experience hath shown that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same object, evinces a design to reduce them under absolute despotism, it is their right, it is their duty, to throw off such government, and to provide new guards for their future security. Such has been the patient suffering of these colonies, and such is now the necessity which constrains them to alter their former systems of government. The history of the present king of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute tyranny over these states. To prove this, let facts be submitted to a candid world.

He has refused his assent to laws the most wholesome and necessary for the public good.

He has forbidden his governors to pass laws of immediate and pressing importance, unless suspended in their operation till his assent should be obtained, and, when so suspended, he has utterly neglected to attend to them.

He has refused to pass other laws for the accommodation of large districts of people, unless those people would relinquish the right of representation in the legislature—a right inestimable to them and formidable to tyrants only.

He has called together legislative bodies, at places unusual, uncomfortable and distant from the repository of their public records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved representative houses repeatedly for opposing with manly firmness his invasions on the rights of the people.

He has refused for a long time after such dissolutions to cause others to be elected; whereby the legislative powers, incapable of annihilation, have returned to the people at large for their exercise; the state remaining, in the meantime, exposed to all the dangers of invasion from without and convulsions within.

He has endeavored to prevent the population of these states; for that purpose obstructing the laws for naturalization of foreigners; refusing to pass others, to encourage their migration hither, and raising the conditions of new appropriations of lands.

He has obstructed the administration of justice by refusing his assent to laws for establishing judiciary powers.

He has made judges dependent on his will alone for the tenure of their offices and the amount and payment of their salaries.

He has erected a multitude of new offices and sent hither swarms of officers to harass our people and eat out their substance.

He has kept among us, in times of peace, stand-

ing armies without the consent of our legislatures.

He has affected to render the military independent of and superior to the civil power.

He has combined with others to subject us to a jurisdiction foreign to our constitutions and unacknowledged by our laws, giving his assent to their acts of pretended legislation:

For quartering large bodies of armed troops among us;

For protecting them by a mock trial from punishment for any murders which they should commit on the inhabitants of these states;

For cutting off our trade with all parts of the world;

For imposing taxes on us without our consent; For depriving us in many cases of the benefits of trial by jury;

For transporting us beyond seas to be tried for pretended offenses;

For abolishing the free system of English laws in a neighboring province, establishing therein an arbitrary government, and enlarging its boundaries so as to render it at once an example and fit instrument for introducing the same absolute rule into these colonies;

For taking away our charters, abolishing our most valuable laws and altering fundamentally the forms of our governments;

For suspending our own legislatures and declaring themselves invested with power to legislate for us in all cases whatsoever.

He has abdicated government here by declaring us out of his protection and waging war against us.

He has plundered our seas, ravaged our coasts, burnt our towns and destroyed the lives of our people.

He is at this time transporting large armies of foreign mercenaries to complete the work of death, desolation and tyranny already begun, with circumstances of cruelty and perfidy scarcely paralleled in the most barbarous ages and totally unworthy the head of a civilized nation.

He has constrained our fellow citizens taken captive upon the high seas to bear arms against their country, to become the executioners of their friends and brethren or to fall themselves by their hands.

He has excited domestic insurrection amongst us and has endeavored to bring on the inhabitants of our frontiers the merciless Indian savages, whose known rule of warfare is an undistinguished destruction of all ages, sexes and conditions.

In every stage of these oppressions we have petitioned for redress, in the most humble terms; our repeated petitions have been answered only by repeated injury. A prince whose character is thus marked by every act which may define a tyrant is unfit to be the ruler of a free people.

Nor have we been wanting in attention to our British brethren. We have warned them, from time to time, of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred, to disavow these usurpations, which would inevitably interrupt our connections and correspondence. They, too, have been deaf to the voice of justice and consanguinity. We must, therefore, acquiesce in the necessity which denounces our separation, and hold them, as we hold the rest of mankind, enemies in war; in peace, friends.

We, therefore, the representatives of the United States of America, in general congress assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the name and by the authority of the good people of these colonies, solemnly publish and declare that these united colonies are, and of right ought to be, free and independent states; that they are absolved from all allegiance to the British crown, and that

all political connection between them and the state of Great Britain is, and ought to be, totally dissolved; and that as free and independent states they have full power to levy war, conclude peace, contract alliances, establish commerce and to do all other acts and things which independent states may of right do. And for the support of this declaration, with a firm reliance on the protection of Divine Providence, we mutually pledge to each other our lives, our fortunes and our sacred honor.

THE MONROE DOCTRINE.

The "Monroe doctrine" was enunciated by President Monroe in his message to congress Dec. 2, 1823. Referring to steps taken to arrange the respective rights of Russia, Great Britain and the United States on the northwest coast of this continent, the president went on to say:

"In the discussions to which this interest has given rise, and in the arrangements by which they may terminate, the occasion has been deemed proper for asserting, as a principle in which the rights and interests of the United States are involved, that the American continents, by the free and independent condition which they have assumed and maintain, are henceforth not to be considered as subjects for future colonization by any European power. * * * We owe it, therefore, to candor and to the amicable relations existing

between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European power we have not interfered and shall not interfere. But with the governments who have declared their independence and maintain it, and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them or controlling in any other manner their destiny by any European power in any other light than as the manifestation of an unfriendly disposition toward the United States."

THE DRAGO DOCTRINE.

When in the winter of 1902-03 Germany, Britain and Italy blockaded the ports of Venezuela in attempt to make the latter country settle up its debts Dr. L. F. Drago, a noted jurist of Argentina, maintained that force cannot be used by one power to collect money owing to its citizens by

another power. Prominence was given to the contention by the fact that it was officially upheld by Argentina and favored by other South American republics. The principle embodied has become generally known as the "Drago doctrine."

CONSTITUTION OF THE UNITED STATES.

September 17, 1787.

PREAMBLE. We, the people of the United States, in order to form a more perfect union, establish justice, insure domestic tranquillity, provide for the common defense, promote the general welfare and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this constitution for the United States of America:

ARTICLE I.

Section I. All legislative powers herein granted shall be vested in a congress of the United States, which shall consist of a senate and house of representatives.

Section II. 1. The house of representatives shall be composed of members chosen every second year by the people of the several states, and the electors in each state shall have the qualifications requisite for electors of the most numerous branch of the state legislature.

2. No person shall be a representative who shall not have attained to the age of 25 years and been seven years a citizen of the United States, and who shall not, when elected, be an inhabitant of that state in which he shall be chosen.

3. Representatives and direct taxes shall be apportioned among the several states which may be included within this union, according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three-fifths of all other persons. The actual enumeration shall be made within three years after the first meeting of the congress of the United States, and with in every subsequent term of ten years, in such manner as they shall by law direct. The number of representatives shall not exceed one for every 30,000, but each state shall have at least one representative, and until such enumeration shall be made the state of New Hampshire shall be entitled to choose three; Massachusetts, eight; Rhode Island and Providence Plantations, one; Connecticut, five; New York, six; New Jersey, four; Pennsylvania, eight; Delaware, one; Maryland, six; Virginia, ten; North Carolina, five; South Carolina, five, and Georgia, three.

4. When vacancies happen in the representation from any state the executive authority thereof shall issue writs of election to fill such vacancies.

5. The house of representatives shall choose their speaker and other officers and shall have the sole power of impeachment.

Section III. 1. The senate of the United States shall be composed of two senators from each state, chosen by the legislature thereof, for six years, and each senator shall have one vote.

2. Immediately after they shall be assembled in consequence of the first election they shall be divided, as equally as may be, into three classes. The seats of the senators of the first class shall be vacated at the expiration of the second year; of the second class, at the expiration of the fourth year, and of the third class at the expiration of the sixth year, so that one-third may be chosen every second year, and if vacancies happen by resignation or otherwise, during the recess of the legislature of any state, the executive thereof may make temporary appointments until the next meeting of the legislature, which shall then fill such vacancies.

3. No person shall be a senator who shall not have attained the age of 30 years and been nine years a citizen of the United States, and who shall not, when elected, be an inhabitant of that state for which he shall be chosen.

4. The vice-president of the United States shall be president of the senate, but shall have no vote unless they be equally divided.

5. The senate shall choose their other officers and also a president pro tempore in the absence of the vice-president or when he shall exercise the office of president of the United States.

6. The senate shall have the sole power to try all impeachments. When sitting for that purpose they shall be on oath or affirmation. When the president of the United States is tried the chief

justice shall preside, and no person shall be convicted without the concurrence of two-thirds of the members present.

7. Judgment, in cases of impeachment, shall not extend further than to removal from office and disqualification to hold and enjoy any office of honor, trust or profit under the United States, but the party convicted shall, nevertheless, be liable and subject to indictment, trial, judgment and punishment according to law.

Section IV. 1. The times, places and manner of holding elections for senators and representatives shall be prescribed in each state by the legislature thereof, but the congress may at any time, by law, make or alter such regulations, except as to the places of choosing senators.

2. The congress shall assemble at least once in every year, and such meeting shall be on the first Monday in December, unless they shall, by law, appoint a different day.

Section V. 1. Each house shall be the judge of the elections, returns and qualifications of its own members, and a majority of each shall constitute a quorum to do business, but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent members, in such manner and under such penalties as each house may provide.

2. Each house may determine the rules of its proceedings, punish its members for disorderly behavior, and, with the concurrence of two-thirds, expel a member.

3. Each house shall keep a journal of its proceedings, and from time to time publish the same, excepting such parts as may, in their judgment, require secrecy; and the yeas and nays of the members of either house, on any question, shall, at the desire of one-fifth of those present, be entered on the journal.

4. Neither house, during the session of congress, shall without the consent of the other, adjourn for more than three days, nor to any other place than that in which the two houses shall be sitting.

Section VI. 1. The senators and representatives shall receive a compensation for their services, to be ascertained by law, and paid out of the treasury of the United States. They shall, in all cases, except treason, felony and breach of the peace, be privileged from arrest during their attendance at the session of their respective houses and in going to or returning from the same, and for any speech or debate in either house they shall not be questioned in any other place.

2. No senator or representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States which shall have been created, or the emoluments whereof shall have been increased, during such time, and no person holding any office under the United States shall be a member of either house during his continuance in office.

Section VII. 1. All bills for raising a revenue shall originate in the house of representatives, but the senate may propose or concur with amendments, as on other bills.

2. Every bill which shall have passed the house of representatives and the senate shall, before it becomes a law, be presented to the president of the United States: if he approve, he shall sign it, but if not, he shall return it, with his objections, to that house in which it shall have originated, who shall enter the objections at large on their journal and proceed to reconsider it. If, after such reconsideration, two-thirds of that house shall agree to pass the bill, it shall be sent, together with the objections, to the other house, by which it shall likewise be reconsidered, and if approved by two-thirds of that house it shall become a law. But in all cases the votes of both houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the journal of each house respectively. If any bill shall not be returned by the president within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law, in like manner as if he had

signed it, unless the congress, by their adjournment, prevent its return, in which case it shall not be a law.

3. Every order, resolution or vote to which the concurrence of the senate and house of representatives may be necessary (except on a question of adjournment) shall be presented to the president of the United States, and before the same shall take effect shall be approved by him, or, being disapproved by him shall be repassed by two-thirds of the senate and house of representatives, according to the rules and limitations prescribed in case of a bill.

Section VIII. The congress shall have power—

1. To lay and collect taxes, duties, imposts and excises, to pay the debts and provide for the common defense and general welfare of the United States, but all duties, imposts and excises shall be uniform throughout the United States.

2. To borrow money on the credit of the United States.

3. To regulate commerce with foreign nations and among the several states and with the Indian tribes.

4. To establish a uniform rule of naturalization and uniform laws on the subject of bankruptcies throughout the United States.

5. To coin money, regulate the value thereof and of foreign coin, and fix the standard of weights and measures.

6. To provide for the punishment of counterfeiting the securities and current coin of the United States.

7. To establish postoffices and postroads.

8. To promote the progress of science and useful arts by securing, for limited times, to authors and inventors, the exclusive right to their respective writings and discoveries.

9. To constitute tribunals inferior to the Supreme court. To define and punish piracies and felonies committed on the high seas and offenses against the law of nations.

10. To declare war, grant letters of marque and reprisal and make rules concerning captures on land and water.

11. To raise and support armies, but no appropriation of money to that use shall be for a longer term than two years.

12. To provide and maintain a navy.

13. To make rules for the government and regulation of the land and naval forces.

14. To provide for calling forth the militia to execute the laws of the union, suppress insurrections and repel invasions.

15. To provide for organizing, arming and disciplining the militia and for governing such part of them as may be employed in the service of the United States, reserving to the states respectively the appointment of the officers and the authority of training the militia according to the discipline prescribed by congress.

16. To exercise exclusive legislation in all cases whatsoever over such district (not exceeding ten miles square) as may, by cession of particular states and the acceptance of congress, become the seat of government of the United States, and to exercise like authority over all places purchased, by the consent of the legislature of the state in which the same shall be, for the erection of forts, magazines, arsenals, dockyards and all other needful buildings; and.

17. To make all laws which shall be necessary and proper for carrying into execution the foregoing powers and all other powers vested by this constitution in the government of the United States or in any department or officer thereof.

Section IX. 1. The migration or importation of such persons as any of the states now existing shall think proper to admit shall not be prohibited by the congress prior to the year one thousand eight hundred and eight, but a tax or duty may be imposed on such importation, not exceeding \$10 for each person.

2. The privilege of the writ of habeas corpus shall not be suspended, unless when, in cases of rebellion or invasion, the public safety may require it.

3. No bill of attainder or ex post facto law shall be passed.

4. No capitation or other direct tax shall be laid, unless in proportion to the census or enumeration hereinbefore directed to be taken.

5. No tax or duty shall be laid on articles exported from any state. No preference shall be given, by any regulation of commerce or revenue, to the ports of one state over those of another; nor shall vessels bound to or from one state be obliged to enter, clear or pay duties in another.

6. No money shall be drawn from the treasury but in consequence of appropriations made by law, and a regular statement and account of receipts and expenditures of all public money shall be published from time to time.

7. No title of nobility shall be granted by the United States, and no person holding any office of profit or trust under them shall, without the consent of congress, accept of any present, emolument, office or title of any kind whatever, from any king, prince or foreign state.

Section X. 1. No state shall enter into any treaty, alliance or confederation; grant letters of marque and reprisal; coin money; emit bills of credit; make anything but gold and silver coin a tender in payment of debts; pass any bill of attainder, ex post facto law, or law impairing the obligation of contracts, or grant any title of nobility.

2. No state shall, without the consent of the congress, lay any imposts or duties on imports or exports except what may be absolutely necessary for executing its inspection laws, and the net produce of all duties and imposts laid by any state on imports or exports shall be for the use of the treasury of the United States, and all such laws shall be subject to the revision and control of the congress. No state shall, without the consent of congress, lay any duty of tonnage, keep troops or ships of war in time of peace, enter into any agreement or compact with another state or with a foreign power or engage in war, unless actually invaded or in such imminent danger as will not admit of delay.

ARTICLE II.

Section I. 1. The executive power shall be vested in a president of the United States of America. He shall hold his office during the term of four years, and together with the vice-president, chosen for the same term, be elected as follows:

2. Each state shall appoint, in such manner as the legislature thereof may direct, a number of electors, equal to the whole number of senators and representatives to which the state may be entitled in the congress, but no senator or representative or person holding an office of trust or profit under the United States shall be appointed an elector.

3. The electors shall meet in their respective states and vote by ballot for two persons, of whom one at least shall not be an inhabitant of the same state with themselves. And they shall make a list of all the persons voted for and of the number of votes for each, which list they shall sign and certify and transmit sealed to the seat of government of the United States, directed to the president of the senate. The president of the senate shall, in the presence of the senate and house of representatives, open all the certificates and the votes shall then be counted. The person having the greatest number of votes shall be the president. If such number be a majority of the whole number of electors appointed, and if there be more than one who have such majority and have an equal number of votes, then the house of representatives shall immediately choose, by ballot, one of them for president; and if no person have a majority, then from the five highest on the list the said house shall, in like manner, choose the president. But in choosing the president the votes shall be taken by states, the representation from each state having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the states, and a majority of all the states shall be necessary to a choice. In every case after the choice of the president the person having the greatest number of votes of the electors shall be the vice-president. But if there should remain two or more who have equal votes the senate shall choose from them, by

ballot, the vice-president. [The foregoing provisions were changed by the 12th amendment.]

4. The congress may determine the time of choosing the electors and the day on which they shall give their votes, which day shall be the same throughout the United States.

5. No person except a natural-born citizen or a citizen of the United States at the time of the adoption of this constitution shall be eligible to the office of president; neither shall any person be eligible to that office who shall not have attained to the age of 35 years and been fourteen years a resident within the United States.

6. In case of the removal of the president from office or of his death, resignation or inability to discharge the powers and duties of the said office, the same shall devolve on the vice-president; and the congress may, by law, provide for the case of removal, death, resignation or inability both of the president and vice-president, declaring what officer shall then act as president, and such officer shall act accordingly, until the disability be removed or a president shall be elected.

7. The president shall, at stated times, receive for his services a compensation, which shall neither be increased nor diminished during the period for which he shall have been elected, and he shall not receive within that period any other emolument from the United States or any of them.

8. Before he enters on the execution of his office he shall take the following oath or affirmation:

I do solemnly swear (or affirm) that I will faithfully execute the office of president of the United States, and will, to the best of my ability, preserve, protect and defend the constitution of the United States.

Section II. 1. The president shall be commander in chief of the army and navy of the United States and of the militia of the several states when called into the actual service of the United States. He may require the opinion, in writing, of the principal officer in each of the executive departments upon any subject relating to the duties of their respective offices, and he shall have the power to grant reprieves and pardons for offenses against the United States except in cases of impeachment.

2. He shall have power, by and with the advice and consent of the senate, to make treaties, provided two-thirds of the senators present concur, and he shall nominate, and, by and with the advice and consent of the senate, shall appoint ambassadors, other public ministers and consuls, judges of the Supreme court and all other officers of the United States whose appointments are not herein otherwise provided for and which shall be established by law. But the congress may, by law, vest the appointment of such inferior officers as they shall think proper in the president alone, in the courts of law or in the heads of departments.

3. The president shall have power to fill up all vacancies that may happen during the recess of the senate by granting commissions, which shall expire at the end of their next session.

Section III. He shall, from time to time, give to the congress information of the state of the union and recommend to their consideration such measures as he shall judge necessary and expedient. He may, on extraordinary occasions, convene both houses or either of them, and in case of disagreement between them, with respect to the time of adjournment, he may adjourn them to such time as he shall think proper. He shall receive ambassadors and other public ministers. He shall take care that the laws be faithfully executed, and shall commission all officers of the United States.

Section IV. The president, vice-president and all civil officers of the United States shall be removed from office on impeachment for and conviction of treason, bribery or other high crimes and misdemeanors.

ARTICLE III.

Section I. The judicial power of the United States shall be vested in one Supreme court and in such inferior courts as the congress may, from time to time, ordain and establish. The judges,

both of the Supreme and inferior courts, shall hold their offices during good behavior, and shall, at stated times, receive for their services a compensation, which shall not be diminished during their continuance in office.

Section II. 1. The judicial power shall extend to all cases, in law and equity, arising under this constitution, the laws of the United States and treaties made or which shall be made, under their authority; to all cases affecting ambassadors, other public ministers and consuls; to all cases of admiralty and maritime jurisdiction; to controversies to which the United States shall be a party; to controversies between two or more states; between a state and citizens of another state; between citizens of different states; between citizens of the same state, claiming lands under grants of different states, and between a state or the citizens thereof and foreign states, citizens or subjects.

2. In all cases affecting ambassadors, other public ministers and consuls and those in which a state shall be a party the Supreme court shall have original jurisdiction. In all the other cases before mentioned the Supreme court shall have appellate jurisdiction, both as to law and fact, with such exceptions and under such regulations as the congress shall make.

3. The trial of all crimes, except in cases of impeachment, shall be by jury, and such trials shall be held in the state where the said crimes shall have been committed, but when not committed within any state the trial shall be at such place or places as the congress may by law have directed.

Section III. 1. Treason against the United States shall consist only in levying war against them, or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act or on confession in open court.

2. The congress shall have power to declare the punishment of treason, but no attainder of treason shall work corruption of blood or forfeiture except during the life of the person attainted.

ARTICLE IV.

Section I. Full faith and credit shall be given in each state to the public acts, records and judicial proceedings of every other state. And the congress may, by general laws, prescribe the manner in which such acts, records and proceedings shall be proved and the effect thereof.

Section II. 1. The citizens of each state shall be entitled to all privileges and immunities of citizens in the several states.

2. A person charged in any state with treason, felony or other crime, who shall flee from justice and be found in another state, shall, on demand of the executive authority of the state from which he fled, be delivered up, to be removed to the state having jurisdiction of the crime.

3. No person held to service or labor in one state under the laws thereof, escaping into another, shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due.

Section III. 1. New states may be admitted by the congress of this union, but no new state shall be formed or erected within the jurisdiction of any other state, nor any state be formed by the junction of two or more states or parts of states, without the consent of the legislatures of the states concerned as well as of the congress.

2. The congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States, and nothing in this constitution shall be so construed as to prejudice any claims of the United States or of any particular state.

Section IV. The United States shall guarantee to every state in this union a republican form of government, and shall protect each of them against invasion, and on application of the legislature or of the executive (when the legislature cannot be convened) against domestic violence.

ARTICLE V.

The congress, whenever two-thirds of both houses shall deem it necessary, shall propose amendments to this constitution, or, on the application of the legislatures of two-thirds of the several states, shall call a convention for proposing amendments, which, in either case, shall be valid to all intents and purposes as part of this constitution, when ratified by the legislatures of three-fourths of the several states or by conventions in three-fourths thereof, as the one or the other mode of ratification may be proposed by the congress; provided, that no amendment which may be made prior to the year one thousand eight hundred and eight shall in any manner affect the first and fourth clauses in the ninth section of the first article, and that no state, without its consent, shall be deprived of its equal suffrage in the senate.

ARTICLE VI.

Section I. 1. All debts contracted and engagements entered into before the adoption of this constitution shall be as valid against the United States under this constitution as under the confederation.

2. This constitution and the laws of the United States which shall be made in pursuance thereof, and all treaties made or which shall be made under authority of the United States, shall be the supreme law of the land, and the judges in every state shall be bound thereby, anything in the constitution or laws of any state to the contrary notwithstanding.

3. The senators and representatives before mentioned and the members of the several state legislatures and all executive and judicial officers, both of the United States and of the several states, shall be bound, by oath or affirmation, to support this constitution, but no religious test shall ever be required as a qualification to any office or public trust under the United States.

ARTICLE VII.

The ratification of the conventions of nine states shall be sufficient for the establishment of this constitution between the states so ratifying the same.

Done in convention, by the unanimous consent of the states present, the seventeenth day of September, in the year of our Lord one thousand seven hundred and eighty-seven, and of the independence of the United States of America the twelfth.

AMENDMENTS TO THE CONSTITUTION.

Proposed by congress and ratified by the legislatures of the several states, pursuant to article V. of the original constitution—For the first twelve, 1. stat. at large, 21. Thirteenth proposed, 13 Id., 567; proclaimed, Id., 774. Fourteenth proposed, 14 Id., 358; proclaimed, 15 Id., 706, 708. Fifteenth proposed, 15 Id., 346.

I. Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof, or abridging the freedom of speech or of the press, or the right of the people peaceably to assemble and to petition the government for a redress of grievances.

II. A well-regulated militia being necessary to the security of a free state, the right of the people to keep and bear arms shall not be infringed.

III. No soldier shall, in time of peace, be quartered in any house without the consent of the owner; nor in wartime but in a manner to be prescribed by law.

IV. The right of the people to be secure in their persons, houses, papers and effects against unreasonable searches and seizures shall not be violated, and no warrants shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched and the persons or things to be seized.

V. No person shall be held to answer for a capital or otherwise infamous crime unless on a presentment or indictment of a grand jury except in cases arising in the land or naval forces or in the militia, when in actual service, in time of war or public danger; nor shall any person be subject for the same offense to be twice put in jeopardy

of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty or property without due process of law; nor shall private property be taken for public use without just compensation.

VI. In all criminal prosecutions the accused shall enjoy the right to a speedy and public trial by an impartial jury of the state and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defense.

VII. In suits at common law, where the value in controversy shall exceed \$20, the right of trial by jury shall be preserved, and no fact tried by a jury shall be otherwise re-examined in any court of the United States than according to the rules of the common law.

VIII. Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

IX. The enumeration in the constitution of certain rights shall not be construed to deny or disparage others retained by the people.

X. The powers not delegated to the United States by the constitution nor prohibited by it to the states are preserved to the states respectively or to the people.

XI. The judicial power of the United States shall not be construed to extend to any suit in law or equity commenced or prosecuted against one of the United States by citizens of another state or by citizens or subjects of any foreign state.

XII. Section 1. The electors shall meet in their respective states and vote by ballot for president and vice-president, one of whom at least shall not be an inhabitant of the same state with themselves; they shall name in their ballots the person voted for as president, and in distinct ballots the person voted for as vice-president, and they shall make distinct lists of all persons voted for as president and of all persons voted for as vice-president, and of the number of votes for each, which list they shall sign and certify and transmit sealed to the seat of the government of the United States, directed to the president of the senate; the president of the senate shall, in the presence of the senate and house of representatives, open all the certificates and the votes shall then be counted; the person having the greatest number of votes for president shall be the president, if such number be a majority of the whole number of electors appointed, and if no person have such majority, then from the persons having the highest numbers, not exceeding three, on the list of those voted for as president, the house of representatives shall choose immediately, by ballot, for president. But in choosing the president the votes shall be taken by states, the representation from each state having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the states, and a majority of all the states shall be necessary to a choice. And if the house of representatives shall not choose a president whenever the right of choice shall devolve upon them before the fourth day of March next following, then the vice-president shall act as president, as in the case of the death or other constitutional disability of the president.

Section 2. The person having the greatest number of votes as vice-president shall be the vice-president, if such number be a majority of the whole number of electors appointed, and if no person have a majority, then from the two highest numbers on the list the senate shall choose a vice-president. A quorum for the purpose shall consist of two-thirds of the whole number of senators and a majority of the whole number shall be necessary to a choice.

Section 3. But no person constitutionally ineligible to the office of president shall be eligible to that of vice-president of the United States.

XIII. Section 1. Neither slavery nor involuntary servitude, except as a punishment for crime,

whereof the party shali have been duly convicted, shall exist within the United States or any place subject to their jurisdiction.

Section 2. Congress shall have the power to enforce this article by appropriate legislation.

XIV. Section 1. All persons born or naturalized in the United States and subject to the jurisdiction thereof are citizens of the United States and of the state wherein they reside. No state shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States, nor shall any state deprive any person of life, liberty or property without due process of law, nor deny to any person within its jurisdiction the equal protection of the laws.

Section 2. Representatives shall be apportioned among the several states according to their respective numbers, counting the whole number of persons in each state, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for president and vice-president of the United States, representatives in congress, the executive and judicial officers of a state or the members of the legislature thereof is denied to any of the male inhabitants of such state, being 21 years of age and citizens of the United States, or in any way abridged, except for participation in rebellion or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens 21 years of age in such state.

Section 3. No person shall be a senator or

representative in congress or elector of president and vice-president, or hold any office, civil or military, under the United States, or under any state, who, having previously taken the oath as a member of congress or as an officer of the United States, or as a member of any state legislature, or as an executive or judicial officer of any state, to support the constitution of the United States, shall have engaged in insurrection or rebellion against the same or given aid or comfort to the enemies thereof. But congress may, by a vote of two-thirds of each house, remove such disability.

Section 4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection or rebellion, shall not be questioned. But neither the United States nor any state shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States or any claim for the loss or emancipation of any slave, but all such debts, obligations and claims shall be held illegal and void.

Section 5. The congress shall have the power to enforce by appropriate legislation the provisions of this article.

XV. Section 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or any state on account of race, color or previous condition of servitude.

Section 2. The congress shall have power to enforce this article by appropriate legislation.

CITIZENSHIP IN THE UNITED STATES.

All persons born or naturalized in the United States and subject to the jurisdiction thereof are citizens of the United States and of the state wherein they reside. (Fourteenth amendment to the constitution.)

All persons born in the United States and not subject to any foreign power, excluding Indians not taxed, are declared to be citizens of the United States. (Sec. 1992, U. S. Revised Statutes.)

All children heretofore born or hereafter born out of the limits and jurisdiction of the United States, whose fathers were or may be at the time of their birth, citizens thereof, are declared to be citizens of the United States; but the rights of citizenship shall not descend to children whose fathers never resided in the United States. (Sec. 1993, U. S. Revised Statutes.)

Any woman who is now or may hereafter be married to a citizen of the United States and who might herself be lawfully naturalized shall be deemed a citizen. (Sec. 1995, U. S. Revised Statutes.)

Children born in the United States of alien parents are citizens of the United States.

When any alien who has formally declared his intention of becoming a citizen of the United

States dies before he is actually naturalized the widow and children of such alien are citizens. Children of Chinese parents who are themselves aliens and incapable of becoming naturalized are citizens of the United States. Children born in the United States of persons engaged in the diplomatic service of foreign governments are not citizens of the United States. Children born of alien parents on a vessel of a foreign country while within the waters of the United States are not citizens of the United States, but of the country to which the vessel belongs. Children born of alien parents in the United States have the right to make an election of nationality when they reach their majority. Minors and children are citizens within the meaning of the term as used in the constitution. Deserters from the military or naval service of the United States are liable to loss of citizenship. Any alien being a free white person, an alien of African nativity or of African descent may become an American citizen by complying with the naturalization laws. "Hereafter no state court or court of the United States shall admit Chinese to citizenship; and all laws in conflict with this act are repealed." (Sec. 14, act of May 6, 1882.)

The courts have held that neither Chinese, Japanese, Hawaiians, Burmese nor Indians can be naturalized.

The naturalization laws apply to women as well as men. An alien woman who marries a citizen, native or naturalized, becomes a naturalized citizen of the United States.

Aliens may become citizens of the United States by treaties with foreign powers, by conquest or by special acts of congress.

In an act approved March 2, 1907, it is provided that any American citizen shall have expatriated himself when he has been naturalized in any foreign state in conformity with its laws, or when he has taken an oath of allegiance to any foreign state.

When any naturalized citizen shall have resided for two years in the foreign state from which he came, or five years in any other foreign state, it shall be presumed that he has ceased to be an American citizen, and the place of his general abode shall be deemed his place of residence during said years; provided, however, that such presumption may be overcome on the presentation of satisfactory evidence to a diplomatic or consular officer of the United States, under such rules and regulations as the department of state may prescribe; and, provided also, that no American citizen shall be allowed to expatriate himself when this country is at war.

Any American woman who marries a foreigner shall take the nationality of her husband. At the termination of the marital relation she may resume her American citizenship, if abroad, by registering as an American citizen within one year with a consul of the United States, or by returning to reside in the United States, or, if residing in the United States at the termination of the marital relation, by continuing to reside therein.

Any foreign woman who acquires American citizenship by marriage to an American citizen shall be assumed to retain the same after the termination of the marital relation if she continue to reside in the United States, unless she makes formal renunciation thereof before a court having jurisdiction to naturalize aliens, or, if she resides abroad, she may retain her citizenship by registering as such before a United States consul within one year after the termination of such marital relation.

A child born without the United States, of alien parents, shall be deemed a citizen of the United States by virtue of the naturalization of or resumption of American citizenship of the parent; provided that such naturalization or resumption takes place during the minority of such child; and, provided further, that the citizenship of such minor child shall begin at the time such minor child begins to reside permanently in the United States.

All children born outside the limits of the United States, who are citizens thereof in accordance with the provisions of section 1993 of the Revised Statutes of the United States (see above), and who continue to reside outside of the United States, shall, in order to receive the protection of the government, be required, upon reaching the age of 18 years, to record at an American consulate their intention to become residents and remain citizens of the United States and shall further be required to take the oath of allegiance to the United States upon attaining their majority.

NATURALIZATION LAWS.

Approved June 29, 1906.

Exclusive jurisdiction to naturalize aliens resident in their districts is conferred upon the United States Circuit and District courts and all courts of record having a seal, a clerk and jurisdiction in actions in law or equity or both in which the amount in controversy is unlimited.

An alien may be admitted to citizenship in the following manner and not otherwise:

1. He shall declare on oath before the clerk of the proper court at least two years before his admission, and after he has reached the age of 18 years, that it is bona fide his intention to become a citizen of the United States and to renounce allegiance to any foreign state or sovereignty.

Such declaration shall set forth the same facts as are registered at the time of his arrival.

2. Not less than two years nor more than seven after he has made such declaration he shall file a petition, signed by himself and verified, in which he shall state his name, place of residence, occupation, date and place of birth, place from which he emigrated, name of the vessel on which he arrived; the time when and the place and name of the court where he declared his intention of becoming a citizen; if he is married, he shall state the name of his wife, the country of her nativity and her place of residence at the time the petition is filed, and if he has children, the name, date and place of birth and place of residence of each child living. The petition shall also set forth that he is not a disbeliever in or opposed to organized government or a member of any body of persons opposed to organized government, and that he is not a polygamist or a believer in polygamy; that he intends to become a citizen of and to live permanently in the United States, and every other fact material to his naturalization and required to be proved upon the final hearing of his application. The petition shall be verified by the affidavits of at least two credible witnesses who are citizens. At the time of the filing of the petition there shall be also filed a certificate from the department of commerce and labor stating the date, place and manner of his arrival in the United States and the declaration of intention of such petitioner, which certificate and declaration shall be attached to and be a part of his petition.

3. He shall, before he is admitted to citizenship, declare on oath in open court that he will support the constitution of the United States, and that he absolutely renounces all allegiance to any foreign prince, potentate, state, or sovereignty.

4. It shall be made apparent to the satisfaction of the court admitting any alien to citizenship that immediately preceding the date of his application he has resided continuously within the United States five years at least, and within the state or territory where such court sits at the time held one year at least, and that during that time he has behaved as a man of good moral character, attached to the principles of the constitution. In addition to the oath of the applicant, the testimony of at least two witnesses, citizens of the United States, as to the facts of residence, moral character and attachment to the principles of the constitution shall be required.

5. He must renounce any hereditary title or order of nobility which he may possess.

6. When any alien, who has declared his intention, dies before he is actually naturalized the widow and minor children may, by complying with the other provisions of the act, be naturalized without making any declaration of intention.

Immediately after the filing of the petition the clerk of the court shall give notice thereof by posting in a public place the name, nativity and residence of the alien, the date and place of his arrival in the United States and the date for the final hearing of his petition and the names of the witnesses whom the applicant expects to summon in his behalf. Petitions for naturalization may be filed at any time, but final action thereon shall be taken only on stated days and in no case until at least ninety days have elapsed after the filing of the petition. No person shall be naturalized within thirty days preceding a general election within the territorial jurisdiction of the court.

No person who disbelieves in or who is opposed to organized government, or who is a member of or affiliated with any organization entertaining and teaching such disbelief in or opposition to organized government, or who advocates or teaches the duty, necessity or propriety of the unlawful assaulting or killing of any officer or officers of the government of the United States, or of any other organized government, because of his or their official character, or who is a polygamist, shall be naturalized.

No alien shall hereafter be naturalized or admitted as a citizen of the United States who cannot speak the English language. This requirement does not apply to those physically unable to comply with it; or to those making homestead entries upon the public lands of the United States.

CENTER OF POPULATION AND ITS MEDIAN POINT.

The center of population is the center of gravity of the population of the country, each individual being assumed to have the same weight. What is known as the median point is the point of intersection of the line dividing the population equally north and south with the line dividing it equally east and west. The center of population in 1900 was at a point six miles southeast of Columbus, Ind., or north latitude 39 degrees and 9.5 minutes and west longitude 85 degrees 48.9 minutes. The

median point in 1900 was at Spartanburg, Ind., or latitude 40 degrees 4 minutes and 22 seconds and longitude 84 degrees 51 minutes and 29 seconds.

The center of area of the United States, excluding Alaska and Hawaii and other recent accessions, is in northern Kansas, in approximate latitude 39 degrees 55 minutes and approximate longitude 98 degrees 50 minutes. The center of population is therefore about three-fourths of a degree south and more than thirteen degrees east of the center of area.

*State census. †Less than 1 person per square mile. ‡Exclusive of areas in great lakes. These are as follows: Illinois, 1,674 square miles in Lake Michigan; Indiana, 230 in Lake Michigan; Michigan, 16,653 in Lake Superior, 12,922 in Lake Michigan, 9,925 in Lake Huron and 460 in Lakes St. Clair and Erie; Minnesota, 2,514 in Lake Superior; New York, 3,140 in Lakes Ontario and Erie; Ohio, 3,445 in Lake Erie; Pennsylvania, 891 in Lake Erie; Wisconsin, 2,378 in Lake Superior and 7,500 in Lake Michigan. §Does not include the water surface of the oceans nor the Gulf of Mexico lying

within the jurisdiction of the United States. NOTE—The areas of the United States and insular possessions have been computed generally by planimeter measurements from the latest maps. Slight differences in the figures published hitherto by the geological survey, general land office and the bureau of the census, due principally to variations in the maps used, were adjusted at a recent conference of representatives of these bureaus and an agreement was reached in regard to the areas. The figures agreed upon are those given in the foregoing table.

*The figures for the towns in these states and territories are for 1900, no estimates for 1906 have-

ing been made by the census bureau, as none of the places had 8,000 inhabitants in 1900.

THERMOMETERS COMPARED.

There are three kinds of thermometers, with varying scales, in general use throughout the world—the Fahrenheit, Reaumur and Centigrade. The freezing and boiling points on their scales compare as follows:

Thermometer.	Freezing pt.	Boiling pt.
Fahrenheit	32 degrees	212 degrees
Reaumur	zero	80 degrees
Centigrade	zero	100 degrees

The degrees on one scale are reduced to their equivalents on another by these formulas:

Fahrenheit to Reaumur—Subtract 32, multiply by four-ninths.

Fahrenheit to Centigrade—Subtract 32, multiply by five-ninths.

Reaumur to Fahrenheit—Multiply by nine-fourths, add 32.

Reaumur to Centigrade—Multiply by five-fourths.

Centigrade to Fahrenheit—Multiply by nine-fifths, add 32.

Centigrade to Reaumur—Multiply by four-fifths.

NOTE—Owing to imperfect data the above figures are only approximately correct, but being based on the same method of enumeration they are of some

value for comparative purposes. The true annual birth rate for the whole of the United States, as shown by the natural increase of population between 1890 and 1900, is within 2 per cent either way of 35.1 per 1,000 of mean population.

Assuming that the total population of the world is 1,600,000,000 and the average annual death rate 20 per 1,000 of population, the total number of deaths in a year is about 32,000,000. This is at the rate of 87.671 per day, 3.653 per hour, 61 per minute and 1 per second.

As the population of the world increases by about 7,000,000 per year, the total births must be that number in excess of the deaths, or about 39,000,000.

This is at the rate of 106,849 births per day, 4,452 per hour, 74 per minute and 1.2 per second.

Assuming that the population of the United States is 87,000,000 and the death rate 16 per 1,000, the total number of deaths in a year is 1,392,000. This is at the rate of 3.814 per day, 159 per hour and 2.6 per minute. With a birth rate of 34 per 1,000, the total number of births in a year in the United States will approximate 2,958,000, or at the rate of 8.104 per day, 338 per hour and 5.6 per minute.

TRANSCONTINENTAL RAILWAY OF GUATEMALA.

The railroad connecting the Caribbean and Pacific coasts of Guatemala was opened for traffic in January, 1908. The line runs from Puerto Barrios to San Jose and is 270 miles long. This is the third

transcontinental line in the Central American region, the other two being the Panama and Tehuantepec railroads.

*Including improvements. †Included in Erie.

NOTE—The above list, it will be noted, includes a number of canalized rivers, and does not include canals completed since 1906. Among the latter is the Hennepin canal in Illinois, completed in 1907,

104 miles long with feeder, 80 feet wide at surface, 52 feet wide at bottom, 7 feet deep, 33 locks and costing \$7,500,000.

THE HENNEPIN CANAL.

Preliminary surveys begun—1871.

Excavation begun—1892.

Work completed—1907.

Canal formally opened—Oct. 24, 1907.

Length of main channel—75 miles.

Length of feeder—29.3 miles.

Total length—104 miles.

Depth—7 feet.

Width at bottom—52 feet.

Width at water line—80 feet.

Locks on main canal—32.

Locks on feeder—1.

Total cost—\$7,500,000.

The Hennepin, or, more comprehensively, the Illinois and Mississippi canal, extends from the Illinois river near Hennepin to the Mississippi three miles below Rock Island. The navigable feeder extends from Rock river at Sterling and Rock Falls to the main line near Sheffield and is of the same size and just as navigable as the main line. Water is forced into it by a dam a quarter of a mile long at Sterling.

NEW YORK STATE BARGE CANAL.

General outline of New York canal system as planned.

Total length—442 miles.
Width—From 122 to 160 feet.
Depth—From 12 to 20 feet.
Locks—61.
Excavation—175,000,000 cubic yards.
Cost—\$101,000,000.

Work on the New York state barge canal, or system of canals, was begun three years ago and, according to estimates, will be completed in 1916.

The main waterway will follow the line of the present Erie canal in most places from the Hudson river at Watford, Saratoga county, to Tonawanda and Lake Erie; another division will connect the Hudson with Lake Champlain, while a third branch will run from the main canal at Three Rivers Point to Lake Ontario. The waterway will be wide and deep enough to accommodate steam barges with a maximum capacity of 1,800 tons each.

TARIFF BILLS SINCE 1884.

Morrison Bills—First bill presented to 48th congress during Chester A. Arthur's administration; proposed a horizontal reduction of 20 per cent with free iron ore, coal and lumber; defeated in house April 15, 1884, by vote of 159 to 155; house heavily democratic and senate republican. Second bill presented to 49th congress during Grover Cleveland's first administration; similar to first bill, proposing free wool, salt and lumber; defeated in house June 17, 1886, by a vote of 157 to 140; house democratic, senate republican.

Mills Bill—Presented to 50th congress during Cleveland's first administration; provided for free lumber and wool, reduction on pig iron and abolition of specific duties on cotton; passed by house July 21, 1888, by vote of 162 to 149, but failed in senate; house democratic, senate republican.

McKinley Bill—Passed by 51st congress during Benjamin Harrison's administration; became law

Oct. 6, 1890; high protective measure, though remitting duties on sugar and providing for reciprocity treaties; both houses of congress republican.

Wilson Bill—Passed by 53d congress during Cleveland's second administration; became law Aug. 17, 1894, without the president's signature; both houses democratic; measure reduced duties in some cases and made additions to free list, notably wool.

Dingley Bill—Passed by 54th congress during McKinley's administration; approved July 24, 1897; passed by house 205 yeas to 122 nays, 27 members not voting; passed by senate 38 yeas to 28 nays, 23 not voting; house contained 206 republicans and 134 democrats and senate 46 republicans and 34 democrats; measure raised rates to produce more revenue, but was similar in many respects to the McKinley act.

PASSPORTS.

Passports are issued to citizens of the United States upon application to the state department in Washington. The application must be accompanied by an affidavit, attested by a notary public or other officer empowered to administer oaths, stating that the applicant is a citizen and giving the place of birth and age, and it must be accompanied by the certificate of one other citizen to whom he is personally known that the declaration made by the applicant is true. The application must also be accompanied by a description of the person, particularly as to age, height, complexion, forehead, eyes, nose, mouth, chin, hair and face.

Blank forms are furnished by the state department upon application. The fee for each passport is \$1. Citizens traveling abroad may also obtain passports by applying to United States ambassadors and ministers. Where any person has made a declaration of intention to become a citizen of the United States and has resided in the United States for three years a passport valid for six months may be issued to him. This passport is not renewable and does not entitle the holder to the protection of this government in the country of which he was originally a citizen.

CALEB POWERS AND JAMES B. HOWARD PARDONED.

Caleb Powers and James B. Howard, who were convicted of complicity in the assassination of William Goebel, Jan. 30, 1900, were pardoned by Gov. Wilson on Kentucky June 13, 1900. Powers, who was secretary of state of Kentucky at the time of the murder, was tried four times on the charge of complicity in the crime, and was thrice

convicted. Life imprisonment was the sentence at the first and second trials and death was the penalty fixed at the third trial. The fourth trial resulted in a disagreement of the jury. James B. Howard was convicted on his first trial on evidence similar to that against Powers.

EXPLOSION ON THE CRUISER TENNESSEE.

While the armored cruiser Tennessee, flagship of the second division of the Atlantic battle-ship fleet, was engaged in a speed trial off Santa Barbara, Cal., June 5, a boiler tube exploded, instantly kill-

ing four men and wounding ten others. Two of the latter died from their injuries the next day. Rear-Admiral Uriel Sigbee narrowly escaped death. The ship was not seriously damaged.

OKLAHOMA BANK DEPOSITORS' GUARANTY FUND.

Following are the sections of the Oklahoma banking law, passed by the first state legislature, dealing with the matter of guaranteeing deposits in banks:

1. A state banking board is hereby created, to be composed of the governor, the lieutenant-governor, president of the state board of agriculture, state treasurer and the state auditor.

2. Within sixty days after the passage and approval of this act, the state banking board shall levy against the capital stock an assessment of 1 per cent of the bank's daily average deposits, less the deposits of the state funds, properly secured for the preceding year, upon each and every bank organized and existing under the laws of the state for the purpose of creating a depositors' guaranty fund. Said assessment shall be collected upon the call of the state banking board. In one year from the time the first assessment is levied, and annually thereafter, each bank subject to the provisions of this act shall report to the bank commissioner the amount of its average daily deposits for the preceding year, and if said deposits are in excess of the amount upon which the 1 per cent was previously paid, said report shall be accompanied by additional funds to equal 1 per cent of the said daily average excess of deposits, less the deposits of state funds properly secured, and less the deposits of the national government for the year, over the preceding year, and such amount shall be added to the depositors' guaranty fund. If the depositors' guaranty fund is depleted from any cause it shall be the duty of the state banking board, in order to keep said fund to 1 per cent of the total deposits in all of the said banks subject to the provisions of this act, to levy a special assessment to cover such deficiency, which said special assessment shall be levied upon the capital stock of the banks subject to this act, according to the amount of their deposits as reported in the office of the bank commissioner. And said special assessment shall become immediately due and payable.

3. Banks organized subsequent to the enactment of this act shall pay into the depositors' guaranty fund 3 per cent of the amount of their capital stock when they open for business, which amount shall constitute a credit fund, subject to adjustment on the basis of its deposits as provided for in the act herein existing at the end of one year. Provided, however, said 3 per cent. payment shall not be required of new banks formed by the reorganization or consolidation of banks that have previously complied with the terms of this act.

4. Any national bank in this state, approved by the bank commissioner, may voluntarily avail its depositors of the protection of the depositors' guaranty fund by application to the state banking board, in writing, and the said application may be sustained upon terms and conditions in harmony with the purpose of this act, to be agreed upon by the state banking board and the bank commissioner; provided, that in the event national banks

should be required by federal enactment to pay assessments to any depositors' guaranty fund of the federal government, and thereby the deposits in the national banks in the state should be guaranteed by virtue of federal law, the national banks having availed themselves of the benefits of this act may withdraw therefrom and have returned to them 90 per cent of the unused portion of all assessments levied upon and paid by said banks.

5. Whenever any bank organized or existing under the laws of this state shall voluntarily place itself in the hands of the bank commissioner, or whenever any judgment shall be rendered by a court of competent jurisdiction, adjudging and decreeing that such bank is insolvent, or whenever its rights or franchises to conduct a banking business under the laws of this state shall have been adjudged to be forfeited, or whenever the bank commissioner shall become satisfied of the insolvency of any such bank, he may, after due examination of its affairs and possession of said bank and its assets and proceed to wind up its affairs and enforce the personal liability of the stockholders, officers and directors.

6. In the event that the bank commissioner shall take possession of any bank which is subject to the provisions of this act, the depositors of said bank shall be paid in full, and when the cash available, or that can be made immediately available, of said bank is insufficient to discharge its obligations to depositors, the said banking board shall draw from the depositors' guaranty fund and from additional assessments, if required, as provided in section 3, the amount necessary to make up the deficiency, and the state shall have the benefit of the depositors' guaranty fund, a first lien upon the assets of said bank, and all liabilities against the stockholders, officers and directors of said bank and against all other persons, corporations or firms. Such liabilities may be enforced by the state for the benefit of the depositors' guaranty fund.

10. The bank commissioner shall deliver to each bank that has complied with the provisions of this act a certificate stating that said bank has complied with the laws of this state for the protection of bank depositors, and that safety to its depositors is guaranteed by the depositors' guaranty fund of the state of Oklahoma. Said certificate shall be conspicuously displayed in its place of business and said bank may print or may engrave upon its stationery and advertising matter words to the effect that its depositors are protected by the depositors' guaranty fund of the state of Oklahoma. The printing or engraving of a false statement to the fact last before this named is hereby declared to be a felony.

19. The expense of administering the depositors' guaranty fund by the state banking board shall be paid from said fund.

SCHOOL SAVINGS-BANK STATISTICS.

Up to Jan. 1, 1908, the school savings-bank system was in operation in 1,102 schools of 101 cities of twenty-two states of America. The total deposits in these banks since they were started amounted to \$4,419,453.36, of which \$3,659,807.77 had been withdrawn, leaving a balance of \$759,645.59 due 178,817 little depositors.

The school savings-bank system was introduced by J. H. Thiry in the schools of Long Island City (now part of New York), N. Y., March 16, 1885,

and it is largely through his efforts that it has been adopted in so many places in the United States and Canada. The purpose of the system is, of course, to encourage thrift, prudence and business methods among children at an age when their life habits are in process of formation. The following figures are taken from a table of statistics furnished by Mr. Thiry. They include only places in which the number of depositors is 1,000 or more:

BOMB TRAGEDY IN UNION SQUARE, NEW YORK.

While the police were trying to prevent a mass meeting of unemployed in Union square, New York, N. Y., March 28, 1908, an anarchist named Selig Silverstein attempted to throw a bomb at the officers. He held it too long, however, and it exploded before he could hurl it. He himself was terribly mutilated, a bystander was instantly killed, four

policemen were wounded and a score of persons received injuries from the flying fragments. Silverstein was immediately arrested. The meeting was planned by the leaders of the so-called unemployed conference of the socialist party, prominent among them being Robert Hunter and Morris Hillquit. Silverstein died from his injuries April 28.

NOTE—The years for which the revenues and expenditures are given are approximately, but not in all cases, the same as those for the debts.

SURVIVORS OF THE UNION ARMY AND NAVY IN THE CIVIL WAR.

The probable number of survivors of the union army and navy in the war of the rebellion is estimated in a table prepared by Gen. F. O. Ainsworth, chief of the record and pension office, war department, as follows:

1909.....	665,332	1915.....	429,727	1925.....	116,073	1935.....	6,296	1945.....	0

RATES OF POSTAGE AND MONEY ORDERS.

The domestic letter rate is 2 cents an ounce or fraction thereof, and it applies to the island possessions of the United States, Cuba, Canada, United Kingdom, Mexico, Shanghai, the Canal Zone and Republic of Panama. The foreign letter rate is 5 cents an ounce or fraction thereof, and it applies to all other foreign countries than those named in the universal postal union.

DOMESTIC.

FIRST CLASS.—Letters and all written or partly written matter, whether sealed or unsealed, and all other matter sealed or otherwise closed against inspection, 2 cents per ounce or fraction thereof. Postal cards issued by the government sold at 1 cent each; double, or reply cards, 2 cents each. Cards must not be changed or mutilated in any way and no printing or writing other than the address is allowable on the address side. "Private mailing cards" (post cards) require 1 cent postage. These cards must conform in shape and quality and weight of paper used to the cards issued by the government. Each card must be an unfolded piece of cardboard not exceeding 3 9-16 by 5 9-16 inches, not less than 2 15-16 by 4 1/2 inches, and must bear at the top of the address side the words "Post card." Advertisements and illustrations may be printed on either side provided they do not interfere with the distinctness of the address or postmark.

Among the articles requiring first-class postage are blank forms filled out in writing; certificates, checks and receipts filled out in writing; copy (manuscript or typewritten) drawings, maps, proof sheets; plans and unaccompanied containing written words, letters or figures; price lists containing written figures changing individual items; old letters sent singly or in bulk; typewritten matter and manifold copies thereof, and stenographic notes.

SECOND CLASS.—All regular newspapers, magazines and other periodicals issued at stated intervals not less frequently than four times a year, when mailed by publishers or news agents, 1 cent a pound or fraction thereof; when mailed by others, 1 cent for each four ounces or fractional part thereof.

THIRD CLASS.—Books, circulars, pamphlets and other matter wholly in print (not included in second-class matter), 1 cent for each two ounces or fractional part thereof. The following named articles are among those subject to third-class rate of postage: Almanacs, architectural designs, blue prints, bulbs, seeds, roots, scents and paints; calendars, cards, press clippings with name and date of papers stamped or written in, engravings, samples of grain in its natural condition, imitation of hand or type written matter when mailed at post-office window in a minimum number of twenty identical copies separately addressed; insurance applications and other blank forms mainly in print; printed labels, lithographs, maps, music books, photographs, tags, proof sheets, periodicals having the character of books, and publications which depend for their circulation upon offers of premiums.

FOURTH CLASS.—All matter not in the first, second or third class, which is not in its form or nature liable to destroy, deface or otherwise damage the contents of the mailbag or harm the person of any one engaged in the postal service, 1 cent an ounce or fraction thereof. Included in fourth-class mail matter are the following articles: Blank books, blank cards or paper, blotters, playing cards, celluloid, coin, crayon pictures, cut flowers, metal or wood cuts, drawings, dried fruit, dried plants, electrolyte plates, framed engravings, envelopes, geological specimens, letterheads, cloth maps, samples of merchandise, metals, minerals, napkins, oil paintings, paper bags or wrapping paper, photograph albums, printed matter on other material than paper, queen bees properly packed, stationery, tinctures, wall paper and wooden rulers bearing printed advertisements.

UNMAILABLE MATTER.—Includes that which is prohibited by law, regulation or treaty stipulation and that which by reason of illegible or insufficient address cannot be forwarded to destination. Among the articles prohibited are poisons, explosives or

inflammable articles, articles exhalting bad odors, vinous, spirituous and malt liquors, specimens of disease germs, lottery letters and circulars, indecent and scurrilous matter.

SPECIAL DELIVERY.—Any article of mailable matter bearing a 10-cent special delivery stamp in addition to the regular postage is entitled to immediate delivery on its arrival at the office of address between the hours of 7 a. m. and 11 p. m., if the office be of the free-delivery class, and between the hours of 7 a. m. and 7 p. m., if the office be other than a free-delivery office.

REGISTRATION.—All mailable matter may be registered at the rate of 8 cents for each package in addition to the regular postage, which must be prepaid. An indemnity not to exceed \$10 for any one piece, or the actual value if less than \$10, will be paid for the loss of first-class registered matter.

LIMITS OF WEIGHT.—No package of third or fourth class matter weighing more than four pounds, except single books, will be received for conveyance by mail. The limit of weight does not apply to second-class matter mailed at the second-class rate of postage, or at the rate of 1 cent for each four ounces, nor is it enforced against matter fully prepaid with postage stamps affixed at the first-class or letter rate of postage.

POST CARDS.—A post card must be an unfolded piece of cardboard not exceeding 3 9-16 by 5 9-16 inches, nor less than 2 1/2 by 4 inches in size; it must be in form and quality and weight of paper substantially like the government postal cards; it may be of any color not interfering with the legibility of the address; the face of the card may be divided by a vertical line, the right half to be used for the address only and the left for the message, etc.; very thin sheets of paper may be attached to the card, and such sheets may bear both writing and printing; advertisements may appear on the back of the card and on the left half of the face. Cards bearing particles of glass, metal, mica, sand, tinsel or similar substances are unmailable except in envelopes.

MONEY-ORDER FEES.—For domestic money orders in denominations of \$100 or less the following fees are charged:

For orders for sums not exceeding \$2.50.....	3c
For over \$2.50 and not exceeding \$5.....	5c
For over \$5 and not exceeding \$10.....	8c
For over \$10 and not exceeding \$20.....	10c
For over \$20 and not exceeding \$30.....	12c
For over \$30 and not exceeding \$40.....	15c
For over \$40 and not exceeding \$50.....	18c
For over \$50 and not exceeding \$60.....	20c
For over \$60 and not exceeding \$75.....	25c
For over \$75 and not exceeding \$100.....	30c

SUGGESTIONS.—Direct your mail matter to a post-office, writing the name of the state plainly, and if to a city, add the street and number or postoffice box of the person addressed. Write or print your name and address, and the contents, if a package, upon the upper left-hand corner of all mail matter. This will insure the immediate return of all first-class matter to you for correction, if improperly addressed or insufficiently paid; and if it is not called for at destination it can be returned to you without going to the dead-letter office. If a letter, it will be returned free. Undelivered second, third and fourth class matter will not be forwarded or returned without a new prepayment of postage. When a return card appears on this matter either the sender or addressee is requested to send the postage. Register all valuable letters and packages.

FOREIGN.

Mail matter may be sent to any foreign country subject to the following rates and conditions:

REGISTRATION.—Eight cents additional to ordinary postage on all articles to foreign countries.

ON LETTERS.—Five cents for each ounce or fraction thereof and 3 cents for each additional ounce. Double rates are collected on delivery of unpaid or short-paid letters.

POST CARDS.—Single, 2 cents each; with paid reply, 4 cents each.

"PRIVATE MAILING CARDS" (Post Cards).—Two cents each, subject to conditions governing domestic post cards.

On newspapers, books, pamphlets, photographs, sheet music, maps, engravings and similar printed matter, 1 cent for each two ounces or fraction thereof. Prepayment required at least in part.

To CANADA (including Nova Scotia, New Brunswick, Manitoba and Prince Edward Island).—Letters, 2 cents for each ounce or fraction thereof; postal cards, 1 cent each; books, circulars and similar printed matter, 1 cent for each two ounces or fraction thereof; second-class matter, same as in the United States; samples of merchandise, 1 cent for each two ounces. Minimum postage, 2 cents. Merchandise, 1 cent for each ounce or fraction. Packages must not exceed four pounds in weight—prepayment compulsory.

CUBA.—Rates of postage same as to the United States.

To GREAT BRITAIN.—Letter postage same as in United States.

To MEXICO.—Letters, postal cards and printed matter, same rates as in the United States; samples, 1 cent for each two ounces; 2 cents the least postage on a single package; merchandise other than samples can be sent only by parcels post.

To SHANGHAI, CHINA.—Letters, 2 cents an ounce or fraction thereof.

LIMITS OF SIZE AND WEIGHT.—Packages of samples of merchandise to foreign countries must not exceed twelve ounces, nor measure more than twelve inches in length, eight in breadth and four in depth; and packages of printed matter must not exceed four pounds six ounces.

WHAT TRAVELERS MAY TAKE TO AMERICA.

[From United States treasury department circular of July 31, 1907.]

The customs laws and the regulations made in pursuance thereof require the examination of the baggage and effects of passengers upon arrival in the United States from foreign countries.

Entries prepared and signed by passengers are required. The forms provided for that purpose entitled "Baggage declaration and entry" for residents and nonresidents, will be distributed to passengers during the early part of the voyage by an officer of the ship designated for that purpose. When a passenger has prepared and signed his declaration and entry, he should detach and retain the coupon at the bottom of the form and return the latter to the officer of the ship. After the ship has docked and the baggage and effects of the passenger are landed, he should present the coupon which he has retained to the chief customs officer on the dock, who will detail an inspector to make the examination.

For the purposes of customs administration, passengers are divided into two classes, viz.:

1. Nonresidents of the United States.
2. Residents of the United States.

The division of the passengers into nonresidents and residents in nowise affects citizenship.

Nonresidents are:

- (a) Actual residents of other countries.
- (b) Persons who have been abroad with a fixed foreign abode for one year or more, who elect to declare as nonresidents.
- (c) Persons who have been abroad for two years with or without a fixed place of foreign abode, who elect to declare as nonresidents.

Persons of class (c) may erase the second and third lines within the brackets on the "Baggage declaration and entry" for nonresidents.

Residents are such persons as are not included in the definition of nonresidents.

There is no limitation as to the value of articles free of duty brought in by persons declaring as nonresidents, provided such articles are in the nature of wearing apparel, articles of personal adornment, toilet articles and similar personal effects actually accompanying the passenger and necessary and appropriate for his or her wear and use for the purpose of the journey and present comfort and convenience, and are not intended for other persons nor for sale.

Persons declaring as residents are entitled to bring with them free of duty all wearing apparel and other personal effects taken by them out of the United States which have not been remodeled or improved abroad so as to increase their value, and articles obtained abroad by purchase or otherwise of a value not exceeding \$100, provided they are not for sale; but in the case of a minor, the exemption of \$100 worth of articles obtained abroad is restricted to such articles as are intended for the bona fide personal use of such minor.

Each passenger is entitled to bring in free of duty and internal-revenue tax fifty cigars or 300 cigarettes for his or her bona fide personal consumption. Cigars and cigarettes in excess of these

quantities are chargeable with internal-revenue tax and duties or fines, as the case may be.

Persons declaring as residents should use the form of baggage declaration and entry for residents of the United States. Nonresidents should use the form of baggage declaration and entry for nonresidents of the United States.

Residents should carefully state in their entries under the captions "Description of articles" and "Foreign cost or value" the articles obtained abroad, with the cost price of each article if purchased, or the foreign market value of each article if obtained otherwise than by purchase.

Nonresidents should carefully state in their entries under the captions "Description of articles" and "Foreign cost or value" articles not necessary and appropriate for the wear and use of such nonresidents for the purpose of the journey and their present comfort and convenience, and articles intended for sale or for the use of any other person or persons, with the cost price of each article if purchased, or the foreign market value of each article if obtained otherwise than by purchase.

The senior member of a family, if a passenger, may make entry for the entire family.

Ladies traveling alone should state the fact in their declarations and entries.

The exact number of pieces of baggage accompanying the passenger should be stated in the entry.

Whenever practicable passengers should present the original receipted bills of foreign purchases.

Passengers dissatisfied with values placed upon dutiable articles by the customs officers on the docks may demand a re-examination, but application therefor should be immediately made to the officers there in charge. If for any reason this course is impracticable, the packages containing the articles should be left in customs custody and application for reappraisement made to the collector of customs, in writing, within two days after the original appraisement. No request for reappraisement can be entertained after the articles have been removed from customs duty.

Duties will be assessed on used articles of foreign origin at the foreign market values on the date of the owner's departure for the United States, with due allowance for wear or depreciation.

The law expressly forbids the importation into the United States of garments made in whole or in part of the skins of prohibited for seals, and unless the owner is able to establish by competent evidence, and to the satisfaction of the collector, either that the garments were purchased prior to Dec. 29, 1897, or that the animal from which the skin was taken was captured elsewhere than in prohibited waters, entry will not be allowed.

Residents who desire to take sealskin garments abroad may have the same registered with the collector.

THE CAPITOL IN WASHINGTON.

The corner stone of the original capitol building was laid by President Washington Sept. 18, 1793. The north wing was finished in 1810 and the south wing in 1811, a wooden passageway connecting them. The original designs of the structure were made by Dr. William Thornton. The two wings were burned by the British in 1814, but were immediately restored. In 1827 the original building

was completed at a cost of \$2,433,844.13. Extensions of the wings were begun in 1851 and completed in 1859. The dome, which is 287 feet 5 inches in height, was completed in 1855. The capitol stands in latitude 38 degrees 53 minutes 20.4 seconds north and longitude 77 degrees 00 minutes 35.7 seconds west from Greenwich.

ASSASSINATION OF KING CARLOS I. OF PORTUGAL.

King Carlos I. and Crown Prince Luiz Philippe of Portugal were assassinated Saturday evening, Feb. 1, 1908, in Lisbon, while driving from the Barreiro railroad station to the palace after a visit to the royal estate at Villa Cosa. With them in the carriage, which was an open one, were Queen Amelie and Prince Manuel. Many persons had gathered along the route they were expected to take and there was apparently no thought of danger, as only the usual guard was on hand despite the fact that the city had for several weeks been the scene of revolutionary disorders. As the carriage turned into the Praco do Commercio from the Rua do Arsenal about 5:30 o'clock six men drew carbines from under their cloaks and began firing upon the royal party. King Carlos was killed almost instantly, having been struck by three bullets fired at close range. The crown prince drew a revolver and was defending himself when he, too, was shot down and mortally wounded, though the queen attempted to shield him with her body. Manuel, the second son, was shot in the face and right arm, but his wounds were not dangerous. Queen Amelie had a narrow escape, one of the assassins taking aim at her, but a soldier grappled with him and with the assist-

ance of a policeman killed him with revolver shots. One of the other assassins was also shot down and killed and three were captured, one of whom committed suicide. The royal carriage was driven to the marine hospital near by, where the crown prince died soon after he had been carried in.

The wounds inflicted upon Prince Manuel were not serious and he was at once proclaimed king of Portugal with the title of Manuel II. The immediate provocation for the regicide was a decree issued in the name of the king giving Premier Joao Franco unlimited power for the suppression of revolutionary movements and political opposition. It authorized the cabinet to deport to the colonies the members of any associations deemed to be inimical to the state, not even members of parliament being immune. Premier Franco had, as a matter of fact, been exercising the powers of dictator since May, 1907, when, with the approval of the king, the cortes was dismissed and no call issued for new elections. Wholesale arrests were made, the press was subjected to a vigorous censorship and the people oppressed in other ways. The result was rioting, plotting and threats of revolution, all culminating in the tragedy of Feb. 1.

DESTRUCTION OF THE CRUISER MATSUSHIMA.

The Japanese cruiser Matsushima, which was being used as a training ship, was sunk off the Pescadores islands at 4 o'clock on the morning of April 30, 1908, as the result of the explosion of one of the magazines. Two hundred and seven officers and men lost their lives, many being killed in their berths, while others were drowned after jumping

overboard. Among the victims were sons of Field Marshal Prince Oyama, Baron Chinda, Vice-Admiral Uriu and other distinguished men of Japan. Admiral Yoshimatsu reported that the explosion was caused by the decomposition of cordite used in the ammunition.

CRUISER GLADIATOR SUNK BY STEAMSHIP.

The American line steamship St. Paul, which left Southampton for New York Saturday, April 25, rammed and destroyed the British second-class cruiser Gladiator off the Isle of Wight on the afternoon of the same day. A heavy snowstorm was prevailing at the time and the lookouts were unable

to see for any distance ahead. Twenty-eight men on the cruiser were drowned in spite of heroic efforts on the part of the liner's officers and crew to save them. No lives were lost on the St. Paul, though the vessel was badly damaged and had a narrow escape from sinking.

The authorized strength of the hospital corps is 3,500 enlisted men.

SEIZURE OF THE STEAMER TATSU.

The Japanese steamer Tatsu left Kobe Jan. 26, 1908, with a cargo of rifles and ammunition consigned to a Chinese firm in Macao. On arrival there the vessel was seized and its flag lowered by Chinese gunboats on the ground that the cargo was intended for the use of Chinese insurgents. Japan contended that the shipment was legal and authorized and demanded the immediate release of the ship. China was slow to accede and the matter assumed such a serious aspect that an armed clash

between the two countries was considered a possibility. It was finally agreed that the officers who hauled down the Japanese flag should be punished, that the flag on being hoisted should be saluted, that the steamer should be released and damages paid for the detention, that China should pay for the arms and ammunition seized and that Japan should exercise extra vigilance against the smuggling of arms into China. The Tatsu was released March 16.

HUDSON RIVER TUNNELS AT NEW YORK.

The first of the Hudson & Manhattan system of electric railroad tunnels under the Hudson river between Hoboken and Jersey City on the one side and New York city on the other was opened to the public Feb. 25, 1908. President Roosevelt in Washington started the first official train on its way by pressing an electric button at the White House. The section of the system opened on this occasion consists of a twin tube tunnel about three miles long extending from Hoboken, N. J., to Morton street in New York and thence northeast to 33d street, 19th street, from which the first trains were run, being only a temporary terminal.

The second section, opened later in the year, consists of two tunnels running from a station directly underneath the Pennsylvania railroad terminal in Jersey City to Cortlandt and Fulton streets in New York. The third section is a tunnel one and a quarter miles long connecting the terminal in Jersey City with that in Hoboken and giving access to the Erie, Lackawanna and other great railroad stations. This section and also the fourth section, which runs under a portion of Jersey City in the direction of Newark, are land tunnels hewn

in part out of solid rock. The length of the entire system is about nine miles, double track, and the total cost approximately \$70,000,000.

The interior diameter of the tunnel tube is 15 feet 3 inches. Under the river the tracks are from 60 to 90 feet beneath the surface of the water, while the depth of earth and rock between the roof of the tunnel and the bottom of the river is from 15 to 40 feet. The tubes are some 30 feet apart for the greater part of the distance under the water. The tunnels are made of steel rings or tubes riveted together, the interior being for the most part coated with cement. The cars are operated by electricity.

Work on a tunnel between the Jersey shore and New York was begun in 1873, but the company then formed built only 1,200 feet. In 1888 another company was formed and added 1,800 feet to the part already constructed, but failed on account of financial difficulties. In 1899 the property was sold and in 1902 the enterprise was revived by William G. McAdoo, a lawyer, and carried through to completion in accordance with new and greatly enlarged plans.

DESTRUCTIVE TORNADOES IN THE SOUTH.

April 24 and 25, 1908, a series of tornadoes swept over portions of Mississippi, Alabama, Arkansas, Georgia, Louisiana and Tennessee, killing 368 persons and injuring 1,200 others. Some 2,500 buildings were destroyed and 8,000 people made homeless. Most of those killed were negroes. The property loss was very large, aggregating several million dollars, but no accurate estimate could be made.

The towns and districts in which the greatest loss of life occurred were: Albertsville, Ala., 12; Bergen, Ala., 4; Hector, Ark., 4; Shipley, Ga., 12; Amite, La., 62; Purvis, Miss., 62; Caddo parish, La., 11; Richland, La., 8; Concordia parish, La., 8; Adams county, Miss., 12; Baxterville, Miss., 6; Church Hill, Miss., 25; McCallum, Miss., 6; Natchez district, Miss., 37; Cleveland, Tenn., 3.

HIGHEST ASCENT MADE IN A BALLOON.

The highest balloon ascension of which there is any authentic record was that of M. Berson, July 31, 1901. Going up with a provision of compressed oxygen he took an observation at 34,500 feet and then became partly unconscious. As he was still rising he certainly reached an altitude of at least

35,500 feet and probably 36,000 feet. The record of more than 36,000 feet claimed to have been made by M. Glaisher, Sept. 5, 1862, has been disputed, as he carried no oxygen with him and it is not believed that he could have lived at that height.

INTERNATIONAL BUREAU OF AMERICAN REPUBLICS.

The international bureau of the American republics was established upon the recommendation of the first international American conference in 1890 for the purpose of maintaining closer relations between the republics of the western hemisphere. Its duties have been broadened since then and it is now a sort of clearing house of information concerning the nations of North, South and Central America. It publishes a monthly bulletin in which

are given the latest official data concerning the resources, commerce and other features of the republics. Following are the officers:

Director—John Barrett.
Secretary—Francisco J. Yanes.
Chief Statistician—William C. Wells.
Chief Clerk—Franklin Adams.
Chief Translator—Emilio M. Amores.
Librarian (acting)—Charles E. Babcock.

UNITED STATES MILITARY ACADEMY.

West Point, N. Y.

The United States military academy is a school for the practical and theoretical training of cadets for the military service of the United States. Upon completing the course satisfactorily cadets are eligible for promotion and commission as second lieutenants in any arm or corps of the army in which there may be a vacancy the duties of which they may have been judged competent to

perform. The maximum number of cadets at present permitted by law is 521. The corps of cadets consists of one from each congressional district, one from each territory, one from the District of Columbia, two from each state at large and forty from the United States at large, all appointed by the president.

REDUCTION OF POSTAGE TO ENGLAND.

The postage on letters between the United States and the united kingdom was reduced Oct. 1, 1908, from 5 cents per ounce to 2 cents per ounce. No great increase resulted immediately from the re-

duction and it is expected that the resulting decrease in revenue will be considerable both to Great Britain and the United States for some time to come.

Sixty-first Congress,

From March 4, 1909, to March 3, 1911.

DEATH OF EMPEROR AND DOWAGER EMPRESS OF CHINA.

Kwang-Hsu, emperor of China, died in the royal palace in Peking Saturday, Nov. 14, 1908, and on Sunday, Nov. 15, Tsu-Hsi, the dowager empress, also passed away. Before the death of the emperor the dowager empress issued an edict in his name appointing Prince Chun to the regency and his infant son, Pu-Yi, to be heir presumptive. Kwang-Hsu was born Aug. 2, 1872, and was proclaimed emperor of China in March, 1887. When in 1898 he showed a tendency to favor the reform movement he was deposed by the empress dowager by a coup d'etat and after that had no part in the govern-

ment of the country, the dowager empress issuing all edicts and transacting all business in his name. Tsu-Hsi, the dowager empress, was born in 1834 and was married to Emperor Hienfung in 1851. She was regent from the time of his death until 1887. She was a woman of great strength of character but was opposed to innovations and was credited with being inimical to foreigners. The emperor was her nephew. Prince Chun, the regent, is a brother of the late emperor and until he succeeded to his father's title of prince in 1891 was known as Tsai-Peng. His son, Pu-Yi, is 3 years old.

THE B. F. FERGUSON MONUMENT FUND.

By the will of Benjamin Franklin Ferguson, a pioneer lumberman who died April 10, 1905, the perpetual income from a trust fund of \$1,000,000 was set aside for defraying the cost of statuary to be erected in the parks and boulevards of Chicago. The fund is the "B. F. Ferguson monument fund," and is used "entirely and exclusively under the direction of the board of trustees of the Art insti-

tute of Chicago in the erection and maintenance of enduring statuary and monuments of stone, granite or bronze, in the parks, along the boulevards and in other public places, commemorating worthy men and women of America or important events of American history." The Northern Trust company is trustee.

"IN GOD WE TRUST" RESTORED.

Approved May 18, 1908.

Be it enacted, etc., That the motto "In God We Trust," heretofore inscribed on certain denominations of the gold and silver coins of the United States of America, shall hereafter be inscribed upon all such gold and silver coins of said denominations as heretofore.

FOR EXPOSITION IN TOKYO, JAPAN.

By an act approved May 22, 1908, the United States government accepts the invitation of Japan to participate in a great national exposition to be held in Tokyo in 1912 (see note appended) and for that purpose makes an appropriation limited to \$1,500,000. It further authorizes the president to appoint three commissioners-general to arrange for the erection of suitable buildings and the display of exhibits illustrating the growth and development of the United States and the character of the people.

[For financial reasons the proposed international exposition in Tokyo has, with the consent of this country, been postponed until a date not yet finally fixed.]

CHILD LABOR IN DISTRICT OF COLUMBIA.

No child under 14 years of age shall be employed or permitted to work in the District of Columbia in any factory, workshop, mercantile establishment, store, business office, club, theater, bowling alley, telegraph or telephone office, restaurant, hotel, apartment house, laundry, bootblack stand, or in the distribution or transmission of merchandise or messages. No such child shall be employed in any work performed for wages or other compensation, to whomsoever payable, during the hours when the public schools are in session, nor before the hour of 6 o'clock in the morning or after the hour of 7 o'clock in the evening. Pages employed in the senate are excepted and children between 12 and 14, upon whom disabled parents or a younger brother or sister are dependent, may be permitted to work at the discretion of the judge of the juvenile court. Children under 16 years of age must be provided with age and schooling certificates before they are permitted to work.

REMISSION OF PART OF THE CHINESE INDEMNITY.

By a joint resolution passed by the senate Jan. 15, 1908, and by the house May 23 the president is authorized to consent to a modification of the bond for \$24,440,778.81 received from China pursuant to the protocol of Sept. 7, 1901, for indemnity against losses and expenses incurred by the United States by reason of the Boxer disturbances in China in 1900, so that the total payment to be made by China under the bond shall be limited to \$13,655,492.69 and interest at 4 per cent, and that the remainder of the indemnity may be remitted as an act of friendship. Of the \$13,655,492.69 the sum of \$2,000,000 is reserved for the payment of judgments that may be rendered by the Court of Claims, which is authorized to hear and pass upon claims disallowed in

whole or in part by the United States commissioners or the state department. Any balance remaining after such claims are paid shall also be remitted to China. The total amount remitted under the resolution was \$10,785,286.12. The expenses of the war department in connection with the Boxer outbreak were \$7,186,310.75, and of the navy department, \$2,469,181.94. The private claims allowed by the state department and commissioners amounted to \$1,994,616.76.

WIDOWS' PENSIONS INCREASED.

Approved April 19, 1908.

Be it enacted, etc., That from and after the passage of this act the rate of pensions for widows, minor children under the age of 16 years, and helpless minors as defined by existing laws, now on the roll or hereafter to be placed on the pension roll and entitled to receive a less rate than hereinafter provided, shall be twelve dollars per month; and nothing herein shall be construed to affect the existing allowance of two dollars per month for each child under the age of 16 years and for each helpless child; and all acts and parts of acts inconsistent with the provisions of this act are hereby repealed; provided, however, that this act shall not be construed to reduce any pension under any act, public or private.

Sec. 2. That if any officer or enlisted man who served ninety days or more in the army or navy of the United States during the late civil war and who has been honorably discharged therefrom has died or shall hereafter die, leaving a widow, such widow shall, upon due proof of her husband's death, without proving his death to be the result of his army or navy service, be placed on the pension roll from the date of the filing of her application therefor under this act at the rate of twelve dollars a month during her widowhood, provided the said widow shall have married the said soldier or sailor prior to June 27, 1890; and the benefits of this section shall include those widows whose husbands if living would have a pensionable status under the joint resolutions of Feb. 15, 1895, July 1, 1902, and June 28, 1896.

Sec. 3. This section limits the compensation of agents, attorneys or other persons engaged in prosecuting any claim under the provisions of this act to \$10 in each case.

EMPLOYERS' LIABILITY LAW.

Approved May 30, 1908.

Be it enacted, etc., That every common carrier by railroad while engaging in commerce between any of the several states or territories, or between any of the states and territories, or between the District of Columbia and any of the states or territories, or between the District of Columbia or any of the states or territories and any foreign nation or nations, shall be liable in damages to any person suffering injury while he is employed by such carrier in such commerce, or, in case of the death of such employee, to his or her personal representative, for the benefit of the surviving widow or husband and children of such employee; and, if none, then of such employee's parents; and, if none, then of the next of kin dependent upon such employee; and such injury or death resulting in whole or in part from the negligence of any of the officers, agents or employees of such carrier, or by reason of any defect or insufficiency, due to its negligence, in its cars, engines, appliances, machinery, track, road-bed, works, boats, wharves or other equipment.

Sec. 2. That every common carrier by railroad in the territories, the District of Columbia, the Panama canal zone or other possessions of the United States shall be liable in damages to any person suffering injury while he is employed by such carrier in any of said jurisdictions, or, in case of the death of such employee, to his or her personal representative, for the benefit of the surviving widow or husband and children of such employee; and, if none, then of such employee's parents; and, if none, then of the next of kin dependent upon such employee, for such injury or death resulting in whole or in part from the negligence of any of the officers.

agents or employees of such carrier, or by reason of any defect or insufficiency, due to its negligence, in its cars, engines, appliances, machinery, track, roadbed, works, boats, wharves or other equipment.

Sec. 3. That in all actions hereafter brought against any such common carrier by railroad to recover damages for personal injuries to an employee, or where such injuries have resulted in his death, the fact that the employee may have been guilty of contributory negligence shall not bar a recovery, but the damages shall be diminished by the jury in proportion to the amount of negligence attributable to such employee: Provided, That no such employee who may be injured or killed shall be held to have been guilty of contributory negligence in any case where the violation by such common carrier of any statute enacted for the safety of employees contributed to the injury or death of such employee.

Sec. 4. That in any action brought against any common carrier under, or by virtue of any of the provisions of this act to recover damages for injury to, or the death of, any of its employees, such employee shall not be held to have assumed the risks of his employment in any case where the violation by such common carrier of any statute enacted for the safety of employees contributed to the injury or death of such employee.

Sec. 5. That any contract, rule, regulation or device whatsoever, the purpose or intent of which shall be to enable any common carrier to exempt itself from any liability created by this act, shall to that extent be void: Provided, That in any action brought against any such common carrier under or by virtue of any of the provisions of this act, such common carrier may set off therein any sum it has contributed or paid to any insurance, relief benefit or indemnity that may have been paid to the injured employee or the person entitled thereto on account of the injury or death for which said action was brought.

Sec. 6. That no action shall be maintained under this act unless commenced within two years from the day the cause of action accrued.

Sec. 7. That the term "common carrier" as used in this act shall include the receiver or receivers or other persons or corporations charged with the duty of the management and operation of the business of a common carrier.

Sec. 8. That nothing in this act shall be held to limit the duty or liability of common carriers or to impair the rights of their employees under any other act or acts of congress, or to affect the prosecution of any pending proceeding or right of action under the act of congress entitled "An act relating to liability of common carriers in the District of Columbia and territories and to common carriers engaged in commerce between the states and between the states and foreign nations to their employees," approved June 11, 1906.

NEW MILITIA LAW.

Approved May 27, 1908.

An act to further amend the act entitled "An act to promote the efficiency of the militia and for other purposes," approved Jan. 21, 1903. Be it enacted, etc., That section 1 of the said act be, and is hereby, amended and re-enacted so as to read as follows:

"Section 1. That the militia shall consist of every able-bodied male citizen of the respective states and territories and the District of Columbia, and every able-bodied male of foreign birth who has declared his intention to become a citizen, who is more than 18 and less than 45 years of age, and shall be divided into two classes: The organized militia, to be known as the national guard of the state, territory or District of Columbia, or by such other designations as may be given them by the laws of the respective states or territories; the remainder to be known as the reserve militia: Provided, That the provisions of this act and of section 1661, revised statutes, as amended, shall apply only to the militia organized as a land force."

Sec. 2. That section 3 of said act as amended be, and the same is hereby, amended and re-enacted so as to read as follows:

"Sec. 3. That the regularly enlisted, organized

and unorganized active militia in the several states and territories and the District of Columbia, who have heretofore participated or shall hereafter participate in the apportionment of the annual appropriation provided by section 1661 of the revised statutes of the United States, as amended, whether known and designated as national guard, militia or otherwise, shall constitute the organized militia. On and after Jan. 21, 1910, the organization, armament and discipline of the organized militia in the several states and territories and the District of Columbia shall be the same as that which is now or may hereafter be prescribed for the regular army of the United States, subject in time of peace to such general exceptions as may be authorized by the secretary of war: Provided, That in peace and war each organized division of militia may have one inspector of small-arms practice with the rank of lieutenant-colonel; each organized brigade of militia one inspector of small-arms practice with the rank of major; each regiment of infantry or cavalry of organized militia one assistant inspector of small-arms practice with the rank of captain, and each separate or unassigned battalion of infantry or engineers or squadron of cavalry of organized militia one assistant inspector of small-arms practice with the rank of first lieutenant: Provided also, That the president of the United States in time of peace may, by order, fix the minimum number of enlisted men in each company, troop, battery, signal corps, engineer corps and hospital corps: And provided further, That any corps of artillery, cavalry and infantry existing in any state at the passage of the act of May 8, 1792, which by the laws, customs or usages of said states have been in continuous existence since the passage of said act, under its provisions and under the provisions of section 232 and sections 1625 to 1660, both inclusive, of title 16 of the revised statutes of the United States, relating to the militia, shall be allowed to retain their accustomed privileges, subject, nevertheless, to all other duties required by law, in like manner as other militia."

Sec. 3. That section 4 of said act as amended be, and the same is hereby, amended and re-enacted so as to read as follows:

"Sec. 4. That whenever the United States is invaded, or danger of invasion from any foreign nation, or of rebellion against the authority of the government of the United States, or the president is unable with the regular forces at his command to execute the laws of the union, it shall be lawful for the president to call forth such number of the militia of the state or of the states or territories or of the District of Columbia as he may deem necessary to repel such invasion, suppress such rebellion, or to enable him to execute such laws, and to issue his orders for that purpose, through the governor of the respective state or territory, or through the commanding general of the militia of the District of Columbia, from which state, territory or district such troops may be called, to such officers of the militia as he may think proper."

Sec. 4. That section 5 of said act as amended be, and the same is hereby, amended and re-enacted so as to read as follows:

"Sec. 5. That whenever the president calls forth the organized militia of any state, territory or of the District of Columbia, to be employed in the service of the United States, he may specify in his call the period for which such service is required, and the militia so called shall continue to serve during the term so specified, either within or without the territory of the United States, unless sooner relieved by order of the president: Provided, That no commissioned officer or enlisted man of the organized militia shall be held to service beyond the term of his existing commission or enlistment: Provided further, That when the military needs of the federal government arising from the necessity to execute the laws of the union, suppress insurrection or repel invasion, cannot be met by the regular forces, the organized militia shall be called into the service of the United States in advance of any volunteer force which it may be determined to raise."

Sec. 5. That section 7 of said act as amended be, and the same is hereby, amended and re-enacted so as to read as follows:

"Sec. 7. That every officer and enlisted man of the militia who shall be called forth in the manner hereinbefore prescribed shall be mustered for service without further enlistment and without further medical examination previous to such muster, except for those states and territories which have not adopted the standard of medical examination prescribed for the regular army: Provided, however, That any officer or enlisted man of the militia who shall refuse or neglect to present himself for such muster, upon being called forth as herein prescribed, shall be subject to trial by court-martial and shall be punished as such court-martial may direct."

Sec. 6. That section 8 of said act as amended be, and the same is hereby, amended and re-enacted so as to read as follows:

"Sec. 8. That the majority membership of courts-martial for the trial of officers and men of the militia when in the service of the United States shall be composed of militia officers."

Sec. 7. That section 11 of said act as amended be, and the same is hereby, amended and re-enacted so as to read as follows:

"Sec. 11. That when the militia is called into the actual service of the United States, or any portion of the militia is called forth under the provisions of this act, their pay shall commence from the day of their appearing at the place of company rendezvous, but this provision shall not be construed to authorize any species of expenditure previous to arriving at such places of rendezvous which is not provided by existing laws to be paid after their arrival at such places of rendezvous."

Sec. 8. That section 13 of said act as amended be, and the same is hereby, amended and re-enacted so as to read as follows:

"Sec. 13. That the secretary of war is hereby authorized to procure, by purchase or manufacture, under such regulations as he may prescribe, such number of the United States service arms, together with all accessories and such other accoutrements, equipments, uniforms, clothing, equipage and military stores of all kinds required for the army of the United States, as are necessary to arm, uniform and equip all the organized militia in the several states, territories and the District of Columbia. In accordance with the requirements of this act, without charging the cost or value thereof, or any expense connected therewith, against the allotment of said state, territory or the District of Columbia, out of the annual appropriation provided by section 1661 of the revised statutes as amended, or requiring payment therefor, and to exchange, without receiving any money credit therefor, ammunition or parts thereof suitable to the new arms, round for round, for corresponding ammunition suitable to the old arms heretofore issued to said state, territory or the District of Columbia by the United States: Provided, That said property shall remain the property of the United States, except as hereinafter provided, and be annually accounted for by the governors of the states and territories as required by law, and that each state, territory and the District of Columbia shall, on receipt of new arms or equipments, turn in to the war department, or otherwise dispose of in accordance with the directions of the secretary of war, without receiving any money credit therefor and without expense for transportation, all United States property so replaced or condemned. When the organized militia is uniformed as above required, the secretary of war is authorized to fix an annual clothing allowance to each state, territory and the District of Columbia for each enlisted man thereof, and thereafter issues of clothing to such states, territories and the District of Columbia shall be in accordance with such allowance, and the governors of the states and territories and the commanding general of the militia of the District of Columbia shall be authorized to drop from their returns each year as expended clothing corresponding in value to such allowance. The secretary of war is hereby further authorized to issue from time to time to the organized militia, under such regulations as he may prescribe, small arms and artillery ammunition upon the requisition of the governor, in the proportion of 50 per centum of the corresponding regular army allowance, without

charge to the state's allotment from the appropriation under section 1661, revised statutes, as amended. To provide means to carry into effect the provisions of this section, the necessary money to cover the cost of procuring, exchanging or issuing of arms, accoutrements, equipments, uniforms, clothing, equipage, ammunition and military stores to be exchanged or issued hereunder is hereby appropriated out of any money in the treasury not otherwise appropriated: Provided, That the sum expended in the execution of the purchases and issues provided for in this section shall not exceed the sum of \$2,000,000 in any fiscal year: Provided, also, That the secretary of war shall annually submit to congress a report of the expenditures made by him in the execution of the requirements of this section."

Sec. 9. That section 15 of said act as amended be, and the same is hereby, amended and re-enacted so as to read as follows:

"Sec. 15. That the secretary of war is authorized to provide for the participation by any part of the organized militia of any state or territory on the request of the governor thereof in the encampment maneuvers and field instruction of any part of the regular army at or near any military post or camp or lake or seacoast defenses of the United States. In such case the militia so participating shall receive the same pay, subsistence and transportation as is provided by law for the officers and men of the regular army, and no part of the sums appropriated for the support of the regular army shall be used to pay any part of the expenses of the organized militia of any state, territory or District of Columbia, while engaged in joint encampments, maneuvers and field instruction of the regular army and militia, but all payments to the militia under the provisions of this section and all allowances for mileage shall be made solely from the sums appropriated for such purposes: Provided, That the command of such military post or camp and the officers and troops of the United States there stationed shall remain with the regular commander of the post without regard to the rank of the commanding or other officers of the militia temporarily so encamped within its limits or in its vicinity: Provided further, That except as herein specified the right to command during such joint encampments, maneuvers and field instruction shall be governed by the rules set forth in articles 122 and 124 of the rules and articles for the government of the armies of the United States. The sums appropriated for the organized militia for such joint encampment, maneuvers and field instruction shall be disbursed as, and for that purpose shall constitute, one fund; and the secretary of war shall forward to congress, at each session next after said encampment, a detailed statement of the expenses of such encampments and maneuvers."

Sec. 10. That section 16 of said act as amended be, and the same is hereby, amended and re-enacted so as to read as follows:

"Sec. 16. That whenever any officer or enlisted man of the organized militia shall upon the recommendation of the governor of any state or territory, or the commanding general of the District of Columbia militia, and when authorized by the president, attend and pursue a regular course of study at any military school or college of the United States, such officer or enlisted man shall receive from the annual appropriation for the support of the army the same travel allowances and quarters or commutation of quarters to which an officer or enlisted man of the regular army would be entitled for attending such school or college under orders from proper military authority; such officer shall also receive commutation and subsistence at the rate of one dollar per day and each enlisted man such subsistence as is furnished to an enlisted man of the regular army while in actual attendance upon a course of instruction."

Sec. 11. That section 20 of said act as amended be, and the same is hereby, amended and re-enacted so as to read as follows:

"Sec. 20. That upon the application of the governor of any state or territory furnished with material of war under the provisions of this act, or former laws of congress, the secretary of war may, in his discretion, detail one or more officers or en-

listed men of the army to report to the governor of such state or territory for duty in connection with the organized militia. All such assignments may be revoked at the request of the governor of such state or territory or at the pleasure of the secretary of war. The secretary of war is hereby authorized to appoint a board of five officers on the active list of the militia so selected as to secure, as far as practicable, equitable representation to all sections of the United States, and which shall, from time to time, as the secretary of war may direct, proceed to Washington, District of Columbia, for consultation with the secretary of war respecting the condition, status and needs of the whole body of organized militia. Such officers shall be appointed for the term of four years unless sooner relieved by the secretary of war. The actual and necessary traveling expenses of the board, together with a per diem to be established by the secretary of war, shall be paid to the members of the board. The expenses herein authorized, together with the necessary clerical and office expenses of the division of militia affairs in the office of the secretary of war, shall constitute a charge against the whole sum annually appropriated under section 1661, revised statutes, as amended, and shall be paid therefrom, and not from the allotment duly apportioned to any particular state, territory or the District of Columbia; and a list of such expenses shall be submitted to congress annually by the secretary of war in connection with his annual report."

ALDRICH-VREELAND CURRENCY LAW.

Following is the full text of the amendment to the national banking laws known as the Aldrich-Vreeland act, approved May 30, 1908:

Be it enacted by the senate and house of representatives of the United States of America in congress assembled, That national banking associations, each having an unimpaired capital and a surplus of not less than 20 per centum, not less than ten in number, having an aggregate capital and surplus of at least five millions of dollars, may form voluntary associations to be designated as national currency associations. The banks uniting to form such association shall, by their presidents or vice-presidents, acting under authority from the board of directors, make and file with the secretary of the treasury a certificate setting forth the names of the banks composing the association, the principal place of business of the association, and the name of the association, which name shall be subject to the approval of the secretary of the treasury. Upon the filing of such certificate the associated banks therein named shall become a body corporate, and by the name so designated and approved may sue and be sued and exercise the powers of a body corporate for the purposes hereinafter mentioned: Provided, That not more than one such national currency association shall be formed in any city: Provided further, That the several members of such national currency association shall be taken, as nearly as conveniently may be, from a territory composed of a state or part of a state, or contiguous parts of one or more states: And provided further, That any national bank in such city or territory, having the qualifications herein prescribed for membership in such national currency association, shall, upon its application to and upon the approval of the secretary of the treasury, be admitted to membership in a national currency association for that city or territory, and upon such admission shall be deemed and held a part of the body corporate, and as such entitled to all the rights and privileges and subject to all the liabilities of an original member: And provided further, That each national currency association shall be composed exclusively of banks not members of any other national currency association.

The dissolution, voluntary or otherwise, of any bank in such association shall not affect the corporate existence of the association unless there shall then remain less than the minimum number of ten banks: Provided, however, That the reduction of the number of said banks below the minimum of ten shall not affect the existence of the corporation with respect to the assertion of all rights in favor of or against such association. The

affairs of the association shall be managed by a board consisting of one representative from each bank. By-laws for the government of the association shall be made by the board, subject to the approval of the secretary of the treasury. A president, vice-president, secretary, treasurer and an executive committee of not less than five members shall be elected by the board. The powers of such board, except in the election of officers and making of by-laws, may be exercised through its executive committee.

The national currency association herein provided for shall have and exercise any and all powers necessary to carry out the purposes of this section, namely, to render available, under the direction and control of the secretary of the treasury, as a basis for additional circulation, any securities, including commercial paper, held by a national banking association. For the purpose of obtaining such additional circulation, any bank belonging to any national currency association, having circulating notes outstanding secured by the deposit of bonds of the United States to an amount not less than 40 per centum of its capital stock, and which has its capital unimpaired and a surplus of not less than 20 per centum, may deposit with and transfer to the association, in trust for the United States, for the purpose hereinafter provided, such of the securities above mentioned as may be satisfactory to the board of the association. The officers of the association may thereupon, in behalf of such bank, make application to the comptroller of the currency for an issue of additional circulating notes to an amount not exceeding 75 per centum of the cash value of the securities or commercial paper so deposited. The comptroller of the currency shall immediately transmit such application to the secretary of the treasury with such recommendation as he thinks proper, and if, in the judgment of the secretary of the treasury, business conditions in the locality demand additional circulation, and if he be satisfied with the character and value of the securities proposed and that a lien in favor of the United States on the securities so deposited and on the assets of the banks composing the association will be amply sufficient for the protection of the United States, he may direct an additional issue of circulating notes to the association, on behalf of such bank, to an amount in his discretion, not, however, exceeding 75 per centum of the cash value of the securities so deposited: Provided, That upon the deposit of any of the state, city, town, county or other municipal bonds, of character described in section 5230 of this act, circulating notes may be issued to the extent of not exceeding 90 per centum of the market value of such bonds so deposited: And provided further, That no national banking association shall be authorized in any event to issue circulating notes based on commercial paper in excess of 30 per centum of its unimpaired capital and surplus. The term "commercial paper" shall be held to include only notes representing actual commercial transactions, which when accepted by the association shall bear the names of at least two responsible parties and have not exceeding four months to run.

The banks and the assets of all banks belonging to the association shall be jointly and severally liable to the United States for the redemption of such additional circulation; and to secure such liability the lien created by section 5230 of the revised statutes shall extend to and cover the assets of all banks belonging to the association, and to the securities deposited by the banks with the association pursuant to the provisions of this act; but as between the several banks composing such association each bank shall be liable only in the proportion that its capital and surplus bears to the aggregate capital and surplus of all such banks. The association may, at any time, require any of its constituent banks a deposit of additional securities or commercial paper, or an exchange of the securities already on deposit, to secure such additional circulation; and in case of the failure of such bank to make such deposit or exchange the association may, after ten days' notice to the bank, sell the securities and paper already in its hands at public sale, and deposit the proceeds

with the treasurer of the United States as a fund for the redemption of such additional circulation. If such fund be insufficient for that purpose the association may recover from the bank the amount of the deficiency by suit in the Circuit court of the United States, and shall have the benefit of the lien hereinbefore provided for in favor of the United States upon the assets of such bank. The association or the secretary of the treasury may permit or require the withdrawal of any such securities or commercial paper and the substitution of other securities or commercial paper of equal value therefor.

Sec. 2. That whenever any bank belonging to a national currency association shall fail to preserve or make good its redemption fund in the treasury of the United States, required by section 3 of the act of June 20, 1874, chapter 343, and the provisions of this act, the treasurer of the United States shall notify such national currency association to make good such redemption fund, and upon the failure of such national currency association to make good such fund, the treasurer of the United States may, in his discretion, apply so much of the redemption fund belonging to the other banks composing such national currency association as may be necessary for that purpose; and such national currency association may, after five days' notice to such bank, proceed to sell at public sale the securities deposited by such bank with the association pursuant to the provisions of section 1 of this act, and deposit the proceeds with the treasurer of the United States as a fund for the redemption of the additional circulation taken out by such bank under this act.

Sec. 3. That any national banking association which has circulating notes outstanding, secured by the deposit of United States bonds to an amount of not less than 40 per centum of its capital stock, and which has a surplus of not less than 20 per centum, may make application to the comptroller of the currency for authority to issue additional circulating notes to be secured by the deposit of bonds other than bonds of the United States. The comptroller of the currency shall transmit immediately the application, with his recommendation, to the secretary of the treasury, who shall, if in his judgment business conditions in the locality demand additional circulation, approve the same, and shall determine the time of issue and fix the amount, within the limitations herein imposed, of the additional circulating notes to be issued. Whenever, after receiving notice of such approval, any such association shall deposit with the treasurer or any assistant treasurer of the United States such of the bonds described in this section as shall be approved in character and amount by the treasurer of the United States and the secretary of the treasury, it shall be entitled to receive, upon the order of the comptroller of the currency, circulating notes in blank, registered and countersigned as provided by law, not exceeding in amount 90 per centum of the market value, but not in excess of the par value, of any bonds so deposited, such market value to be ascertained and determined under the direction of the secretary of the treasury.

The treasurer of the United States, with the approval of the secretary of the treasury, shall accept as security for the additional circulating notes provided for in this section, bonds or other interest-bearing obligations of any state of the United States, or any legally authorized bonds issued by any city, town, county or other legally constituted municipality or district in the United States, which have been in existence for a period of ten years, and which, for a period of ten years previous to such deposit has not defaulted in the payment of any part of either principal or interest of any funded debt authorized to be contracted by it, and whose net funded indebtedness does not exceed 10 per centum of the valuation of its taxable property, to be ascertained by the last preceding valuation of property for the assessment of taxes. The treasurer of the United States, with the approval of the secretary of the treasury, shall accept, for the purposes of this section, securities herein enumerated in such proportions as he may from time to time determine, and he may with such approval at any time require the deposit of additional securities, or

require any association to change the character of the securities already on deposit.

Sec. 4. That the legal title of all bonds, whether coupon or registered, deposited to secure circulating notes issued in accordance with the terms of section 3 of this act shall be transferred to the treasurer of the United States in trust for the association depositing them, under regulations to be prescribed by the secretary of the treasury. A receipt shall be given to the association by the treasurer or any assistant treasurer of the United States, stating that such bond is held in trust for the association on whose behalf the transfer is made, and as security for the redemption and payment of any circulating notes that have been or may be delivered to such association. No assignment or transfer of any such bond by the treasurer shall be deemed valid unless countersigned by the comptroller of the currency. The provisions of sections 5163, 5164, 5165, 5166 and 5167 and sections 5224 and 5234, inclusive, of the revised statutes respecting United States bonds deposited to secure circulating notes shall, except as herein modified, be applicable to all bonds deposited under the terms of section 3 of this act.

Sec. 5. That the additional circulating notes issued under this act shall be used, held and treated in the same way as circulating notes of national banking associations heretofore issued and secured by a deposit of United States bonds, and shall be subject to all the provisions of law affecting such notes except as herein expressly modified: Provided, That the total amount of circulating notes outstanding of any national banking association, including notes secured by United States bonds as now provided by law, and notes secured otherwise than by deposit of such bonds, shall not at any time exceed the amount of its unimpaired capital and surplus: And provided further, That there shall not be outstanding at any time circulating notes issued under the provisions of this act to an amount of more than \$500,000,000.

Sec. 6. That whenever and so long as any national banking association has outstanding any of the additional circulating notes authorized to be issued by the provisions of this act it shall keep on deposit in the treasury of the United States, in addition to the redemption fund required by section 3 of the act of June 20, 1874, an additional sum equal to 5 per centum of such additional circulation at any time outstanding, such additional 5 per centum to be treated, held and used in all respects in the same manner as the original redemption fund provided for by said section 3 of the act of June 20, 1874.

Sec. 7. That the distribution of notes to be issued under the provisions of this act shall be made as equitable as practicable between the various sections of the country, the secretary of the treasury shall not approve applications from associations in any state in excess of the amount to which such state would be entitled of the additional notes herein authorized on the basis of the proportion which the unimpaired capital and surplus of the national banking associations in such state bears to the total amount of unimpaired capital and surplus of the national banking associations of the United States: Provided, however, That in case the applications from associations in any state shall not be equal to the amount which the associations of such state would be entitled to under this method of distribution, the secretary of the treasury may, in his discretion, to meet an emergency, assign the amount not thus applied for to any applying association or associations in states in the same section of the country.

Sec. 8. That it shall be the duty of the secretary of the treasury to obtain information with reference to the value and character of the securities authorized to be accepted under the provisions of this act, and he shall from time to time furnish information to national banking associations as to such securities as would be acceptable under the provisions of this act.

Sec. 9. That section 5214 of the revised statutes, as amended, be further amended to read as follows:

"Sec. 5214. National banking associations having on deposit bonds of the United States, bearing interest at the rate of 2 per centum per annum, including the bonds issued for the construction of the

Panama canal, under the provisions of section 8 of 'An act to provide for the construction of a canal connecting the waters of the Atlantic and Pacific oceans,' approved June 28, 1902, to secure its circulating notes, shall pay to the treasurer of the United States, in the months of January and July, a tax of one-fourth of 1 per centum each half year upon the average amount of such of its notes in circulation as are based upon the deposit of such bonds; and such associations having on deposit bonds of the United States bearing interest at a rate higher than 2 per centum per annum shall pay a tax of one-half of 1 per centum each half year upon the average amount of such notes in circulation as are based upon the deposit of such bonds. National banking associations having circulating notes secured otherwise than by bonds of the United States shall pay for the first month a tax at the rate of 5 per centum per annum upon the average amount of such of their notes in circulation as are based upon the deposit of such securities and afterwards an additional tax of 1 per centum per annum for each month until a tax of 10 per centum per annum is reached, and thereafter such tax of 10 per centum per annum upon the average amount of such notes. Every national banking association having outstanding circulating notes secured by a deposit of other securities than United States bonds shall make monthly returns, under oath of its president or cashier, to the treasurer of the United States, in such form as the treasurer may prescribe, of the average monthly amount of its notes so secured in circulation; and it shall be the duty of the comptroller of the currency to cause such reports of notes in circulation to be verified by examination of the banks' records. The taxes received on circulating notes secured otherwise than by bonds of the United States shall be paid into the division of redemption of the treasury and credited and added to the reserve fund held for the redemption of United States and other notes."

Sec. 10. That section 9 of the act approved July 12, 1882, as amended by the act approved March 4, 1907, be further amended to read as follows:

"Sec. 9. That any additional banking association desiring to withdraw its circulating notes, secured by deposit of United States bonds in the manner provided in section 4 of the act approved June 20, 1874, is hereby authorized for that purpose to deposit lawful money with the treasurer of the United States and, with the consent of the comptroller of the currency and the approval of the secretary of the treasury, to withdraw a proportionate amount of bonds held as security for its circulating notes in the order of such deposits: Provided, That not more than nine millions of dollars of lawful money shall be so deposited during any calendar month for this purpose.

"Any national banking association desiring to withdraw any of its circulating notes, secured by the deposit of securities other than bonds of the United States, may make such withdrawal at any time in like manner and effect by the deposit of lawful money or national bank notes with the treasurer of the United States, and upon such deposit a proportionate share of the securities so deposited may be withdrawn: Provided, That the deposits under this section to retire notes secured by the deposit of securities other than bonds of the United States shall not be covered into the treasury, as required by section 6 of an act entitled 'An act directing the purchase of silver bullion and the issue of treasury notes thereon, and for other purposes,' approved July 14, 1890, but shall be retained in the treasury for the purpose of redeeming the notes of the bank making such deposit."

Sec. 11. That section 5172 of the revised statutes be, and the same is hereby, amended to read as follows:

"Sec. 5172. In order to furnish suitable notes for circulation, the comptroller of the currency shall, under the direction of the secretary of the treasury, cause plates and dies to be engraved, in the best manner to guard against counterfeiting and fraudulent alterations, and shall have printed therefrom, and numbered, such quantity of circulating notes, in blank, of the denominations of five dollars, ten dollars, twenty dollars, fifty dollars, one hundred

dollars, five hundred dollars, one thousand dollars and ten thousand dollars, as may be required to supply the associations entitled to receive the same. Such notes shall state upon their face that they are secured by United States bonds or other securities, certified by the written or engraved signatures of the treasurer and register and by the imprint of the seal of the treasury. They shall also express upon their face the promise of the association receiving the same to pay on demand, attested by the signature of the president or vice-president and cashier. The comptroller of the currency, acting under the direction of the secretary of the treasury, shall as soon as practicable cause to be prepared circulating notes in blank, registered and countersigned, as provided by law, to an amount equal to 50 per centum of the capital stock of each national banking association; such notes to be deposited in the treasury or in the sub-treasury of the United States nearest the place of business of each association, and to be held for such association, subject to the order of the comptroller of the currency, for their delivery as provided by law: Provided, That the comptroller of the currency may issue national bank notes of the present form until the plates can be prepared and circulating notes issued as above provided: Provided, however, That in no event shall bank notes of the present form be issued to any bank as additional circulation provided for by this act."

Sec. 12. That circulating notes of national banking associations, when presented to the treasury for redemption, as provided in section 3 of the act approved June 20, 1874, shall be redeemed in lawful money of the United States.

Sec. 13. That all acts and orders of the comptroller of the currency and the treasurer of the United States authorized by this act shall have the approval of the secretary of the treasury, who shall have power, also, to make any such rules and regulations and exercise such control over the organization and management of national currency associations as may be necessary to carry out the purposes of this act.

Sec. 14. That the provisions of section 5191 of the revised statutes, with reference to the reserves of national banking associations, shall not apply to deposit of lawful moneys by the United States in designated depositories.

Sec. 15. That all national banking associations designated as regular depositories of public money shall pay upon all special and additional deposits made by the secretary of the treasury in such depositories, and all such associations designated as temporary depositories of public money shall pay upon all sums of public money deposited in such associations, interest at such rate as the secretary of the treasury may prescribe, not less, however, than 1 per centum per annum upon the average monthly amount of such deposits: Provided, however, That nothing contained in this act shall be construed to change or modify the obligation of any association or any of its officers for the safe-keeping of public money: Provided further, That the rate of interest charged upon such deposits shall be equal and uniform throughout the United States.

Sec. 16. That a sum sufficient to carry out the purposes of the preceding sections of this act is hereby appropriated out of any money in the treasury not otherwise appropriated.

Sec. 17. That a commission is hereby created, to be called the "national monetary commission," to be composed of nine members of the senate, to be appointed by the presiding officer thereof, and nine members of the house of representatives, to be appointed by the speaker thereof; and any vacancy on the commission shall be filled in the same manner as the original appointment.

Sec. 18. That it shall be the duty of this commission to inquire into and report to congress, at the earliest date practicable, what changes are necessary or desirable in the monetary system of the United States or in the laws relating to banking and currency, and for this purpose they are authorized to sit during the sessions or recess of congress, at such times and places as they may deem desirable, to send for persons and papers, to administer oaths, to summon and compel the attend-

ance of witnesses and to employ a disbursing officer and such secretaries, experts, stenographers, messengers and other assistants as shall be necessary to carry out the purposes for which said commission was created. The commission shall have the power, through subcommittee or otherwise, to examine witnesses and to make such investigations and examinations, in this or other countries, of the subjects committed to their charge as they shall deem necessary.

Sec. 19. That a sum sufficient to carry out the purposes of sections 17 and 18 of this act, and to pay the necessary expenses of the commission and its members, is hereby appropriated, out of any money in the treasury not otherwise appropriated. Said appropriation shall be immediately available and shall be paid out on the audit and order of the chairman or acting chairman of said commission, which audit and order shall be conclusive and binding upon all departments as to the correctness of the accounts of such commission.

Sec. 20. That this act shall expire by limitation on the 30th day of June, 1914.

NATIONAL MONETARY COMMISSION.

Under section 17 of the act to amend the national banking laws Vice-President Fairbanks appointed Senators Nelson W. Aldrich of Rhode Island, William B. Allison (since deceased) of Iowa, Julius C. Burrows of Michigan, Eugene Hale of Maine, Philander C. Knox of Pennsylvania, John W. Daniel of Virginia, Henry M. Teller of Colorado, Hernando D. Money of Mississippi and Joseph W. Bailey of Texas members on the part of the senate of the national monetary commission. On the part of the house Speaker Cannon appointed the following representatives to be members of the commission: Edward B. Vreeland of New York, Jesse Overstreet of Indiana, Theodore E. Burton of Ohio, John W. Weeks of Massachusetts, Robert W. Byrnes of Colorado, Sylvester C. Smith of California, Lemuel P. Padgett of Tennessee, George F. Burgess of Texas and Arsene P. Pujo of Louisiana.

COMPENSATION FOR INJURIES OF EMPLOYEES OF THE UNITED STATES.

Approved May 30, 1908.

Section 1. When, on or after Aug. 1, 1908, any person employed by the United States as an artisan or laborer in any of its manufacturing establishments, arsenals or navy yards, or in the construction of river and harbor or fortification work or in hazardous employment on construction work in the reclamation of arid lands or the management and control of the same, or in hazardous employment under the isthmian canal commission, is injured in the course of such employment, such employee shall be entitled to receive for one year thereafter, unless such employee, in the opinion of the secretary of commerce and labor, be sooner able to resume work, the same pay as if he continued to be employed, such payment to be made under such regulations as the secretary of commerce and labor may prescribe: Provided, That no compensation shall be paid under this act where the injury is due to the negligence or misconduct of the employee injured, nor unless said injury shall continue for more than fifteen days. All questions of negligence or misconduct shall be determined by the secretary of commerce and labor.

Sec. 2. If any artisan or laborer so employed shall die during the said year by reason of such injury received in the course of such employment, leaving a widow, or a child or children under 16 years of age, or a dependent parent, such widow and child or children and dependent parent shall be entitled to receive, in such portions and under such regulations as the secretary of commerce and labor may prescribe, the same amount, for the remainder of the said year, that said artisan or la-

borer would be entitled to receive as pay if such employee were alive and continued to be employed: Provided, That if the widow shall die at any time during the said year her portion of said amount shall be added to the amount to be paid to the remaining beneficiaries under the provisions of this section, if there be any.

Sec. 3. Whenever an accident occurs to any employee embraced within the terms of the first section of this act, and which results in death or a probable incapacity for work, it shall be the duty of the official superior of such employee to at once report such accident and the injury resulting therefrom to the head of his bureau or independent office, and his report shall be immediately communicated through regular official channels to the secretary of commerce and labor. Such report shall state, first, the time, cause and nature of the accident and injury and the probable duration of the injury resulting therefrom; second, whether the accident arose out of or in the course of the injured person's employment; third, whether the accident was due to negligence or misconduct on the part of the employee injured; fourth, any other matters required by such rules and regulations as the secretary of commerce and labor may prescribe. The head of each department or independent office shall have power, however, to charge a special official with the duty of making such reports.

Sec. 4. In the case of any accident which shall result in death, the persons entitled to compensation under this act or their legal representatives shall, within ninety days after such death, file with the secretary of commerce and labor an affidavit setting forth their relationship to the deceased and the ground of their claim for compensation under the provisions of this act. This shall be accompanied by the certificate of the attending physician setting forth the fact and cause of death, or the nonproduction of the certificate shall be satisfactorily accounted for. In the case of incapacity for work lasting more than fifteen days, the injured party desiring to take the benefit of this act shall, within a reasonable period after the expiration of such time, file with his official superior, to be forwarded through regular official channels to the secretary of commerce and labor, an affidavit setting forth the grounds of his claim for compensation, to be accompanied by a certificate of the attending physician as to the cause and nature of the injury and probable duration of the incapacity, or the nonproduction of the certificate shall be satisfactorily accounted for. If the secretary of commerce and labor shall find from the report and affidavit or other evidence produced by the claimant or his or her legal representatives, or from such additional investigation as the secretary of commerce and labor may direct, that a claim for compensation is established under this act, the compensation to be paid shall be determined as provided under this act and approved for payment by the secretary of commerce and labor.

Sec. 5. The employee shall, whenever and as often as required by the secretary of commerce and labor, at least once in six months, submit to medical examination to be provided and paid for under the direction of the secretary, and if such employee refuses to submit to or obstructs such examination his or her right to compensation shall be lost for the period covered by the continuance of such refusal or obstruction.

Sec. 6. Payments under this act are only to be made to the beneficiaries or their legal representatives other than assignees and shall not be subject to the claims of creditors.

Sec. 7. The United States shall not exempt itself from liability under this act by any contract, agreement, rule or regulation, and any such contract, agreement, rule or regulation shall be pro tanto void.

PLAN OF THE CANAL.

In September, 1905, a number of eminent engineers of America and Europe met in Washington, D. C., to make investigations and recommendations as to the type of canal to be built, as it had not been decided whether it should be a sea-level or a lock canal. They visited the isthmus and on returning to Washington formulated majority and minority reports, the foreign engineers favoring a sea-level and a majority of the American engineers a lock canal.

In a message to congress Feb. 19, 1906, President Roosevelt transmitted the reports of the board of consulting engineers and the isthmian canal commission and announced that unless otherwise directed by congress he would order the canal commission to proceed with the construction of the lock type of canal. The majority of the board of consulting engineers, eight in number, including

the five foreign engineers, favored a sea-level canal, and one member of the canal commission, Rear-Admiral Endicott, took the same view. Five of the eight American members of the board of consulting engineers and five members of the isthmian canal commission favored the lock canal and so did Chief Engineer Stevens and the secretary of war. The president concurred in the recommendation of the minority of the consulting engineers and of the majority of the canal commission that the lock plan be adopted. This was also the view taken by the members of the 59th congress, which at its first session passed a bill directing that a lock canal should be constructed. It was also determined that all the materials used in building the canal should be purchased in the United States.

The canal begins in the bay of Limon, a mile northwest of the city of Colon on the Atlantic side, with a channel 500 feet in width and 41 feet in depth at mean tide, running due south to the shore line of Limon bay, at the mouth of the Mindi river. This distance is $4\frac{1}{2}$ miles. Then the canal passes through low and swampy ground in a southerly direction 3 miles to the town of Gatun, the width for this stretch being 500 feet and the depth 45 feet. At Gatun there is a space between the hills of over 7,000 feet, through which the waters of the Chagres river and its tributaries flow to the sea. This space is buttressed on either side with rocks and hills and about midway in this space there is a mountain of rock and earth, in which it is proposed to excavate a diversion channel through which the Chagres river will flow during the construction of the earth dam. The plan is to construct this dam across the entire

space at a height of 135 feet above sea level and create a lake. Vessels are to be raised to the level of the lake, to be known as Lake Gatun, by three duplicate locks ranging in a flight of steps, each lock being 900 feet interior length, 110 feet wide, 40 feet deep over the miter sills, with a lift in each lock of 25 2-3 feet. These six locks, constructed of a mass of masonry and concrete, will be buried in Gatun hill and founded on rock throughout. Lake Gatun, when created by the construction of this dam, will be 171 square miles in area and will form the summit level of the canal, which will be 85 feet above sea level. The total length of the lake will be 30 miles, of which 23 miles will be navigated by ships crossing the isthmus. Its depth will be about 75 feet in the immediate vicinity of the dam, this being maintained by a little reduction to Bohio (a distance of about 10 miles) and thence reducing gradually toward Obispo, where the depth of 45 feet will be obtained with but little excavation, the bed of the river being about 45 feet below the surface of the future lake.

For 15.63 miles above the Gatun locks the deep portion of the lake will have generally a width exceeding half a mile and only a small amount of excavation will be required to provide a navigable channel nowhere less than 1,000 feet wide at the bottom and 45 feet deep. Farther up the lake, as the amount of excavation required to obtain a depth of 45 feet increases, the minimum width of the channel will be decreased, first to 800 feet for a distance of 3.86 miles from San Pablo to Juan Grande, then to 500 feet for 3.73 miles to Obispo, and to 300 feet for 1.55 miles from Obispo to Las Cascades, where the channel will be further narrowed to 200 feet through the heaviest portion of the great central mass known as Culebra.

For a distance of 4.7 miles through the deep portion of the Culebra cut the channel is to have a bottom width of 200 feet and to have nearly vertical sides below the water line and then will become 300 feet wide for 1.88 miles to the Pedro Miguel locks, where the summit level will end. The duplicate locks at Pedro Miguel will have one end of the 300 foot channel at the same level. The duplicate locks at Sosa locks will be 500 feet wide for .84 miles, then increasing 1,000 feet or more for the further distance of 3.38 miles to the Sosa locks on the shore of Panama.

bay. This broad navigation will be in an artificial lake created by three dams, to be subsequently described. There are to be duplicate flights of locks on the west side of Sosa bay near La Boca with two lifts of about 31 feet each from ordinary low tide to the level of Lake Sosa. From the Sosa lock to the 7-fathom curve in Panama bay, a distance of 4 miles, the channel is to be 300 feet wide at the bottom and 45 feet deep below mean tide.

The waterway may be summarized with reference to the channel widths as follows:

ASSASSINATION OF DURHAM W. STEVENS.

Durham W. Stevens, an American who had been serving Korea as legal adviser, was shot by a Korean named In Whan Chang in San Francisco, Cal., March 23, and died from his wounds March 25. His assailant, who was arrested, justified his action on the ground that Stevens had betrayed Korea to the Japanese.

CONSERVATION OF THE NATION'S RESOURCES.

In accordance with the invitations sent out by President Theodore Roosevelt Nov. 16, 1907, the governors of practically all the states and territories met at the White House in Washington, D. C., May 13, 14 and 15, 1908, to consider with him the question of the conservation of the nation's resources. Others who took part in the deliberations included the vice-president, members of the cabinet, justices of the Supreme court and senators and representatives. Those specially invited were Andrew Carnegie, James J. Hill, John Mitchell, Prof. T. C. Chamberlin, Dr. I. C. White, William J. Bryan and Judge George Gray.

In his address opening the conference President Roosevelt said the problem to be considered was the weightiest now before the nation and that the occasion for the meeting was the fact that the natural resources of the country were in danger of exhaustion if the old wasteful methods of exploiting them were permitted to continue. "This nation," he said, "began with the belief that its landed possessions were illimitable and capable of supporting all the people who might care to make our country their home; but already the limit of unsettled land is in sight and, indeed, but little land fitted for agriculture now remains unoccupied save what can be reclaimed by irrigation and drainage. We began with an unapproached heritage of forests; more than half of the timber is gone. We began with coal fields more extensive than those of any other nation and with iron ores regarded as inexhaustible and many experts now declare that the end of both iron and coal is in sight. The mere increase in our consumption of coal during 1907 over 1906 exceeded the total consumption in 1876, the centennial year. The enormous stores of mineral oil and gas are largely gone.

"Our natural waterways are not gone, but they have been so injured by neglect and by the division of responsibility and utter lack of system in dealing with them that there is less navigation on them now than there was fifty years ago. Finally, we began with soils of unexampled fertility and we have so impoverished them by injudicious use and by failing to check erosion that their crop-producing power is diminishing instead of increasing. In a word, we have thoughtlessly and to a large degree unnecessarily diminished the resources upon which not only our prosperity but the prosperity of our children must always depend.

"We have become great because of the lavish use of our resources and we have just reason to be proud of our growth. But the time has come to inquire seriously what will happen when our forests are gone, when the coal, the iron, the oil and the gas are exhausted, when the soils shall have been still further impoverished and washed into the streams, polluting the rivers, denuding the fields and obstructing navigation. * * *

"We are on the verge of a timber famine in this country and it is unpardonable for the nation or the states to permit any further cutting of our timber save in accordance with a system which will provide that the next generation shall see the timber increased instead of diminished. Moreover, we can add enormous tracts of the most valuable possible agricultural land to the national domain by irrigation in the arid and semiarid regions and by drainage of great tracts of swamp lands in the humid regions. We can enormously increase our transportation facilities by the canalization of our rivers so as to complete a great system of waterways on the Pacific, Atlantic and gulf coasts and in the Mississippi valley, from the great plains to the Alleghenies and from the northern lakes to the mouth of the mighty father of waters. But all these various uses of our natural resources are so closely connected that they should be co-ordinated and should be treated as part of one coherent plan and not in haphazard and piecemeal fashion.

"We are coming to recognize as never before the right of the nation to guard its own future in the essential matter of natural resources. In the past we have admitted the right of the individual to injure the future of the republic for his own present profit. The time has come for a change. As a

people we have the right and the duty, second to none other but the right and duty of obeying the moral law, of requiring and doing justice, to protect ourselves and our children against the wasteful development of our natural resources, whether that waste is caused by the actual destruction of such resources or by making them impossible of development hereafter. * * * There are signs that both the nation and the states are waking to a realization of this great truth. On March 10, 1908, the Supreme court of Maine rendered an exceedingly important judicial decision. This opinion was rendered in response to questions as to the right of the legislature to restrict the cutting of trees on private land for the prevention of droughts and floods, the preservation of the natural water supply and the prevention of the erosion of such lands and the consequent filling up of rivers, ponds and lakes. * * *

"The opinion of the Maine Supreme bench sets forth unequivocally the principle that the property rights of the individual are subordinate to the rights of the community, and especially that the waste of wild timber land derived originally from the state, involving as it would the impoverishment of the state and its people and thereby defeating one great purpose of government, may properly be prevented by state restrictions. * * * The Court of Errors and Appeals of New Jersey has adopted a similar view, which has recently been sustained by the Supreme court of the United States."

The first day's session of the conference was devoted to the conservation of mineral resources, papers being read by Andrew Carnegie and Dr. I. C. White. The second day's session was occupied with the subject of land resources, concerning which formal papers were presented by Ex-Gov. George C. Pardee and H. A. Jastro. The water resources of the country was the topic on the third day, the essayists being Ex-Senator Joseph M. Carey, Prof. Emory R. Johnson and H. S. Putnam. Speeches were made by John Mitchell, William J. Bryan and many of the governors. The following resolutions were adopted:

"We, the governors of the states and territories of the United States of America, in conference assembled, do hereby declare the conviction that the great prosperity of our country rests upon the abundant resources of the land chosen by our forefathers for their homes and where they laid the foundation of this great nation.

"We look upon these resources as a heritage to be made use of in establishing and promoting the comfort, prosperity and happiness of the American people, but not to be wasted, deteriorated or needlessly destroyed.

"We agree that our country's future is involved in this; that the great natural resources supply the material basis upon which our civilization must continue to depend, and upon which the perpetuity of the nation itself rests.

"We agree, in the light of the facts brought to our knowledge and from information received from sources which we cannot doubt, that this material basis is threatened with exhaustion. Even as each succeeding generation from the birth of this nation has performed its part in promoting the progress and development of the republic, so do we in this generation recognize it as a high duty to perform our part, and this duty in large degree is the adoption of measures for the conservation of the natural wealth of the country.

"We declare our firm conviction that this conservation of our natural resources is a subject of transcendent importance, which should engage unremittingly the attention of the nation, the states and the people in earnest co-operation. These natural resources include the land on which we live and which yields our food; the living waters, which fertilize the soil, supply power and form great avenues of commerce; the forests, which yield the materials for our homes, prevent erosion of the soil and conserve the navigation and other uses of our streams, and the minerals, which form the basis of our industrial life and supply us with heat, light and power.

"We agree that the land should be so used that

erosion and soil wash should cease; that there should be reclamation of arid and semiarid regions by means of irrigation and of swamp and overflowed regions by means of drainage; that the waters should be so conserved and used as to promote navigation, to enable the arid regions to be reclaimed by irrigation, and to develop power in the interests of the people; that the forests, which regulate our rivers, support our industries and promote the fertility and productiveness of the soil, should be preserved and perpetuated; that the minerals found so abundantly beneath the surface should be used so as to prolong their utility; that the beauty, healthfulness and habitability of our country should be preserved and increased; that the sources of national wealth exist for the benefit of all the people, and that the monopoly thereof should not be tolerated.

"We commend the wise forethought of the president in sounding the note of warning as to the waste and exhaustion of the natural resources of the country and signify our appreciation of his action in calling this conference to consider the same and to seek remedies therefor through co-operation of the nation and the states.

"We agree that this co-operation should find expression in suitable action by the congress within the limits of and co-extensive with the national jurisdiction of the subject and, complementary thereto, by the legislatures of the several states within the limits of and coextensive with their jurisdiction.

"We declare the conviction that in the use of the natural resources our independent states are interdependent and bound together by ties of mutual benefits, responsibilities and duties.

"We agree in the wisdom of future conferences between the president, members of congress and the governors of the states regarding the conservation of our natural resources, with the view of continued operation and action on the lines suggested. And to this end we advise that from time to time, as in his judgment may seem wise, the president call the governors of the states, members of congress and others into conference.

"We agree that further action is advisable to ascertain the present condition of our natural resources and to promote the conservation of the same, and to that end we recommend the appointment by each state of a commission on the conservation of natural resources, to co-operate with each other and with any similar commission on behalf of the federal government.

"We urge the continuation and extension of forest policies adapted to secure the husbanding and renewal of our diminishing timber supply, the prevention of soil erosion, the protection of head waters, and the maintenance of the purity and navigability of our streams. We recognize that the private ownership of forest lands entails responsibilities in the interests of all the people and we favor the enactment of laws looking to the protection and replacement of privately owned forests.

"We recognize in our waters a most valuable asset of the people of the United States and we recommend the enactment of laws looking to the conservation of water resources for irrigation, water supply, power and navigation, to the end that navigable and source streams may be brought under complete control and fully utilized for every purpose. We especially urge on the federal congress the immediate adoption of a wise, active and thorough waterway policy, providing for the prompt improvement of our streams and conservation of their watersheds required for the uses of commerce and the protection of the interests of our people.

"We recommend the enactment of laws looking to the prevention of waste in the mining and extraction of coal, oil, gas and other minerals, with a view to their wise conservation for the use of the people, and to the protection of human life in the mines.

"Let us conserve the foundations of our prosperity."

INVENTORY OF NATURAL RESOURCES.

The national conservation commission through its executive committee and the chiefs of bureaus concerned in Washington, D. C., began in 1908 to gather materials for an inventory of the natural resources of the United States. The facts collected are being compiled by Mr. Henry Gannett.

NATIONAL CONSERVATION COMMISSION.

Appointed by President Roosevelt, June 8, 1908.

Waters—Theodore E. Burton, Ohio, chairman; W. J. McGee, bureau of soils, secretary; Senator Francis G. Newlands, Nevada; Senator William Warner, Missouri; Senator John H. Bankhead, Alabama; F. H. Newell, reclamation service; Gifford Pinchot, forest service; Herbert K. Smith, bureau of corporations; Joseph E. Ransdell, Louisiana; Prof. George F. Swain, Massachusetts; chief of engineers, United States army.

Forests—Senator Reed Smoot, Utah, chairman; Overton W. Price, forest service, secretary; Senator Albert J. Beveridge, Indiana; Senator Charles A. Culberson, Texas; Charles F. Scott, Kansas; Champ Clark, Missouri; J. B. White, Missouri; Prof. Henry S. Graves, Connecticut; William B. Irvine, Wisconsin; Newton C. Blanchard, Louisiana; Charles L. Pack, New Jersey; Gustav Schwab, New York.

President—Walter L. Fisher.

Vice-Presidents—Gustav M. Schwab and John Mitchell.

The members of the Conservation League of America include among other associations, the following: American Civic association, American Federation of Labor, American Forestry association, American Railway association, Farmers' National congress, Interstate Inland waterway, Interstate Mississippi Improvement and Levee association, Lakes-to-the-Gulf Deep Waterways association, Mining Congress of America, Missouri Valley Improvement association, National Association of Real Estate Exchanges, National Civic federation, National Electric Light association, National Fire Protection association, National Geographic society, National Irrigation congress, National Lumber Manufacturers' association, National Rivers and Harbors congress, Ohio Valley Improvement association, Upper Mississippi River Improvement association.

BIRDS OF ILLINOIS.

From investigations made by Prof. S. A. Forbes of the University of Illinois, the total summer population of birds in Illinois numbers about 30,750,000, of which 5,500,000 are English sparrows.

The ten most abundant species are English sparrows, meadow larks, bronzed grackles, mourning doves, dickcissels, red-winged blackbirds, prairie horned larks, flickers, robins and field sparrows.

NONCONTIGUOUS POSSESSIONS OF THE UNITED STATES.

THE PHILIPPINE ISLANDS.

The Philippine Islands were ceded to the United States by Spain Dec. 10, 1898. Maj.-Gen. Merritt was the first military governor. He was succeeded in August, 1899, by Maj.-Gen. E. S. Otis, who in turn was followed in May, 1900, by Maj.-Gen. Arthur MacArthur. The last named remained in office until July 4, 1901, when the military authority was transferred to Gen. A. R. Chaffee. By order of the president Gen. Chaffee was relieved of his duties as military governor July 4, 1902, and the office terminated. The Philippine commission was at the same time made the superior authority. Sept. 2 the islands were divided into three military departments, to be known as the department of Luzon, the department of Visayas and the department of Mindanao.

July 1, 1902, congress passed an act providing temporarily for the government of the Philippines providing for the election by popular vote, two years after a census of the islands had been taken and published, of delegates to an assembly, consisting of not more than 100 members nor less than fifty, apportioned among the provinces as nearly as possible according to population. This assembly should, together with the Philippine commission appointed by the president of the United States, exercise the legislative power heretofore exercised by the commission alone, the members of the commission acting as an upper house and the elected assemblymen as a lower house. The members of the assembly were to hold office two years and annual sessions of the legislature not exceeding ninety days in length were to be held.

The first election was held July 30, 1907, when eighty members of the legislature were chosen, the total vote being 97,803. The first session was formally opened Oct. 16 by William H. Taft, United States secretary of war, the first civil governor of the islands after they came into American possession. Sergio Osmeña was elected president.

OFFICIALS AND SALARIES—The Philippine commission consisted in October, 1908, of James F. Smith of California, Prof. Dean C. Worcester of Michigan, W. Morgan Shuster of the District of Columbia, W. Cameron Forbes of Massachusetts, Newton W. Gilbert of Indiana and Trinidad Pardo de Tavera, Rafael Palma, Gregorio Araneta and Jose R. Luzurraga of the Philippines. The officers in 1908 were:

Governor-General—James F. Smith.
Vice-Governor and Secretary of Commerce and Police—W. Cameron Forbes.
Secretary Interior Department—Dean C. Worcester.
Secretary Finance and Justice—
Secretary Public Instruction—W. M. Shuster.
Executive Secretary—Frank W. Carpenter.
Acting Auditor—William H. Clarke.
Treasurer—Frank A. Branagan.
Superintendent of Education—David P. Barrows.
Director-General of Posts—C. M. Cottoman.
Attorney-General—Ignacio Villamor.
Collector of Customs—George R. Colton.
Chief Justice Supreme Court—Cayetano Arellano.

The governor receives \$20,000 a year (\$15,000 as governor-general) and the other American commissioners receive \$15,500 each (\$10,500 being for their services as heads of departments). The commissioners not heads of departments get \$7,500 each. The salaries of other leading officials are: Executive secretary, \$9,000; assistant executive secretary, \$6,000; auditor, \$6,000; collector of customs, \$6,000; attorney-general, \$6,000; chief-justice Supreme court, \$10,000; associate justices, \$10,000; superintendent of public education, \$6,000; director-general of posts, \$6,000; treasurer, \$7,000.

AREA AND POPULATION—The total land and water area of the Philippine archipelago is 332,965 square miles and the population 7,635,436, according to the census of 1903. Of the inhabitants 6,987,686 are civilized. The population of Manila in 1903 was 219,928. The population of the principal islands was: Bobol, 243,148; Cebu, 592,247; Jolo, 44,718; Leyte, 357,641; Luzon, 3,798,507; Marinduque, 50,601; Mindanao, 499,634, of whom 252,940 are uncivilized; Negros,

460,776 (21,217 uncivilized); Panay, 743,646 (14,933 uncivilized); Samar, 222,690.

PRODUCTS AND CLIMATE—The chief products are hemp, sugar, coffee, tobacco leaf, copra, cigars and indigo. Between 600,000 and 700,000 bales of hemp are exported annually.

The climate of the Philippine Islands is considered excellent for the tropics. The mean temperature in Manila ranges from 77 in January to 83 in May. June, July, August and September are the rainy months. March, April and May the hot and dry, and October, November, December, January and February the temperate and dry.

TRADE WITH THE UNITED STATES—The shipments of merchandise from the United States to the Philippines in the fiscal year ended June 30, 1908, amounted in value to \$11,461,732, as compared with \$8,661,424 in 1907. The principal articles sent were: Breadstuffs, \$490,713; cotton manufactures, \$836,845; iron and steel manufactures, \$3,473,346; wood and manufactures of wood, \$434,711. The imports amounted in value to \$10,164,223, as compared with \$11,510,438 in 1907. The principal articles imported were: Unmanufactured manila, \$8,922,890; sugar, \$669,800; fruits and nuts, \$213,999.

IMPORTS AND EXPORTS—The total imports of the Philippine Islands in the calendar year 1907 amounted to \$30,453,810; total exports, \$35,097,867. Of the exports \$11,607,840 went to Europe and \$9,752,850 to Asiatic countries.

ISLAND OF PORTO RICO.

Porto Rico, according to the decision of the United States Supreme court in the insular cases May 27, 1901, is a territory appurtenant and belonging to the United States, but not a part of the United States within the revenue clause of the constitution. The island was ceded to the United States by Spain Dec. 10, 1898, and was under military rule until the Foraker law went into effect May 1, 1900. (For the provisions of that law see The Daily News Almanac for 1901.) In accordance with the third section of that act, the legislative assembly of Porto Rico having put into operation a system of local taxation to meet the necessities of government, President McKinley on the 25th of July, 1901—the anniversary of the landing of American troops on the island in 1898—proclaimed free trade between the United States and Porto Rico.

GOVERNMENT—Civil government, under the provisions of the Foraker act, was established May 1, 1900. The upper house consists of eleven members, six of whom are "cabinet" officers appointed by the president; the lower house is made up of thirty-five delegates elected by the people every two years. The governor, who is appointed by the president, has practically the same duties as the governor of any other territory of the United States. The present officers are: Governor, Regis H. Post; secretary, William F. Willoughby; treasurer, Samuel D. Gomer; commissioner of education, Edwin Grant Dexter; resident commissioner in the United States, Tullio Larrinaga.

AREA AND POPULATION—The area of Porto Rico is about 3,600 square miles and the population, as shown by the military census of 1899, is 953,243. Of these 941,751 are natives. The whites number 589,426 and the colored 363,817. The colored are subdivided into 304,352 mestizos, 59,390 negroes and 75 Chinese. By departments the population is: Aguadilla, 99,645; Arecibo, 162,308; Bayamon, 147,681; Guayama, 111,986; Humacao, 100,866; Mayaguez, 127,566; Ponce, 203,191. The cities having more than 5,000 inhabitants are: San Juan, 32,048; Ponce, 27,952; Mayaguez, 15,187; Arecibo, 8,009; Aguadilla, 6,425; Yauco, 6,108; Caguas, 5,450; Guayama, 5,334.

COMMERCE—For the year ended June 30, 1908, the total domestic exports from Porto Rico to foreign countries were \$715,843, and to the United States \$25,885,776. Foreign imports amounted to \$3,148,280, and imports from the United States amounted to \$22,360,366. Of the exports Spain took \$842,804; Cuba, \$1,472,801; France, \$677,414; Germany, \$553,328; Austria-Hungary, \$626,578.

The leading articles of export are coffee, oranges, brown sugar and tobacco.

TERRITORY OF HAWAII.

Annexed to the United States Aug. 12, 1896.

Created a territory June 14, 1900.

Governor—Walter F. Frear.

Secretary—Henry E. Cooper.

POPULATION—According to the federal census of 1900 the total population of the territory is 154,001. In 1890 it was 83,990. The only large city is Honolulu, which in 1900 had a population of 39,306. By island divisions the population is as follows: Hawaii, 46,843; Kauai and Nihaui, 20,734; Lanai and Maui, 25,416; Oahu, 58,504; Molokai, 2,504.

COMMERCE WITH THE UNITED STATES—The total value of the shipments of merchandise from Hawaii to the United States for the twelve months ended June 30, 1908, was \$41,595,708. Brown sugar was the principal item, amounting to 1,054,395,987 pounds, valued at \$38,603,138. The other articles of importance were: Coffee, \$157,137; fruits, \$797,186; raw wool, \$58,133; rice, \$140,768. The total value of the shipments of merchandise from the United States to Hawaii was \$14,638,717. The principal articles were: Iron, steel and machinery, \$2,112,933; leather and manufactures of, \$452,834; oils, \$1,150,705; provisions, \$636,536; tobacco, \$458,125; lumber and manufactures of wood, \$855,389; wool, manufactures of, \$302,893; wines and liquors, \$512,727.

TERRITORY OF ALASKA.

Purchased from Russia in March, 1867.

Organized as noncontiguous territory July 27, 1868.

Made a civil and judicial district June 6, 1900.

Governor—W. B. Hoggatt.

AREA AND POPULATION—Area, 577,390 square miles; population in 1900, 63,592; estimated population in 1906, 82,516.

COMMERCE WITH THE UNITED STATES—The total value of the shipments of domestic merchandise from the mainland of the United States to Alaska in the year ended June 30, 1908, was \$15,957,576. The principal articles were: Animals, \$226,692; breadstuffs, \$635,454; manufactures of cotton, \$586,715; eggs, \$341,245; fruits and nuts, \$437,886; manufactures of iron and steel, \$4,070,788; leather manufactures, \$330,207; meat and dairy products, \$1,873,121; wines and liquors, \$32,281; vegetables, \$532,760; wood and manufactures of, \$596,536. Total value of shipments of domestic merchandise from Alaska to the mainland, \$10,917,797. The main articles were: Copper ore, \$474,172; canned salmon, \$3,125,951; whalebone, \$138,989.

GOLD SHIPMENTS—From Alaska to the mainland, \$11,498,717; from the mainland to Alaska, \$447,955 in coin. The total gold and silver shipments, including foreign, to the United States were \$13,848,247.

PANAMA CANAL ZONE.

Acquired by the United States Feb. 26, 1904.

Area, 474 square miles.

TUTUILA.

Acquired by the United States January, 1900.

Area, including Manua and several other small islands, 79 square miles.

Population, about 4,000.

Pango-Pango harbor acquired by United States in 1872.

GUAM.

Ceded to United States by Spain Dec. 10, 1898.

Area, about 200 square miles.

Population, about 9,000.

First American Governor—Capt. R. P. Leary, U.S.N.

CUBA.

GOVERNMENT.—Owing to internal disorders in the island the United States was obliged to intervene and assume charge under the terms of the "Platt amendment" in September, 1906. Since then C. E. Magoon has been acting as governor and order has been maintained by a force of United States troops. The date of their withdrawal has been fixed for Jan. 28, 1909.

Under the constitution the legislative power in ordinary times is exercised by two elective bodies—the house of representatives and the senate, conjointly called congress. The senate is composed of four senators from each of the six provinces, elected for eight years by the provincial councilmen and by a double number of electors constituting together an electoral board.

The house of representatives is composed of one representative for each 25,000 inhabitants or fraction thereof over 12,500, elected for four years by direct vote. One-half of the members of the house are to be elected every two years. The salary of members of congress is \$3,600 a year.

ORGANIZATION OF THE REPUBLIC.—The organization of the republic of Cuba, begun in 1900, was practically completed on the 20th of May, 1902, when the military occupation of the island by the United States came to an end and Gen. Tomas Estrada Palma was inaugurated as the first president.

AREA AND POPULATION.—The total area of Cuba is 35,994 square miles. The population in 1907, when the last census was taken, was 2,028,282.

Population of provinces (1907):

Pinar del Rio	240,751	Santa Clara	457,897
Havana	518,524	Camaguey	117,432
Matanzas	239,866	Orienta	453,782

Population of principal cities (1899):

Cardenas	21,940	Matanzas	36,374
Cienfuegos	30,338	Puerto Principe	25,102
Havana	235,981	Santiago	43,000

About 67 per cent of the population is white.

IMPORTS AND EXPORTS.—The total imports in 1907 amounted to \$104,460,935 and the exports to \$104,172,967. The imports from the United States in 1908 were valued at \$47,161,306 and the exports at \$83,284,692. The principal articles of export are sugar, tobacco and cigars, iron and manganese ore, fruit, coffee, cocoa, molasses and sponges; of import, animals, breadstuffs, coal and

coke, iron and steel, wood, liquor, cotton, chemicals and vegetables.

HAITI.

President, Gen. Nord Alexis. The area of Haiti is 10,204 square miles and the population about 1,425,000. Coffee, cocoa and logwood are the leading articles sold. Exports to the United States in 1908, \$689,045; imports, \$3,649,172.

DESTRUCTIVE FIRE IN CHELSEA, MASS.

Date—April 12, 1908.

Lives lost—15.

Loss—\$6,000,000.

Insurance—\$3,500,000.

Buildings burned—1,000.

Persons made homeless—10,000.

Area burned district—350 acres.

While a strong gale of wind was blowing a fire started in Chelsea, Mass., Sunday forenoon, April 12, 1908, and before the flames were brought under control an area of about 350 acres had been burned over, making 10,000 persons homeless and entailing a loss of \$6,000,000. The local fire department was aided by many engines and men

from Boston, but the flames could not be checked until late in the evening, when they had cut a wide path through the heart of the city for a distance of nearly a mile and a half. Among the buildings destroyed were the city hall, state armory, old and new postoffices, public library, Masonic hall, five schools, two hospitals, sixteen churches and five banks. Seven lives were lost and scores of persons were injured. The fire started in the extreme southwestern part of the city and extended to the extreme southeastern part, passing through the heart of the retail district on the way and consuming some 800 tenements and other dwellings in the residence district.

IMMIGRATION LAW OF THE UNITED STATES.

The immigration law provides for a poll tax of \$4 for every alien entering the United States. This tax is not levied upon aliens who shall enter the United States after an uninterrupted residence of at least one year, immediately preceding such entrance, in Canada, Newfoundland, Cuba or Mexico, nor upon aliens in transit through the United States, nor upon aliens arriving in Guam, Porto Rico or Hawaii.

Whenever the president shall be satisfied that passports issued by any foreign government to its citizens to go to any country other than the United States or to any insular possession of the United States, or to the canal zone, are being used for the purpose of enabling the holders to come to the continental territory of the United States to the detriment of labor conditions therein, the president may refuse to permit such citizens of the country issuing such passports to enter the continental territory of the United States from such other country or from such insular possessions or from the canal zone.

The following classes are excluded from admission into the United States: All idiots, imbeciles, feeble-minded persons, epileptics, insane persons and persons who have been insane within five years; persons who have had two or more attacks of insanity at any time previously; paupers; persons likely to become a public charge; professional beggars; persons afflicted with tuberculosis or with a loathsome or dangerous contagious disease; persons who have committed a felony or other crime involving moral turpitude; polygamists or persons who believe in the practice of polygamy; anarchists or persons who believe in or advocate the overthrow by force or violence of the government of the United States, or of all governments, or of all forms of law, or the assassination of public officials; prostitutes, or women

and girls coming into the United States for any immoral purpose; contract laborers who have been induced to migrate to this country by offers of employment or in consequence of agreements of any kind, verbal or written, express or implied, to perform labor in this country of any kind, skilled or unskilled; any person whose ticket or passage is paid for with the money of another, or who is assisted by others to come, unless it is satisfactorily shown that such person does not belong to one of the foregoing excluded classes and that said ticket or passage was not paid for by any corporation, society, municipality or foreign government, directly or indirectly; all children under 16 years of age unaccompanied by one or both of their parents, at the discretion of the secretary of commerce and labor. Nothing in the act shall exclude, if otherwise admissible, persons convicted of an offense purely political, not involving moral turpitude. Skilled labor may be imported if labor of like kind unemployed cannot be found in this country. The provisions of the law applicable to contract labor shall not be held to exclude professional actors, artists, lecturers, singers, clergymen, professors or colleges or seminaries, persons belonging to any recognized learned profession or persons employed strictly as personal or domestic servants.

It is unlawful to assist or encourage the importation or migration of any alien by promise of employment through advertisements printed in any foreign country. This, however, does not apply to states or territories advertising the inducements they offer to immigration thereto.

All aliens brought to this country in violation of law shall be immediately sent back by the owners of the vessels bringing them. Any alien entering the United States in violation of law and such as become public charges from causes

existing prior to their landing shall be deported at any time within three years after their arrival.

No person who disbelieves in or who is opposed to all organized government, or who is a member of or affiliated with any organization entertaining and teaching such belief in or opposition to all organized government, or who advocates or teaches

the duty, necessity or propriety of the unlawful assaulting or killing of any officer or officers, either of specific individuals or of officers generally, of the government of the United States, or of any other organized government, because of his or their official character, shall be permitted to enter the United States.

WAGES AND RETAIL PRICES OF FOOD IN 1907.

[Bureau of labor report.]

The following table shows for the industries, taken as a whole, the per cent of increase or decrease in wages per hour, hours of labor per week, the purchasing power of wages, etc., in 1907 in the manufacturing and mechanical industries, as compared with the year preceding, back to and including 1890, and as compared with the average for the ten years, 1890 to 1899. Opposite each year in the table is given the per cent of increase or de-

crease (indicated by + or -) in 1907, as compared with the year specified. Thus, for example, in the fourth column, opposite 1890, appears +23.4, indicating that the increase in wages per hour in 1907, as compared with 1890, was 23.4 per cent. In like manner, in the third column, opposite 1890, appears -5.7, indicating that the decrease in the hours of labor in 1907, as compared with 1890, was 5.7 per cent.

ARCTIC AND ANTARCTIC EXPLORATION.

THE PEARY EXPEDITION.

Commander Robert E. Peary sailed from Sydney, N. S., July 17, 1908, on the arctic steamship Roosevelt for the purpose of making another attempt to reach the north pole. The vessel left New York July 6 with all of the party except the leader on board and with provisions for about three years. The commander left a few days later, rejoining the steamer at Cape Breton. The Roosevelt arrived at Cape York July 31 and left Etah, North Greenland, Aug. 17. Before sailing from Sydney, N. S., Commander Peary wrote a letter explaining the plan of the expedition as follows:

"We are leaving Sydney to-day for the north. I shall go north across the Gulf of St. Lawrence through the Strait of Belle Isle; along the southern portion of the Labrador coast; to the west coast of Greenland in the vicinity of Godthaab; then follow the west coast through Davis strait and Baffin bay, and across Melville bay to Cape York, which, if everything goes well, should be reached about the first of August. For some ten days I shall be occupied in the region from Cape York (76 degrees north latitude) to Etah (about 79 degrees north latitude), taking on board my Eskimos with their

dogs and hunting walrus for my meat supply. About the middle of August, after replenishing the coal supply of the Roosevelt from the auxiliary steamer Erik, and putting down a coal depot at Etah, the Roosevelt will part company with the Erik, the latter turning south for home.

"I shall then endeavor to force the Roosevelt through Kane basin, Kennedy channel and Robeson channel, to winter quarters at Cape Sheridan on the north coast of Grant Land. I hope to get my ship to Cape Sheridan not later than Sept. 15. Early in February, 1909, I shall leave the ship with dogs and sledges in the effort to reach the pole across the ice of the central polar sea.

"Returning I shall probably come down upon the northern coast of Greenland, and follow that coast back to the Roosevelt, which should be reached about the end of June, 1909. If the sledging journey has been successful the Roosevelt will then force her way south the latter part of July, and I shall hope to get in touch with the world again in September or October of 1909. Should the effort of the spring of 1909 prove unsuccessful, I have supplies and equipment with which to remain another

year, and make a second attempt in February, 1910."

Peary's scientific assistants are Ross C. Marvin of the department of civil engineering in Cornell university, D. D. McMillan of Worcester, Mass., and George Borup of Yale university.

DANISH GREENLAND EXPEDITION.

News was received in August, 1908, of the death of Mylius Erichsen, leader of the Danish Greenland expedition on the northeast coast of Greenland in November, 1907. With two of his companions, Lieuts. Hagen and Bronlund, he perished at 79 degrees north while making a trial trip over the inland ice. Hagen died Nov. 15, Erichsen Nov. 25 and Bronlund a little later, as was found from his diary, written just before he died. The expedition discovered a group of islands between latitudes 78 and 79 which, with other territory, were taken possession of in the name of Denmark. The surviving members of the party reached Bergen, Norway, Aug. 15, after having been in the arctic regions since June, 1906.

THE COOK EXPEDITION.

Randolph Frank, one of the members of the Cook arctic expedition, returned to St. John's, N. F., early in October, 1908, on the Peary auxiliary steamer Erik. He reported that Dr. Frederick A. Cook, the leader, left his headquarters at Annatok, twenty miles north of Etah, West Greenland, March 2, with eight Eskimos, intending to reach the north pole if possible. May 7 one of the Eskimos returned bringing a letter from Dr. Cook, written at Cape Hubbard, western Ellesmere land, about sixty miles southwest of Cape Columbia, the northernmost part of the arctic mainland. In this letter, dated March 17, the doctor stated that he hoped to return in June, but that in the event that he did not do so Frank was to return home. The latter waited until the ice in Smith sound broke up and then started southward, as he knew it would be impossible for the explorer to return to headquarters, as he had no boat. Cape Hubbard is about 500 miles from the pole.

NATIONAL PARTY PLATFORMS OF 1908.

PEOPLE'S.

Adopted at St. Louis, April 3.

The people's party advocates the issuance of money direct by the government to the people without the intervention of the national banks, to be distributed through federal and internal improvement; the public ownership of railroads and other public utilities; homesteading of land; the parcels post; governmental regulation of corporations by a general law regulating corporations doing an interstate business; initiative and referendum; direct vote for all public officers, with the power of recall; federal statute recognizing the principle of the initiative and referendum; giving the people power of instructing their national representatives in congress; abolition of child labor; the eight-hour day; an employers' liability law; condemnation of federal injunctions and gambling on futures.

UNITED CHRISTIAN.

Reaffirmed at Rock Island, Ill., May 1.

The platform of the united Christian party is based on the ten commandments and the golden rule and favors direct primary elections, the initiative, referendum, recall, uniform marriage and divorce laws, equal rights for men and women, government ownership of coal mines, oil wells and public utilities; the regulation of trusts and the election of the president and vice-president and senators of the United States by the direct vote of the people.

SOCIALIST.

Adopted at Chicago, May 17.

The socialist party, in national convention assembled, again declares itself as the party of the working class, and appeals for the support of all workers of the United States and of all citizens who sympathize with the great and just cause of labor. We are at this moment in the midst of one of those industrial breakdowns that periodically paralyze the life of the nation. The much-boasted era of our national prosperity has been followed by one of general misery. Factories, mills and mines are closed. Millions of men, ready, willing and able to provide the nation with all the necessities and comforts of life, are forced into idleness and starvation. Within recent times the trusts and monopolies have attained an enormous and menacing development. They have acquired the power to dictate the terms upon which we shall be allowed to live. The trusts fix the prices of our bread, meat and sugar, of our coal, oil and clothing, of our raw material and machinery, of all the necessities of life. The present desperate condition of the workers has been made the opportunity for a renewed onslaught on organized labor. The highest courts of the country have within the last year rendered decision after decision depriving the workers of rights which they had won by generations of struggle. The attempt to destroy the Western Federation of Miners, although defeated by the solidarity of organized labor and the socialist movement, revealed the existence of a far-reaching and unscrupulous conspiracy by the ruling class against the organizations of labor. In their efforts to take the lives of the leaders of the miners the conspirators violated state laws and the federal constitution in a manner seldom equaled even in a country so completely dominated by the profit-seeking class as is the United States.

The congress of the United States has shown its contempt for the interests of labor as plainly and unmistakably as have the other branches of government. The laws for which the labor organizations have continually petitioned have failed to pass. Laws ostensibly enacted for the benefit of labor have been distorted against labor. The working class of the United States cannot expect any remedy for its wrongs from the present ruling class or from the dominant parties. So long as a small number of individuals are permitted to control the sources of the nation's wealth for their

private profit in competition with each other and for the exploitation of their fellow men, industrial depressions are bound to occur at certain intervals. No currency reforms or other legislative measures proposed by capitalist reformers can avail against these fatal results of utter anarchy in production. Individual competition leads inevitably to combinations and trusts. No amount of government regulation or of publicity or of restrictive legislation will arrest the natural course of modern industrial development. While our courts, legislatures and executive offices remain in the hands of the ruling classes and their agents the government will be used in the interest of these classes as against the toilers.

Political parties are but the expression of economic class interests. The republican, the democratic and the so-called independence parties and all parties other than the socialist party are financed, directed and controlled by the representatives of different groups of the ruling class. In the maintenance of class government both the democratic and republican parties have been equally guilty. The republican party has had control of the national government and has been directly and actively responsible for these wrongs. The democratic party, while saved from direct responsibility by its political impotence, has shown itself equally subservient to the aims of the capitalist class whenever and wherever it has been in power. The old chattel slave-owning aristocracy of the south, which was the backbone of the democratic party, has been supplanted by a child-slave plutocracy. In the great cities of our country the democratic party is allied with the criminal element of the slums as the republican party is allied with the predatory criminals of the palace in maintaining the interest of the possessing class. The various "reform" movements and parties which have sprung up within recent years are but the clumsy expression of the widespread popular discontent. They are based on an intelligent understanding of the historical development of civilization and of the economic and political needs of our time. They are bound to perish as the numerous middle-class reform movements of the past have perished.

As measures calculated to strengthen the working class in its fight for the realization of this ultimate aim, and to increase its power of resistance against capitalist oppression, we advocate and pledge ourselves and our elected officers to the following programme:

1. The immediate government relief for the unemployed workers by building schools, by reforestation of cutover and waste lands, by reclamation of arid tracts, and the building of canals, and by extending all other useful public works. All persons employed on such works shall be employed directly by the government under an eight-hour workday and at the prevailing union wages. The government shall also loan money to states and municipalities, without interest, for the purpose of carrying on public works. It shall contribute to the funds of labor organizations for the purpose of assisting their unemployed members, and shall take such other measures within its power as will lessen the widespread misery of the workers caused by the misrule of the capitalist class.

2. The collective ownership of railroads, telegraphs, telephones, steamship lines and all other means of social transportation and communication, and all land.

3. The collective ownership of all industries which are organized on a national scale and in which competition has virtually ceased to exist.

4. The extension of the public domain to include mines, quarries, oil wells, forests and water power.

5. The occupancy and use of land to be the sole title to possession. The scientific reforestation of timber lands and the reclamation of swamp lands. The land so reforested or reclaimed to be permanently retained as a part of the public domain.

6. The absolute freedom of press, speech and assemblage.

7. The improvement of the industrial condition of the workers—

- (a) By shortening the workday in keeping with the increased productiveness of machinery.
 - (b) By securing to every worker a rest period of not less than a day and a half in each week.
 - (c) By securing a more effective inspection of workshops and factories.
 - (d) By forbidding the employment of children under 16 years of age.
 - (e) By forbidding the interstate transportation of the products of child labor, of convict labor and of all uninspected factories.
 - (f) By abolishing official charity and substituting in its place compulsory insurance against unemployment, illness, accidents, invalidism, old age and death.
 8. The extension of inheritance taxes, graduated in proportion to the amount of the bequests and to the nearness of kin.
 9. A graduated income tax.
 10. Unrestricted and equal suffrage for men and women, and we pledge ourselves to engage in an active campaign in that direction.
 11. The initiative and referendum, proportional representation and the right of recall.
 12. The abolition of the senate.
 13. The abolition of the power usurped by the Supreme court of the United States to pass upon the constitutionality of legislation enacted by congress. National laws to be repealed or abrogated only by act of congress or by a referendum of the whole people.
 14. That the constitution be made amendable by a majority vote.
 15. The enactment of further measures for general education and for the conservation of health. The bureau of education to be made a department. The creation of a department of public health.
 16. The separation of the present bureau of labor from the department of commerce and labor, and the establishment of a department of labor.
 17. That all judges be elected by the people for short terms, and that the power to issue injunctions shall be curbed by immediate legislation.
 18. The free administration of justice.
- Such measures of relief as we may be able to force from capitalism are but a preparation of the workers to seize the whole powers of government. In order that they may thereby lay hold of the whole system of industry and thus come to their rightful inheritance.

REPUBLICAN.

Adopted at Chicago, June 18.

Once more the republican party, in national convention assembled, submits its cause to the people. This great historic organization that destroyed slavery, preserved the union, restored credit, expanded the national domain, established a sound financial system, developed the industries and resources of the country and gave to the nation her seat of honor in the councils of the world, now meets the new problems of government with the same courage and capacity with which it solved the old.

In this the greatest era of American advancement the republican party has reached its highest service under the leadership of Theodore Roosevelt. His administration is an epoch in American history. In no other period since national sovereignty was won under Washington, or preserved under Lincoln, has there been such mighty progress in those ideals of government which make for justice, equality and fair dealing among men. The highest aspirations of the American people have found a voice. Their most exalted servant represents the best aims and worthiest purposes of all his countrymen. American manhood has been lifted to a nobler sense of duty and obligation. Conscience and courage in public station and higher standards of right and wrong in private life have become cardinal principles of political faith: capital and labor have been brought into closer relations of confidence and interdependence; and the abuse of wealth, the tyranny of power and all the evils of privilege and favoritism have been put to scorn by the simple, manly virtues of justice and fair play.

The great accomplishments of President Roosevelt have been, first and foremost, a brave and im-

partial enforcement of the law, the prosecution of illegal trusts and monopolies, the exposure and punishment of evildoers in the public service, the more effective regulation of the rates and service of the great transportation lines, the complete overthrow of preferences, rebates and discriminations, the arbitration of labor disputes, the amelioration of the condition of wage workers everywhere, the conservation of the natural resources of the country, the forward step in the improvement of the inland waterways and always the earnest support and defense of every wholesome safeguard which has made more secure the guarantees of life, liberty and property.

These are the achievements that will make for Theodore Roosevelt his place in history, but more than all else the great things he has done will be an inspiration to those who have yet greater things to do. We declare our unflinching adherence to the policies thus inaugurated and pledge their continuance under a republican administration of the government.

Under the guidance of republican principles the American people have become the richest nation in the world. Our wealth to-day exceeds that of England and all her colonies and that of France and Germany combined. When the republican party was born the total wealth of the country was \$16,000,000,000. It has leaped to \$110,000,000,000 in a generation, while Great Britain has gathered but \$80,000,000,000 in 500 years. The United States now owns one-fourth of the world's wealth and makes one-third of all modern manufactured products. In the great necessities of civilization, such as coal, the motive power of all activity: iron, the chief basis of all industry; cotton, the staple foundation of all fabrics; wheat, corn and all of the agricultural products that feed mankind, America's supremacy is undisputed. And yet her great natural wealth has been scarcely touched. We have a vast domain of 3,000,000 square miles, literally bursting with latent treasure, still waiting the magic of capital and industry to be converted to the practical uses of mankind: a country rich in soil and climate, in the unharnessed energy of its rivers and in all the varied products of the field, the forest and the factory. With gratitude for God's bounty, with pride in the splendid productiveness of the past and with confidence in the plenty and prosperity of the future, the republican party declares for the principle that in the development and enjoyment of wealth so great and blessings so benign there shall be equal opportunity for all.

Nothing so clearly demonstrates the sound basis upon which our commercial, industrial and agricultural interests are founded, and the necessity of promoting their continued welfare through the operation of republican policies, as the recent safe passage of the American people through a financial disturbance which, if appearing in the midst of democratic rule or the menace of it, might have equaled the familiar democratic panics of the past. We congratulate the people upon this renewed evidence of American supremacy and hail with confidence the signs now manifest of a complete restoration of business prosperity in all lines of trade, commerce and manufacturing.

Since the election of William McKinley in 1896 the people of this country have felt anew the wisdom of intrusting to the republican party through decisive majorities the control and direction of national legislation.

The many wise and progressive measures adopted at recent sessions of congress have demonstrated the patriotic resolve of republican leadership in the legislative department to keep step in the forward march toward better government.

Notwithstanding the indefensible filibustering of a democratic minority in the house of representatives during the last session many wholesome and progressive laws were enacted, and we especially commend the passage of the emergency currency bill, the appointment of the national monetary commission, the employers' and government liability laws, the measures for the greater efficiency of the army and navy, the widows' pension bill, the child labor law for the district of Columbia, the new statutes for the safety of railroad engi-

neers and firemen and many other acts conserving the public welfare.

TARIFF REVISION.

The republican party declares unequivocally for a revision of the tariff by a special session of congress immediately following the inauguration of the next president, and commends the steps already taken to this end in the work assigned to the appropriate committees of congress which are now investigating the operation and effect of existing schedules. In all tariff legislation the true principle of protection is best maintained by the imposition of such duties as will equal the difference between the cost of production at home and abroad, together with a reasonable profit to American industries. We favor the establishment of maximum and minimum rates to be administered by the president under limitations fixed in the law, the maximum to be available to meet discriminations by foreign countries against American goods entering their markets and the minimum to represent the normal measure of protection at home; the aim and purpose of the republican policy being not only to preserve, without excessive duties, that security against foreign competition to which American manufacturers, farmers and producers are entitled, but also to maintain the high standard of living of the wage earners of this country, who are the most direct beneficiaries of the protective system. Between the United States and the Philippines we believe in a free interchange of products with such limitations as to sugar and tobacco as will afford adequate protection to domestic interests.

EMERGENCY CURRENCY.

We approve the emergency measures adopted by the government during the recent financial disturbance, and especially commend the passage by congress at the last session of the law designed to protect the country from a repetition of such stringency. The republican party is committed to the development of a permanent currency system, responding to our greater needs, and the appointment of the national monetary commission by the present congress which will impartially investigate all proposed methods insures the early realization of this purpose. The present currency laws have fully justified their adoption, but an expanding commerce, a marvelous growth in wealth and population, multiplying the centers of distribution, increasing the demand for movement of crops in the west and south, and entailing periodic changes in monetary conditions, disclose the need of a more elastic and adaptable system. Such a system must meet the requirements of agriculturists, manufacturers, merchants and business men generally, must be automatic in operation, minimizing the fluctuations in interest rates, and, above all, must be in harmony with that republican doctrine which insists that every dollar shall be based upon and as good as gold.

POSTAL SAVINGS BANKS.

We favor the establishment of a postal savings bank system for the convenience of the people and the encouragement of thrift.

ANTITRUST LEGISLATION.

The republican party passed the Sherman antitrust law over democratic opposition, and enforced it after democratic dereliction. It has been a wholesome instrument for good in the hands of a wise and fearless administration. But experience has shown that its effectiveness can be strengthened and its real objects better attained by such amendments as will give to the federal government greater supervision and control over, and secure greater publicity in, the management of that class of corporations engaged in interstate commerce having power and opportunity to effect monopolies.

RAILROAD LAWS.

We approve the enactment of the railroad rate law and the vigorous enforcement by the present administration of the statutes against rebates and discriminations, as a result of which the advantages formerly possessed by the large shipper over the small shipper have substantially disappeared, and in this connection we commend the appropriation by the present congress to enable the inter-

state-commerce commission to thoroughly investigate and give publicity to the accounts of interstate railroads. We believe, however, that the interstate-commerce law should be further amended so as to give railroads the right to make and publish traffic agreements subject to the approval of the commission, but maintaining always the principle of competition between naturally competing lines and avoiding the common control of such lines by any means whatsoever. We favor such national legislation and supervision as will prevent the future overissue of stocks and bonds by interstate carriers.

PROTECTION FOR WORKMEN.

The enactment in constitutional form at the present session of congress of the employers' liability law; the passage and enforcement of the safety-appliance statutes, as well as the additional protection secured for engineers and firemen; the reduction in the hours of labor of trainmen and railroad telegraphers; the successful exercise of the powers of mediation and arbitration between interstate railroads and their employes, and the law making a beginning in the policy of compensation for injured employes of the government are among the most commendable accomplishments of the present administration. But there is further work in this direction yet to be done, and the republican party pledges its continued devotion to every cause that makes for safety and the betterment of conditions among those whose labor contributes so much to the progress and welfare of the country.

The same wise policy which has induced the republican party to maintain protection to American labor; to establish an eight-hour day in the construction of all public works; to increase the list of employes who shall have preferred claims for wages under the bankruptcy laws; to adopt a child labor statute for the district of Columbia; to direct an investigation into the condition of working women and children, and later of employes of telephone and telegraph companies engaged in interstate business; to appropriate \$150,000 at the recent session of congress in order to secure a thorough inquiry into the causes of catastrophes and loss of life in the mines, and to amend and strengthen the law prohibiting the importation of contract labor, will be pursued in every legitimate direction within federal authority to lighten the burdens and increase the opportunity for happiness and advancement of all who toil. The republican party recognizes the special needs of wage workers generally, for their well-being means the well-being of all. But more important than all other considerations is that of good citizenship, and we especially stand for the needs of every American, whatever his occupation, in his capacity as a self-respecting citizen.

FEDERAL INJUNCTIONS.

The republican party will uphold at all times the authority and integrity of the courts, state and federal, and will ever insist that their powers to enforce their process and to protect life, liberty and property shall be preserved inviolate. We believe, however, that the rules of procedure in the federal courts with respect to the issuance of the writ of injunction should be more accurately defined by statute and that no injunction or temporary restraining order should be issued without notice, except where irreparable injury would result from delay, in which case a speedy hearing thereafter should be granted.

aiding the farmer.

Among those whose welfare is as vital to the welfare of the whole country as is that of the wage earner is the American farmer. The prosperity of the country rests peculiarly upon the prosperity of agriculture. The republican party during the last twelve years has accomplished extraordinary work in bringing the resources of the national government to the aid of the farmer, not only in advancing agriculture itself but in increasing the conveniences of rural life. Free rural mail delivery has been established; it now reaches millions of our citizens, and we favor its extension until every community in the land receives the full benefits of the postal service. We recognize the social and economic advantages of good country roads, main-

tained more and more largely at public expense, and less and less at the expense of the abutting owner. In this work we commend the growing practice of state aid, and we approve the efforts of the national agricultural department by experiments and otherwise to make clear to the public the best methods of road construction.

RIGHTS OF THE NEGRO.

The republican party has been for more than fifty years the consistent friend of the American negro. It gave him freedom and citizenship. It wrote into the organic law the declarations that proclaim his civil and political rights, and it believes to-day that his noteworthy progress in intelligence, industry and good citizenship has earned the respect and encouragement of the nation. We demand equal justice for all men, without regard to race or color; we declare once more, and without reservation, for the enforcement in letter and spirit of the thirteenth, fourteenth and fifteenth amendments to the constitution, which were designed for the protection and advancement of the negro, and we condemn all devices that have for their real aim his disfranchisement for reasons of color alone, as unfair, un-American and repugnant to the supreme law of the land.

CONSERVATION OF RESOURCES.

We indorse the movement inaugurated by the administration for the conservation of natural resources; we approve all measures to prevent the waste of timber; we commend the work now going on for the reclamation of arid lands, and reaffirm the republican policy of the free distribution of the available areas of the public domain to the landless settler. No obligation of the future is more insistent and none will result in greater blessings to posterity. In line with this splendid undertaking is the further duty, equally imperative, to enter upon a systematic improvement upon a large and comprehensive plan, just to all portions of the country, of the waterways, harbors and great lakes, whose natural adaptability to the increasing traffic of the land is one of the greatest gifts of a benign Providence.

ARMY AND NAVY.

The 60th congress passed many commendable acts increasing the efficiency of the army and navy; making the militia of the states an integral part of the national establishment; authorizing joint maneuvers of army and militia; fortifying new naval bases and completing the construction of coaling stations; instituting a female nurse corps for naval hospitals and ships and adding two new battle ships, ten torpedo-boat destroyers, three steam colliers and eight submarines to the strength of the navy. Although at peace with all the world and secure in the consciousness that the American people do not desire and will not provoke a war with any other country, we nevertheless declare our unalterable devotion to a policy that will keep this republic ready at all times to defend her traditional doctrines and assure her appropriate part in promoting permanent tranquillity among the nations.

PROTECT AMERICANS ABROAD.

We commend the vigorous efforts made by the administration to protect American citizens in foreign lands and pledge ourselves to insist upon the just and equal protection of all our citizens abroad. It is the unquestioned duty of the government to procure for all our citizens, without distinction, the rights of travel and sojourn in friendly countries, and we declare ourselves in favor of all proper efforts tending to that end.

FOREIGN COMMERCE.

Under the administration of the republican party the foreign commerce of the United States has experienced a remarkable growth until it has a present annual valuation of approximately \$3,000,000,000 and gives employment to a vast amount of labor and capital which would otherwise be idle. It has inaugurated, through the recent visit of the secretary of state to South America and Mexico, a new era of pan-American commerce and comity which is bringing us into closer touch with our twenty sister American republics, having a common historical heritage, a republican form of government and of-

fering us a limitless field of legitimate commercial expansion.

THE HAGUE TREATIES.

The conspicuous contributions of American statesmanship to the great cause of international peace, so signally advanced in The Hague conferences, are an occasion for just pride and gratification. At the last session of the senate of the United States eleven Hague conventions were ratified, establishing the rights of neutrals, laws of war on land, restriction of submarine mines, limiting the use of force for the collection of contractual debts, governing the opening of hostilities, extending the application of Geneva principles and, in many ways, lessening the evils of war and promoting the peaceful settlement of international controversies. At the same session twelve arbitration conventions with great nations were confirmed, and extradition, boundary and neutralization treaties of supreme importance were ratified. We indorse such achievements as the highest duty a people can perform and proclaim the obligation of further strengthening the bonds of friendship and good will with all the nations of the world.

MERCHANT MARINE.

We adhere to the republican doctrine of encouragement to American shipping and urge such legislation as will revive the merchant marine prestige of the country, so essential to national defense, the enlargement of foreign trade and the industrial prosperity of our own people.

PENSIONS.

Another republican policy which must be ever maintained is that of generous provision for those who have fought the country's battles and for the widows and orphans of those who have fallen. We commend the increase in the widows' pensions made by the present congress and declare for a liberal administration of all pension laws, to the end that the people's gratitude may grow deeper as the memories of heroic sacrifice grow more sacred with the passing years.

CIVIL SERVICE.

We reaffirm our former declarations that the civil-service laws enacted, extended and enforced by the republican party shall continue to be maintained and obeyed.

We commend the efforts designed to secure greater efficiency in national public health agencies and favor such legislation as will effect this purpose.

In the interest of the great mineral industries of our country we earnestly favor the establishment of a bureau of mines and mining.

ISLAND AFFAIRS.

The American government, in republican hands, has freed Cuba, given peace and protection to Porto Rico and the Philippines under our flag and begun the construction of the Panama canal. The present conditions in Cuba vindicate the wisdom of maintaining between that republic and this imperishable bonds of mutual interest and the hope is now expressed that the Cuban people will soon again be ready to assume complete sovereignty over their land.

In Porto Rico the government of the United States is meeting loyal and patriotic support; order and prosperity prevail and the well-being of the people is in every respect promoted and conserved.

We believe that the native inhabitants of Porto Rico should be at once collectively made citizens of the United States and that all others properly qualified under existing laws residing in said island should have the privilege of becoming naturalized.

In the Philippines insurrection has been suppressed, law established and life and property made secure. Education and practical experience are there advancing the capacity of the people for government, and the policies of McKinley and Roosevelt are leading the inhabitants step by step to an ever increasing measure of home rule.

Time has justified the selection of the Panama route for the great isthmian canal and events have shown the wisdom of securing authority over the zone through which it is to be built. The work is now progressing with a rapidity far beyond expectation, and already the realization of the hopes of centuries has come within the vision of the near future.

NEW MEXICO AND ARIZONA.

We favor the immediate admission of the territories of New Mexico and Arizona as separate states in the union.

LINCOLN CENTENARY.

Feb. 12, 1909, will be the 100th anniversary of the birth of Abraham Lincoln, an immortal spirit whose fame has brightened with the receding years and whose name stands among the first of those given to the world by the great republic. We recommend that this centennial anniversary be celebrated throughout the confines of the nation, by all the people thereof, and especially by the public schools, as an exercise to stir the patriotism of the youth of the land.

PARTY DIFFERENCES.

We call the attention of the American people to the fact that none of the great measures here advocated by the republican party could be enacted and none of the steps forward here proposed could be taken under a democratic administration or under one in which party responsibility is divided. The continuance of present policies, therefore, absolutely requires the continuance in power of that party which believes in them and which possesses the capacity to put them into operation.

Beyond all platform declarations there are fundamental differences between the republican party and its chief opponent which make the one worthy and the other unworthy of public trust.

In history the difference between democracy and republicanism is that the one stood for debased currency, the other for honest currency; the one for free silver, the other for sound money; the one for free trade, the other for protection; the one for the contraction of American influence, the other for its expansion; the one has been forced to abandon every position taken on the great issues before the people, the other has held and vindicated all.

In experience the difference between democracy and republicanism is that one means adversity, while the other means prosperity; one means low wages, the other means high; one means doubt and debt, the other means confidence and thrift.

In principle the difference between democracy and republicanism is that one stands for vacillation and timidity in government, the other for strength and purpose; one stands for obstruction, the other for construction; one promises, the other performs; one finds fault, the other finds work.

The present tendencies of the two parties are even more marked by inherent differences. The trend of democracy is toward socialism, while the republican party stands for a wise and regulated individualism. Socialism would destroy wealth. Republicanism would prevent its abuse. Socialism would give to each an equal right to take; republicanism would give to each an equal right to earn. Socialism would offer an equality of possession which would soon leave no one anything to possess; republicanism would give equality of opportunity which would assure to each his share of a constantly increasing sum of possessions. In line with this tendency, the democratic party of to-day believes in government ownership, while the republican party believes in government regulation. Ultimately, democracy would have the nation own the people, while republicanism would have the people own the nation.

Upon this platform of principles and purposes, reaffirming our adherence to every republican doctrine proclaimed since the birth of the party, we go before the country, asking the support not only of those who have acted with us heretofore but of all our fellow citizens who, regardless of past political differences, unite in the desire to maintain the policies, perpetuate the blessings and make secure the achievements of a greater America.

SOCIALIST LABOR.

Adopted at New York city, July 5.

The socialist labor party at its national convention in New York city, July 2-5, 1908, reaffirmed the platform adopted in 1904. This, in substance, advocates the ending of the present struggle between the capitalist and laboring classes by placing the land and the means of production, transportation

and distribution into the hands of the people as a collective body and substituting the co-operative commonwealth for the present state of planless production, industrial war and social disorder—a commonwealth in which every worker shall have the free exercise and full benefit of his faculties, multiplied by all the modern factors of civilization.

DEMOCRATIC.

Adopted at Denver, July 10.

We, the representatives of the democracy of the United States in national convention assembled, reaffirm our belief in, and pledge our loyalty to, the principles of the party.

We rejoice at the increasing signs of an awakening throughout the country. The various investigations have traced graft and political corruption to the representatives of predatory wealth, and laid bare the unscrupulous methods by which they have debauched elections and preyed upon a defenseless public through the subservient officials whom they have raised to place and power.

The conscience of the nation is now aroused and will free the government from the grip of those who have made it a business asset of the favor-seeking corporations; it must become again a people's government, and be administered in all its departments according to the Jeffersonian maxim of "equal rights to all and special privileges to none."

"Shall the people rule?" is the overshadowing issue which manifests itself in all the questions now under discussion.

ECONOMY DEMANDED.

The republican congress in the session just ended has made appropriations amounting to \$1,008,000,000, exceeding the total expenditures of the past fiscal year by \$90,000,000, and leaving a deficit of more than \$60,000,000 for the fiscal year. We denounce the needless waste of the people's money which has resulted in this appalling increase as a shameful violation of all prudent considerations of government, as no less than a crime against the millions of working men and women from whose earnings the great proportion of these colossal sums must be extorted through excessive tariff exactions and other indirect methods. It is not surprising that, in the face of this shocking record, the republican platform contains no reference to economical administration or promise thereof in the future. We demand that a stop be put to this frightful extravagance and insist upon the strictest economy in every department compatible with frugal and efficient administration.

Coincident with the enormous increase in expenditures is a like addition to the number of officeholders. During the last year 23,784 were added, costing \$16,156,000, and in the last six years of the republican administration the total number of new offices created, aside from many commissions, has been 99,319, entailing an additional expenditure of nearly \$70,000,000, as against only 10,279 new offices created under the Cleveland and McKinley administrations, which involved an expenditure of only \$6,000,000. We denounce this great and growing increase in the number of officeholders as not only unnecessary and wasteful but also as clearly indicating a deliberate purpose on the part of the administration to keep the republican party in power at public expense by thus increasing the number of its retainers and dependents. Such procedure we declare to be no less dangerous and corrupt than the open purchase of votes at the polls.

DOMINATION OF SPEAKER.

The house of representatives was designed by the fathers of the constitution to be the popular branch of our government, responsive to the public will.

The house of representatives, as controlled in recent years by the republican party, has ceased to be a deliberative and legislative body, responsive to the will of a majority of its members, but has come under the absolute domination of the speaker, who has entire control of its deliberations and powers of legislation.

We have observed with amazement the popular branch of our federal government helpless to obtain either the consideration or enactment of measures desired by a majority of its members.

Legislative control becomes a failure when

one member in the person of the speaker is more powerful than the entire body.

We demand that the house of representatives shall again become a deliberative body, controlled by a majority of the people's representatives and not by the speaker, and we pledge ourselves to adopt such rules and regulations to govern the house of representatives as will enable a majority of its members to direct its deliberations and control legislation.

We condemn, as a violation of the spirit of our institutions, the action of the present chief executive in using the patronage of his high office to secure the nomination for the presidency of one of his cabinet officers. A forced succession in the presidency is scarcely less repugnant to public sentiment than is life tenure in that office. No good intention on the part of the executive and no virtue in the one selected can justify the establishment of a dynasty. The right of the people to freely select their officials is inalienable and cannot be delegated.

CAMPAIGN CONTRIBUTIONS.

We demand federal legislation forever terminating the partnership which has existed between corporations of the country and the republican party under the expressed or implied agreement that in return for the contribution of great sums of money wherewith to purchase elections they should be allowed to continue substantially unmolested in their efforts to encroach upon the rights of the people.

Any reasonable doubt as to the existence of this relation has been forever dispelled by the sworn testimony of witnesses examined in the insurance investigation in New York, and the open admission of a single individual, unchallenged by the republican national committee, that he himself at the personal request of the republican candidate for the presidency, raised over a quarter of a million dollars to be used in a single state during the closing hours of the last campaign. In order that this practice shall be stopped for all time, we demand the passage of a statute punishing with imprisonment any officer of a corporation who shall either contribute on behalf of, or consent to the contribution by, a corporation of any money or thing of value to be used in furthering the election of a president or vice-president of the United States or of any member of the congress thereof.

We denounce the republican party, having complete control of the federal government, for its failure to pass the bill introduced in the last congress to compel the publication of the names of contributors and the amounts contributed toward campaign funds, and point to the evidence of the insincerity of republican leaders when they sought by an absolutely irrelevant and impossible amendment to defeat the passage of the bill. As a further evidence of their intention to conduct their campaign in the coming contest with vast sums of money wrested from favor-seeking corporations, we call attention to the fact that the recent republican national convention at Chicago refused when the plank was presented to it to declare against such practices.

We pledge the democratic party to the enactment of a law preventing any corporation contributing to a campaign fund and any individual from contributing an amount above a reasonable maximum and providing for the publication before election of all such contributions above a reasonable minimum.

STATES' RIGHTS.

Believing, with Jefferson, in "the support of the state governments in all their rights as the most competent administration for our domestic concerns and the surest bulwark against antirepublican tendencies," and in "the preservation of the general government in its whole constitutional vigor as the sheet anchor of our peace at home and safety abroad," we are opposed to the centralization implied in these suggestions, now frequently made, that the powers of the general government should be extended by judicial construction. There is no twilight zone between the nation and the state in which exploiting interests can take refuge from both; and it is as necessary that the federal government shall exercise the powers delegated to it as it is that the state governments shall use the authority reserved to them, but we insist that federal remedies for the regulation of interstate com-

merce and for the prevention of private monopoly shall be added to, not substituted for, state remedies.

TARIFF REFORM.

We welcome the belated promise of tariff reform now affected by the republican party in tardy recognition of the righteousness of the democratic position on this question; but the people cannot safely intrust the execution of this important work to a party which is so deeply obligated to the highly protected interests as is the republican party. We call attention to the significant fact that the promised relief was postponed until after the coming election—an election to succeed in which the republican party must have that same support from the beneficiaries of the high protective tariff as it has always heretofore received from them; and to the further fact that during years of uninterrupted power no action whatever has been taken by the republican congress to correct the admittedly existing tariff inequities.

We favor immediate revision of the tariff by the reduction of import duties. Articles entering into competition with trust-controlled products should be placed upon the free list, and material reductions should be made in the tariff upon the necessities of life, especially upon articles competing with such American manufactures as are sold abroad more cheaply than at home; and graduate reductions should be made in such other schedules as may be necessary to restore the tariff to a revenue basis.

Existing duties have given to the manufacturers of paper a shelter behind which they have organized combinations to raise the price of pulp and of paper, thus imposing a tax upon the spread of knowledge.

We demand the immediate repeal of the tariff on wood pulp, print paper, lumber, timber and logs and that these articles be placed upon the free list.

ANTITRUST LEGISLATION.

A private monopoly is indefensible and intolerable. We, therefore, favor the vigorous enforcement of the criminal law against guilty trust magnates and officials, and demand the enactment of such additional legislation as may be necessary to make it impossible for a private monopoly to exist in the United States. Among the additional remedies we specify three: First, a law preventing a duplication of directors among competing corporations; second, a license system which will, without abridging the right of each state to create corporations, or its right to regulate as it will foreign corporations doing business within its limits, make it necessary for a manufacturing or trading corporation engaged in interstate commerce to take out a federal license before it shall be permitted to control as much as 25 per cent of the product in which it deals, the license to protect the public from watered stock and to prohibit the control by such corporations of more than 50 per cent of the total amount of any product consumed in the United States; and third, a law compelling such licensed corporation to sell to all purchasers in all parts of the country on the same terms, after making due allowance for cost of transportation.

RAILROAD REGULATION.

We assert the right of congress to exercise complete control over interstate commerce and the right of each state to exercise like control over commerce within its borders.

We demand such enlargement of the powers of the interstate-commerce commission as may be necessary to compel railroads to perform their duties as common carriers and prevent discrimination and extortion.

We favor the efficient supervision and rate regulation of railroads engaged in interstate commerce, and to this end we recommend the valuation of railroads by the interstate-commerce commission, such valuation to take into consideration the physical value of the property, the original cost, cost of production and all elements of value that will render the valuation fair and just.

We favor such legislation as will prohibit the railroads from engaging in business which brings them into competition with their shippers, also leg-

isolation preventing the overissue of stocks and bonds by interstate railroads and legislation which will assure such reduction in transportation rates as conditions will permit, care being taken to avoid reductions that would compel a reduction of wages, prevent adequate service or do injustice to legitimate investments. We heartily approve the laws prohibiting the pass and the rebate, and we favor any further necessary legislation to restrain, control and prevent such abuses.

We favor such legislation as will increase the power of the interstate-commerce commission, giving to it the initiative with reference to rates and transportation charges put into effect by the railroad companies, and permitting the interstate-commerce commission on its own initiative to declare a rate illegal and as being more than should be charged for such service. That the present law relating thereto is inadequate by reason of the fact that the interstate-commerce commission is without power to fix or investigate a rate until complaint has been made to it by the shipper.

We further declare in favor of a law providing that all agreements of traffic or other associations of railway agents affecting interstate rates, service or classification shall be unlawful unless filed with and approved by the interstate-commerce commission.

We favor the enactment of a law giving to the interstate-commerce commission the power to inspect proposed railroad tariff rates or schedules before they shall take effect, and, if they be found to be unreasonable, to initiate an adjustment thereof.

BANKING AND CURRENCY.

The panic of 1907, coming without any legitimate excuse, when the republican party had for a decade been in complete control of the federal government, furnishes additional proof that it is either unwilling or incompetent to protect the interests of the general public. It has so linked the country to Wall street that the sins of the speculators are visited upon the whole people. While refusing to rescue the wealth producers from spoliation at the hands of the stock gamblers and speculators in farm products, it has deposited treasury funds, without interest and without competition, in favorite banks. It has used an emergency for which it is largely responsible to force through congress a bill changing the basis of bank currency and inviting market manipulation, and has failed to give to the 15,000,000 depositors of the country protection in their savings.

We believe that in so far as the needs of commerce require an emergency currency, such currency should be issued, controlled by the federal government and loaned on adequate security to national and state banks. We pledge ourselves to legislation under which the national banks shall be required to establish a guaranty fund for the prompt payment of the depositors of any insolvent national bank under an equitable system which shall be available to all state banking institutions wishing to use it.

We favor a postal savings bank, if the guaranteed bank cannot be secured, and believe that it should be so constituted as to keep the deposited money in the community where the depositors live. But we condemn the policy of the republican party in proposing postal savings banks under a plan of conduct by which they will aggregate the deposits of rural communities and redeposit the same while under government charge in the banks of Wall street, thus depleting the circulating medium of the producing regions and unjustly favoring the speculative markets.

INCOME TAX.

We favor an income tax as part of our revenue system, and we urge the submission of a constitutional amendment specifically authorizing congress to levy and collect a tax upon individual and corporate incomes, to the end that wealth may bear its proportionate share of the burdens of the federal government.

LABOR AND INJUNCTIONS.

The courts of justice are the bulwark of our liberties, and we yield to none in our purpose to

maintain their dignity. Our party has given to the bench a long line of distinguished judges, who have added to the respect and confidence in which this department must be jealously maintained. We resent the attempt of the republican party to raise false issues respecting the judiciary. It is an unjust reflection upon a great body of our citizens to assume that they lack respect for the courts. It is the function of the courts to interpret the laws which the people create, and if the laws appear to work economic, social or political injustice it is our duty to change them. The only basis upon which the integrity of our courts can stand is that of unswerving justice and protection of life, personal liberty and property. If judicial processes may be abused we should guard them against abuse.

Experience has proven the necessity of a modification of the present law relating to injunctions, and we reiterate the pledges of our national platforms of 1896 and 1904 in favor of the measure which passed the United States senate in 1896, but which a republican congress has ever since refused to enact, relating to contempt in federal courts and providing for trial by jury in cases of indirect contempt. Questions of judicial practice have arisen especially in connection with industrial disputes. We deem that parties to all judicial proceedings should be treated with rigid impartiality and that injunctions should not be issued in any case in which injunctions would not issue if no industrial dispute were involved.

The expanding organization of industry makes it essential that there should be no abridgment of the right of wage earners and producers to organize for the protection of wages and the improvement of labor conditions to the end that such labor organizations and their members should not be regarded as illegal combinations in restraint of trade.

We favor the eight-hour day on all government work.

We pledge the democratic party to the enactment of a law by congress, as far as the federal jurisdiction extends, for a general employers' liability act covering injury to body or loss of life of employees.

We pledge the democratic party to the enactment of a law creating a department of labor, represented separately in the president's cabinet, which department shall include the subject of mines and mining.

MERCHANT MARINE.

We believe in the upbuilding of the American and merchant marine without new or additional burdens upon the people and without bounties from the public treasury.

THE NAVY.

The constitutional provision that a navy shall be provided and maintained means an adequate navy, and we believe that the interests of this country would be best served by having a navy sufficient to defend the coasts of this country and protect American citizens wherever their rights may be in jeopardy.

PROTECTION OF CITIZENS.

We pledge ourselves to insist upon the just and lawful protection of our citizens at home and abroad and to use all proper methods to secure for them, whether native born or naturalized, and without distinction of race or creed, the equal protection of law and the enjoyment of all rights and privileges open to them under our treaties; and if, under existing treaties, the right of travel and sojourn is denied to American citizens or recognition is withheld from American passports by any countries on the ground of race or creed, we favor prompt negotiations with the governments of such countries to secure the removal of these unjust discriminations. We demand that all over the world a duly authorized passport issued by the government of the United States to an American citizen shall be proof of the fact that he is an American citizen and shall entitle him to the treatment due him as such.

CIVIL SERVICE.

The laws pertaining to the civil service should be honestly and rigidly enforced to the end that merit and ability shall be the standard of appointment

and promotion rather than services rendered to a political party.

PENSIONS.

We favor a generous pension policy, both as a matter of justice to the surviving veterans and their dependents and because it tends to relieve the country of the necessity of maintaining a large standing army.

NATIONAL HEALTH BUREAU.

We advocate the organization of all existing national public health agencies into a national bureau of public health, with such power over sanitary conditions connected with factories, mines, tenements, child labor and such other subjects as are properly within the jurisdiction of the federal government and do not interfere with the power of the states controlling public health agencies.

The democratic party favors the extension of agricultural, mechanical and industrial education. We, therefore, favor the establishment of district agricultural experiment stations, with secondary agricultural and mechanical colleges in the several states.

DIRECT VOTE FOR SENATORS.

We favor the election of United States senators by direct vote of the people, and regard this reform as the gateway to other national reforms.

OKLAHOMA.

We welcome Oklahoma to the sisterhood of states and heartily congratulate her on the auspicious beginning of a great career.

ARIZONA AND NEW MEXICO.

The national democratic party has for the last sixteen years labored for the admission of Arizona and New Mexico as separate states of the federal union, and, recognizing that each possesses every qualification to successfully maintain separate state governments, we favor the immediate admission of these territories as separate states.

PUBLIC LANDS.

The establishment of rules and regulations, if any such are necessary, in relation to free grazing upon the public lands outside of forest or other reservations, until the same shall eventually be disposed of, should be left to the people of the states respectively in which such lands may be situated.

WATERWAYS.

Water furnishes the cheapest means of transportation and the national government, having the control of navigable waters, should improve them to their fullest capacity. We earnestly favor the immediate adoption of a liberal and comprehensive plan for improving every water course in the union which is justified by the needs of commerce, and, to secure that end, we favor, when practicable, the connection of the great lakes with the navigable rivers and with the gulf, through the Mississippi river, and the navigable rivers with each other, and the rivers, bays and sounds of our coasts with each other by artificial canals, with a view to perfecting a system of inland waterways, to be navigated by vessels of standard draft.

We favor the co-ordination of the various services of the government connected with waterways in one service, for the purpose of aiding in the completion of such a system of inland waterways, and we favor the creation of a fund ample for continuous work, which shall be conducted under the direction of a commission of experts to be authorized by law.

We favor federal aid to state and local authorities in the construction and maintenance of post roads.

We pledge the democratic party to the enactment of a law to regulate under the jurisdiction of the interstate-commerce commission the rates and services of telegraph and telephone companies engaged in the transmission of messages between the states.

NATIONAL RESOURCES.

We repeat the demand for internal development and for the conservation of our natural resources contained in previous platforms, the enforcement of which Mr. Roosevelt has vainly sought from a reluctant party; and to that end we insist upon the preservation, protection and replacement of needed

forests, the preservation of the public domain for homeseekers, the protection of the nation's natural resources in timber, coal, iron and oil against monopolistic control, the development of our waterways for navigation and every other useful purpose, including the irrigation of arid lands, the reclamation of swamp lands, the clarification of streams, the development of water power and the preservation of electric power generated by this natural force from the control of monopoly; and to such end we urge the exercise of all powers, national, state and municipal, both separately and in co-operation.

We insist upon a policy of administration of our forest reserves which shall relieve it of the abuses which have arisen thereunder, and which shall, as far as practicable, conform to the police regulations of the several states wherein the reserves are located, which shall enable homesteaders as of right to occupy and acquire title to all portions thereof which are especially adapted to agriculture and which shall furnish a system of timber sales available as well to the private citizen as to the larger manufacturer and consumer.

HAWAII AND PHILIPPINES.

We favor the application of principles of the land laws of the United States to our newly acquired territory, Hawaii, to the end that the public lands of that territory may be held and utilized for the benefit of bona fide homesteaders.

We condemn the experiment in imperialism as an inexcusable blunder which has involved us in an enormous expense, brought us weakness instead of strength, and laid our nation open to the charge of abandoning a fundamental doctrine of self-government. We favor an immediate declaration of the nation's purpose to recognize the independence of the Philippine islands as soon as a stable government can be established, such independence to be guaranteed by us as we guarantee the independence of Cuba, until the neutralization of the islands can be secured by treaty with other powers. In recognizing the independence of the Philippines our government should retain such land as may be necessary for coaling stations and naval bases.

ALASKA AND PORTO RICO.

We demand for the people of Alaska and Porto Rico the full enjoyment of the rights and privileges of a territorial form of government, and that the officials appointed to administer the government of all our territories and the district of Columbia should be thoroughly qualified by previous bona fide residence.

PANAMA CANAL.

We believe the Panama canal will prove of great value to our country and favor its speedy completion.

PAN-AMERICAN RELATIONS.

The democratic party recognizes the importance and advantage of developing closer ties of pan-American friendship and commerce between the United States and her sister nations of Latin America and favors the taking of such steps, consistent with democratic policies, for better acquaintance, greater mutual confidence and larger exchange of trade, as will bring lasting benefit not only to the United States but to this group of American republics having constitutions, forms of government, ambitions and interests akin to our own.

ORIENTAL IMMIGRATION.

We favor full protection, by both national and state governments within their respective spheres, of all foreigners residing in the United States under treaty, but we are opposed to the admission of Asiatic immigrants who cannot be amalgamated with our population, or whose presence among us would raise a race issue and involve us in diplomatic controversies with oriental powers.

PATENTS.

We believe that where an American citizen holding a patent in a foreign country is compelled to manufacture under his patent within a certain time, similar restrictions should be applied in this country to the citizens or subjects of such country.

DEMOCRATIC PARTY.

The democratic party stands for democracy; the republican party has drawn to itself all that is aristocratic and plutocratic.

The democratic party is the champion of civil rights and opportunities to all; the republican party is the party of privilege and private monopoly. The democratic party listens to the voice of the whole people and gauges progress by the prosperity and advancement of the average man; the republican party is subservient to the comparatively few who are the beneficiaries of governmental favoritism. We invite the co-operation of all, regardless of previous political affiliation or past differences, who desire to preserve a government of the people, by the people and for the people, and who favor such an administration of the government as will insure, as far as human wisdom can, that each citizen shall draw from society a reward commensurate with his contribution to the welfare of society.

PROHIBITIONIST.

Adopted at Columbus, O., July 16.

The prohibition party of the United States, assembled in convention at Columbus, O., July 15-16, 1908, expressing gratitude to Almighty God for the victories of our principles in the past, for encouragement at present and for confidence in early and triumphant success in the future, makes the following declaration of principles and pledges their enactment into law when placed in power:

1. The submission by congress to the several states of an amendment to the federal constitution prohibiting the manufacture, sale, importation, exportation or transportation of alcoholic liquors for beverage purposes.
 2. The immediate prohibition of the liquor traffic for beverage purposes in the district of Columbia, in the territories and all places over which the national government has jurisdiction; the repeal of the internal revenue tax on alcoholic liquors and the prohibition of interstate traffic therein.
 3. The election of United States senators by direct vote of the people.
 4. Equitable graduated income and inheritance taxes.
 5. The establishment of postal savings banks and the guaranty of deposits in banks.
 6. The regulation of all corporations doing an interstate-commerce business.
 7. The creation of permanent tariff commissions.
 8. The strict enforcement of law instead of official tolerance and practical license of the social evil which prevails in many of our cities, with its unspeakable traffic in girls.
 9. Uniform marriage and divorce laws.
 10. An equitable and constitutional employers' liability act.
 11. Court review of postoffice department decisions.
 12. The prohibition of child labor in mines, workshops and factories.
 13. Legislation basing suffrage only upon intelligence and ability to read and write the English language.
 14. The preservation of the mineral and forest resources of the country and the improvement of the highways and waterways.
- Believing in the righteousness of our cause and in the final triumph of our principles and convinced of the unwillingness of the republican and democratic parties to deal with these issues, we invite to full party fellowship all citizens who are with us agreed.

"INDEPENDENCE.

Adopted at Chicago, July 28.

We, independent American citizens, representing the independence party in forty-four states and two territories, have met in national convention to nominate, absolutely independent of all other political parties, candidates for president and vice-president of the United States.

Our action is based upon a determination to wrest the conduct of public affairs from the hands of selfish interests, political tricksters and corrupt bosses, and make the government, as the founders intended, an agency for the common good.

At a period of unexampled national prosperity and promise, a staggering blow was dealt to legitimate business by the unmolested practice of stock

watering and dishonest financing. Multitudes of defenseless investors, thousands of honest business men and an army of idle workmen are paying the penalty. Year by year, fostered by wasteful and reckless governmental extravagance, by the manipulation of trusts and by a privilege-creating tariff, the cost of living mounts higher and higher. Day by day the control of the government drifts further away from the people and more firmly into the grip of machine politicians and party bosses.

The republican and democratic parties are not only responsible for these conditions, but are committed to their indefinite continuance. Prodigal of promises, they are so barren of performance that to a new party of independent voters the country must look for the establishment of a new policy and a return to genuine popular government.

Our object is not to introduce violent innovations or startlingly new theories. We of the independence party look back, as Lincoln did, to the declaration of independence as the fountain head of all political inspiration. It is not our purpose to attempt to revolutionize the American system of government, but to restore the action of the government to the principles of Washington and Jefferson and Lincoln. It is not our purpose either to effect a radical change in the American system of government, but to conserve for the citizens of the United States their privileges and liberties won for them by the founders of this government and to perpetuate the principles and policies upon which the nation's greatness has been built.

The independence party is, therefore, a conservative force in American politics, devoted to the preservation of American liberty and independence, to honesty in elections, to opportunity in business and to equality before the law. Those who believe in the independence party and work with it are convinced that a genuine democracy should exist; that a true republican form of government should continue; that the power of government should rest with the majority of the people, and that the government should be conducted for the benefit of the whole citizenship, rather than for the special advantage of any particular class.

INITIATIVE AND REFERENDUM.

As of first importance, in order to restore the power of government to the people, to make their will supreme in the primaries, in the elections and in the control of public officials after they have been elected, we declare for direct nominations, the initiative and referendum and the right of recall.

It is idle to cry out against the evil of bossism while we perpetuate a system under which the boss is inevitable. The destruction of an individual boss is of little value. The people in their politics must establish a system which will eliminate not only an objectionable boss but the system of bossism. Representative government is made a mockery by the system of modern party conventions dominated by bosses and controlled by cliques. We demand the natural remedy of direct nominations by which the people not only elect but, which is far more important, select their representatives.

We believe in the principles of the initiative and referendum and we particularly demand that no franchise grant go into operation until the terms and conditions have been approved by popular vote in the locality interested.

We demand for the people the right to recall public officials from the public service. The power to make officials resides in the people and in them also should reside the power to unmake and remove from office any official who demonstrates his unfitness or betrays the public trust.

MONEY AT ELECTIONS.

Of next importance in destroying the power of selfish special interests and the corrupt political bosses whom they control is to wrest from their hands their main weapon, the corruption fund. We demand severe and effective legislation against all forms of corrupt practices at elections and advocate prohibiting the use of any money at elections except for meetings, literature and the necessary traveling expenses of candidates. Bidding for votes, the republican and democratic candidates are making an outcry about publicity of contribu-

tions, although both the republican and democratic parties have for years consistently blocked every effort to pass a corrupt-practices act. Publicity of contributions is desirable and should be required, but the main matter of importance is the use to which contributions are put. We believe that the dishonest use of money in the past, whether contributed by individuals or by corporations, has been chiefly responsible for the corruption which has undermined our system of popular government.

We demand honest conduct of public office and businesslike and economical administration of public affairs, and we condemn the gross extravagance of federal administration and its appalling annual increase in appropriations. Unnecessary appropriations mean unnecessary taxes and unnecessary taxes, whether direct or indirect, are paid by the people and add to the ever increasing cost of living.

CAPITAL AND LABOR.

We condemn the evil of overcapitalization. Modern industrial conditions make the corporation and stock company a necessity, but overcapitalization in corporations is as harmful and criminal as is personal dishonesty in an individual. Compelling the payment of dividends upon great sums that have never been invested, upon masses of watered stock not justified by the property, overcapitalization prevents the better wages, the better public service and the lower cost that should result from American inventive genius and that wide organization which is replacing costly individual competition. The collapse of dishonestly inflated enterprises robs investors, closes banks, destroys confidence and engenders panics. The independence party advocates as a primary necessity for sounder business conditions and improved public service the enactment of laws, state and national, to prevent watering of stock, dishonest issues of bonds and other forms of corporation frauds.

We denounce the so-called labor planks of the republican and democratic platforms as political buncombe and contemptible claptrap unworthy of national parties claiming to be serious and sincere.

INJUNCTIONS.

The republican declaration that "no injunction or temporary restraining order should be issued without notice, except where irreparable injury would result from delay," is empty verbiage, for showing of irreparable injury can always be made and is always made in ex parte affidavits.

The democratic declaration that "injunctions should not be issued in any case in which injunctions should not issue if no industrial dispute were involved" is meaningless and worthless.

Such insincere and meaningless declarations place a low estimate upon the intelligence of the average American workman and exhibit either ignorance or indifference to the real interests of labor.

The independence party condemns the arbitrary use of the writ of injunction and contempt proceedings as a violation of the fundamental American right of trial by jury.

From the foundation of our government down to 1872 the federal judiciary act prohibited the issue of any injunction without reasonable notice until after a hearing. We assert that in all actions growing out of a dispute between employers and employees concerning terms or conditions of employment no injunction should issue until after a trial upon the merits, that such trial should be had before a jury and that in no case of alleged contempt should any person be deprived of liberty without a trial by jury.

The independence party believes that the distribution of wealth is as important as the creation of wealth, and indorses those organizations among farmers and workers which tend to bring about a just distribution of wealth through good wages for workers and good prices for farmers and which protect the employer and the consumer through equality of price for labor and for product, and we favor such legislation as will remove them from the operation of the Sherman antitrust law.

We indorse the eight-hour day, favor its application to all government employees and demand the enactment of laws requiring that all work done for the government, whether federal or state, and whether done directly or indirectly through con-

tractors or subcontractors, shall be done on an eight-hour basis.

We favor the enactment of a law condemning as illegal any combination or conspiracy to blacklist employees.

We demand protection for workmen through enforced use of standard safety appliances and provision of hygienic conditions in the operation of factories, railways, mills, mines and all industrial undertakings.

We advocate state and federal inspection of railways to secure a greater safety for railway employees and for the traveling public.

We call for the enactment of stringent laws fixing employers' liabilities and a rigid prohibition of child labor through co-operation between the state governments and the national government.

We condemn the manufacture and sale of prison-made goods in the open market in competition with free labor manufactured goods. We demand that convicts be employed directly by the different states in the manufacture of products for use in state institutions and in making good roads, and in no case shall convicts be hired out to contractors or subcontractors.

We favor the creation of a department of labor, including mines and mining, the head of which shall be a member of the president's cabinet.

The great abuses of grain inspection, by which the producers are plundered, demand immediate and vigorous correction. To that end we favor federal inspection under a strict civil-service law.

CURRENCY AND TARIFF.

The independence party declares that the right to issue money is inherent in the government and it favors the establishment of a central governmental bank through which the money so issued shall be put into general circulation.

We demand a revision of the tariff, not by the friends of the tariff, but by the friends of the people, and declare for a gradual reduction of tariff duties with just consideration for the rights of the consuming public and of established industry. There should be no protection for oppressive trusts which sell cheaply abroad and take advantage of the tariff at home to crush competition, raise prices, control production and limit work and wages.

RAILROADS AND MONOPOLIES.

The railroads must be kept open to all upon exactly equal terms. Every form of rebate and discrimination in railroad rates is a crime against business and must be stamped out. We demand adequate railroad facilities and advocate a bill empowering shippers in time of need to compel railroads to provide sufficient cars for freight and passenger traffic and other railroad facilities through summary appeal to the courts. We favor the creation of an interstate-commerce court, whose sole function it shall be to review speedily and enforce summarily the orders of the interstate-commerce commission. The interstate-commerce commission should have the power to initiate investigation into the reasonableness of rates and practices, and no increase in rates should be put into effect until opportunity for such investigation is afforded. The interstate-commerce commission should proceed at once with a physical valuation of railroads engaged in interstate commerce.

We believe that legitimate organizations in business, designed to secure an economy of operation and increased production, are beneficial wherever the public participates in the advantages which result.

We denounce all combinations for restraint of trade and for the establishment of monopoly in all products of labor and declare that such combinations are not combinations for production, but for extortion, and that activity in this direction is not industry, but robbery.

In cases of infractions of the antitrust law or of the interstate-commerce act, we believe in the enforcement of a prison penalty against the guilty and responsible individuals controlling the management of the offending corporations, rather than a fine imposed upon stockholders.

PUBLIC OWNERSHIP.

We advocate the extension of the principle of public ownership of public utilities, including rail-

roads, as rapidly as municipal, state or national governments shall demonstrate ability to conduct public utilities for the public benefit. We favor specifically government ownership of the telegraphs, such as prevails in every other civilized country in the world, and demand as an immediate measure that the government shall purchase and operate the telegraphs in connection with the postal service.

POSTAL SAVINGS BANKS.

The parcels post system should be rapidly and widely extended, and government postal savings banks should be established where the people's deposits will be secure, the money to be loaned to the people in the locality of the several banks and at a rate of interest to be fixed by the government.

We favor the immediate development of a national system of good roads connecting all states and national aid to states in the construction and maintenance of post roads.

We favor a court review of the censorship and arbitrary rulings of the postoffice department.

STATEHOOD.

We favor the admission of Arizona and New Mexico to separate statehood.

We advocate such legislation, both state and national, as will suppress the bucket shop and prohibit the fictitious selling of farm products for future delivery.

We favor the creation of a national department of public health to be presided over by a member of the medical profession, this department to exercise such authority over matters of public health, hygiene and sanitation which come properly within the jurisdiction of the national government and does not interfere with the right of states or municipalities.

ASIATIC EXCLUSION.

We oppose Asiatic immigration, which does not amalgamate with our population, creates race issues and un-American conditions and which reduces wages and tends to lower the high standard of living and the high standard of morality which American civilization has established.

We demand the passage of an exclusion act which shall protect American workmen from competition with Asiatic cheap labor and which shall protect American civilization from the contamination of Asiatic conditions.

THE NAVY.

The independence party declares for peace and against aggression and will promote the movement for the settlement of international disputes by arbitration.

We believe, however, that a small navy is poor economy, and that a strong navy is the best protection in time of war and the best preventive of war. We therefore favor the speedy building of a

navy sufficiently strong to protect at the same time both the Atlantic and Pacific coasts of the United States.

INLAND WATERWAYS.

We rejoice in the adoption by both the republican and democratic platforms of the demand of the independence party for improved national waterways and the Mississippi inland deep waterways project, to complete a ship canal from the gulf to the great lakes. We favor the extension of this system to the tributaries of the Mississippi, by means of which thirty states shall be served and 20,000 miles added to the coast line of the United States. The reclamation of arid lands should be continued and the irrigation programme now contemplated by the government extended and steps taken for the conservation of the country's natural resources, which should be guarded not only against devastation and waste, but against falling into the control of monopoly.

The abuses growing out of the administration of our forest preserves must be corrected and provision should be made for free grazing from public lands outside of forest or other reservation. In behalf of the people residing in arid portions of our western states we protest vigorously against the policy of the federal government in selling the exclusive use of water and electric power derived from public works to private corporations, thus creating a monopoly and subjecting citizens living in those sections to exorbitant charges for light and power and diverting enterprises originally started for public benefit into channels for corporate greed and oppression, and we demand that no more exclusive contracts be made.

PROTECTION OF CITIZENS.

American citizens abroad, whether native born or naturalized, and of whatever race or creed, must be secured in the enjoyment of all rights and privileges under our treaties, and wherever such rights are withheld by any country on the ground of race or religious faith, steps should be taken to secure the removal of such unjust discrimination.

OTHER DEMANDS.

We advocate the popular election of United States senators and of judges, both state and federal, and favor a graduated income tax and any constitutional amendments necessary to these ends.

Equality of opportunity, the largest measure of individual liberty consistent with equal rights; the overthrow of the rule of special interests and the restoration of government by the majority exercised for the benefit of the whole community—these are the purposes to which the independence party is pledged and we invite the co-operation of all patriotic and progressive citizens, irrespective of party, who are in sympathy with these principles and in favor of their practical enforcement.

THE ELECTORAL COLLEGE.

The president and vice-president of the United States are not elected directly by the people, but by the members of an electoral college who are voted for at the regular presidential elections. Each state is entitled to as many representatives

in the electoral college as there are congressional districts in the states and in addition one for each senator. Following is the electoral vote of the states, based upon the apportionment of representatives made by congress under the census of 1900:

State.	Electoral vote.	State.	Electoral vote.	State.	Electoral vote.	State.	Electoral vote.

RECESSION OF NIAGARA FALLS.

It has been established by Messrs. J. W. Spencer and James Wilson that the average rate of recession of Niagara falls in the last 290 years has

been 4.2 feet a year and that in 3,500 years it has receded about four miles. The age of the falls is placed at approximately 39,000 years.

PRIMARY ELECTION LAWS.

[Data gathered by Clinton Rogers Woodruff in 1908.]

Every state in the union now has a primary election law on its statute books. Of the various primary laws, some provide for most of the guarantees of an ordinary election, are state-wide in application and mandatory. These states are Louisiana, Illinois, Kentucky, Massachusetts, Maryland, Michigan, Minnesota, New Jersey, North Dakota, Ohio, Oregon, Pennsylvania, Texas and Wisconsin. Some states have laws of a similar character which are, however, local in their scope. These are California, limited to cities of 7,500 population; Delaware, limited to Newcastle county; Florida, to all cities; Iowa, to Polk county; Indiana, to counties having a city of over 50,000 or between 36,500 and 43,000; Maine, to cities from 2,000 to 35,000; Missouri, to cities above 175,000; Nebraska, to cities of over 125,000; New York, to cities of over 5,000;

Rhode Island to Providence, Newport and Pawtucket. Mandatory laws of general application, but not providing a complete scheme of legally regulated primary elections, are found in other states. These states are Arizona, Colorado, Connecticut, Georgia, Idaho, Kansas, Mississippi, Nevada, South Carolina, South Dakota, Tennessee, Utah, Vermont, West Virginia and Wyoming. In these states there are general regulations governing primaries, but the protection afforded is by no means equivalent to that provided at the general election. In another group of states laws are either optional, or incomplete, or both. This includes Alabama (optional), Arkansas (optional), Montana (optional), New Hampshire (local), North Carolina (local), Oklahoma (optional), Virginia (local) and Washington (optional).

LIBRARY OF CONGRESS.

The library of congress was established in 1800 in the city of Washington, D. C. It was burned in 1814 and in 1851 lost 35,000 volumes by fire. The present library building, which cost \$6,347,000, was opened to the public in November, 1897. It is located a short distance east of the capitol and is the largest and finest building of its kind in the world.

June 30, 1907, the library contained 1,433,848 books and pamphlets, 98,483 maps, 464,618 pieces of music and 253,822 photographs, prints, engravings and lithographs. The copyright office is a distinct division of the library with its own force of employees. The total number of employees in the library is 452 and the annual cost of maintenance is now about \$800,000.

PRESIDENT'S SPECIAL MESSAGE ON NAVY.

To the Senate and House of Representatives: Let me again urge upon the congress the need of providing for four battle ships of the best and most advanced type at this session. Prior to the recent Hague conference it had been my hope that an agreement could be reached between the different nations to limit the increase of naval armaments and especially to limit the size of warships. Under these circumstances I felt that the construction of one battle ship a year would keep our navy up to its then positive and relative strength. But actual experience showed not merely that it was impossible to obtain such an agreement for the limitation of armaments among the various leading powers, but that there was no likelihood whatever of obtaining it in the future within any reasonable time. Coincidentally with this discovery occurred a radical change in the building of battle ships among the great military nations—a change in accordance with which the most modern battle ships have been or are being constructed, of a size and armament which doubles, or more probably trebles, their effectiveness.

Every other great nation has built, or is building, a number of ships of this kind; we have provided for only two, and therefore the balance of power is now inclining against us. Under these conditions, to provide for only one or two battle ships a year is to provide that this nation, instead of advancing, shall go backward in naval rank and relative power among the great nations. Such a course would be unwise for us if we fronted merely on one ocean, and it is doubly unwise when we front on two oceans.

As chief executive of the nation and as commander in chief of the navy, there is imposed upon me the solemn responsibility of advising the congress of the measures vitally necessary to secure the peace and welfare of the republic in the event of international complications which are even remotely possible. Having in view this solemn responsibility, I earnestly advise that the congress now provide four battle ships of the most advanced type.

I cannot too emphatically say that this is a measure of peace and not of war. I can conceive of no circumstances under which this republic would enter into an aggressive war; most certainly, under no circumstances would it enter into an aggressive war to extend its territory or in any other manner seek material aggrandizement. I advocate that the United States build a navy commensurate with its powers and its needs, because I feel that such a navy will be the surest guaranty and safeguard of peace.

We are not a military nation. Our army is so small as to present an almost absurd contrast to our size. It is properly treated as little more than a nucleus for organization in case of serious war. Yet we are a rich nation, and undefended wealth invites aggression. The very liberty of individual speech and action which we so prize and guard renders it possible that at times unexpected causes of friction with foreign powers may suddenly develop.

At this moment we are negotiating arbitration treaties with all the other great powers that are willing to enter into them. These arbitration treaties have a special usefulness because in the event of some sudden disagreement they render it morally incumbent upon both nations to seek first to reach an agreement through arbitration and at least secure a breathing space during which the cool judgment of the two nations involved may get the upper hand over any momentary burst of anger. These arbitration treaties are entered into not only with the hope of preventing wrong doing by others against us but also as a proof that we have no intention of doing wrong ourselves.

Yet it is idle to assume, and from the standpoint of national interest and honor it is mischievous folly for any statesman to assume, that this world has yet reached the stage, or has come within measurable distance of the stage, when a proud nation, jealous of its honor and conscious of its great mission in the world, can be content to rely for peace upon the forbearance of other powers. It would be equally foolish to rely upon each of

them possessing at all times and under all circumstances and provocations an altruistic regard for the rights of others. Those who hold this view are blind indeed to all that has gone on before their eyes in the world at large. They are blind to what has happened in China, in Turkey, in the Spanish possessions, in Central and South Africa, during the last dozen years.

For centuries China has cultivated the very spirit which our own peace-at-any-price men wish this country to adopt. For centuries China has refused to provide military forces and has treated the career of the soldier as inferior in honor and regard to the career of the merchant or of the man of letters. There never has been so large an empire which for so long a time has so resolutely proceeded on the theory of doing away with what is called "militarism."

Whether the result has been happy in international affairs I need not discuss; all the advanced reformers and far-sighted patriots in the Chinese empire are at present seeking (I may add, with our hearty good will) for a radical and far-reaching reform in internal affairs. In external affairs the policy has resulted in various other nations now holding large portions of Chinese territory, while there is a very acute fear in China lest the empire, because of its defenselessness, be exposed to absolute dismemberment, and its well wishers are able to help it only in a small measure, because no nation can help any other unless that other can help itself.

The state department is continually appealed to to interfere on behalf of peoples and nationalities who insist that they are suffering from oppression; now Jews in one country, now Christians in another, now black men said to be oppressed by white men in Africa. Armenians, Koreans, Finns, Poles; representatives of all, appeal at times to this government. All of this oppression is alleged to exist in time of profound peace, and frequently, although by no means always, it is alleged to occur at the hands of people who are not very formidable in a military sense. In some cases the accusations of oppression and wrong-doing are doubtless ill founded. In others they are well founded, and in certain cases the most appalling loss of life is shown to have occurred, accompanied with frightful cruelty. It is not our province to decide which side has been right and which has been wrong in all or in any of these controversies. I am referring to the loss of life.

It is probably a conservative statement to say that within the last twelve years, at periods of profound peace and not as the result of war, massacres and butcheries have occurred in which more lives of men, women and children have been lost than in any single great war since the close of the Napoleonic struggles.

To any public man who knows of the complaints continually made to the state department there is an element of grim tragedy in the claim that the time has gone by when weak nations or peoples can be oppressed by those who are stronger without effective protest from other strong interests. Events still fresh in the mind of every thinking man show that neither arbitration nor any other device can as yet be invoked to prevent the gravest and most terrible wrong-doing to peoples who are either few in number or who, if numerous, have lost the first and most important of national virtues—the capacity for self-defense.

When a nation is so happily situated as ours—that is, when it has no reason to fear or to be feared by its land neighbors—the fleet is all the more necessary for the preservation of peace. Great Britain has been saved by its fleet from the necessity of facing one of the two alternatives—of submission to conquest by a foreign power or of itself becoming a great military power. The United States can hope for a permanent career of peace on only one condition and that is on condition of building and maintaining a first-class navy; and the step to be taken toward this end at this time is to provide for the building of four additional battle ships.

I earnestly wish that the congress would pass the measures for which I have asked for strength-

ening and rendering more efficient the army as well as the navy. All of these measures as affecting every branch and detail of both services are sorely needed, and it would be the part of far-sighted wisdom to enact them all into laws, but the most vital and immediate need is that of the four battle ships.

To carry out this policy is only to act in the spirit of George Washington; is only to continue the policies which he outlined when he said: "Observe good faith and justice toward all nations. Cultivate peace and harmony with all. * * * Nothing is more essential than that permanent, inveterate antipathies against particular nations and passionate attachments for others should be excluded, and that in place of them just and amicable feelings toward all should be cultivated."

I cannot recommend to your notice measures for

the fulfillment of our duties to the rest of the world without again pressing upon you the necessity of placing ourselves in a condition of complete defense and of exacting from them the fulfillment of their duties toward us. The United States ought not to indulge a persuasion that, contrary to the order of human events, they will forever keep at a distance those painful appeals to arms with which the history of every other nation abounds. There is a rank due to the United States among nations which will be withheld if not absolutely lost by the reputation of weakness. If we desire to avoid insult we must be able to repel it; if we desire to secure peace, one of the most powerful instruments of our rising prosperity, it must be known that we are at all times ready for war.

THEODORE ROOSEVELT.

The White House, April 14, 1908.

PRESIDENT'S SPECIAL MESSAGE ON ANARCHY.

To the Senate and House of Representatives: I herewith submit a letter from the department of justice which explains itself. Under this opinion, I hold that existing statutes give the president the power to prohibit the postmaster-general from being used as an instrument in the commission of crime; that is, to prohibit the use of the mails for the advocacy of murder, arson and treason, and I shall act upon such construction. Unquestionably, however, there should be further legislation by congress in this matter. When compared with the

suppression of anarchy, every other question sinks into insignificance. The anarchist is the enemy of humanity, the enemy of all mankind, and his is a deeper degree of criminality than any other. No immigrant is allowed to come to our shores if he is an anarchist, and no paper published here or abroad should be permitted circulation in this country if it propagates anarchistic opinions.

THEODORE ROOSEVELT.

The White House, April 9, 1908.

DEATH OF GROVER CLEVELAND.

Stephen Grover Cleveland, president of the United States from 1885 to 1889 and from 1893 to 1897, died at his home in Princeton, N. J., at 8:40 o'clock Wednesday morning, June 24, 1908. He had been subject for several years to repeated attacks of gastral intestinal origin and had also suffered from an organic disease of the heart and kidneys. The immediate cause of his death was heart failure complicated with pulmonary thrombosis and oedema. He was survived by his wife, two sons and two daughters. The funeral took place June 26, the burial being in the Princeton cemetery.

Following is a brief summary of the notable events in Cleveland's career:

Born at Caldwell, Essex county, N. J., March 18, 1837.

In 1841 family removed to Fayetteville, N. Y. Served as clerk in a country store. 1850.

In 1853 was appointed assistant teacher of the New York institution for the blind.

Admitted to the bar in Buffalo in 1859.

Appointed assistant district attorney of Erie county Jan. 1, 1863.

Defeated for the district attorneyship of Erie county in 1865.

Practiced law.

Elected sheriff of Erie county in 1870.

Elected mayor of Buffalo in 1881.

Elected governor of New York in 1882 by a plurality of 200,000.

Elected president of the United States in 1884.

Married Frances Folsom in the white house June 2, 1886.

Defeated in campaign for re-election in 1888.

Engaged in the practice of law in New York.

Elected president of the United States in 1892.

Settled Venezuela boundary dispute in 1895.

After leaving white house in 1897 established home for his family in Princeton, N. J.

Elected chairman of the Ryan trustees of the Equitable Life association in 1905.

THE HAGUE PEACE CONFERENCE.

Aug. 24, 1898, Emperor Nicholas II. of Russia issued a rescript proposing an international peace conference. This was held from May 18 to July 29, 1899, at The Hague, Holland, with Baron de Staal as president. The United States was represented by Andrew D. White, Seth Low, Stanford Newel, Capt. William Crozier, U. S. A., Capt. A. T. Mahan, U. S. N., and Frederick Hollis. The chief result of this conference was the establishment of a permanent court of arbitration at The Hague.

The second peace conference was also summoned by the czar of Russia and was held at The Hague from June 15 to Oct. 18, 1907, Count Nelidoff, Russian ambassador to France, serving as president. The delegates from the United States were Joseph H. Choate, Horace Porter, Uriah M. Rose,

David Jayne Hill, Brig.-Gen. George B. Davis and Vice-Admiral Charles S. Sperry. At this conference thirteen conventions relating chiefly to the conduct of war on sea and land were adopted. One of the most important was that urged by the United States making it obligatory in the matter of the collection of contractual debts to resort to arbitration before appealing to force.

The third conference will be held about the year 1915. The subjects to be then considered are to be prepared beforehand.

April 24, 1903, Andrew Carnegie gave to the government of the Netherlands the sum of \$1,500,000 to be used in the construction of a "palace of peace" at The Hague. The corner stone of this structure was laid July 30, 1907, at Zorgvliet in the wooded park stretching from The Hague to Scheveningen.

ORDER OF PRESIDENTIAL SUCCESSION.

In case of the removal, death, resignation or inability of both the president and vice-president, then the secretary of state shall act as president until the disability of the president or vice-president is removed or a president is elected. The rest of the order of succession is: Secretary of the

treasury, secretary of war, attorney-general, postmaster-general, secretary of the navy, secretary of the interior, secretary of agriculture and secretary of commerce and labor. The acting president, in case congress is not in session, must call a special session, giving twenty days' notice.

UNITED STATES CIVIL SERVICE.

Civil-service act approved Jan. 16, 1883.

Officers—Three commissioners are appointed by the president to assist him in classifying the government offices and positions, formulating rules and enforcing the law. Their office is in Washington, D. C. The chief examiner is appointed by the commissioners to secure accuracy, uniformity and justice in the proceedings of the examining boards. The secretary to the commission is appointed by the president.

General Rules—The fundamental rules governing appointments to government positions are found in the civil-service act itself. Based upon these are many other regulations formulated by the commission and promulgated by the president from time to time as new contingencies arise. The present rules were approved March 20, 1903, and went into effect April 15, 1903. In a general way they require that there must be free, open examinations of applicants for positions in the public service; that appointments shall be made from those graded highest in the examinations; that appointments to the service in Washington shall be apportioned among the states and territories according to population; that there shall be a period (six months) of probation before any absolute appointment is made; that no person in the public service is for that reason obliged to contribute to any political fund or is subject to dismissal for refusing to so contribute; that no person in the public service has any right to use his official authority or influence to coerce the political action of any person. Applicants for positions shall not be questioned as to their political or religious beliefs and no discrimination shall be exercised against or in favor of any applicant or employee on account of his religion or politics. The classified civil service shall include all officers and employees in the executive civil service of the United States except laborers and persons whose appointments are subject to confirmation by the senate.

Examinations—These are conducted by boards of examiners chosen from among persons in government employ and are held twice a year in all the states and territories at convenient places. In Illinois, for example, they are usually held at Cairo, Chicago and Peoria. The dates are announced through the newspapers or by other means. They can always be learned by applying to the commission or to the nearest postoffice or custom house. Those who desire to take examinations are advised to write to the commission in Washington for the "Manual of Examinations," which is sent free to all applicants. It is revised semiannually to Jan. 1 and July 1. The January edition contains a schedule of the spring examinations and the July edition contains a schedule of the fall examinations. Full information is given as to the methods and rules governing examinations, manner of making application, qualifications required, regulations for rating examination papers, certification for and chances of appointment, and as far as possible it outlines the scope of the different subjects of general and technical examinations. These are practical in character and are designed to test the

relative capacity and fitness to discharge the duties to be performed. It is necessary to obtain an average percentage of 70 to be eligible for appointment, except that applicants entitled to preference because of honorable discharge from the military or naval service for disability resulting from wounds or sickness incurred in the line of duty need obtain but 65 per cent. The period of eligibility is one year.

Qualifications of Applicants—No person will be examined who is not a citizen of the United States; who is not within the age limitations prescribed; who is physically disqualified for the service which he seeks; who has been guilty of criminal, infamous, dishonest or disgraceful conduct; who has been dishonored from the public service for delinquency and misconduct or has failed to receive absolute appointment after probation; who is addicted to the habitual use of intoxicating liquors to excess, or who has made a false statement in his application. The age limitations in the more important branches of the public service are: Post-office, 18 to 45 years; rural letter carriers, 17 to 55; internal revenue, 21 years and over; railway mail, 18 to 35; lighthouse, 18 to 50; life saving, 18 to 45; general departmental, 20 and over. These age limitations are subject to change by the commission. They do not apply to applicants of the preferred class. Applicants for the position of railway mail clerk must be at least 5 feet 6 inches in height, exclusive of boots or shoes, and weigh not less than 135 pounds in ordinary clothing and have no physical defects. Applicants for certain other positions have to come up to similar physical requirements.

Method of Appointment—Whenever a vacancy exists the appointing officer makes requisition upon the civil-service commission for a certification of names to fill the vacancy, specifying the kind of position vacant, the sex desired and the salary. The commission thereupon takes from the proper register of eligibles the names of three persons standing highest of the sex called for and certifies them to the appointing officer, who is required to make the selection. He may choose any one of the three names, returning the other two to the register to await further certification. The time of examination is not considered, as the highest in average percentage on the register must be certified first. If after a probationary period of six months the name of the appointee is continued on the roll of the department in which he serves the appointment is considered absolute.

Removals—No person can be removed from a competitive position except for such cause as will promote the efficiency of the public service and for reasons given in writing. No examination of witnesses nor any trial shall be required except in the discretion of the officer making the removal. **Salaries**—Entrance to the department service is usually in the lowest grades, the higher grades being generally filled by promotion. The usual entrance grade is about \$900, but the applicant may be appointed at \$840, \$760 or even \$600.

EMPLOYES IN THE FEDERAL CIVIL SERVICE.

[From census bulletin.]

On July 1, 1907, the executive civil service of the United States, exclusive of the consular and diplomatic service, furnished employment to 286,902 persons, of whom 10.1 per cent were employed in Washington and 89.9 per cent elsewhere. In the census statistics 101,028 of these employees were omitted for various reasons. They included nineteen in the state department, 678 in the treasury department, 539 in the war department, 75,577 in the postoffice department, 18,435 in the navy department, 83 in the interior department, 1,079 in the agricultural department, 18 in the commerce and labor department and 11 in the Smithsonian institution. In addition there were 4,584 employed by the Isthmian canal commission. Of the 185,874 employees concerning whom data are given by the census bulletin 172,053 were male and 13,821 female; 174,546 were

white and 11,328 colored. By age they were classified as follows: Under 20 years, 3,238; 20 to 24, 18,958; 25 to 29, 29,577; 30 to 34, 31,896; 35 to 39, 29,108; 40 to 44, 21,466; 45 to 49, 19,940; 50 to 54, 11,824; 55 to 59, 7,942; 60 to 64, 6,840; 65 to 69, 4,364; 70 to 74, 1,557; 75 to 79, 465; 80 and over, 137; not reported, 472. As to marital condition, 55,874 were single; 120,497 married; 8,092 widowed; 933 divorced; 691 not reported. By character of appointment 164,064 were in the classified and 21,823 in the unclassified service.

Distributed according to the character of the work performed, the employees numbered in each division: Executive, 2,157; professional, technical and scientific, 9,475; clerical, 122,636; mechanical, 8,596; subclerical and manual labor, 37,097; miscellaneous, 5,643.

Classified by departments, the civil-service employees, with the omissions noted above, were as follows in 1907:

REGISTRATION OF TRADE-MARKS.

Under the law passed by congress Feb. 20, 1905, and effective April 1, 1905, citizens of the United States, or foreigners living in countries affording similar privileges to citizens of the United States, may obtain registration of trade-marks used in commerce with foreign nations, or among the several states, or with Indian tribes, by complying with the following requirements: First, by filing in the patent office an application therefor in writing, addressed to the commissioner of patents, signed by the applicant, specifying his name, domicile, location and citizenship; the class of merchandise and the particular description of goods comprised in such class to which the trade-mark is appropriated; a statement of the mode in which the same is applied and affixed to goods, and the length of time during which the trade-mark has been used. With this statement shall be filed a drawing of the trade-mark, signed by the applicant or his attorney, and such number of specimens of the trade-mark as may be required by the commissioner of patents. Second, by paying

into the treasury of the United States the sum of \$10 and otherwise complying with the requirements of the law and such regulations as may be prescribed by the commissioner of patents.

The application must be accompanied by a written declaration to the effect that the applicant believes himself to be the owner of the trade-mark sought to be registered and that no other person or corporation has the right to use it; that such trade-mark is in use and that the description and drawing presented are correct. Trade-marks consisting of or comprising immoral or scandalous matter, the coat of arms, flag or other insignia of the United States or of any state or foreign nation cannot be registered. Fees for renewal of trade-marks and for filing opposition to registration are \$10 each; for appeals from examiners to the commissioner of patents, \$15 each.

Further information regarding the trade-mark law may be had by applying to the commissioner of patents, Washington, D. C.

AMERICAN HALL OF FAME.

"The Hall of Fame for Great Americans" is the name of a building on University Heights in New York city, in which are inscribed on bronze tablets the names of famous American men and women. Nominations for the honor are made by the public and are submitted to a committee of 100 eminent citizens. In the case of men fifty-one votes are required and in the case of women forty-seven. The first balloting took place in October, 1900, when the following were chosen:

Punta Arenas in the Straits of Magellan was reached Jan. 31 and after target practice the cruise was continued to Callao. The fleet passed within sight of Valparaíso, Chile, and received there, as well as at Punta Arenas, a hearty welcome from the Chileans. Callao was reached Feb. 18 and the demonstrations of good will made by the authorities and people of the other South American republics were repeated by the Peruvians. From Callao the fleet sailed direct to Magdalena bay in Lower California, where it arrived March 12 without having met with any mishaps of any sort. Here it remained several weeks while the gun crews engaged in target practice. Shortly after the fleet arrived at this point it was announced that the cruise would be continued to the far east and that the return would be by way of the Suez canal. Invitations to stop

The battle ships and torpedo boats named above, with the auxiliary vessels Glacier, Culgoa, Panther and Yankton, left Hampton roads, Virginia, Dec. 16, 1907, for a cruise which, though having San Francisco as its original objective, was extended until it encircled the world.

The first stop was made at Trinidad Dec. 24 and after a stop of four days the voyage was resumed. Jan. 11, 1908, the fleet reached Rio Janeiro, where it remained ten days, during which the officers and

at ports in Australia and Japan were received and accepted.

While the fleet was at Magdalena bay Rear-Admiral Evans was obliged to give up the command temporarily on account of a severe attack of rheumatism and go to a health resort in California for treatment. He was succeeded by Rear-Admiral Charles M. Thomas, who had charge until just before San Francisco was reached, when Evans resumed command. The fleet arrived at San Diego, Cal., April 14, and was welcomed by a large concourse of people. April 18 it arrived at San Pedro harbor, where it was viewed by 100,000 persons from Los Angeles and vicinity. Proceeding up the coast and making brief stops at Santa Barbara, Monterey and Santa Cruz, the fleet entered Golden Gate May 6 and at noon anchored before the city of San Francisco. It is estimated that 1,000,000 people witnessed the arrival of the battle ships and the demonstration in their honor.

After a visit to Puget sound ports the fleet sailed from San Francisco July 7 and arrived at Honolulu on schedule time July 16. Great enthusiasm was manifested and many festivities were arranged in honor of officers and men. July 23 the stately column of war vessels moved on to Auckland, N. Z., which was reached on Sunday, Aug. 9. The welcome here was as cordial as anywhere and the entertaining of the visitors lasted until the day of departure, Aug. 15. Five days later the fleet anchored in Sydney harbor and for a full week the officers and sailors were feted and honored in magnificent style. The same was the case at Melbourne, which was reached Aug. 29. The occasion was made memorable in many ways by the people and officials during the week's stay of the American fleet. Sept. 5 the ships went to Albany in western

Australia, where a supply of coal was taken. Sailing Sept. 18, the fleet proceeded to Manila, where it arrived Oct. 2. The festivities here had to be abridged owing to the existence of Asiatic cholera.

From Manila the battle ships proceeded to Yokohama, Japan, arriving there Oct. 17. The reception of the fleet and its officers and men was made exceptionally striking by the Japanese in order to show that the reports of an unfriendly feeling in their country toward the Americans were unfounded. At Yokohama the fleet divided, the first squadron going back to Manila and the second squadron to Amoy, China.

According to the schedule the fleet will arrive on the Atlantic seaboard early in March, 1909, returning by way of the Suez canal and making no stops except for coaling purposes.

FRANCO-AMERICAN ARBITRATION TREATY.

An arbitration treaty between the United States and France was ratified by the senate Feb. 19, 1908. Following is the gist of the agreement:

"Differences which may arise of a legal nature or relating to the interpretation of treaties existing between the two contracting parties and which it may not have been possible to settle by diplomacy shall be referred to a permanent court of arbitration established at The Hague by the convention of July 29, 1893, provided, nevertheless, that they do not affect the vital interest, the independence or the honor of the two contracting states and do not concern the interest of third parties,

"In each individual case the high contracting parties, before appealing to the permanent court of arbitration, shall conclude a special agreement defining clearly the matter in dispute, the scope of the powers of the arbitrators and the periods to be fixed for the formation of the arbitral tribunal and the several stages of the procedure. It is understood that on the part of the United States such special agreements will be made by the president of the United States, by and with the advice and consent of the senate, and on the part of France they will be subject to the procedure required by the constitutional laws of France."

DES MOINES PLAN OF CITY GOVERNMENT.

Briefly, the "Des Moines plan" of municipal government is to substitute for the old system of a partisan mayor and ward aldermen a nonpartisan commission consisting of a mayor and four councilmen chosen at large. Two candidates for mayor and eight or less for councilmen are selected at nonpartisan primaries and the candidate for mayor and the four candidates for councilmen receiving the highest number of votes at the election constitute the commission. The mayor presides at the meetings of the council, but he has no veto power. It requires three affirmative votes to pass any measure and every resolution or ordinance passed by the council must be signed by the mayor or two councilmen, and be recorded, before it becomes a law. The executive and administrative powers and duties are divided among the following five departments:

1. Department of public affairs.
2. Department of accounts and finances.
3. Department of public safety.
4. Department of streets and public safety.
5. Department of parks and public property.

The mayor is superintendent of the department of public affairs and each of the four councilmen is superintendent of one of the other departments, the assignments being made by the council itself by majority vote. Other officers, such as city clerk, solicitor, assessor, treasurer, auditor, chief of

police, fire marshal and city physician, are elected by the council. All franchises for public utilities must be authorized or approved by a referendum vote at a general or special election. Provisions are made for a civil-service commission, for monthly and annual reports, for the publication of campaign expenses and for the removal of elective officers by means of a petition, signed by 25 per cent of the voters who voted at the last preceding mayoralty election, asking for a special election to choose a successor to the officer whom it is desired to remove. If the petition shall be deemed to be sufficient the council shall order the election to be held in the same manner as other elections. The official sought to be removed may be a candidate for election and his name, unless he shall request otherwise, will be placed on the ticket without nomination. Proposed ordinances may be submitted to the council by petition and if the petitioners so request shall be passed without alteration by the council or be submitted to the voters of the city at a special or general election for adoption. Such ordinances cannot be repealed except by a vote of the people.

The legislative act authorizing the commission plan of government for cities was approved March 29, 1907. The plan was carried into effect in Des Moines, Iowa, April 6, 1908. It has also been adopted in Cedar Rapids, Iowa.

Commanderies have been established in twenty-one states. Total membership about 1,400.

The order is a military organization with patriotic objects, having for its scope the period of American history since national independence. It

stands for the needed and honorable principle of national defense against foreign aggression. The principal feature of the order is the perpetuating of the names, as well as the services, of commissioned officers who served in either the war of the revolution, the war with Tripoli, the war of 1812, the Mexican war or the war with Spain and all future campaigns, recognized by the United States government as war with foreign powers. Veteran companionship is conferred upon such officers and hereditary companionship upon their direct lineal descendants in the male line.

SIMPLIFIED SPELLING.

The simplified spelling board was organized Jan. 12, 1906, to promote by systematic and continued effort the gradual simplification and regulation of English spelling. The board is made up of prominent educators, authors, editors and others and in connection with it is an advisory council representing all parts of the country and all phases of educated opinion favorable to the general idea of simplified spelling. It is composed of the same class of men as the board. In March, 1906, the board published a list of some 300 words spelled in two or more different ways with the recommendation that the simpler form be used in each case. Jan. 30, 1908, the board published a second list consisting of seventy-five amended spellings and of six classified lists coming under two broad general rules. The amended spelling list follows:

NORTH COLLINWOOD (O.) SCHOOL DISASTER.

Through the burning of the public school at North Collinwood, a suburb of Cleveland, O., Wednesday, March 4, 1908, 174 children, ranging in age from 6 to 15 years, and two woman teachers lost their lives. The building was two and a half stories high with brick and concrete walls. Stairways in the front and rear led to the second floor and there was one fire escape in the rear. The front entrance was provided with a double door, one-half of which was fastened. The rear door was reached by a narrow hall from the stairway.

When the alarm of fire was raised at 9:30 o'clock in the morning the nine teachers employed in the school marshaled the pupils, of whom there were between 310 and 325, into columns as they had always done in the fire drills and started them down the stairways. Those at the front entrance found the way barred by flames and attempted to turn

back, but those behind kept pushing forward and in a moment all was panic and confusion. The children were packed together in a dense mass and many who were not burned or suffocated were trampled to death. All efforts to get the door open either from the inside or the outside were unavailing until it was too late.

The condition of affairs at the back door was still worse. The door could not be opened until the narrow hallway had been packed with little bodies six deep, all so tightly wedged in that only those on top could be dragged out alive when the door was finally forced open. Those of the children that escaped unhurt did so by the fire escape and the windows in the back part of the building. The fire started in the basement, but from what cause could not be determined.

APPLICATIONS FOR PATENTS.

[Condensed from Rules of Practice in the United States patent office.]

A patent may be obtained by any person who has invented or discovered any new and useful art, machine, manufacture or composition of matter, or any new and useful improvement thereof not previously patented or described in this or any other country, for more than two years prior to his application, unless the same is proved to have been abandoned. A patent may also be obtained for any new design for a manufacture, bust, statue, alto-relievo or bas-relief; for the printing of woolen, silk or other fabrics; for any new impression, ornament, pattern, print or picture to be placed on or woven into any article of manufacture; and for any new, useful and original shape or configuration of any article of manufacture, upon payment of fees and taking the other necessary steps.

Applications for patents must be in writing, in the English language and signed by the inventor if alive. The application must include the first fee of \$15, a petition, specification and oath, and drawings, model or specimen when required. The petition must be addressed to the commissioner of patents and must give the name and full address of the applicant, must designate by title the invention sought to be patented, must contain a reference to the specification for a full disclosure of such invention and must be signed by the applicant.

The specification must contain the following in the order named: Name and residence of the applicant with title of invention; a general statement of the object and nature of the invention; a brief description of the several views of the drawings (if the invention admits of such illustration); a detailed description; claim or claims; signature of inventor and signatures of two witnesses. Claims for a machine and its product and claims for a machine and the process in the performance of which the machine is used must be presented in separate applications, but claims for a process and its product may be presented in the same application.

The applicant, if the inventor, must make oath or affirmation that he believes himself to be the first inventor or discoverer of that which he seeks to have patented. The oath or affirmation must also state of what country he is a citizen and where he resides. In every original application the applicant must swear or affirm that the invention has not been patented to himself or to others with his knowledge or consent in this or any foreign country for more than two years prior to his application, or on an application for a patent filed in any foreign country by himself or his legal representatives or assigns more than seven months prior to his application. If application has been made in any foreign country full and explicit details must be given. The oath or affirmation may

be made before any one who is authorized by the laws of his country to administer oaths.

Drawings must be on white paper with india ink and the sheets must be exactly 10x15 inches in size, with a margin of one inch. They must show all details clearly and without the use of superfluous lines.

Applications for reissues must state why the original patent is believed to be defective and tell precisely how the errors were made. These applications must be accompanied by the original patent and an offer to surrender the same; or, if the original be lost, by an affidavit to that effect and certified copy of the patent. Every applicant whose claims have been twice rejected for the same reasons may appeal from the primary examiners to the examiners in chief upon the payment of a fee of \$10.

The duration of patents is for seventeen years except in the case of design patents, which may be for three and a half, seven or fourteen years as the inventor may elect.

Caveats or notices given to the patent office of claims to inventions to prevent the issue of patents to other persons upon the same invention, without notice to caveators, may be filed upon the payment of a fee of \$10. Caveats must contain the same information as applications for patents.

COPYRIGHT REGULATIONS.

The articles specified by law as proper subjects of copyright are: Books, maps, charts, dramatic compositions, musical compositions, engravings, cuts, prints, photographs, photographic negatives, chromos, lithographs, periodicals, paintings, drawings, statuary and models or designs intended to be perfected as works of fine art.

Any one desiring to secure a copyright should send to the librarian of congress for a blank application. This must be filled up according to the printed directions, which will be found plainly and specifically given on the blank itself. A printed or typewritten copy of the title of the article to be copyrighted must accompany the application; in

the case of paintings, drawings, statuary or designs, descriptions must be inclosed. On or before the day of publication two complete copies of the book or other article must be sent to the library of congress to perfect the copyright.

The fee for the entry of title of production of a citizen of the United States is 50 cents; for a foreigner, \$1; certificates, 50 cents additional in either case. Remittances must be made by money order, express or bank draft; postage stamps and checks will not be accepted. The copyright is for twenty-eight years, but it may be renewed for fourteen more.

NEW BRITISH PATENT LAW.

Under the new British patent and designs act which went into effect Jan. 1, 1903, any article patented must be produced in the united kingdom or the patent will be canceled. The fees are now as follows:

On application.....	\$5.00
On filing specifications.....	15.00
On granting of patent.....	5.00

Before end of four years.....	250.00
Before end of eight years.....	500.00

Total\$775.00

In lieu of the \$250 and \$500 fees annual fees amounting to \$775 may be paid. The life of a patent is fourteen years.

ATTEMPT TO ASSASSINATE PRESIDENT ALCORTA.

President J. Figueroa Alcorta of Argentina was alighting from his carriage at his residence in Buenos Aires, Thursday evening, Feb. 23, 1908, when a man named Solaro Regis dropped a bomb

at his feet. Though it contained about twenty-two pounds of explosives it failed to burst and no one was harmed. Regis was arrested.

IMPORTANT LEGAL DECISIONS IN 1908.

"UNFAIR LIST" ILLEGAL.

In the case of John E. and John T. Wilson, liv-
eymen of Sparta, Ill., against the local branch of
the Team Drivers' International union, the Supreme
court of Illinois, in a decision announced Feb. 20,
1908, held that a labor union's "unfair list" could
be enjoined, the words quoted being merely a
euphemism for and in effect the same thing as a
boycott.

PICKETING UNLAWFUL.

In affirming the order of the Superior court of
Cook county making perpetual injunction against
Chicago Typographical union No. 16 and others the
Supreme court of Illinois decided Feb. 20, 1908, that
workmen could combine for lawful benefits but
not for the purpose of doing an injury to another,
and that therefore they had no right to do peaceful
picket duty or to congregate in a peaceful manner
near a plant where a strike was in progress.

ALABAMA PROHIBITION VALID.

The Alabama Supreme court in a decision an-
nounced April 9, 1908, held both the general prohi-
bition and the 9 o'clock closing laws to be constitu-
tional and effective. Attacks had been made on
them by the Mobile liquor interests. In upholding
the prohibition act the court also gave validity to
the local-option law which was involved in the
cases brought.

RIGHT TO STAND ON STREET CORNER.

It was decided by the Missouri Supreme court
March 17, 1908, that city ordinances prohibiting per-
sons from lounging or loitering on street corners are
unconstitutional. The case came from St. Louis,
where a man doing picket duty in a strike was
fined for standing on a street corner. The Supreme
court held that the city had no right to interfere
with a man standing on a street corner providing
he was not obstructing traffic or interfering with
other persons.

PEACEFUL PICKETING UPHELD.

The United States Circuit court in a decision an-
nounced Oct. 10, 1908, reversed the decision of a
lower court which had sought to prohibit picketing
by the Iron Molders' union of Milwaukee, Wis., in its
strike against the Allis-Chalmers company. The up-
per court held that a distinction should be made
between peaceful picketing and intimidation. The
latter, the court declared, could be forbidden but
the former was not subject to inhibition.

FEDERAL EMPLOYERS' LIABILITY ACT.

In a decision announced Jan. 6, 1908, the United
States Supreme court held to be unconstitutional the
federal employers' liability act of June 11, 1906.
The ground of the decision was not that congress
may not extend, as in the act, the liability of em-
ployers who are engaged in interstate commerce, but
that the act was so worded as to apply to com-
merce which is solely intrastate as well as that
which is interstate. Congress having no authority
over the former, the act to that extent was un-
constitutional and as the form of the act was such as
to make it impossible to separate the part applying
to interstate from that applicable to intrastate com-
merce the law as a whole must be declared void.

HOURS OF WORK FOR WOMEN.

In a decision announced Feb. 24 the United States
Supreme court held constitutional the Washington
state law forbidding employers from forcing women
to work more than ten hours a day. The law had
been attacked by a laundryman on the ground that
it put a limitation on the power of contract. Jus-
tice Brewer, who wrote the opinion, held that wom-
en's rights could no more be infringed upon than
those of men. He further declared that on account
of her physical weakness and for other reasons
woman is entitled to greater protection than man
and that legislation designed to give her such pro-
tection could be sustained even when like legisla-
tion was unnecessary for men and could not be sus-
tained.

ANTIDISCRIMINATION CLAUSE OF THE ERD-
MAN LAW.

The act of June 1, 1898 (Erdman law), prohibiting
railroad companies engaged in interstate commerce
from discriminating against members of labor or-
ganizations was declared unconstitutional by the
United States Supreme court Jan. 27, 1908. The case
was that of William Adair versus the United
States. The court held that Adair, as master me-
chanic of the Louisville & Nashville railroad, had
the right to discharge an employe because he was a
member of a labor organization, just as it was the
employe's right to quit the road's employment be-
cause of his membership in the organization. Con-
gress could not, under the constitution, authorize a
violation of contract under the guise of protecting
interstate commerce.

WISCONSIN EIGHT-HOUR LAW VOID.

In a decision announced Sept. 29, 1908, the Wis-
consin Supreme court declared unconstitutional the
state eight-hour railroad telegraphers' law, enacted
at the 1907 session of the legislature. The act was
called unconstitutional on the theory that it was in
conflict with the provisions of the federal constitu-
tion, which clothes congress with the power to regu-
late interstate commerce, and further on the the-
ory that, congress having already provided a law
fixing the hours of railway telegraphers from nine
to thirteen hours, it was not within the power of
the state to enact a law which would in effect
change these hours of labor. In effect the decision
is one of the most far reaching of the court, as it
practically prohibits the state enacting laws relat-
ing to the hours of labor on interstate railroads as
long as there is a federal statute in force.

SYMPATHETIC STRIKES ILLEGAL.

In a decision made by the Massachusetts Supreme
court April 3, 1908, sympathetic strikes to prevent
an employer from conducting an "open shop" were
declared illegal. The case involved was that of
nine firms of building contractors in Lynn, Mass.,
who applied for an injunction restraining the build-
ing trades council in that city and affiliated unions
from enforcing a sympathetic strike. The matter
came to the Supreme court on an appeal from the
Superior court, which had granted the injunction
asked for, and made it permanent. In its decision
the Supreme court held that "a sympathetic strike
interfering with an open shop is illegal, and the
rules which govern the unions in the furtherance of
such strikes are unlawful."

COMMODITIES CLAUSE ILLEGAL.

In a decision announced Sept. 10, 1908, the United
States Circuit court for the eastern district of
Pennsylvania held that congress exceeded its con-
stitutional powers in enacting the so-called com-
modities clause of the interstate-commerce bill June 20,
1906. This clause made it unlawful for any railroad
company to transport from one state into another
any article or commodity manufactured, mined or
produced by such railroad company. The act was
aimed at several eastern railroads which are en-
gaged in the mining and transportation of anthra-
cite coal. The court held that it affected in a ser-
ious degree the individual liberty and property rights
enjoyed under the federal constitution and the laws
of Pennsylvania and that therefore it was void.

PENNSYLVANIA 2-CENT FARE LAW.

The 2-cent railroad fare law passed by the Penn-
sylvania legislature in 1907 was declared unconsti-
tutional by the state Supreme court Jan. 20, 1908.
The decision affirmed that rendered by the Common
Pleas court of Philadelphia in September, 1907. The
court declared that the new rate law transgressed
the constitutional provision that the legislative
power to alter charters shall be exercised only in
such manner that injustice shall not be done the
corporators. "The corporation," said the court, "is
entitled to make a fair profit on every branch of
its business, subject to the limitation that its cor-
porate duties must be performed, even though at a
loss. What is a fair profit is a highly complicated
and difficult question. The court below availed it-
self of all the best evidence shown to be attainable,

considered it with exemplary patience and care, and its conclusion that the enforcement of the act of 1907 against the complainant would do injustice to the corporators is beyond just criticism."

ILLINOIS LOCAL OPTION.

The Illinois local option law was upheld by the state Supreme court in a decision announced April 23. The case involved was that of the Coulterville precinct in Randolph county and the point made on behalf of the liquor interests was that the people of a township did not have the right to bind to prohibition the residents of any village or city lying wholly within the limits of that township. The Supreme court declared that the law passed in 1907 giving townships that right was valid and constitutional. The court held that there was no basis for the contention that local self-government was impaired by the new election statute. It declared that municipalities were simply creatures of the legislature, and that their privileges could be changed, modified or taken away from them at the will of the creating body. The court also held that a dramshop license was neither a contract nor a vested right. The right of a municipality to vote itself "wet" after the township had gone "dry" was not considered by the court, except by inference. It held there was nothing to the argument that voters in outside territory would be dictating to municipalities at local-option elections. The creating of "dry" territory, the court considered, was distinct from any local municipal question.

HABEAS CORPUS DECISION.

The Illinois Supreme court, in a decision handed down April 23, held that the Circuit and Superior court judges have no right to interfere by means of habeas corpus writs with the punishment of criminals whose conviction has been upheld by the Supreme court. The case leading to the decision was that of Ralph Lipsey, convicted of receiving stolen property. His sentence to the penitentiary was affirmed by the Supreme court and he was taken to Joliet. His attorney brought habeas corpus proceedings before Judge McEwen in Chicago, the prisoner was brought back from Joliet and the judge set a date for hearing the case. With the purpose of putting a stop to the abuse of the habeas corpus writ, the state's attorney of Cook county applied to the Supreme court for a writ of certiorari requiring the removal of the case to that tribunal. In granting the application the court said:

"In the present case the respondent (Judge McEwen) was without jurisdiction, the punishment of Lipsey was interfered with and wrong was done the people of the state when the warden, pursuant to the writ ordered by Judge McEwen, removed the prisoner from the penitentiary. In such an instance the writ of certiorari issues without awaiting the final decision of the matter. The affirmation of the judgment of conviction by this court must, according to law, be regarded by judges of Circuit and Superior courts as a final determination by this court, that there is in the record reviewed no error and that the judgment is valid for aught that appears in the record. Interference by nisi prius judges exercising jurisdiction in habeas corpus with the execution of such a judgment for any reason appearing upon the record presented to the Supreme court constitutes a wrongful infringement of the appellate jurisdiction of that court and tends to bring the courts of the state into disrepute."

MISSOURI RAILWAY LITIGATION ACT VOID.

In the United States District court at Kansas City, Mo., Jan. 20, 1908, Judge Smith McPherson declared unconstitutional and void the act passed by the Missouri legislature in 1907 forbidding foreign corporations from transferring suits brought against them from the state to the federal courts upon pain of forfeiture of their charters. The application of the Rock Island and other railroads for an injunction to prevent the secretary of state from enforcing the act was granted. The law in question specifically provided that if any railway corporation created under the laws of any other state and doing business in Missouri should, without the written consent of the other party, remove a case from the state court to a United States court, or should,

without such consent, institute any suit against any citizen of the state in any federal court, then it would be the duty of the secretary of state to revoke the license to do business within the state, either in carrying passengers or freight, and doing such business would subject the company to a penalty of not less than \$2,000 nor more than \$10,000 for each offense. In concluding his decision Judge McPherson said: "The Missouri statute of 1907 is void because it allows a resident company to sue in the federal court, if there is a federal question, and denies that right to a nonresident company. Regarding the last preceding statement, the statute is void because it seeks to take from the complainant its right to bring or remove a case to the United States court, which right is given by the constitution and the act of congress, which, by article 6 of the constitution, is declared to be 'the supreme law of the land, anything in the constitution or laws of any state to the contrary notwithstanding.' The statute is void because it is an effort to not only impair but to repudiate the contract of the state made with the company."

BOYCOTTING DECLARED ILLEGAL.

In a decision announced Feb. 3, 1908, the Supreme court of the United States unanimously decided that boycotting where it affected interstate commerce was in violation of the Sherman antitrust act. The case in question was that of Lawler vs. Loewe, the former a member of the United Hatters' union of Danbury, Conn., and the latter a member of the firm of Loewe & Co., hat manufacturers. The suit was instituted by Loewe & Co. in the United States Circuit court for the district of Connecticut. The company, alleging damages by a boycott against their factory to the extent of \$80,000, asked for a judgment for \$240,000 in accordance with the terms of the Sherman act. The American Federation of Labor, as well as the members of the local union, was included in the bill.

In the complaint it was alleged that the labor organization had undertaken to compel the manufacturers to unionize their factory, as a large majority of other hat factories in the United States had been forced to do, and it was asserted that when they failed in this effort the union hatters withdrew and induced other employees to do so. This act was followed by the declaration of a boycott against Loewe's hats wherever they were found, and as the firm controlled an extensive trade throughout the country the boycott extended to many states, which, in the language of the bill, constituted a combination to limit and restrain interstate commerce. The Circuit court upheld the demurrer of the hatters' union that the Sherman act was inapplicable and dismissed the case. The Court of Appeals certified the case to the United States Supreme court, which reversed the decision of the Circuit court.

The chief justice said: "In our opinion the combination described in the declaration is a combination in restraint of trade or commerce among the several states in the sense in which those words are used in the act and the action can be maintained accordingly. That conclusion rests on many judgments of this court to the effect that the act prohibits any combination whatever to secure action which essentially obstructs the free flow of commerce between the states or restricts in that regard the liberty of a trade to engage in business. The combination charged falls within the class of restraints of trade aimed at compelling third parties and strangers involuntarily not to engage in the course of trade except on conditions that the combination imposes, and there is no doubt that, to quote from the well-known work of Chief Justice Eme on trade unions, 'at common law every person has individually and the public has also collectively a right to require that the course of trade should be kept free from unreasonable obstruction.'"

MINNESOTA RAILROAD RATE LAWS.

In a decision announced March 23, 1908, the United States Supreme court held that the Minnesota railroad-rate laws passed by the legislature in April, 1907, were unconstitutional. The 2-cent passenger-rate law was not directly involved, but it was quoted in the decision as being open to the

same fatal objection as the freight-rate law. The case came to the Supreme court on an application to file a petition for writs of habeas corpus and certiorari in behalf of Attorney-General Edward T. Young of Minnesota. He had been enjoined from enforcing the state law, but went ahead and applied for a writ of mandamus in the state courts to compel compliance with the railroad-rate law, for which he was held by the Circuit court to be in contempt.

Taking up the contention that the Minnesota acts were invalid on account of the penalties imposed the Supreme court said: "For disobedience to the freight act the officers, directors, agents and employees of the company are made guilty of a misdemeanor, and upon conviction each may be punished by imprisonment in the county jail for a period not exceeding ninety days. Each violation would be a separate offense and therefore might result in imprisonment of the various agents of the company who would dare disobey for a term of ninety days each for each offense. Disobedience to the passenger-rate act renders the party guilty of a felony and subject to a fine not exceeding \$5,000 or imprisonment in the state prison for a period not exceeding five years, or both fine and imprisonment. The sale of each ticket above the price permitted by the act would be a violation thereof.

"It would be difficult, if not impossible, for the company to obtain officers, agents or employees willing to carry on its affairs except in obedience to the act and orders in question. The company itself would also, in case of disobedience, be liable to the immense fines provided for in violating orders of the commission. The company, in order to test the validity of the acts, must find some agent or employee to disobey them at the risk stated. The necessary effect and result of such legislation must be to preclude a resort to the courts, either state or federal, for the purpose of testing its validity. The officers and employees could not be expected to disobey any of the provisions of the acts or orders at the risk of such fines and penalties being imposed

upon them, in case the court should decide that the law was valid. The result would be a denial of any hearing to the company.

"We hold that the provisions of the acts relating to the enforcement of the rates, either for freight or passengers, by imposing such enormous fines and possible imprisonment as a result of an unsuccessful effort to test the validity of the laws themselves are unconstitutional on their face, without regard to the question of the insufficiency of those rates. We also hold that the Circuit court had jurisdiction and it was therefore its duty to inquire whether the rates permitted by these acts or orders were too low and therefore confiscatory, and, if so held, that the court then had jurisdiction to permanently enjoin the railroad company from putting them in force, and that it also had power, while the inquiry was pending, to grant a temporary injunction to the same effect.

"To await proceedings against the company in a state court grounded upon disobedience of the act and then, if necessary, obtain a review in this court by writ of error to the highest state court would place the company in peril of large loss and its agents in great risk of fines and imprisonment if it should be finally determined that the act was valid. This risk the company ought not to be required to take. Over \$11,000,000,000, it is estimated, are invested in railroad property, owned by many thousands of people, who are scattered over the whole country from ocean to ocean, and they are entitled to equal protection from the laws and from the courts with the owners of all other kinds of property, no more, no less. The courts having jurisdiction, federal or state, should at all times be open to them as well as to others, for the purpose of protecting their property and their legal rights."

NORTH CAROLINA CASE.

The opinion of the Supreme court in the Minnesota case was declared to apply also to the North Carolina 2½-cent passenger-rate law in which the injunction issued by Federal Judge Pritchard was upheld.

PROCEEDINGS AGAINST THE STANDARD OIL COMPANY.

Indictments returned, Aug. 27, 1906.

Trial begun, March 4, 1907.

Verdict returned, April 13, 1907.

Fines imposed, Aug. 3, 1907.

Total fines, \$29,240,000.

Fines declared illegal, July 22, 1908.

Aug. 27, 1906, ten indictments containing 6,428 counts were returned against the Standard Oil Company of Indiana by two federal grand juries in the United States District court, Chicago, for alleged violations of the act approved Feb. 19, 1903, known as the Elkins rebate law. The charge was that the defendant's property was transported by the Chicago & Alton railway at rates less than those named in the carrier's tariff schedules, published and filed with the interstate-commerce commission as required by law. The offenses were alleged to have been committed during the period from Sept. 1, 1903, to March 1, 1905.

Judge Kenesaw M. Landis of the United States District court at Chicago decided Jan. 3, 1907, adversely to the demurrer of the Standard Oil company to the indictments. The indictment under which the trial began March 4 contained 1,903 counts, each charging the movement of a car of oil

either from Whiting, Ind., to East St. Louis, Ill., or from Chappell, Ill., to St. Louis, Mo. On the trial 441 counts were withdrawn from the consideration of the jury on grounds not going into the ultimate questions involved in the case. On 1,462 counts the verdict returned by the jury April 13 was guilty. Aug. 3 Judge Landis pronounced judgment and sentenced the defendant company to pay a fine of \$29,240,000, the maximum penalty under the law.

July 22, 1908, the United States Circuit Court of Appeals, to which the Standard Oil Company of Indiana carried its case, ruled that the fine imposed was illegal. The principal reasons given for this decision were that the trial court abused its discretion in the post-trial investigation which was held after the conviction of the Standard Oil Company of Indiana and by measuring the amount of the fine by the ability of the parent corporation—the Standard Oil Company of New Jersey—to pay; that the trial court was in error in excluding evidence of knowledge and intent on the part of the defendant in the acceptance of rebates; that the trial court erred in the manner of computing the number of offenses. Each cash settlement and not the shipment of each carload of oil constituted an offense.

INDICTMENTS FOR REBATING.

Indictments for rebating were found in the course of 1903 against the following railroads:

Southern Pacific company, northern district of California, three indictments.

Southern Pacific company, southern district of California, three indictments.

Chesapeake & Ohio railway, eastern division of Virginia, three indictments.

Illinois Central railroad, northern district of Illinois.

Chicago, Rock Island & Pacific, northern district of Illinois.

St. Louis, Iron Mountain & Southern railway, eastern district of Arkansas.

Missouri Pacific railway, eastern district of Arkansas.

Illinois Terminal railroad, southern district of Illinois.

Missouri, Kansas & Texas railway, western district of Missouri.

St. Louis & San Francisco railroad, eastern district of Missouri.

PACKERS CONVICTED OF REBATING.

June 22, 1906, the Armour Packing company, Swift & Co., Morris & Co. and the Cudahy Packing company were convicted before Judge Smith McPherson in Kansas City, Mo., of having obtained from the Chicago, Burlington & Quincy railroad a rebate of 12 cents per 100 pounds upon shipments from Kansas City, Kas., to New York for export, and the defendants and the railroad were fined \$15,000 each. The Circuit Court of Appeals sustained the District court and the conviction was upheld by the United States Supreme court in a decision announced March 17, 1908. It was contended on behalf of the defendants that they had employed no fraud or "device" as prohibited by the Elkins law and,

further, that the District court for the western district of Missouri had no jurisdiction, as the alleged offense was committed in Kansas City, Kas. It was held by the Supreme court, that special contracts could not be excepted from the operation of the law which required that there should be only one rate charged and that one fixed by the statute and subject to change only in the manner specified by law; that the word "device" did not necessarily imply a fraudulent device, and that the trial court had jurisdiction because the sections of the law construed together made a case like this triable in any district through which the unlawful transportation was had.

SUIT AGAINST HARRIMAN RAILROAD COMBINATION.

Jan. 25, 1907, it was announced by the attorney-general of the United States that a bill in equity would be filed to set aside control by the Union Pacific Railroad company and its subsidiary corporations of the Southern Pacific line and the San Pedro, Los Angeles & Salt Lake line; also to have declared illegal the ownership by the Union Pacific or Oregon Short line of stock in the Santa Fe, Great Northern and Northern Pacific lines, all of which are competitors of the Union Pacific. The attorney-general, in a formal statement issued on the date named, declared:

"From evidence and independent investigation, the department has concluded the stock holdings of the Union Pacific and subsidiary company in the other corporations mentioned are in violation of the Sherman act. The department regards the suit as of first importance, as it is sought by means thereof to break up a substantial monopoly of the transportation business between the Missouri river on the east and the Pacific coast south of Portland on the west.

"Aside from the railway companies named, defendants in the suit are the Farmers' Loan & Trust company of New York, depository of all stock of the San Pedro road, under a contract by which it is required to give proxies to such persons as may be named by Mr. Harriman and Mr. Clark for a period of years. The following individual defendants are alleged to have conceived and carried out the conspiracy complained of: E. H. Harriman, Jacob H. Schiff, Otto H. Kahn, James Still-

man, Henry C. Frick, Henry H. Rogers and William A. Clark."

Feb. 1 United States Attorney Hiram E. Booth, acting for the attorney-general, filed in the United States Circuit court for the district of Utah, sitting at Salt Lake City, a petition or bill in equity in which the following railroad companies and individuals were made defendants: Union Pacific, Oregon Short Line, Oregon Railroad & Navigation, San Pedro, Los Angeles & Santa Fe, Southern Pacific, Northern Pacific, Great Northern, the Farmers' Loan & Trust company, Edward H. Harriman, Jacob H. Schiff, Otto H. Kahn, James Stillman, Henry H. Rogers, Henry C. Frick and William A. Clark. The bill sets out in detail the agreements, contracts and operations by which the several individual defendants at various times since Jan. 1, 1901, were alleged to have secured for themselves and others the management and control of the various defendant roads and steamship lines, and to have ever since operated them in restraint of trade and commerce in violation of the act of congress approved July 2, 1890, or the Sherman anti-trust law. After alleging combination and conspiracy among the defendants in derogation of the common rights of all the people of the United States, the bill asked that the defendants be perpetually enjoined from doing any and every act or thing in furtherance of the combination and conspiracy described and intended to complete the control or partial control of competing lines of railway by the Union Pacific and subsidiary companies.

RIOTS AND LYNCHINGS AT SPRINGFIELD, ILL.

Date—Aug. 14-15, 1908.

Negroes lynched—2.

Other persons killed—4.

Persons wounded—60.

Negro homes burned—25.

Negro refugees—2,000.

State troops called out—3,500.

Aug. 13, 1908, a white woman was assaulted by a negro in Springfield, Ill. This following the murder by a colored man of a father defending his daughter from a similar attack led to a bitter race feeling and preparations were made by a mob of whites to lynch George Richardson and Joe James, the negroes under arrest for the crimes. The sheriff, with the assistance of a restaurant keeper named Harry T. Loper, took them away from the jail in an automobile and sent them to Bloomington. When the lynchers learned of the ruse they demolished Mr. Loper's restaurant, burned his automobile and then rushed to the quarter of the city occupied by the colored people. Here the mob sacked

a number of stores and burned between twenty and twenty-five houses. Negroes on the streets were chased and attacked. One named Scott Burton, who was alleged to have fired on the rioters, was badly beaten and then hanged to a tree. Another, George Donigan, aged 80, a friend of Abraham Lincoln and for fifty years a respected citizen of Springfield, was beaten and hanged to a tree. He was guilty of no offense. He was cut down before life was extinct, but he died in a hospital the following day. In the course of the rioting many persons were hit by stray bullets fired either by the mob itself, by negroes trying to defend themselves or by the soldiers who were called out by Gov. Charles S. Deneen to preserve order. It was not until 3,500 troops had been rushed into the city from Chicago and other points that it became safe for negroes to venture out on the streets. It was estimated that 2,000 of them left for other cities. The grand jury returned 107 indictments against the rioters and several condemned the police force for cowardice and inefficiency.

ATTEMPT TO KILL KING HAAKON OF NORWAY.

Johannes Gren, a Swede, who was once an inmate of an insane asylum in Denmark, made an attempt to assassinate King Haakon of Norway, March 10, 1908, in Christiania, by firing twelve shots from a repeating rifle into the walls and through the windows of the royal palace. He had

seen some domestics passing a window and taking them for members of the royal family fired at them. No one was hurt. The king, queen and crown prince were not in the palace, having recently moved into another royal residence. Gren was arrested.

NORTHWESTERN GAME AND FISH LAWS.

Revised to Oct. 1, 1908.

NOTE—The laws as given below are necessarily very much condensed and many of the restrictions as to modes of hunting and fishing and as to the transportation, export and sale of game are omitted. Copies of the state laws may usually be obtained by writing to the commissioners and wardens. The dates are for the open season except where it is otherwise specified.

ILLINOIS.

GAME—Deer protected until 1917; quail, Nov. 10 to Dec. 20; prairie chicken and partridges protected until 1911; woodcock or mourning doves, Aug. 1 to Nov. 30; snipe and plover, Sept. 1 to May 1; squirrels, July 1 to Nov. 15; pheasants cannot be killed until after July 1, 1913; wild geese, ducks, brant or other waterfowl, Sept. 1 to April 15. THEATER FIRE AT BOYERTOWN, PA.

While some 425 persons were assembled in Rhoads's opera house at Boyertown, Pa., on the evening of Jan. 13, 1900, to witness a performance of "The Scottish Reformation" for the benefit of St. John's Lutheran Sunday school, an oil tank in front of the stage used for feeding the foot-lights was upset. The coal oil caught fire and the audience, panic-stricken, made a rush for the front exit. Most of the spectators were women and children and many of these were trampled to death before the flames reached them. A few escaped by means of the windows and some through the exit back of the stage, but the majority were trapped in the main part of the audience room and perished. The opera house, which was located in the second story of a three-story bank building, was entirely consumed with the rest of the structure, making the work of recovering the bodies from the ruins difficult and identification in many cases impossible. At the close

UNITED STATES LIGHTHOUSE ESTABLISHMENT.

[From report of Lighthouse board for the year 1907.]

There are under control of the Lighthouse establishment the following aids to navigation:

Lighthouses and beacon lights.....	1,479
Light vessels in position.....	49
Light vessels for relief.....	11
Gas-lighted buoys.....	153
Fog signals.....	463
Post lights, about.....	1,964
Day beacons.....	595
Whistling buoys.....	92
Bell buoys.....	152
Other buoys.....	5,365

There are about 1,585 light keepers and 3,720 other employees connected with the service. The main items of regular expenses are as follows:

Supplies of lighthouses.....	\$800,000
Repairs of lighthouses.....	800,000
Salaries of keepers.....	950,000
Expenses of light vessels.....	625,000
Expenses of buoyage.....	700,000
Expenses of fog signals.....	235,000
Lighting of rivers.....	375,000

There are, of course, many other items of expense not enumerated in this list, such as for new lighthouse sites and new undertakings of various kinds.

The secretary of commerce and labor is the ex-officio president of the board, the executive members of which are Rear-Admiral George C. Reiter, U. S. N., chairman; Capt. Uriel Sebree, U. S. N., and Lieut.-Col. Thomas L. Casey, U. S. A.

THE CARNEGIE HERO FUND.

April 15, 1904. Andrew Carnegie placed in the hands of a commission the sum of \$5,000,000 to be known as "the hero fund." Its purpose is to reward with medals and money the men and women who perform heroic deeds, or, in case they lose their lives, to care for those dependent upon them. Only such as follow peaceful vocations on sea or land in the United States and Canada are eligible to become beneficiaries of the fund. The headquarters of the commission are in the Carnegie building, Pittsburg, Pa., and F. M. Wilmut is the secretary. The first awards of medals and money were made in May, and others in October, 1905. The names of the recipients with the reason for the award in each case will be found in The Daily News Almanac and Year-Book beginning with the volume for 1906.

CARNEGIE INSTITUTION OF WASHINGTON.

The Carnegie institution was endowed by Andrew Carnegie with \$10,000,000 and incorporated under the laws of the District of Columbia, Jan. 4, 1902. It was, however, deemed advisable to have it incorporated by act of congress, and this was effected May 18, 1904. Section 2 of the act specifies that the objects of the corporation shall be to encourage, in the broadest and most liberal manner, investigation, research and discovery, and the application of knowledge to the improvement of mankind; and in particular:

- (a) To conduct, endow and assist investigation in any department of science, literature or art, and to this end to co-operate with governments, universities, colleges, technical schools, learned societies and individuals.
- (b) To appoint committees of experts to direct special lines of research.
- (c) To publish and distribute documents.
- (d) To conduct lectures, hold meetings and acquire and maintain a library.
- (e) To purchase such property, real or personal, and construct such buildings as may be necessary to carry on the work of the corporation.

Dec. 4, 1907, Andrew Carnegie added \$2,000,000 to the endowment of the institution, making the total \$12,000,000.

The following table shows the gross sums allotted to large projects since the organization of the institution up to 1908:

Botanical research.....	\$64,000.00
Economics and sociology.....	90,000.00
Experimental evolution.....	93,250.00
Geophysical research.....	238,000.00
Historical research.....	47,150.00
Horticultural work (Burbank).....	30,000.00
Marine biology.....	65,700.00
Meridian astronomy.....	30,000.00
Nutrition research.....	147,585.70
Solar observatory.....	392,500.00
Terrestrial magnetism.....	158,000.00

Total 1,356,185.70

Total allotments for minor projects and research associates and assistants up to 1908:

Anthropology .. \$18,838.61 Archaeology \$53,050.00

THE CARNEGIE FOUNDATION FOR THE ADVANCEMENT OF TEACHING.

In April, 1905, Andrew Carnegie transferred to a board of trustees \$10,000,000 in United States Steel corporation fifty-year bonds bearing 5 per cent interest, the purpose of the trust fund thus created being to provide retiring allowances or annuities to teachers in the higher institutions of learning in the United States, Canada and Newfoundland under such regulations as the trustees might decide to be wise. Schools below the rank of college and institutions directly under the control of religious denominations are excluded from the benefits of the fund. State universities were also originally excluded from the benefits of the fund, but March 31, 1908, Mr. Carnegie wrote the following letter to Dr. H. S. Pritchett, president of the foundation, in reply to a request made by the National Association of State Universities that their professors be given the benefit of the retiring allowance system:

"Dear Sir: Your favor of to-day informs me of the desire of the professors of state universities to be embraced in the pension fund, as shown by a resolution unanimously adopted by the national association. In my letter of April 16, 1905, handing over the fund to my trustees, the following occurs:

"We have, however, to recognize that state and colonial governments which have established or mainly supported universities, colleges or schools may prefer that their relations shall remain exclusively with the state. I cannot, therefore, presume to include them."

"I beg now to say that should the governing boards of any state university apply for participation in the fund, and the legislature and governor of the state approve such application, it will give

me great pleasure to increase the fund to the extent necessary to admit them. I understand from you that if all the state universities should apply and be admitted five millions more of 5 per cent bonds would be required, making the fund \$15,000,000 in all. From the numerous letters I have received from pensioners and their wives, and the warm approval of the press and the public, I am satisfied that this fund is, and must be for all time, productive of lasting good not only to the recipients but to the cause of higher education. Most grateful am I to be privileged as trustee of this wealth to devote it to such use."

The policy of the board has been to confer the retiring allowances through the institutions themselves rather than to individual teachers, on the principle that the annuity must come as a right and not as a charity. The professors in the accepted institutions receive retired pay in due course and under established rules. At the beginning of 1908 there were fifty-five such institutions. Allowances are granted on the basis of age, service and disability. The total grant from the beginning of the foundation to Sept. 30, 1907, was \$234,660, and the amount of the average allowance was \$1,418. Following were the officers of administration in 1908:

President—Henry Smith Pritchett.
Treasurer—Thomas Morrison Carnegie.
Assistant secretary—John Gabbert Bowman.
Trustees—Charles W. Eliot, chairman; David Starr Jordan, vice-chairman; Charles F. Thwing, secretary; Hill McClelland Bell, Nicholas M. Butler, Thomas M. Carnegie, Edwin B. Craighead,

William H. Crawford, George H. Denny, Robert A. Franks, Arthur Twining Hadley, Charles C. Harrison, Edwin Holt Hughes, Alexander C. Humphreys, Henry C. King, Thomas McClelland, Samuel B. McCormick, William Peterson, Samuel

Plantz, Henry S. Pritchett, Jacob Gould Schurman, Laurens C. Seelye, William F. Slocum, Frank A. Vanderlip, Woodrow Wilson.

OLD-AGE PENSIONS IN ENGLAND.

July 31, 1908, the British parliament passed an old-age pension bill, the main features of which are as follows: The pensioner must be 70 years or more of age, a citizen of the united kingdom and a resident thereof during the preceding twenty years. Lunatics, criminals, inebriates and wastrels are excluded, and all those who since Jan. 1, 1908, have received any such poor relief as disqualifies them from registration as parliamentary electors. The pension is based upon the private income of the recipient in such manner that his total income, supplemented by the pension, will range from 10 to 13 shillings (\$2.40 to \$3.12) per week. The law gives 5 shillings (\$1.20) a week to those whose incomes are £21 (\$102.27) or less per year; 4 shillings (96 cents) to those whose incomes reach £23 12s 6d (\$115); 3 shillings (72 cents) to

those with incomes of £26 5s (\$127.82); 2 shillings (48 cents) to those with incomes of £28 17s 6d (\$130.56), and 1 shilling (24 cents) to those with incomes of £31 10s (\$153.37).

Local pension committees are appointed by the borough councils and county councils and to these committees the first applications are made. They are then referred to pension officers appointed by the treasury department and if the recommendations agree the pension is issued. In cases of dispute the matter is referred to the local government board, which is the final authority. The payments, which begin to accrue Jan. 1, 1909, are made weekly through the postoffice. It is expected that the total cost of the pensions for 1909 will be \$32,500,000 and more thereafter.

CENTENARIANS IN THE UNITED STATES.

In 1900 there were 3,536 persons in the United States aged 100 years or more. Of these 1,289 were men and 2,247 women. All but 419 were native born and 2,553 were negroes. In Illinois there were 78 persons more than 100 years of age, of whom 31 were men and 47 women. The deaths of the following centenarians in the United States were reported between Nov. 1, 1907, and Nov. 1, 1908:

Mrs. Ann Hulsizer, 106, West Liberty, O., Dec. 20, 1907.

Garry Brooks, 101, Fairport, N. Y., Dec. 24, 1907.

Mrs. Mary R. L. Wood, 119, Hillsboro, Ore., Jan. 1.

Mrs. E. E. Bliss, 103, Pueblo, Col., Jan. 5.

Mrs. Mary Sherry, 102, Brocton, N. Y., Feb. 3.

Mrs. Honorah Kinney, 100, Beloit, Wis., Feb. 4.

Dr. William M. Starr, 100, Washington, D. C., Feb. 15.

THE SAGE FOUNDATION.

March 12, 1907, Mrs. Russell Sage of New York announced that she had set aside the sum of \$10,000,000 to be known as the Sage foundation and to be devoted to the improvement of the social and living conditions in the United States. As trustees she appointed Robert W. DeForest, Cleveland H. Dodge, Daniel C. Gilman, John M. Glenn, Miss Helen Gould, Mrs. William B. Rice and Miss Louise L. Schuyler. Following is a part of the statement given out by Mrs. Sage as to the object of the gift:

"I have set aside \$10,000,000 for the endowment of this foundation. Its object is the improvement of social and living conditions in the United States. The means to that end will include research, publication, education, the establishment and maintenance of charitable and beneficial activities, agencies and institutions and the aid of any such activities, agencies and institutions already established."

CHANGE OF RULERS IN MOROCCO.

Sultan Mulai-Abd-el-Aziz of Morocco was de-throned in August, 1908, by Mulai Haifa, his elder brother. The rebellion begun by the latter in 1907 was successful owing to the dislike incurred by the reigning sultan because of the favors shown to foreigners and to the defection of some of the most powerful tribes. The decisive battle in which Abd-el-Aziz's forces were defeated was fought Aug. 22 at a point fifty miles from Morocco City. Mulai-Abd-el-Aziz had been on the throne since June 7, 1894.

STARS ON THE AMERICAN FLAG.

Owing to the admission of Oklahoma as a state the war department in March, 1908, issued an order that the field or union of the national flag in use in the army should, after July 4, 1908, consist of forty-six stars, in six rows, the first, third, fourth and sixth rows to have eight stars, and the second and fifth rows seven stars each. In a blue field, arranged as shown in the accompanying diagram.

LONGEST STEEL BRIDGE IN THE WORLD.

The steel bridge across the Columbia river at Vancouver, Wash., said to be the longest structure of its kind in the world, was completed in June, 1908. It was built for the Spokane, Portland & Seattle railroad at a cost of \$2,000,000. Including approaches it is two miles long. The ten main spans have a total length of 2,806 feet.

WINNERS OF THE NOBEL PRIZES.

[Prepared for The Daily News Almanac by B. Lofgren, chief clerk of the Nobel foundation.]

PHYSICS.

- 1901—William Conrad Roentgen, professor of physics at the University of Munich, for his discovery of the rays bearing his name.
- 1902—Divided equally between Henrik Anton Lorentz, professor of physics at the University of Leyden, and Peter Zeeman, professor of physics at the University of Amsterdam, for their researches in the effects of magnetism on the phenomena of radiation.
- 1903—Half to Antoine Henri Becquerel, professor of physics at the Ecole Polytechnique and at the Museum d'Histoire Naturelle, Paris, France, member Institut Francaise, in recognition of his discovery of spontaneous radio-activity; half to Pierre Curie, professor of physics at the University of Paris (Sorbonne) and teacher in physics at the Paris Municipal School of Industrial Physics and Chemistry, and his wife, Marie Sklodowska Curie, preceptress at the Higher Normal School for Young Girls at Sevres, "as an acknowledgment of the extraordinary merit they have acquired through the work which they have done in common in connection with the radiation phenomena discovered by Prof. Henri Becquerel."
- 1904—Lord Rayleigh, professor of natural philosophy, Royal Institution of Great Britain, London, for his investigation of the constituent elements of the most important gases and for his discovery of argon in connection with that investigation.
- 1905—Philippe Lenard, professor of physics at the Physical Institute of Kiel, for his investigation of the cathode rays and recognition of his excellent works on "Electricity in Waterfalls," "The Cathode Rays and Their Electric Action on Gases," "The Bringing Out of Cathode Rays from Ultraviolet Light" and others.
- 1906—J. J. Thomson, professor of experimental physics at the University of Cambridge, England, for his researches extending over many years into the nature of electricity.
- 1907—Albert A. Michelson, professor of physics at the University of Chicago, for his optical instrument of precision and his spectroscopic and meteorological investigations.

CHEMISTRY.

- 1901—Jakob Hendrik van't Hoff, professor of chemistry in the University of Berlin, for discovering the laws of chemical dynamics and of osmotic pressure in solutions.
- 1902—Emil Fischer, professor of chemistry in the University of Berlin, for his synthetic works within the sugar and purine groups.
- 1903—Svante August Arrhenius, professor at the University of Stockholm, for elaborating and demonstrating his theory of electrolytic dissociation, and thus promoting the development of chemistry.
- 1904—Sir William Ramsay, professor of chemistry in the University college, London, in recognition of his merit in discovering atmospheric gases and determining their place in the periodic system.
- 1905—Adolf von Baeyer, professor of chemistry at Munich, for his recent discoveries of the green coloring matter "cœrulein" and red coloring matter "eosin" and of "indol" and of his discovery of the process to make artificial indigo blue. He is the world's most noted student of synthetic chemistry and has in the last few years discovered a great number of processes of value to the industrial world.
- 1906—H. Moissan, professor of chemistry at the Sorbonne, Paris, for his experiments in the isolation of fluorine, his researches regarding the nature of that element and his application of the electric furnace to the service of science.
- 1907—Eduard Buchner, professor of chemistry in the agricultural high school of Berlin, for his biological-chemical investigations and his discovery of cell-free fermentation.

MEDICINE.

- 1901—Emil Adolf von Behring, professor of hygiene and medical history at the University of Marburg, Prussia, for his works on serum therapeutics, with especial reference to diphtheria.
- 1902—Donald Ross, professor of tropical medicine at the University college of Liverpool, for his discovery of the cause and cure of malaria.
- 1903—Niels Ryberg Finsen, professor of medicine, Copenhagen, Denmark, for his work in treating diseases, especially lupus vulgaris, with concentrated light rays.
- 1904—Ivan Petrovic Pawlow, professor of physiology in the Military Academy of Medicine, St. Petersburg, in recognition of his work in the physiology of the digestion.
- 1905—Robert Koch, member of the Royal Academy of Science, Berlin, for his bacteriologic discoveries, as for example his tuberculin; also for his works on bacteriologic researches with special reference to cholera and tuberculosis.
- 1906—Profs. Ramon y Cajal and Camillo Golgi of the Pavia university, Italy, for their works dealing with the anatomy of the nervous system.
- 1907—Charles L. A. Laveran of the Pasteur institute in Paris, in recognition of his work touching the importance of protozoa as a cause of disease.

LITERATURE.

- 1901—Rene Francois Armand Sully-Prudhomme, member of the French academy, for poetical works exhibiting the highest idealism and artistic perfection as well as a rare union of the qualities of heart and genius.
- 1902—Theodor Mommsen, a professor of history at the University of Berlin, as the "greatest living master of the art of historical writing, with special regard to his monumental work 'Römische Geschichte.'"
- 1903—Bjørnstjerne Bjørnson, author, Norway, "as a token of recognition of his noble, grand and many-sided work as a classic writer, which work has always been characterized simultaneously by the freshness of inspiration and a rare purity of soul."
- 1904—Half to Frederic Mistral for the originality and art of his poetry and for his important labors in Provençal philology; half to Jose Echegaray in recognition of his comprehensive and skillful work as an author, by which he revived the great traditions of the Spanish drama.
- 1905—Henryk Sienkiewicz, the author of the famous book "Quo Vadis?" for his ability to picture the first Christians in the realistic colors of the olden time.
- 1906—Prof. Giosue Carducci of Bologna, Italy, for his poems and literary essays.
- 1907—Rudyard Kipling, for the power of observation, originality in imagination and virility of conception and art of description which distinguish the creations of this world-renowned author.

PEACE.

- 1901—Divided equally between Henri Dunant, founder of the International Red Cross Society of Geneva, and Frederic Passay, founder of the first French peace association, the "Societe Francaise pour l'Arbitrage Entre Nations."
- 1902—Divided equally between Elle Ducommun, secretary of the international peace bureau at Bern, and Albert Gobat, chief of the interparliamentary peace bureau at Bern.
- 1903—William Randal Cremer, M. P., secretary of the International Arbitration league, London.
- 1904—The Institute of International Right, a scientific association founded in 1873 in Ghent, Belgium.
- 1905—Baroness Bertha von Suttner for her splendid literary work written in the interest of the world's peace movement.
- 1906—Theodore Roosevelt, president of the United States, for the part he took in bringing the Russo-Japanese war to an end. Money set apart

by the president for the establishment of a permanent industrial peace commission.
 1907—Divided equally between Ernesto T. Moneta, president of the Lombardy Peace union, and Louis Renault, professor of international law at the University of Paris.

THE GENERAL EDUCATION BOARD.

Organized Feb. 27, 1902.

Chairman—Frederick T. Gates.
 Treasurer—George Foster Peabody.
 Secretary—Wallace Buttrick.
 Other members—Daniel C. Gilman, Robert C. Ogden, Walter H. Page, J. D. Rockefeller, Jr., Albert Shaw, Starr J. Murphy, Hugh H. Hanna, E. Benjamin Andrews, Edwin A. Alderman, Hollis B. Frissell, Harry Pratt Judson, Charles W. Eliot, Andrew Carnegie.

Offices—2 Rector street, New York city.
 The general education board was informally organized Feb. 27, 1902, at the suggestion of John D. Rockefeller's committee on benevolence and was given a charter by congress and formally organized in January, 1903. The plan was designed and adapted to assist Mr. Rockefeller in distributing his gifts to education and to afford a medium through which other men of means might contribute to the same end. The board, a few days after its initial meeting, received from Mr. Rockefeller the sum of \$1,000,000, the use of which was to be confined to the study and promotion of education in the southern states. An office was opened in New York city April 1, 1902, and work was begun. The board in co-operation with the department of agriculture took steps to educate the farmers of the south in scientific farming and up to the summer of 1903 had established about 15,000 demonstration farms under the supervision of eighty-nine agents in Alabama, Mississippi, Georgia, South Carolina, North Carolina, Virginia and Florida. The board also, in co-operation with the state universities of Virginia, North and South Carolina, Georgia, Alabama, Tennessee and Florida and the department of education in Louisiana has established more than 500 high schools. About \$700,000 of the original sum given by Mr. Rockefeller has been expended in this way, about half being for schools for colored people.

June 30, 1905, the board was notified that Mr. Rockefeller would donate \$10,000,000, the principal of which was to be held in perpetuity as a foundation for education, the income to be used for the benefit of institutions of learning in such manner as might be deemed best adapted to promote a

The prizes are awarded on the 10th of December of each year. In 1908 each prize was \$37,746.00.

An official account of the origin of the Nobel prize fund will be found on page 108 of The Chicago Daily News Almanac and Year-Book for 1904.

comprehensive system of higher education in the United States. This sum was paid in cash Oct. 1, 1905, and the board in accepting it designated it as "The John D. Rockefeller Foundation for Higher Education." After due consideration the board adopted the following principles as defining its general policy: "To co-operate sympathetically and helpfully with the religious denominations; to choose the centers of wealth and population as the permanent pivots of an educational system; to mass its funds on endowments, securing in this work the largest possible local co-operation."

Feb. 7, 1907, the following letter was received from John D. Rockefeller, Jr.:

"Gentlemen: My father authorizes me to say that on or before April 1, 1907, he will give to the general education board income-bearing securities, the present market value of which is about \$32,000,000, one-third to be added to the permanent endowment of the board; two-thirds to be applied to such specific objects within the corporate purposes of the board as either he or I may from time to time direct, any remainder not so designated at the death of the survivor to be added also to the permanent endowment of the board."

Up to the middle of 1908 the board had made conditional appropriations aggregating \$2,437,500 to forty colleges in various parts of the United States and it was then estimated that the supplemental sums to be raised by the institutions themselves would amount to \$10,397,000.

In the northern states the board devotes itself exclusively to the promotion of higher education, having always in view the desirability of aiding such institutions as, taken together, will constitute an adequate system of higher education for each of the several states, thus seeking to correct and prevent duplication and waste and securing the highest efficiency. In the southern states its work for the colleges is similar to that in the north, but in addition it seeks to promote public high schools, to promote elementary education by increasing the productive efficiency of rural life and to aid in developing schools for the training of leaders among the colored people.

FOUNDATION FOR THE PROMOTION OF INDUSTRIAL PEACE.

Established in 1907.

Trustees—Chief Justice Melville W. Fuller, president; Seth Low of New York, representing the general public; John Mitchell of the United Mine Workers of America, representing labor, secretary; Thomas G. Bush of Birmingham, Ala., representing general public; Marvin A. Hughitt, representing capital, and Secretaries James Wilson and Oscar Solomon Straus.

Industrial peace committee—Archbishop John Ireland, Marcus M. Marks of New York, Ralph M. Easley of New York, Franklin MacVeagh of Chicago, Lucius Tuttle, president of Boston & Maine railroad; J. Gunby Jordan of Columbus, Ga.; Samuel Gompers, president of the American Federation of Labor; Daniel J. Keefe, president of the Longshoremen's association, and Warren S. Stone, president International Brotherhood of Locomotive Engineers.

In 1906 President Theodore Roosevelt was awarded the Alfred B. Nobel peace prize and at his sug-

gestion an act was passed by congress March 2, 1907, establishing the Foundation for the Promotion of Industrial Peace. To this organization he turned over the money received from the Nobel committee to be used as the nucleus of a fund the income of which is to be used in promoting an annual conference in Washington between representatives of capital and of labor with a view to bringing about a better understanding between employers and employees, thus promoting industrial peace. The chief justice of the United States, the secretary of agriculture and the secretary of commerce and labor, and their successors in office, and four persons appointed by the president of the United States to represent capital, labor and the general public are the trustees. The trustees are authorized to pay over the funds from time to time to a committee of nine members, known as "the industrial peace committee," whose duty it is to make arrangements for the conferences.

STATISTICS OF CRIME IN THE UNITED STATES.

[From special reports by census bureau.]

June 30, 1904, there were in the United States 1,337 prisons of all kinds receiving persons sentenced for crime. The total number of inmates on the same date was 81,772, or 100.6 per 100,000 of

estimated population. Distributed by sex, color, nativity and race they were as follows for the main geographical divisions:

PRISONERS COMMITTED IN 1904.

During 1904 a total of 149,691 prisoners were committed in the United States on term sentences. Assuming that those enumerated on June 30, 1904—namely, 81,772—represent the average number in prisons on any given date, it will be seen that the prison population on a fixed date constitutes about 54.6 per cent of the number committed on term sentences during a year.

Of the prisoners committed in 1904 244 were for homicide, 1,484 for robbery and 7,161 for burglary. The distribution by color, sex, race and nativity was as follows:

PRESIDENT ROOSEVELT AND ADMIRAL BROWNSON.

Rear-Admiral Willard H. Brownson, chief of the bureau of navigation in the United States navy department, resigned his position Dec. 24, 1907, because he did not agree with President Roosevelt and the secretary of the navy regarding the command of hospital ships. The president accepted the resignation and in a letter dated Jan. 2, 1908, severely criticised the admiral for his action, calling it unseemly and improper, coupled with the various controversies as to details of naval construction and methods of training prejudicial to the interests of the navy. In another letter dated two days later the president gave the reasons why it was decided to put hospital ships under the com-

mand of surgeons instead of line officers. He said this had been the custom in other navies to preserve the neutral character of such vessels in case of war. "The command of a hospital ship," he declared, "should unquestionably be vested in a medical officer and no line officer should be aboard it. The medical officer in such case is simply the responsible head of a large hospital plant, which, by reason of his training, he is peculiarly fitted to command. It is not his province to navigate the vessel; this should be left to a civilian sailing master, but he, and he alone, is best qualified to respect and guard the neutrality of the ship."

NUMBER OF THE STARS.

According to the best astronomers the number of stars that can be seen by a person of average eyesight is only about 7,000. The number visible

through the telescope has been estimated by J. F. Gore at 70,000,000 and by Profs. Newcomb and Young at 100,000,000.

*Innocent party only. †Subsequent to marriage. ‡Incurable, after marriage. §Absence of ten years. ¶After divorce.

NOTE—Consanguinity and infidelity are causes for divorce in all the states.

MARRIAGE LAWS.

Marriage may be contracted without the consent of parents by males who are 21 years of age or more. This is the rule in about all the states having laws on the subject. In Arizona the age is 18. For females the age is 21 in Connecticut, Florida, Kentucky, Louisiana, Ohio, Pennsylvania, Rhode Island, South Dakota, Virginia, West Virginia and Wyoming; 16 is the age in Arizona, Maryland and Nebraska and 13 in the other states. Marriages contracted before the age of consent are illegal in nearly all the states.

Marriage licenses are required in all the states and territories with the exception of New Mexico, New Jersey, New York, North Dakota, Oklahoma and South Carolina.

Marriages between whites and negroes are prohibited by law in Alabama, Arizona, Arkansas,

California, Colorado, Delaware, District of Columbia, Florida, Georgia, Idaho, Indiana, Kentucky, Maryland, Mississippi, Missouri, Nebraska, Nevada, North Carolina, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Virginia and West Virginia. Michigan specifically declares such marriages valid.

Marriages between first cousins are prohibited in Arizona, Arkansas, Illinois, Indiana, Kansas, Louisiana, Missouri, Montana, Nevada, New Hampshire, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Dakota and Wyoming. Step-relatives are not permitted to intermarry except in California, Colorado, Florida, Georgia, Idaho, Minnesota, New Mexico, New York, North Carolina, Oregon, Utah and Wisconsin.

SEVEN WONDERS OF THE WORLD.

The "seven wonders of the world," according to the generally accepted list, were the following works of antiquity: The walls of Babylon, the statue of Zeus by Phidias at Olympia, the hanging

gardens at Babylon, the colossus of Rhodes, the pyramids of Egypt, the mausoleum of Halicarnassus and the temple of Artemis at Ephesus.

WEIGHTS AND MEASURES USED IN THE UNITED STATES.

LONG MEASURE.		MARINERS' MEASURE.		LIQUID MEASURE.	
12 inches = 1 foot.		6 feet = 1 fathom.		4 gills = 1 pint.	
3 feet = 1 yard = 36 inches.		120 fathoms = 1 cable length.		2 pints = 1 quart.	
5½ yards = 1 rod = 16½ feet.		7½ cable lengths = 1 mile.		4 quarts = 1 gallon.	
40 rods = 1 furlong = 660 feet.		5280 feet = 1 statute mile.		8½ gallons = 1 barrel.	
8 furlongs = 1 mile = 5,280 feet.		6085 feet = 1 nautical mile.		2 barrels = 1 hoghead.	
		3 marine miles = 1 marine league.			
SQUARE MEASURE.		CUBIC MEASURE.		DRY MEASURE.	
144 square inches = 1 square foot.		1,728 cubic inches = 1 cubic foot.		2 pints = 1 quart.	
9 square feet = 1 square yard.		27 cubic feet = 1 cubic yard.		8 quarts = 1 peck.	
30¼ square yards = 1 square rod.		128 cubic feet = 1 cord of wood or stone.		4 pecks = 1 bushel.	
160 square rods = 1 acre.		1 gallon contains 231 cubic inches.			
640 acres = 1 square mile.		1 bushel contains 2,150.4 cubic inches.			
36 square miles = 1 township.		A cord of wood is 8 ft. long, 4 ft. wide & 4 ft. high.			
CIRCULAR MEASURE.		APOTHECARIES' WEIGHT.		AVOIRDUPOIS WEIGHT.	
60 seconds = 1 minute.		20 grains = 1 scruple.		27 11-32 grains = 1 dram.	
60 minutes = 1 degree.		3 scruples = 1 dram.		16 drams = 1 ounce.	
360 degrees = 1 circle.		8 drams = 1 ounce.		16 ounces = 1 pound.	
1 degree = 60 geograph. c miles.		12 ounces = 1 pound.		2,000 lbs. = 1 short ton.	
1 geographic mile = 1.1527 statute miles.				2,240 lbs. = 1 long ton.	
1 degree of the equator = 69.124 statute miles.					
TROY WEIGHT.		TIME MEASURE.		STATIONERS' TABLE.	
24 grains = 1 pennyweight.		60 seconds = 1 minute.		24 sheets = 1 quire.	
20 pennyw's = 1 ounce.		60 minutes = 1 hour.		20 quires = 1 ream.	
12 ounces = 1 pound.		24 hours = 1 day.		2 reams = 1 bundle.	
		365 days = 1 year.		5 bundles = 1 bale.	
		100 years = 1 century.			
CLOTH MEASURE.		MISCELLANEOUS.		COUNTING.	
2¼ inches = 1 nail.		3 inches = 1 palm.		12 things = 1 dozen.	
4 nails = 1 quarter.		4 inches = 1 hand.		12 dozen = 1 gross.	
4 quarters = 1 yard.		6 inches = 1 span.		12 gross = 1 great gross.	
		18 inches = 1 cubit.		20 things = 1 score.	
		21.8 inches = 1 bible cubit.			
		2½ feet = 1 military pace.			

ILLINOIS WEIGHTS AND MEASURES.

Statutory weights and measures in Illinois not included in the above tables are: Flour, per barrel, 196 pounds; per half-barrel, 98 pounds; per quarter-barrel sack, 49 pounds; per eighth-barrel sack, 24½ pounds. Cornmeal, per bushel sack, 48 pounds; per half-bushel sack, 24 pounds;

per quarter-bushel sack, 12 pounds. Stone coal, per bushel, 80 pounds. Unslacked lime, per bushel, 80 pounds. Fine salt, per bushel, 55 pounds; coarse salt, 50 pounds. Hair (plastering), per bushel, 8 pounds.

THE METRIC SYSTEM.

The metric system is in general use in all the principal nations of Europe and America with the exception of Great Britain, Russia and the United States, where it is authorized but not compulsory. Its use for scientific purposes is common throughout the world.

WEIGHTS.	
Milligram (.001 gram)	= .00154 grain.
Centigram (.01 gram)	= .01543 grain.
Decigram (.1 gram)	= .15432 grains.
Gram	= 15.432 grains.
Decagram (10 grams)	= 154.32 grains.
Hectogram (100 grams)	= 1,543.2 grains.
Kilogram (1,000 grams)	= 15,432 grains.
Myriagram (10,000 grams)	= 154,320 grains.
Quinta (100,000 grams)	= 1,543,200 grains.
Millier or tonneau-ton (1,000,000 grams)	= 15,432,000 grains.

DRY.	
Milliliter (.001 liter)	= .001 cubic inch.
Centiliter (.01 liter)	= .0102 cubic inch.
Deciliter (.1 liter)	= .61022 cubic inches.
Liter	= .908 quart.
Decaliter (10 liters)	= 9.08 quarts.
Hectoliter (100 liters)	= 2.388 bushels.
Kiloliter (1,000 liters)	= 1.308 cubic yards.

LIQUID.

Milliliter (.001 liter)	= .0038 fluid ounce.
Centiliter (.01 liter)	= .388 fluid ounce.
Deciliter (.1 liter)	= 3.845 gill.
Liter	= 1.0567 quarts.
Decaliter (10 liters)	= 2.6418 gallons.
Hectoliter (100 liters)	= 26.417 gallons.
Kiloliter (1,000 liters)	= 264.18 gallons.

LENGTH.

Millimeter (.001 meter)	= .0394 inch.
Centimeter (.01 meter)	= .3937 inch.
Decimeter (.1 meter)	= 3.937 inches.
Meter	= 39.37 inches.
Decameter (10 meters)	= 393.7 inches.
Hectometer (100 meters)	= 3,937 feet 1 inch.
Kilometer (1,000 meters)	= 3,281 feet 10 inches (3,280 feet 10 inches).
Myriameter (10,000 meters)	= 6,213 miles.

SURFACE.

Centare (1 square meter)	= 1.550 sq. inches.
Are (100 square meters)	= 119.6 sq. yards.
Hectare (10,000 sq. meters)	= 2.471 acres.

ELECTRICAL UNITS DEFINED.

Ohm—Unit of resistance; represents resistance offered to an unvarying electric current by a column of mercury at the temperature of ice, 34.5421 grams in mass, of a cross-sectional area of 1.00003 square millimeters and of the length of 106.3 centimeters.

Ampere—Unit of current; decomposes .0009324 of a gram of water in one second or deposits silver at the rate of .001118 of a gram per second, when passed through a solution of nitrate of silver in water.

Volt—Unit of electro motive force; one volt equals one ampere of current passing through a substance having one ohm of resistance.

Coulomb—Unit of quantity; amount of electricity transferred by a current of one ampere in one second.

Farad—Unit of capacity; capacity of a condenser charged to a potential of one volt by one coulomb. A microfarad is one-millionth of a farad.

Joule—Unit of work; equivalent to energy expended in one second by one ampere current in one ohm resistance.

Watt—Unit of power; equivalent to work done at the rate of one joule per second. A kilowatt is 1,000 watts.

WEATHER FORECASTS AND SIGNALS.

The weather bureau of the United States department of agriculture sends daily weather forecasts to more than 2,100,000 addresses. Most of these are reached by telephone without expense to the government, the forecasts being distributed as soon as received by some 1,600 telephone companies. About 150,000 persons are reached by mail or rural free delivery, 1,400 by railroad train service and 2,100 by railroad telegraph. The bureau

in addition sends at government expense forecasts and special warnings to 2,300 points, special warnings only to 750 points and emergency warnings to 6,000 places, all by wire.

There are in the employ of the bureau more than 1,600 persons, divided among nearly 200 stations. The number of co-operative observers at the close of the fiscal year 1907 was 3,684 and the number of weather correspondents 4,269.

EXPLANATION OF WEATHER FLAGS.

No. 1.
White flag.

Clear or fair weather.

No. 2.
Blue flag.

Rain or snow.

No. 3.
White and blue flag.

Local rain or snow.

No. 4.
Black triangular flag.

Temperature.

No. 5.
White flag with black square in center.

Cold wave.

When No. 4 is placed above No. 1, 2 or 3 it indicates warmer; when below, colder; when not displayed, the temperature is expected to remain

about stationary. During the late spring and early fall the cold-wave flag is used to indicate anticipated frosts.

EXPLANATION OF STORM-WARNING FLAGS.

Northwest winds.

Southwest winds.

Northeast winds.

Southeast winds.

"Hurricane" signal.

A red flag with a black center indicates that a storm of marked violence is expected. The pennants displayed with the flags indicate the direction of the wind: Red, easterly (from northeast to south); white, westerly (from southwest to north). The pennant above the flag indicates that the wind is expected to blow from the northerly quadrants; below, from southerly quadrants.

By night a red light indicates easterly winds

and a white light above a red light westerly winds.

Two red flags, with black centers, displayed one above the other, indicate the expected approach of tropical hurricanes, and also of those extremely severe and dangerous storms which occasionally move across the lakes and northern Atlantic coast. Hurricane warnings are not displayed at night.

WIND-BAROMETER TABLE FOR THE GREAT LAKES.

[Prepared by United States weather bureau.]

HEIGHT OF BAROMETER (LAKE LEVEL).	Direction of wind.	Character of weather and wind indicated.

THE SHERMAN ANTITRUST LAW.

Passed by the 51st congress and approved July 2, 1890.

Section 1. Every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce among the several states or with foreign nations, is hereby declared to be illegal. Every person who shall make any such contract or engage in any such combination or conspiracy shall be deemed guilty of a misdemeanor, and, on conviction thereof, shall be punished by fine not exceeding \$5,000 or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

Sec. 2. Every person who shall monopolize or attempt to monopolize or combine or conspire with any person or persons to monopolize any part of the trade or commerce among the several states or with foreign nations shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding \$5,000 or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

Sec. 3. Every contract, combination in form of trust or otherwise, or conspiracy in restraint of trade or commerce in any territory of the United States or of the District of Columbia, or in restraint of trade or commerce between any such territory and another, or between any such territory or territories and any state or states or the District of Columbia or with foreign nations, or between the District of Columbia and any state or states or foreign nations, is hereby declared illegal. Every person who shall make any such contract or engage in any such combination or conspiracy shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding \$5,000 or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

Sec. 4. The several Circuit courts of the United States are hereby invested with jurisdiction to prevent or restrain violations of this act; and it shall be the duty of the several district attorneys of the United States, in their respective districts, under the direction of the attorney-general, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petition setting forth the case and pray-

ing that such violation shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition the court shall proceed, as soon as may be, to the hearing and determination of the case; and pending such petition and before final decree the court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises.

Sec. 5. Whenever it shall appear to the court before which any proceeding under section 4 of this act may be pending that the ends of justice require that other parties should be brought before the court, the court may cause them to be summoned, whether they reside in the district in which the court is held or not; and subpoenas to that end may be served in any district by the marshal thereof.

Sec. 6. Any property owned under any contract or by any combination or pursuant to any conspiracy (and being the subject thereof) mentioned in section 1 of this act and being in the course of transportation from one state to another or to a foreign country shall be forfeited to the United States and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure and condemnation of property imported into the United States contrary to law.

Sec. 7. Any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared unlawful by this act may sue therefor in any Circuit court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover threefold the damages by him sustained and the cost of suit, including a reasonable attorney's fee.

Sec. 8. That the word "person" or "persons" wherever used in this act be deemed to include corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the territories, the laws of any state or the laws of any foreign country.

ANNEXATION OF THE KONGO INDEPENDENT STATE.

The Kongo "Independent State" was formally annexed to Belgium in 1908, the treaty of annexation being passed Aug. 20 by the chamber of deputies after a long controversy. Under the terms of this treaty the Kongo revenues are charged with the following annual allowances: To Prince Albert, son of the count of Flanders, brother of King Leopold, \$24,000; to Princess Clementine, the king's third daughter, \$15,000; to King Leopold himself, \$10,000,000, to be paid in fifteen annual installments for his use in building hospitals and schools and forwarding scientific work in Africa. He also retains in fee simple 40,000 hectares of land in Mayumbe for coffee and cocoa experiments. During his lifetime he is to retain his interests in the concessionary companies and the property in Belgium and France which he

purchased out of the funds of the Kongo foundation, but upon his death all this property will revert to Belgium. King Leopold will, however, have nothing further to do with the administration of the colony, this passing into the hands of the government of Belgium.

The Kongo Independent State grew out of the Kongo International association, founded in 1882 by King Leopold II. of Belgium. Its sovereignty was recognized by treaties with various European powers and the United States in 1884 and 1885. Though called an independent state it was virtually administered by King Leopold as his personal property. The atrocities committed upon the natives by his representatives there have formed the subject of a bitter controversy for many years.

THE MAXIM NOISELESS GUN.

In the spring of 1908 it was announced that Hiram Percy Maxim had discovered a method of discharging rifles and other firearms without the customary noise. The silencing apparatus consists of a transverse acting piston valve attached to the barrel of a weapon near the muzzle, permitting the gradual escape of the gases with only a slight hiss-

ing noise. Immediately after the bullet passes the piston valve slides across the bore of the barrel being actuated by the pressure of the gases themselves. After these have escaped through a series of small holes the valve resumes its open position automatically. Another cartridge cannot be fired unless the valve is in its proper position.

THE GUNNESS MURDERS AT LAPORTE, IND.

One of the most startling series of crimes in modern history was revealed by the burning, with all its occupants, April 28, 1908, of a house on the McClung road, one mile north of Laporte, Ind. The place was occupied by Mrs. Belle Gunness, a widow 44 years old, and her family, consisting of her daughters, Myrtle Sorenson, 11 years old, and Lucy Sorenson, 9 years old, and their half-brother Philip Gunness, 5 years old. The daughters were children of her first husband, Mads Sorenson, and the boy was the son of her second husband, Phillip S. Gunness. Ray Lamphere, a carpenter, was arrested shortly after the fire on suspicion of having murdered the woman and children and of having burned the house to conceal the crime. The headless body of a woman, supposed to be that of Mrs. Gunness, and the remains of the children were found in the ruins.

Before the destruction of the house inquiries had been set on foot by the relatives of Andrew Helgellen, a well-to-do bachelor of Aberdeen, S. D., who had arrived at Mrs. Gunness' home in January and had mysteriously disappeared. His brother, Asle K. Helgellen, was particularly active in the search, and when he learned of the fire he came at once to Laporte to carry on a personal investigation. From a man working on the Gunness place he learned that a hole in the garden back of the house had been filled up early in the spring by order of the woman. On digging at this spot Asle Helgellen uncovered and identified the mutilated corpse of his brother Andrew. This was on the morning of May 5. The sheriff of the county and others continued to dig in the vicinity of where the body of Helgellen was found and before the day was over had uncovered the bodies of four other persons who had been dismembered and put in gunny sacks. One of these was that of a young woman, supposed to have been Miss Jennie Olson, an adopted daughter of Mrs. Gunness. The girl, who was about 17 years old, disappeared in September, 1906. Another of the bodies was that of a large man, which was later identified as that of Ole O. Budberg, of Iola, Wis., who sold his farm in January, 1907, and came to Laporte with \$1,000 in cash. The other bodies discovered on May 5 were those of two children, each apparently 12 years of age.

These ghastly discoveries created a great sensation throughout the country and the authorities at once began a searching investigation. It was found that both of the woman's husbands had died under suspicious circumstances and that each had carried considerable life insurance. It was also established that Mrs. Gunness had exchanged letters with several of the victims, the correspondence having been initiated by means of matrimonial advertisements in a Norwegian paper, she and the men to whom she wrote being of Norwegian nationality. She usually insisted that they must bring a considerable amount of ready cash with them to put into her farm. Those of them who did so disappeared until their bones were dug up in the area back of her house.

May 6 the remains of four more human beings were found, all of them so dismembered and decom-

posed as to make identification impossible, and neither age nor sex could be determined. They had been buried in quicklime and three were found in one shallow grave.

Analysis of the bodies believed to be those of Mrs. Gunness and her children disclosed the fact that the stomachs contained enough arsenic to produce death. The theory then advanced was that the woman poisoned her children and then herself when she became convinced that her crimes were about to be exposed.

OTHER CASES OF A SIMILAR CHARACTER.

Bender Case—William Bender and his family came to Kansas in 1870 and settled on a farm some twenty miles southwest of Parsons, in Labette county. The road near which their house stood was used a good deal and travelers frequently stopped for meals or shelter during the night. The disappearance of Dr. William York and his little daughter in the vicinity of the Bender place led to a search being made and occupants of the house became frightened and made their escape. The bodies of York and his daughter were found buried near the house and subsequently the remains of eight or nine others who had been robbed and murdered there were found. In 1901 it was rumored that the Benders were living near Fort Collins, Col., but this turned out to have no foundation in fact. At that time D. W. Martin of Guthrie, O. T., made the statement that when the Benders died in 1873 they were pursued by a vigilance committee and all shot.

Holmes Case—H. H. Holmes was hanged in Philadelphia, Pa., May 7, 1896, for the murder of Benjamin F. Pitzel and his three children in Toronto, Ont., for the insurance on their lives. He was arrested in Boston Nov. 17, 1894, and from that time until his execution the papers were filled with stories of his alleged crimes. No fewer than twenty-seven murders were laid at his door, but there was no proof, legally conclusive, that he was guilty of any of them, though it was shown that he was a forger, bigamist, incendiary and swindler. He himself "confessed" to twelve murders, some of them said to have been committed in his house, known as "Holmes' castle," in Englewood, Chicago. These included the four Pitzels, George W. Thomas, Emily C. Cigrand, Robert E. Phelps, Mrs. Julia L. Connor, Pearl Connor, Emily Van Tassel and Nannie and Minnie Williams.

Hoch Case—Johann Hoch was hanged in Chicago, Feb. 23, 1906, for poisoning his wife Marie Walcker Hoch in the early part of 1905. After his arrest it developed that he had made it a business of marrying women, deserting some and killing others, his motive in each instance being to secure the life insurance and other property of his victim. It was well established that in the last nineteen years of his life he married no fewer than twelve women, of whom four died under circumstances that left but little doubt that they had been poisoned.

MURDER OF PRIEST BY ANARCHIST.

The Rev. Father Leo Heinrichs, pastor of St. Elizabeth's Catholic church, in Denver, Col., was shot and killed by Giuseppe Allia, an anarchist, Sunday, Feb. 23, 1908. The murder occurred at the altar rail in the church just as the victim was giving holy communion to the assassin, who

drew a revolver and shot the priest through the heart. The crime caused wide comment at the time, it being asserted that many other clergymen in America had been threatened with death by Italian anarchists. Allia was tried in March and condemned to death. He was hanged July 16.

ATTEMPT TO KILL BULKELEY WELLS.

While Bulkeley Wells, former adjutant-general of Colorado, was asleep on the porch of his house at Pandora, near Telluride, Col., early on the morning of March 28, 1908, a dynamite bomb was exploded under his bed. He was thrown thirty feet and covered with debris, but was not fatally injured. The house was badly wrecked. The

crime was attributed to a desire for revenge on the part of some of the miners against whom he had been active in 1904. His participation in the proceedings against Moyer, Haywood and Pettibone had also caused many threats of assassination to be made against him.

Sporting Records.

BASEBALL—SEASON OF 1908.

The finish in each of the major leagues in 1908 was the closest and most exciting in the history of baseball. In the case of the National league the result was not determined until the last game was played and that was an extra contest made necessary by a tie between Chicago and New York. In the American league the issue was not decided until near the very close of the season, when a game between the Chicago White Stockings and Detroit gave the championship to the latter.

Y. M. C. A. NEW YORK-CHICAGO RELAY RACE.

One thousand one hundred and thirty-one boys belonging to the Young Men's Christian association took part in a relay race from New York city to Chicago in July, 1908. The route taken was by way of Troy, Syracuse, Buffalo, Erie, Cleveland and South Bend, and was 1,092 miles in length. The boys, each of whom ran a mile or less in 1,250 relays, carried a message in a silver tube from the mayor of New York to the mayor of Chicago. The start was made July 15 at 10 a. m., and the message was delivered in the city hall at Chicago at 9:35 a. m. July 21, the schedule arranged having been beaten by 11 hours and 51 minutes. The actual running time was 114 hours and 46 minutes, excluding a stopover at Fremont, O., on Sunday, or an average of 9.5 miles per hour. The average time per mile was 6 minutes 19 seconds.

FRANKLIN FIELD RELAY RACES.

The one-mile national championship relay race for universities was run on Franklin field, Philadelphia, April 25, 1908. There were only two starters, Pennsylvania and Chicago, the former being represented by Haydock, Whitlam, Taylor and Cartmell and the latter by Quicker, Barker, Merriam and Lingle. Pennsylvania won in 3:23½. The two-mile relay race on the same occasion was won by Michigan university, with Pennsylvania second and Columbia third. Time, 8:04½. The one-mile relay race for high schools was won by the Brooklyn Manual Training high school with the Oak Park (Ill.) high school second. Time, 3:33½.

MARATHON FOOT RACES.

The fourth annual Marathon foot race under the auspices of the Illinois Athletic club of Chicago was run Saturday, Sept. 20, 1908, over the 25-mile course from Ravinia Park to the clubhouse in Mich-

igan avenue. It was won by Albert Corey, unattached, in 2:57:30. Sydney Hatch, I. A. C., was second in 2:58:30, and J. A. Feltes, unattached, third in 3:12:00. There were seventy-nine starters. The record:

1907—Alexander Thibreau.....		3:00:10

T. P. Morrissey of the Mercury Athletic club, Yonkers, N. Y., won the Boston Athletic association Marathon race of 25 miles, from Ashland to Boston, April 20, 1908, making the distance in 2:25:43%, or 1 minute and 19% seconds behind the record made by Thomas Longboat in 1907. Hayes of New York was second and Fowler of Cambridgeport third. There were 100 starters.

Sydney Hatch, representing the first regiment, Chicago, won the fourth annual Marathon race of the Missouri Athletic club at St. Louis, Mo., May 2, 1908, in 2:29:56%. Joseph Forshaw of the M. A. C. was second in 2:30:00%, and Alexander Thibreau, his clubmate, was third in 2:37:48%.

Albert Corey of the First Regiment Athletic association of Chicago won the St. Louis Marathon race of 15 miles June 6, 1908, in 1:41:34. Roy Kemper of the Spartan Athletic club was second in 1:45:51 and Alexander Thibreau of the First Regiment Athletic association of Chicago was third in 1:47:30.

AUTOMOBILING.

RACE FOR EMPEROR'S CUP.

The automobile race for Emperor William's cup was run June 14, 1907, and was won by Nazzaro of Italy in a Fiat in 5 hours 34 minutes and 26 seconds. Hautvast was second and Michel third. The circuit selected for the race covered a distance of 125 kilometers, which had to be traversed four times to complete the distance of 500 kilometers, or about 312 miles. It was in the country adjacent to Homburg, Germany.

LE GRAND PRIX.

Instead of the Bennett cup race "Le Grand Prix" (the grand prize) contest was substituted. The first contest took place on the Sarthe circuit in France June 26-27, 1906. The total distance was 774 miles, 387 being covered each day. The race was won by Francois Szisz in a Renault in 12:14:05%, an average of 63.35 miles an hour. Nazzaro was second and Clement third. There were thirty-two starters. In 1907 the race was shortened from two days to one day, the distance being 478 3-10 miles. Nazzaro of Italy in a Fiat was the winner in 6:46:33, with Szisz of France in a Renault second and Baras of France in a Brasier third. In 1908 Lautenschlager of Germany, driving a Mercedes, won. The distance was 478 miles, Lautenschlager covering the distance at an average speed of 69.5 miles an hour; time, 6:55:43. Hemery of Germany in a Benz was second and Hanriot of Germany in a Mercedes third. Record of events to date:

NEW YORK-PARIS RACE.

Six cars—the Thomas Flyer, representing America; the De Dion, Motobloc and Sizaire-Naudin, France; Zust, Italy, and Protos, Germany—started from New York Feb. 12, 1908, in a 20,000 mile race west to Paris. The Thomas Flyer was adjudged the winner by twenty-six days, its time being 169 days 2 hours, although the Protos beat it into Paris by four days. The Thomas Flyer, however, had an allowance of thirty days for having gone to Alaska, which none of the other cars did. The Protos also was penalized for being shipped from Pocatello, Idaho, to Seattle, then sent by steamer to Vladivostok, whereas the Thomas, De Dion and Zust ran through Japan to Vladivostok.

ONE-MILE CIRCULAR-TRACK RECORD.

Twice in 1907 was the one-mile record on a circular track beaten. The record was :53, held by Barney Oldfield in a Peerless Green Dragon. Walter Christie in a front-drive racer of his own design cut this to :52 at Minneapolis Sept. 7 and Oct. 17 this was reduced to :51 by Lewis Straug, driving the Christie, at Birmingham, Ala. The fastest track mile is :48 $\frac{1}{2}$, made at Morris Park, New York, in 1906, by Webb Jay in a White steamer. This mark was not accepted because there is only one turn in the track. In 1908 a successful attack was made upon Straug's record, Ralph de Palma, in a Fiat, reducing it to :51 at Minneapolis on Labor day.

SPEED OF THE AUTOMOBILE.

Automobile speed may be judged by a study of the record table which shows that the fastest mile ever recorded is the :28 $\frac{3}{4}$ made by F. H. Marlott in a Stanley steamer at Ormond, Fla., in 1906. The fastest average pace for a middle-distance race was made at Ormond March 5, 1908, when Maurice Pernin, in a sixty-horse-power Renault, traveled 100 miles in 1:12:56 $\frac{1}{2}$, an average of 82.26 miles per hour. At the same meet Emanuel Cedrino, in the sixty-horse-power Fiat Cyclone, established a 300-mile record of 3:53:44, an average of 77.02 miles per hour. Greater speed than even this is reported to have been made by Nazzaro in a Fiat in a match race at Brooklands, England, it being said he showed 120 miles an hour for two and three-quarter miles, but these figures never were officially accepted. On the road the fastest average pace was made in the Florio cup race in Italy in 1908 by Nazzaro in a Fiat, who averaged 74.27 miles per hour.

TWENTY-FOUR-HOUR RECORDS.

The world's record for twenty-four hours is 1,581 miles 1,310 yards, an average pace of 65.9 miles an hour, made June 28-29, 1907, by S. F. Edge in a six-cylinder Napier on the three and one-quarter mile cement track at Weybridge, England. During the year there were run in the United States ten twenty-four-hour races, five of them single-car events and the other five relay or team races in which two cars of the same make constituted a team. The twenty-four-hour races run in 1907 resulted as follows:

Place.	Winner.	Mileage.
Philadelphia	Autocar	837
*Detroit	Ford (six-cylinder)	1,135
*Minneapolis	Locomobile	1,037
St. Louis	Tolson	833
*Chicago	Thomas	846
Brighton Beach	Thomas	907
Morris Park	Renault	1,079
Philadelphia	Lozier	717
*Milwaukee	Locomobile	1,146
Morris Park	Fiat	984

*Team races.

In 1908 only three twenty-four-hour races were run, but in two of them the world's single-car record was beaten. The races were:

Place and time.	Winning car.	Mileage.
Brighton Beach, Oct. 2-3	Simplex	1,177
Brighton Beach, Sept. 18-19	Lozier	1,107
Milwaukee, Sept. 25-26	Locomobile	992 $\frac{3}{4}$

CHICAGO-NEW YORK RECORD.

The record by automobile between Chicago and New York is 39:53:00. It was made by a Franklin twenty-eight horse-power runabout Aug. 21-22, 1907. The route followed was via Elkhart, Cleveland, Erie, Buffalo, Rochester, Syracuse, Utica, Newburgh and along the east side of the Hudson to New York. The distance was 1,050 miles. The previous record was 56:58:00, also made by a Franklin, a six-cylinder car.

THE GLIDDEN TOUR.

The 1908 Glidden tour was from Buffalo to Saratoga Springs, N. Y., distance 1,700 miles. Ten teams competed for the Glidden trophy, three of which, the Buffalo Automobile club, Chicago Motor Club No. 2 and the Columbus Automobile club, went through with perfect scores. The Chicago team withdrew from the run-off because the driver

of one of its cars was called home; the Columbus team withdrew because its protest against one of the Buffalo cars was not allowed, which left the Buffalo club with a walkover, which it refused to take. Twenty-two of the Glidden cars had perfect scores, as follows: Studebaker, 2; Pierce-Arrow, 3; Peerless, 3; Franklin, 2; R. Haynes, 2; Oldsmobile, Rainier, Oakland, Reo, Premier, Gaeth, Thomas Flyer, Selden, Garford and Marmon, 1 each.

A tie also resulted for the Hower trophy, in which two Pierce Arrows, two Stoddard-Daytons and a Premier were involved. A run-off of four days followed, the Pierce Arrows being the survivors. One of these withdrew, R. D. Garden's entry, and the trophy went to Charles Clifton's car.

CHICAGO COMPETITIONS IN 1908.

Chicago was prominent in the promotion of motoring events during 1908. The Chicago Motor club ran its annual hill-climb at Algonquin, promoted the first demountable rim test ever held and added still more to its laurels by putting on the most strenuous reliability test in which automobiles ever took part, a 1,000-mile four-day affair. The other big event of the local season was the Interclub team match between the Chicago Automobile club and the Chicago Athletic association, also unique in that it was the first of its kind.

The demountable rim test was held Aug. 6 over the Elgin-Aurora course, four makes of tires contesting, the object being to demonstrate how quickly demountable rims could be changed. The test was won by the Diamond Rubber company, with a total of 5 minutes 36 $\frac{1}{2}$ seconds for the four changes.

The Algonquin cup, the time prize in the hill climb, was won by F. W. Leland in a Stearns six-cylinder with a total of :54 for the two hills, his :29 $\frac{1}{2}$ on Phillips hill being the record for that grade. The class winners were: A. Holman; B. Brush; C. Apperson; D. Cleveland; E. Pierce Arrow; F. Stearns; H. Knox; J. Chalmers-Detroit; I. Chalmers-Detroit. These results were reached under the Chicago Motor club formula.

In the 1,000-mile reliability, held Oct. 6-9, five of the seventeen competing cars survived with perfect scores after the examination by the technical committee, the winning cars being Frank Nutt's Haynes and Ray McNamara's Premier in the roadster division and C. S. Carris' Franklin, Loring Wagner's Haynes and Paul Hofmann's Pierce Arrow in the touring car section. The Premier won the Standard Oil company's trophy for least gasoline consumption under the formula, averaging 15.81 miles per gallon. The Diamond Rubber company won the Kimball cup in the tire competition, the first of the kind ever held.

Six cars represented the Chicago Athletic association and ten the Chicago Automobile club in the interclub match held over the Elgin-Aurora course Oct. 15, 1908. The Chicago Athletic association won with a debit of 4 points as against 72 for the losers.

THE AMERICA'S CUP.

RECORD OF RACES TO DATE.

1851—Aug. 22. In this, the year of the great exhibition in London, the Royal Yacht club of England offered a cup to the winner of a yacht race around the Isle of Wight. The course was 60 miles in length and was won by the schooner-yacht America, designed by George Steers for John C. Stevens of the New York Yacht club. The America was 94 feet over all, 88 feet on the water line, 22½ feet beam and 11½ feet draft. There was no time allowance and the competing yachts ranged in size from a three-masted 392-ton schooner, the Brilliant, to the 47-ton cutter, the Aurora, which came in second in the

BALLOON RACING.

CONTEST FOR BENNETT CUP.

The third international race for the James Gordon Bennett cup was begun in Berlin, Germany, Oct. 11, 1908. Twenty-three balloons, representing Germany, Great Britain, France, the United States, Switzerland, Italy, Spain and Belgium, started. The Conqueror, with A. H. Forbes and Augustus Post aboard, had attained a height, when it burst and fell in view of 25,000 spectators. Fortunately the silk covering formed a sort of parachute and the aeronauts landed on a housetop in Berlin without sustaining any injury. The currents of air forced several of the craft to descend as they approached the North sea, while others fell into the sea itself. Among these were the Hergesell, the pilots of which were drowned; the Busley, the Castilla, the Helvetia and the St. Louis. The last named was manned by N. H. Arnold and Harry J. Hewitt, both of whom were saved by a torpedo boat after a very narrow escape. The Plauen, a balloon taking part in an endurance contest, also fell into the sea, but the occupants were picked up by a fishing vessel and landed at Hull, England. Most of the balloons taking part in the race for the cup landed in the northern part of Germany and the distances made were comparatively short. The following were the longest:

Balloon.	Landing place.	Kilometers.*
Helvetia (Swiss)	Norway	1,000
Banshee (British)	Schleswig-Holstein	435
Belgica (Belgian)	Schleswig-Holstein	423
Condor (French)	Tonders	400
St. Louis (American)	North sea	365
Isle de France (French)	Garding	365
Brise d'Automne (French)	Garding	365
Cognac (Swiss)	Cappel Neufeld	352
Utopie (Belgian)	Cuxhaven	350
Dusseldorf (German)	Mulsen	246
Berlin (German)	Cuxhaven	240
Britannia (British)	Bremen	312
America II. (American)	Mecklenburg	200

*1 kilometer equals .62137 mile.

BENNETT CUP RECORD.

RACE FROM CHICAGO.

Nine balloons started in a race from Chicago on the afternoon of July 4, 1908. The winner was the Fielding-San Antonio, entered by the Texas Aero club of San Antonio and sailed by Dr. Frederick J. Fielding and Capt. E. E. Honeywell. It landed near West Shefford, Que., at 5 p. m., July 5, the

distance traversed being approximately 895 miles and the time consumed 23 hours and 15 minutes. Several of the crews had narrow escapes from drowning in Lake Michigan and Lake Ontario and a number of the men received slight injuries in bringing the balloons to earth. The Fielding-San Antonio escaped after the landing had been made and was lost. Following is a record of the race, the name of each balloon, club represented, capacity of each craft in cubic feet, names of occupants of car, place of landing and distance made being given in the order named:

Fielding-San Antonio—Texas Aero club of San Antonio, 70,000; F. J. Fielding and E. E. Honeywell; West Sheffield, Que.; 895 miles.

Illinois—Aeronautique club of Chicago, 72,000; J. L. Case and C. H. Perrigo; Pictou, Ont.; 545 miles.

Chicago—Aeronautique club of Chicago, 110,000; C. A. Coey and C. L. Bumbaugh; West Moncton, Ont.; 542 miles.

American—Aero Club of Northwest, Minneapolis, 68,000; P. S. Hudson and J. J. Meade; Carsonville, Mich.; 402 miles.

United States—Aero Club of Northwest, St. Paul, 70,000; A. P. Shirley and H. B. Wild; Pinkerton, Ont.; 388 miles.

Cincinnati—Aero club of Cincinnati, 87,000; Leslie Haddock and George Howard; Covert, Mich.; 350 miles.

King Edward—Aero Club of Canada, 65,000; John Bennett and Gerald Gregory; Port Huron, Mich.; 335 miles.

Columbia—Federation of American Aero Clubs, 75,000; C. H. Leichter and Martin Peterson; Clinton, Ont.; 65 miles.

Ville de Dieppe—Paul Lucier, France, 65,000; A. E. Mueller and George Schoenech; Benton Harbor, Mich.; 65 miles.

RACE FROM ST. PAUL.

Five balloons started from St. Paul, Minn., July 18, 1908, in an effort to surpass the world's distance and endurance record, but owing to the inferior quality of gas supplied the attempt was a failure. C. A. Coey's Chicago, which came to earth at Blooming Prairie, Minn., was the winner with a record of only 73 miles air-line distance. The mileage of the others was: America, 53; United States, 55; Pommern, 52; King Edward, 24.

MOTORCYCLING.

NEW YORK-CHICAGO MOTORCYCLE TOUR.

The first motorcycle tour of the Federation of American Motorcyclists took place July 6-15, 1908, over a course of 1,200 miles between New York and Chicago, the start being made at the former point. The final standing of the teams taking part was as follows:

Y.; Erie, Pa., and Swanton, O., these towns being his stopping places. He rode a three and one-half horse power Indian machine.

BILLIARDS.

AMATEUR 14-2 CHAMPIONSHIP.

Calvin Demarest won the 14-2 amateur billiard championship of the United States in a tournament held in Chicago March 14-27, 1908, and in doing so twice broke the world's record for the highest run by an amateur at this style of billiards by making runs of 168 and 170. He also made a world's single average of 57 1-7 and a world's grand average of 21 19-88. In playing off the triple tie at the close of the tournament he made a run of 202 and an average of 30 10-13, but these not being made in a tournament will not stand as records. Standing of players in tournament:

Player.	Games won.	Games lost.	High single average.	Grand average.	High run.
Demarest	4	1	57 1-7	21 19-88	170
Conklin	4	1	15 10-26	12 19-141	141
Wright	4	1	30 10-13	16 16-115	133
Gardner	2	2	13 23-29	11 11-111	75
Poggenburg ..	1	4	21 1-19	11 33-114	116
Jackson	0	5	14 14-19	10 96-125	56

In playing off the tie Conklin defeated Wright, while Demarest defeated Conklin and Wright. The champions prior to 1905 were Arthur Townsend, E. F. Gardner, Wilson P. Foss and J. F. Poggenburg. Record since then:

1905—Charles F. Conklin | 1907—Calvin Demarest.
1906—Edward F. Gardner. | 1908—Calvin Demarest.

AMATEUR 18-2 CHAMPIONSHIP.

The amateur international championship at 18-2 balk-line billiards was contested for in a tournament held in New York city April 28-May 5, 1908, and was won by Calvin Demarest of Chicago, the score at the end of the regular schedule, standing:

Player.	Games won.	Games lost.	High run.	High average.	Grand average.
Demarest	4	0	151	28 8-14	20
Rerolle	2	2	103	16 8-13	13 44-101
Conklin	2	2	59	13 24-29	10 1-127
Poggenburg ..	1	3	55	13 4-18	10 61-129
Gardner	1	3	62	10 20-38	8 62-120

In playing off the ties for second and fourth places Rerolle and Gardner were the winners.

PROFESSIONAL 18-2 CHAMPIONSHIP.

In a game for the 18-2 balk-line professional billiard championship played in New York city March 27, Willie Hoppe won the title by defeating George Sutton by the following score:
Hoppe—1, 30, 8, 1, 1, 0, 10, 12, 99, 5, 10, 36, 83, 6, 0, 22, 25, 14, 24, 29, 0, 42, 32, 5. Total, 500. Average, 20 20-24. High runs, 99, 88, 42.

George Sutton became the 18-1 balk-line billiard champion of the world April 30, 1908, illness compelling Jake Schaefer to forfeit the title which he had won from Willie Hoppe.

HOPPE VS. DEMAREST.

In a match game between Willie Hoppe and Calvin Demarest in Chicago during the week ended March 7, 1908, the former won by 2,400 points to 1,966. Hoppe played the 18-1 game and made a grand average of 23.8-104. Demarest played the 14-2 game and his grand average was 19.9-103. During the last night's play he ran 413 points in six innings for an average of 68.5-6, and made one run of 204. These would have been world's records for the 14-2 game but for the fact they were not made in tournament play.

POOL.

In a match game for the pool championship of the United States played in Chicago March 30-April 1, 1908, Thomas Hueston, holder of the title, defeated Jerome Keough by 450 points to 405.

Frank Sherman of Washington, D. C., won the pool championship of America in a tournament held in Chicago April 6-13, 1908. Thomas Hueston, winner in 1907, was third on the list. Following was the standing of the players at the close of the tournament:

The thirtieth annual tournament of the National Archery association took place in Washington park, Chicago, Aug. 13, 19, 20, and 21, 1908. Col. Robert Williams of Washington, D. C., won the double American round championship, 30 arrows at 60, 50 and 40 yards each, with a score of 1,007 points out of a total of 169 hits. Homer S. Taylor of Chicago was second with a score of 937 and Will H. Thompson of Seattle third with 859. Miss Harriet Case of Chicago won the double national round for women, 48 arrows at 60 yards and 24 arrows at 50 yards, with a score of 398 and also the double Columbia round with 536 points. Will H. Thompson of Seattle won the double York round, 24 arrows at 50, 40 and 30 yards each, with 211 hits for a score of 973. Homer S. Taylor of Chicago being second with 193 hits and 829 points. The men's handicap, 96 arrows at 40 yards, was won by E. I. Bruce, whose handicap was 248, with a score of 674. The men's handicap, 96 arrows at 60 yards, was won by C. S. Cosgrove of Atchison, Kas., with a score of 619. His handicap was 330. The women's handicap, 96 arrows at 30 yards, was won by Miss Florence Bishop with a total score of 587. Her handicap was 326. The women's handicap, 96 arrows at 40 yards, was won by Miss Mary Williams, 10 years old, whose handicap was 174, with a score of 510. The men's team championship, 96 arrows at 60 yards, was won by a Chicago team composed of H. S. Taylor, C. C. Beach, W. H. Thompson and A. E. Spink. The total score was 1,532. The women's team championship, 96 arrows at 50 yards, was won by the Chicago team composed of the Misses Harriet Case, Mary Williams and F. Bishop and Mrs. H. S. Taylor.

Officers for 1908-1909: H. S. Taylor, Chicago, president; Harry B. Richardson, Boston, first vice-president; J. M. Challies, Atchison, Kas., second vice-president; Edward H. Weston, Los Angeles, Cal., third vice-president; H. W. Bishop, Chicago, secretary; A. E. Spink, Chicago, treasurer.

WRESTLING.

Frank Gotch won the title of champion wrestler of the world by defeating George Hackenschmidt, the "Russian lion," at Dexter's pavilion, Chicago, April 3, 1908. The struggle lasted two hours and neither man succeeded in throwing the other, but the Russian was worn out and, raising his hand in token of defeat, said, "I surrender the champion."

ship of the world to Mr. Gotch." Ed Smith was referee of the match, which was at best two of three falls, catch-as-catch-can, for a purse of \$13,000, the winner taking 60 per cent and the loser 40 per cent. Gotch was born in Iowa in 1878 and at the time of the match weighed 196 pounds. Hackenschmidt was born in Russia in 1878 and weighed 208 pounds.

Frank Gotch easily defeated Dr. B. F. Roller in Seattle, Wash., July 1. The champion took the first fall in 15 minutes and 25 seconds and the second in 25 minutes and 54 seconds.

The officers of the American Whist league are: President, Ernest B. Cooper, Nashville, Tenn.; vice-president, C. F. Gilman, Boston, Mass.; recording secretary, E. A. Montgomery, Minneapolis, Minn.; corresponding secretary, John W. Dusenbury, Scranton, Pa.; treasurer, E. G. Comstock, Milwaukee, Wis.

WOMEN'S WHIST LEAGUE.

At the annual meeting of the Women's National Whist league in Detroit, May 7-8, 1908, Mrs. R. W. Bailey and Mrs. E. H. Martin of Omaha won the Philadelphia cup. The Boston trophy was won by the Toomey and St. Clair clubs of Detroit, the Washington trophy by the New Amsterdam club of New York, the Cavendish trophy by the Howell Whist club of Boston, the Quaker City trophy by the Trist club of Philadelphia and the Brooklyn trophy by the Shady Side club of Pittsburg. Mrs. C. H. Waterhouse of Boston was elected president and Mrs. O. D. Thompson of Pittsburg corresponding secretary.

FENCING.

The annual national championship tournament of the Amateur Fencers' League of America took place in New York, N. Y., April 23-24, 1908. The winners were: Dueling swords, B. Bannaberg, New York Turnverein; sabers, G. W. Postgate, New York Turnverein; foils, W. L. Bowman, New York Athletic club.

RACKETS.

Quincy A. Shaw of Boston, Mass. won the title of national racket champion Feb. 22, 1908, by defeating P. D. Haughton at Boston in three out of five sets. The scores were: 9-15, 15-7, 15-3, 11-15, 15-5.

CHESS.

Emanuel Lasker of New York retained the chess championship of the world by defeating Dr. Tarasch of Nuremberg in a series of sixteen games at Munich in September, 1908. Lasker won eight games and lost three, the other five being drawn.

C. W. Phillips won the Illinois state chess championship in a series ending Feb. 25, 1908, at the Chicago Chess club's rooms.

Mrs. S. R. Burgess won the championship of America for woman chess players in a series of games played with Mrs. C. E. Nixdorf at New York, N. Y., the deciding contest occurring Feb. 25, 1908.

BASKET BALL.

The University of Chicago team won the 1908 intercollegiate basket-ball championship of the United States by defeating the University of Pennsylvania team in two games, one of which was played in Chicago, March 21, and the other in Philadelphia, March 25. The scores were 21 to 13 and 16 to 15. Previous to this Chicago had won the conference college championship by defeating the University of Wisconsin in the deciding game, 18 to 16, March 12. Pennsylvania had won the championship of the eastern universities.

SKI JUMPING.

Feb. 16, 1908, John Mangseth of Duluth jumped 117 feet at the Chester Creek hill ski slide in Duluth, establishing a new American record. Ole Fliering was second with 116 feet. Feb. 22, at the annual meet of the Ishpeming Ski club, Mangseth's record was broken by John Evenson of Duluth, who made a jump of 122 feet. March 22 Evenson again broke the record by making a jump of 131 feet, at a tournament held at Duluth. Ole Fliering jumped 135 feet, but fell after alighting.

CRICKET.

In the northwestern cricket tournament held in Chicago and finished Aug. 8, 1908, the Wanderers of Chicago won the championship with 5 points to 3 for Winnipeg. The final standing of the clubs was as follows:

Club.	Won.	Drawn.	Lost.	Points.
Wanderers	2	1	0	5
Winnipeg	0	3	0	3
Pittsburg	1	1	1	3
St. Louis	0	1	2	1

SEAT.

At the congress of the North American Skat league held in New York, N. Y., June 21-23, 1908, the first prize of \$1,000 was won by Franz Hilberling of New York. The second prize of \$500 went to Charles F. Schloss, also of New York. The president of the league is Robert Schiller and the secretary Paul Trommow.

PEDESTRIANISM.

T. E. Hammond, the English pedestrian, walked 100 miles in 18 hours 4 minutes and 10½ seconds at the stadium in London, Sept. 11-12, 1908. He also won the 24-hour walk, making 131 miles 880 yards.

HANDBALL.

In a series of five games played in Chicago July 26, 1908, Martin J. Carney defeated Oliver Drew, handball champion of the world, by scores of 21-7, 21-6, 21-14, 21-17, 21-12.

AERONAUTICAL PROGRESS IN 1908.

Great progress in the science of navigating the air was made in 1908, and it may be fairly said that flying by means of machines heavier than the atmosphere is now an accomplished fact. The experiments in that direction in former years were completely eclipsed in 1908 by Wilbur and Orville Wright, Henry Farman and Leon Delagrè and others working on both sides of the Atlantic. For a time France appeared to lead in aviation, but that was because the Americans worked more or less in secret while the exploits of the Frenchmen were widely advertised. At the close of the year it was generally acknowledged that the Wright brothers of Dayton, O., were far in the lead of all the rest.

In 1907 and the preceding two or three years considerable progress was made in the direction of constructing dirigible balloons, and one of the most successful types of these was the Zeppelin airship in Germany. This was further developed in 1908, and all records for performances by craft in which gas is the sustaining power were broken. The most remarkable was that in which the airship was destroyed. Count Zeppelin started from the waters of Lake Constance at 6:15 a. m. Aug. 4 in an at-

other, followed almost immediately by an explosion which brought the motors and framework crashing to the ground. Four of the crew were injured, but Count Zeppelin escaped being hurt. The craft, which was the fourth constructed by Count Zeppelin, was completely destroyed. It was 443 feet long with a diameter of about 45 feet. The balloon part

was separated into sixteen separate interior compartments for the inflating gas. The bow tapered to a blunt point, while at the stern were the rudders and frames used in steering. Underneath were suspended two independent platforms, each carrying a motor capable of developing 140 horse power. The outer part of the airship consisted of a rigid envelope of aluminum, this among other things making it distinct from any other craft of the kind constructed. It had made many successful trips in the vicinity of Lake Constance and had carried as many as sixteen passengers at one time.

The German government had agreed to purchase the ship after it had fulfilled certain requirements, the principal one being that it remain in the air for twenty-four hours and land on terra firma. The disastrous trip was taken as a preliminary to the official test, which it was confidently expected would be successful. Great sympathy was felt for Count Zeppelin and a popular subscription to enable him to continue his work was at once started with the result that a sum more than ample for his purpose was quickly collected. He built a new airship on the same general principles, but with numerous improvements, and before winter set in had made a number of successful trips.

The other dirigible airships of the balloon type that attracted attention in 1908 were the Parseval in Germany, the République (La République) in France

tempt to make the longest flight on record for a dirigible balloon. He passed over the city of Constance and kept to the west until Basel, on the Swiss frontier, was passed. Then he sailed northwest to Mulhausen and thence northeasterly along the Rhine valley, passing over Strassburg and other cities and continuing until 6 o'clock in the evening when a landing was made on an island in the Rhine, near Oppenheim, Germany. One of the motors was out of order and the stop had to be made for repairs. At 10:15 p. m. the flight was resumed until Mayence was reached. After encircling the city the airship was turned in the direction of home. All went well until Echterdingen, five miles south of Stuttgart, was reached, about 8 a. m. on the 5th. Here it became necessary to make another descent owing to the fusing of the metal in which the piston of the forward motor ran and also because of the escape of gas caused by an ascent of 6,000 feet in the air while maneuvering. The landing was safely made and the necessary repairs were being made when at 3 o'clock in the afternoon a storm arose, tore the balloon from its moorings and drove it some fifty yards. Here the rear end of the fabric drooped and in a moment smoke and flames were seen to burst out from one end to the

and the Baldwin in the United States. These, though differing in detail, are similar in principle, the lifting power in each being a balloon of the usual materials and the motive power a gas engine working in a suspended frame. The Parseval, named after its inventor, Major von Parseval, made a trip from Berlin Sept. 15 lasting 11 hours and 15 minutes, at a height of about 1,600 feet and at a speed of about 25 miles an hour. The balloon is 157 feet long and 26 feet in diameter, and its gas capacity is 3,270 cubic yards. It is tube-shaped with

rounded ends. The car, which is about 20 feet in length, is suspended so as to swing backward and forward in its plane parallel to the gas bag, not being rigidly fastened to it. The propeller, 14 feet in diameter, is situated just above the car.

In La Republique, the French dirigible war balloon, the gas bag is cigar-shaped and flexible, except that it is stiffened by a rigid flat bottom. It is similar in other respects to La Patrie, the craft that escaped from its fastenings and was destroyed in 1907.

The dirigible balloon made by Capt. Thomas A. Baldwin and accepted by the war department of the United States is 84 feet long with a maximum

diameter of 18 feet and a minimum diameter of 16 feet, and a capacity of 18,000 cubic feet of gas. The suspended frame is 66 feet in length and the 12-foot propeller makes 450 revolutions per minute, driving the airship at the rate of about 20 miles an hour. The engine is of twenty horse power. The ship is raised or lowered by means of box-kite planes at the forward end. The tests made in the course of the year at Fort Myer proved that this type of dirigible was equal to the best made in Europe.

In England but little progress in aviation was reported. The Nulli Secundus of 1907 was remodeled by Col. Cody and tested with results that were in no way remarkable.

THE WRIGHT AEROPLANE.

The Wright aeroplane, which won the honors of the year both in Europe and America, is what is

MAJOR VON PARSEVAL'S AIRSHIP.

called a biplane, the surfaces of which are parallel, exactly one above the other and slightly concave on the lower surface. They are made of cloth stretched on a framework of spruce. They are 40 feet long and $6\frac{1}{2}$ feet wide, giving a total area of 260 square feet. The distance between the planes is 6 feet. In front is a horizontal biplane rudder for regulating the height of flight, at the back a vertical biplane rudder for steering. The total length of the machine is 33 feet. Between the planes is a four-cylinder water-cooled twenty-five horse-power motor, designed by the Wright brothers. On its right is a radiator with flat copper

tubes and on its left sit the pilot and passenger. The motor drives two wooden propellers 10 feet in diameter by means of crossed chains. The propellers revolve in opposite directions and are geared down in the ratio of 33 to 9. The total weight of the aeroplane with one man on board is about 1,000 pounds. The motor in working order weighs 200 pounds.

The method of operation is apparently very simple. The most interesting feature consists in the "working" of the extreme under part of the wings, whereby the flight of a bird is imitated and perfect lateral stability is secured. The rudder which regulates the horizontal balance has to be used almost continually. In order to make a flight a wooden rail about 72 feet long is laid on the ground. The aeroplane rests upon wooden "skates" and has two rollers in front. On the rail runs a little car upon which the aeroplane rests and the rollers on the rail. When the screws begin to revolve the machine flies rapidly along the rail and at its extremity rises into the air by the help of the horizontal rudder. When there is a wind the rail alone is sufficient. In calm weather the aeroplane is launched as by a catapult, by means of a weight of 1,500 pounds, which falls from the top of a pillar 18 feet high and pulls upon ropes passing through pulleys.

The French rights in the Wright patents were sold in October, 1908, to a syndicate headed by Lazare Weiller for \$100,000. The tests in France were made in the vicinity of Le Mans by Wilbur Wright, while those in the United States by Orville

CAPT. BALDWIN'S DIRIGIBLE BALLOON.

Wright took place at Fort Myer, Va., under the supervision of army officers. The American experiments were satisfactory to the war department, but were marred by a serious accident on Sept. 17, in which Lieut. Thomas E. Selfridge was killed and Orville Wright seriously injured. The successive records made by the Wright brothers will be found in the appended list of the most remarkable aeroplane performances of the year.

THE FARMAN MACHINE.

Next after the Wright aeroplane that invented by Henry Farman of Paris was the most successful, with that constructed by Leon Delagrangé, also of Paris, a close third. The Farman machine consists of two superimposed aeroplanes, each about 33 feet long by $6\frac{1}{2}$ feet wide and set 5 feet apart. The framework of the ship is of wood and steel tubing and the covering of the aeroplanes rubber. The body for carrying motor and other machinery and the aeronaut is covered with canvas and is 15 feet long, $2\frac{1}{2}$ feet wide. The motor is of the petrol Antoinette type and the propeller, which is $7\frac{1}{2}$ feet in diameter, is of aluminum sheeting. It makes 1,050 revolutions per minute. The machine is mounted on bicycle wheels and starts by running along the ground under its own power until lifted by the planes. In alighting the power is simply shut off and the machine allowed to glide toward the ground. The whole contrivance weighs about 1,500 pounds. The Delagrangé aeroplane is similar in most respects to the Farman machine, the latter being practically only an improved model of the former.

The Aerial Experiment association at Hammondsport, N. Y., turned out at least one successful aero-

plane during the year. This was the June Bug, operated by Glenn H. Curtiss, which won the Scientific American prize for the first public aeroplane flight of a mile in a straight line in America. It developed the remarkable speed of thirty-five miles an hour.

Several inventors were hard at work in 1908 on the helicopter, in which the motor works the propeller blades or wings through a vertical shaft, causing the machine to ascend almost straight up from the ground. One form of this machine, constructed by J. N. Williams, has two superimposed propellers, in horizontal parallel planes, mounted on concentric hollow shafts revolving in opposite directions and driven by a forty-horse-power air-cooled motor. The propellers are 17 feet in diameter and the platform carrying the motor is 6 feet square. Lateral motion is secured by the operator's inclining the blade of the propellers. A speed of thirty miles an hour is claimed for this machine.

The development of light but very powerful gasoline and other motors made automobiles practicable. It seems to be equally true that they have been one of the principal factors in making navigation of the air possible. With their aid the experiments in kite-flying and aeroplane gliding by Chanute, Langley, Lilienthal, Bell and others have resulted in the successful construction of real airships.

THE "NIGHT RIDERS" OF KENTUCKY.

The "night riders" of Kentucky began operations in March, 1906, when they appeared in Princeton in that state and destroyed several freight cars containing tobacco belonging to the American Tobacco company and to planters not belonging to the two associations organized by the farmers of the state to bring the tobacco trust to terms. This exploit was afterward repeated in various parts of western Kentucky, resulting in the killing or wounding of many men and the destruction of millions of dollars' worth of property. The men engaged in these operations adopted the tactics of the Ku-Klux Klan of former days, riding around at night masked and armed, intimidating the independent tobacco growers by means of threats, whippings and murders and burning their stocks of tobacco. On the night of Dec. 6, 1907, they made an attack on Hopkinsville and destroyed several thousands of dollars' worth of property, three men being killed in this raid. Again on the night of Jan. 2, 1908, they made a raid on Russellville, Logan county, overpowered the police, dynamited and burned the buildings belonging to two independent tobacco concerns and wounded three men. In these affairs the raiders themselves lost several men killed or wounded. Innumerable minor raids were made and as early as February, 1908, it was estimated that the total value of the property destroyed by the "night riders" amounted to not less than \$50,000,000, while the tobacco market of Kentucky for the time being had been practically ruined. The lawless operations of the night-riding gangs continued throughout the year and even extended into Tennessee in spite of the efforts of the authorities in both states to put a stop to the raids. The resulting losses not only to the tobacco growers but to business men in general were very heavy.

SAN FRANCISCO GRAFT CASES.

Jan. 9, 1908, the District Court of Appeals of California set aside the judgment in the case of ex-Mayor Eugene E. Schmitz, convicted of extortion in the French restaurant case, on the ground that the offense charged in the indictment was not a crime. The effect of the decision was to invalidate the other indictments against Schmitz and also those against Abraham Hart for extortion and rendered void the plea of guilty made by the latter.

THE BALKAN CRISIS.

BULGARIAN INDEPENDENCE DECLARED.

The principality of Bulgaria was created by the treaty of Berlin, July 13, 1878. It was constituted an autonomous and tributary principality under the sultan of Turkey with a Christian government and a national militia. Eastern Roumelia was created at the same time by the same treaty. It was to have administrative autonomy, but was to remain under the direct political and military control of the sultan. In 1885 a revolution occurred and the district was turned over to the prince of Bulgaria for government. Since then it has virtually been a province of the principality. Ferdinand of Saxe-Coburg and Gotha was elected prince of Bulgaria by vote of the national assembly July 7, 1887, and in 1893 was given the title of "royal highness." In 1908 the relations of Bulgaria and Turkey became strained over the ownership of the Oriental railway, which had been seized by the former and held by force of arms. A movement having for its object the independence of Bulgaria, which had been in progress for some months, culminated Oct. 5, 1908, in the issuance of the following proclamation by Prince Ferdinand at Tirnovo:

"By the will of our never to be forgotten liberator and our great kindred, the Russian nation, aided by our good friends and neighbors, the subjects of the king of Roumania, and by the Bulgarian heroes of 1878, the chains of slavery were broken by which for so many years and centuries Bulgaria, once a great and glorious power, was bound. From that time until to-day, for full thirty years, the Bulgarian nation has been preserving the memory of those who labored for its freedom, and, inspired by their tradition, has worked incessantly for the development of its beautiful country, and under my guidance and that of the departed Prince Alexander has made itself a nation fit to take its place in the family of civilized peoples with its gifts of culture and progress. Bulgaria, practically an independent nation, was imposed into its normal and peaceful development by certain illusions and formal limitations which resulted in coldness of relations between Turkey and Bulgaria. I and the nation desire to rejoice in the political development of Turkey, Turkey and Bulgaria, free and independent of each other, may exist under conditions which will allow them to strengthen their friendly relations and to devote themselves to peaceful internal development. Inspired by the sacred purpose of fulfilling national requirements and national desire, I proclaim, with the blessing of the Almighty, Bulgaria an independent kingdom. Together with the nation I firmly believe that this act will meet the approbation of the great powers."

ANNEXATION OF BOSNIA AND HERZEGOVINA.

Bosnia and Herzegovina, Turkish provinces peopled chiefly by Croato-Servians, were by the treaty of Berlin, signed July 13, 1878, turned over to Austria-Hungary for administration and military occupation. The direction of the administration was exercised by a Bosnian bureau in Vienna at the head of which was the common Austro-Hungarian minister of finances. Oct. 6, 1908, Emperor Francis Joseph issued a proclamation formally annexing the two provinces in the following terms:

"When, a generation ago, our troops crossed the boundaries of your countries you were assured they came not as enemies but as friends, with a firm resolution to put a stop to the ills from which your fatherland for so many years so severely suffered. This promise was given in a solemn moment and was righteously kept. It was the steadfast endeavor of our government in peaceful observance of the law and by vigorous efforts to lead the land to a happier future. To our great pleasure we can say that the seed which was then scattered in the furrow of plowed soil has come up richly. You yourselves must feel the benefits of a situation whereby order and security have taken the place of force and oppression. Trade and communications are steadily spreading; the civilizing influence of a wider education has made itself felt and every man may enjoy the fruits of his labor under the protection of a well-ordered government. We consider it our most solemn duty to move forward

along this path, and with that goal before our eyes we are of opinion that the time has come to give the inhabitants of both countries fresh proof of our trust in their political maturity."

The emperor also addressed the following rescript to Baron von Aehrenthal, the Austro-Hungarian minister of foreign affairs:

"Being imbued with the unalterable conviction that the lofty, civilizing and political objects for which the Austro-Hungarian monarchy undertook the occupation and administration of Bosnia and Herzegovina can be permanently secured only by granting the constitutional institutions corresponding to their needs, I extend my sovereignty over Bosnia and Herzegovina and at the same time bring into force in those provinces the rules of succession applying to my house. As a demonstration of the peaceful purposes which have led me to this immutable decree I at the same time order the evacuation of the Sanjak of Novipazar by the troops of my army stationed therein."

CRETE UNITES WITH GREECE.

The island of Crete, which in 1898 was made an autonomous state under a high commissioner of the powers, subject to the suzerainty of the porte, but paying no tribute, followed the example of Bulgaria and threw off all allegiance to Turkey on the evening of Oct. 7, 1908. A decree was then published in Canea announcing the union of Crete with Greece and the following day the members of the local government took the oath of loyalty to Greece, as did also the officers of the gendarmerie and militia.

PROTEST OF TURKEY TO POWERS.

Turkey, which was in the throes of a revolution, though a peaceful one, was greatly disturbed by the action of Austria-Hungary in annexing Bosnia and Herzegovina as well as by the events in Bulgaria and Crete, and for a time the prospect was that war would result. Turkey, however, was not in a good position to take aggressive action and in addition felt that the provinces in question had long been practically lost to her. She therefore contented herself with making protest to the powers against the independence of Bulgaria and the annexation of Bosnia and Herzegovina. The protest in each case was practically the same. That directed to Austria-Hungary was as follows:

"The Ottoman government, having weighed with all the attention they deserve the considerations of Austria-Hungary, is in duty bound to declare that it cannot accept the views of the imperial and royal government. In fact, the administration of Bosnia in its present form is based upon article 23 of the treaty of Berlin as well as the convention of Constantinople of 1879, which was its sequel. The diplomatic acts clearly define the nature of Austria's occupation and administration of these provinces and the maintenance of the Ottoman sovereign rights, and no derogation to any of these acts can be effected without the unanimous consent of Turkey, the sovereign of these countries, and the other high contracting powers. The Ottoman government must, therefore, of necessity reserve all rights which result in its favor from the international treaties and must protest against the violation of these acts by the imperial and royal government."

In response to Turkey's protest steps were at once taken by Britain, Russia and France to summon a conference of the powers to deal with the situation and while the negotiations were in progress the feeling in Bulgaria, Turkey, Servia, Roumania and other states in southeastern Europe, which had run high in favor of war, became more peaceful and it was hoped that the whole Balkan problem might be settled without resort to arms.

THE M'DONALD MURDER TRIAL.

Mrs. Dora McDonald, wife of M. C. McDonald, was accused of the murder of Webster S. Guerin, who was shot and killed Feb. 21, 1907. Her trial began Jan. 20, 1908, and ended in a verdict of not guilty Feb. 11. M. C. McDonald died Aug. 9, 1907.

PROGRESS OF AFFAIRS IN RUSSIA.

THE THIRD DOUMA.

The third douma in Russia, which assembled Nov. 14, 1907, in accordance with the ukase of the czar, continued in session with brief recesses until July 11, 1908, when it adjourned for the summer. It escaped the fate of its predecessors and actually accomplished something in the way of legislation. The most important bill passed was that authorizing the expenditure of \$46,000,000 for the new war budget and sanctioning in a tentative way the war department's programme of a further expenditure of \$100,000,000 in 1909. The scheme included the strengthening of the fortifications at Vladivostok and the building of the Amur railway. An action of the douma which was rather unexpected was its rejection by a vote of 194 to 78 of a bill appropriating \$5,500,000 to lay the keels of four new battle ships. At the close of the summer session the czar received in audience Dr. Komlakov, president of the douma, and expressed his satisfaction with the work of the assembly, including the rejection of the naval scheme, saying that the people's representatives were right in demanding a complete programme before passing the budget. The fall session of the douma began Oct. 27.

REVOLUTIONISTS INACTIVE.

The year was on the whole a quiet one, the revolutionists not showing much activity. The authorities, on the other hand, continued their prosecution of persons suspected of revolutionary tendencies with unabated severity and the number of executions and arrests reported was very large. Among the assassinations occurring were those of Col. Bobroff, chief of gendarmes at Samara Jan. 2; two soldiers at Sokolow Jan. 10, and Dr. Karavieff, leader of the group of toll in the second douma, at Ekaterinoslav, March 18. In an attempted jail delivery at Ekaterinoslav, May 12, many of the prisoners were shot to death.

GEN. STOESSSEL IN PRISON.

Lieut.-Gen. Anatole Mikhailovitch Stoessel was condemned to death Feb. 20, 1908, by a military court in St. Petersburg, Russia, for surrendering Port Arthur to the Japanese Jan. 1, 1905. His trial began Sept. 30, 1906, after he had resigned from the army, the chief witness against him being Gen. Smirnoff, who with Gens. Fock and Reiss was also tried at the same time. The court reprimanded Gen. Fock for a disciplinary offense, but acquitted Smirnoff and Reiss. In the words of the court Gen. Stoessel was condemned to death "for surrendering the fortress before all the means of defense had been exhausted, for failing to enforce his authority and for military misdemeanors." The court, however, recommended that the sentence be commuted to ten years' imprisonment in a fortress in view of the good defense of Port Arthur prior to the surrender and of his services in three former campaigns.

Lieut.-Gen. Smirnoff and Lieut.-Gen. Fock, both of whom served in the siege of Port Arthur, fought a duel in the riding school of the Chevalier guard regiment in St. Petersburg, March 18, 1908. The men used pistols at twenty paces. At the fourth exchange of shots Gen. Smirnoff fell with a bullet in his abdomen above the right hip. The duel was the result of a secret report by Gen. Smirnoff accusing Gen. Fock of cowardice and of influencing Gen. Stoessel to surrender Port Arthur.

SENTENCED FOR TREASON.

One hundred and sixty-seven members of the first douma who signed the Viborg manifesto issued in July, 1906, calling upon the people to stand up for their rights by refusing to pay taxes or perform military service, were convicted of treason Dec. 31, 1907, and sentenced to three months' imprisonment, beginning Jan. 20, 1908, with loss of civil rights. Among them were Ivan Petrunkévitch, Sergius Mouroumtseff, Prince Dolgoroukoff and other parliamentary leaders.

CHOLERA IN ST. PETERSBURG.

Asiatic cholera broke out in St. Petersburg, Russia, about the 1st of August, 1908, and for several weeks the disease spread with great rapidity, claiming a large number of victims. It assumed the proportions of an epidemic and the efforts of the physicians and authorities to check it were unavailing until cold weather set in. By the end of October the number of cases reported each day was comparatively small. Experts declared that the outbreak was due to unclean streets and houses and to the contamination of the drinking water. Most of them predicted that the epidemic would reappear in the spring of 1909 with renewed violence. While the plague was at its worst, in September, from 300 to 500 new cases and from 150 to 200 deaths were reported each day.

DISTURBANCES IN PERSIA.

Teheran, Persia, was the scene June 23 and 24, 1908, of serious riots resulting from hostility between the shah, Mohammed Ali Mirza, and the anjumans, or clubs composed of nationalist members of parliament and others forming the opposition party. While professing to be in favor of maintaining the constitution granted in 1906 the shah, backed by the conservatives, was apparently determined to crush the liberal element by force of arms. June 23 he surrounded the parliament building with Russian Cossacks and other troops and demanded that certain members whose arrest he had ordered be delivered up. The assembly refused to comply with the demand. The soldiers were fired upon from various directions and bombs were thrown. Cannon were brought up and the parliament building was bombarded and cleared of its occupants. The fighting continued for the greater part of two days, resulting in the death of 154 soldiers and some 300 nationalists and the looting of a great many houses. Many of the prominent members of the opposition took refuge in the foreign legations until the shah promised amnesty.

Fighting also occurred in Tabriz and other cities, where it continued for many weeks. Order was partially restored by the adherents of the shah, but his situation throughout the year was more or less critical.

ATTEMPT TO ASSASSINATE THE SHAH.

Thursday afternoon, Feb. 28, 1908, an attempt was made to assassinate Mohammed Ali Mirza, shah of Persia, by throwing bombs at him while he was on his way from the palace in Teheran to a suburb. It was owing to his own precaution that he was not killed. He was supposed to be riding in a closed automobile at the head of the procession, but instead of this he was in a carriage near the rear of the line. Two bombs were thrown at the motor car, one exploding in the air and doing no damage and the other striking the ground near the vehicle. The second missile also exploded, demolished the automobile, killed three guards and wounded a score of bystanders. The shah took refuge in a neighboring house and was rescued by a detachment of troops.

IRISH UNIVERSITIES BILL.

The Irish universities bill framed by Augustine Birrell was passed by the British parliament July 31, 1908. It provides for two universities in Ireland, one with headquarters in Dublin and the other in Belfast. Dublin university is to be composed of three constituent branches, two of which, Cork and Galway, already exist, and the third,

New college, will be founded in Dublin. The present Queen's college in Belfast will constitute the new northern university, which will be called the University of Belfast. The bill was supported by the Irish nationalists in parliament and was generally approved in Ireland.

PENNSYLVANIA TERMINAL AND TUNNELS IN NEW YORK.

[From description prepared for the American Society of Civil Engineers.]

The Pennsylvania railroad terminal now under construction in New York city occupies the equivalent of about six city blocks between 6th and 10th avenues and 31st and 33d streets. The passenger station is between 7th and 8th avenues and covers about eight acres above the track area. The grade of the tracks at the station site is from seven to ten feet below mean high water in the harbor. There are some sixteen miles of track at the terminal. The station tracks, of which there will be twenty-one, are to be laid in pairs on fifteen-foot centers.

The station building proper has a frontage of 433 feet on the 7th avenue side, in the middle of which will be the main entrance. The length is 774 feet and the average height above the street 69 feet, the maximum height being 153 feet. The building is of steel construction and is supported over the tracks by columns resting on 650 concrete piers placed on rock foundations. The exterior is of Milford granite and the architectural treatment is that of a Doric colonnade. The station is to be used by the Pennsylvania and Long Island railroads, the trains of which will reach it through tunnels under the Hudson and East rivers.

Following are the details in brief of the great terminal project furnished by the contracting engineers:

Area of terminal—28 acres.
Length of trackage—16 miles.
Number of standing tracks at station—21.
Length of platforms adjacent to passenger trains—21,500 feet.
Number of passenger platforms—11.
Highest point of tracks, below sea level—9 feet.
Number of baggage and express lifts—25.
Length of baggage express trucking and pipe subways—5,200 feet.
Weight of street-bridging steel—23,500 tons.
Weight of station-building steel—25,000 tons.

Weight of steel in service building—2,437 tons.
Total excavation required—3,000,000 cubic yards.
Length of retaining walls—7,800 feet.

Number lineal feet of streets and avenues carried on bridging—4,490.

Dimensions of passenger station building—Length, 774 feet; width, 433 feet; average height above street, 69 feet; maximum height above street, 153 feet.

Dimensions of main waiting room—Length, 277 feet; width, 103 feet; height, 150 feet.

Dimensions of concourse—Length, 340 feet, width, 210 feet.

Concrete required for retaining walls, foundations, street bridging and substructures—160,030 cubic yards.

Number of columns supporting station building—650.

Greatest weight on one column—1,658 tons.

Number of buildings removed on terminal area—About 500.

Number of electric lights in station building—About 30,000.

Maximum capacity of all tunnels in trains per hour—144.

Proposed initial daily service of trains—1,000.

Storage capacity of station yard tracks—386 cars.

Length of river tube tunnels (single track)—6.8 miles.

Length of land tunnels (single track)—6.8 miles.

Length of run, Bergen portal to Long Island portal—6.3 miles.

Total length of track in tunnels exclusive of yard tracks in station—16.5 miles.

Length of run, Harrison to terminal station—8.6 miles.

Length of run, Jamaica to terminal station—11.85 miles.

Estimated cost (unofficial)—\$50,000,000.

THE UNITED STATES AND VENEZUELA.

Diplomatic relations between the United States and Venezuela were practically severed in June, 1908, when Jacob Sleeper, the American charge d'affaires at Caracas, was withdrawn. Prior to that William W. Russell, minister to Venezuela, and Thomas P. Moffat, consul at La Guayra, had been granted leave of absence. The rupture between the two countries was caused by the refusal of President Cipriano Castro to submit to arbitration or otherwise settle any of the claims of American citizens against the government of Venezuela. These were the claim of the New York and Bermudez company for damages sustained by reason of ejectment from its asphalt property in Venezuela; the claim of the United States and Venezuela company, which relates to certain property rights, including an asphalt mine and a railroad

concession; the claim of the Orinoco Steamship company, which arose upon a violation and annulment on the part of the government of an alleged exclusive concession held by that company; the claim of the Orinoco corporation, which arises from the repeated concessions to various strangers of the territory which the Orinoco corporation rightfully possesses, and the claim of A. E. Jaurett, an American citizen who was held guilty of sending a false report to a New York paper and ordered expelled from the country.

July 9 the diplomatic relations between the United States and Venezuela were completely severed, when Senor Veloz-Goticoa, the Venezuelan charge d'affaires in Washington, notified the state department that he had been recalled by his government.

SUFFRAGE RIOTS IN GERMANY.

Street demonstrations in favor of universal suffrage in Prussian elections took place in Berlin Jan. 10 and some rioting took place before the building of the landtag and the imperial palace. The socialists had arranged the gatherings in order to influence the landtag in its consideration of a radical resolution demanding manhood suffrage. The measure was opposed by Chancellor Bulow, though he admitted that the system required reform and that the government had been studying the question

for some time. The demonstrations were resumed on Sunday, Jan. 12, when the socialists held a large number of meetings and attempted to organize street processions. The latter were prevented by the police and many persons in the crowds that gathered were seriously injured. Further disturbances occurred Jan. 21, when large meetings of unemployed were addressed by socialists. In clashes with the police scores of persons were seriously wounded with saber thrusts.

SECOND TRIAL OF HARRY K. THAW FOR MURDER.

The second trial of Harry Kendall Thaw of Pittsburgh for the murder of Stanford White in New York, N. Y., June 25, 1906, began Jan. 6, 1908, and ended Feb. 1 in a verdict finding the defendant not guilty on the ground of insanity. Justice Victor F. Dowling, who presided at the trial, ordered Thaw to be taken to the state hospital for criminal insane at Matteawan, there to be kept until dis-

charged by due course of law. The first trial began Jan. 23, 1907, and ended April 12 in a disagreement of the jury. Judge James Fitzgerald presided and the chief counsel for the defense was Delphin M. Delmas. Thaw's leading attorney in the second trial was Martin W. Littleton. District Attorney William T. Jerome was the prosecutor in each instance.

DEVELOPMENT OF STEAM CARRYING POWER.

[From report of O. P. Austin, chief of government bureau of statistics.]

The development of the systems of transportation which now place the producer in the interior of one continent in direct communication with the consumer in the interior of another continent is a product of a comparatively few years. Within the lifetime of men and women now living the world had not a single mile of railway or a single steamship crossing the ocean. To-day the world has on land 567,000 miles of railway and on the ocean 5,500,000 net tons of sail carrying power and 21,000,000 net tons of steam carrying power. At the beginning of the last century the sail carrying power aggregated 4,000,000 tons. By the middle of the century the sail carrying power on the ocean was more than 11,000,000 tons, the steam carrying power on the ocean was less than 1,000,000 tons and the railways on land were but 24,000 miles. By 1880 sail power on the ocean had reached 14,500,000 tons, steam power about 6,000,000 tons and railways on land 225,000 miles. From that time forward steam power on the ocean so rapidly took the place of the sail that in 1907 sailing vessels aggregated but 5,500,000 tons carrying power while steam vessels had an aggregate tonnage of 21,000,000 and railways an aggregate of 567,000 miles. The wonderful effect

on commerce of this increase of transportation power on land and ocean is shown in the fact that the international commerce of the world has grown from less than \$2,000,000,000 in 1800 to over \$26,000,000,000 in 1906, or from less than \$2.50 per capita in 1800 to over \$14 per capita in 1907. The world's development of carrying power, production and commerce between 1800 and 1906 is shown in the following table:

In five states in 1892 the electoral vote was divided: California gave 8 electoral votes for Cleveland and 1 for Harrison and Ohio gave 1 for Cleveland and 22 for Harrison; in Michigan, by act of the legislature, each congressional district voted separately for an elector; in Oregon 1 of the 4 candidates for electors on the people's party ticket was also on the democratic ticket; in North Dakota 1 of the 2 people's party elect-

ors cast his vote for Cleveland, this causing the electoral vote of the state to be equally divided among Cleveland, Harrison and Weaver. In 1896 California gave 8 electoral votes to McKinley and 1 to Bryan; Kentucky gave 12 to McKinley and 1 to Bryan. In Maryland in 1904 7 of the presidential electors chosen were democrats and 1 republican. In 1908 Maryland elected 6 democratic and 2 republican electors.

CONSTITUTION GRANTED IN TURKEY.

The movement secretly carried on by the young Turks for a reform in the government of the Ottoman empire culminated in July, 1908, in the forced granting by the sultan, Abdul-Hamid II., of a constitution. In the early part of the month a number of officers of the 3d army corps were arrested and taken to Constantinople for trial on the charge of conspiring to overthrow the sultan. Then Maj. Niaz, now known as the liberator of Turkey, with 150 men took to the hills near Monastir and there proclaimed the constitution. This was on July 15. Soldiers were sent against them, but the troops revolted and refused to march, and their leader, Gen. Shemsî Pasha, was shot by an officer. The whole army corps then demanded that unless the imprisoned officers were released they would march on Constantinople and proclaim the constitution. The sultan, finding that the other divisions of the army were in sympathy with the 3d corps and that everywhere throughout Macedonia the cry for

a constitution was being successfully raised, became alarmed and Friday, July 24, he issued an order convoking parliament. Members of the young Turk party then came out openly and led their followers to each of the ministers and compelled him to swear fidelity to the constitution. A committee of union and progress was formed which took charge of the situation, the sultan being virtually shorn of all power. The cabinet was completely reorganized and other measures taken to place the government upon a new and solid basis. The whole revolution was practically bloodless, only a few spies being killed. Censorship of the press was abandoned, exiles permitted to return and a call issued for the meeting of parliament Nov. 1. The people of Constantinople and other large cities in the empire gave themselves up to rejoicing, it being taken for granted that the reign of autocracy was finally at an end.

*Does not include scattering vote.

In Maryland the electoral vote was split, the democrats getting six and the republicans one, but the highest republican elector received 605 more votes than the highest democratic elector. In the above table the highest vote received by any elec-

tor on a party ticket was taken as the vote of that party, except in a few cases where the average vote was used according to state usage. The total vote cast in 1904 was 13,638,386, or 1,329,332 less than in 1908.

WRECK OF THE STEAMER SARDINIA.

One hundred and twenty-three persons lost their lives Nov. 25, 1908, by the burning of the British passenger steamer Sardinia just outside the harbor of Valetta, Malta, during a heavy gale. The boat, which was one of the Ellerman liners, was crowded with pilgrims bound from Mediterranean ports for

Mecca. One hundred of the dead were of these, five were European passengers and the remainder were members of the crew. The captain and most of the officers of the steamer died at their posts. Only seventy persons were rescued.

THE PRESIDENT'S MESSAGE.

To the 60th congress, second session.

To the Senate and House of Representatives: The financial standing of the nation at the present time is excellent, and the financial management of the nation's interests by the government during the last seven years has shown the most satisfactory results. But our currency system is imperfect, and it is earnestly to be hoped that the currency commission will be able to propose a thoroughly good system which will do away with the existing defects.

During the period from July 1, 1901, to Sept. 30, 1908, there was an increase in the amount of money in circulation of \$902,991,399. The increase in the per capita during this period was \$7.06. Within this time there were several occasions when it was necessary for the treasury department to come to the relief of the money market by purchases or redemptions of United States bonds, by increasing deposits in national banks, by stimulating additional issues of national bank notes and by facilitating importations from abroad of gold. Our imperfect currency system has made these proceedings necessary and they were effective until the monetary disturbance in the fall of 1907 immensely increased the difficulty of ordinary methods of relief. By the middle of November the available working balance in the treasury had been reduced to approximately \$5,000,000. Clearing-house associations throughout the country had been obliged to resort to the expedient of issuing clearing-house certificates, to be used as money.

In this emergency it was determined to invite subscriptions for \$50,000,000 Panama canal bonds and \$100,000,000 3 per cent certificates of indebtedness authorized by the act of June 13, 1898. It was proposed to redeposit in the national banks the proceeds of these issues and to permit their use as a basis for additional circulating notes of national banks. The moral effect of this procedure was so great that it was necessary to issue only \$24,631,980 of the Panama canal bonds and \$15,436,500 of the certificates of indebtedness.

During the period from July 1, 1901, to Sept. 30, 1908, the balance between the net ordinary receipts and the net ordinary expenses of the government showed a surplus in the four years 1902, 1903, 1906 and 1907, and a deficit in the years 1904, 1905, 1908 and a fractional part of the fiscal year 1909. The net result was a surplus of \$99,283,413.54. The financial operations of the government during this period, based upon these differences between receipts and expenditures, resulted in a net reduction of the interest-bearing debt of the United States from \$987,141,040 to \$897,253,990, notwithstanding that there had been two sales of Panama canal bonds amounting in the aggregate to \$64,651,980, and an issue of 3 per cent certificates of indebtedness under the act of June 13, 1898, amounting to \$15,436,500. Refunding operations of the treasury department under the act of March 14, 1900, resulted in the conversion into 2 per cent consols of 1930 of \$200,309,400 bonds bearing higher rates of interest. A decrease of \$8,687,956 in the annual interest charge resulted from these operations.

In short, during the seven years and three months there has been a net surplus of nearly \$100,000,000 of receipts over expenditures, a reduction of the interest-bearing debt by \$90,000,000, in spite of the extraordinary expense of the Panama canal, and a saving of nearly \$9,000,000 on the annual interest charge. This is an exceedingly satisfactory showing, especially in view of the fact that during this period the nation has never hesitated to undertake any expenditure that it regarded as necessary. There have been no new taxes and no increases of taxes—on the contrary, some taxes have been taken off; there has been a reduction of taxation.

GOVERNMENT AND CORPORATIONS.

As regards the great corporations engaged in interstate business, and especially the railroads, I can only repeat what I have already said and again said in my messages to the congress. I believe that under the interstate clause of the constitution the United States has complete and paramount right to control all agencies of interstate commerce, and I believe that the national govern-

ment alone can exercise this right with wisdom and effectiveness so as both to secure justice from and to do justice to the great corporations which are the most important factors in modern business. I believe that it is worse than folly to attempt to prohibit all combinations as is done by the Sherman antitrust law, because such a law can be enforced only imperfectly and unequally, and its enforcement works almost as much hardship as good. I strongly advocate that instead of an unwieldy effort to prohibit all combinations there shall be substituted a law which shall expressly permit combinations which are in the interest of the public, but shall at the same time give to some agency of the national government full power of control and supervision over them. One of the chief features of this control should be securing entire publicity in all matters which the public has a right to know, and furthermore, the power, not by judicial but by executive action, to prevent or put a stop to every form of improper favoritism or other wrongdoing.

The railways of the country should be put completely under the interstate-commerce commission and removed from the domain of the antitrust law. The power of the commission should be made thoroughgoing, so that it could exercise complete supervision and control over the issue of securities as well as over the raising and lowering of rates. As regards rates, at least, this power should be summary. The power to investigate the financial operations and accounts of the railways has been one of the most valuable features in recent legislation. Power to make combinations and traffic agreements should be explicitly conferred upon the railroads, the permission of the commission being first gained and the combination or agreement being published in all its details. In the interest of the public the representatives of the public should have complete power to see that the railroads do their duty by the public, and as a matter of course this power should also be exercised so as to see that no injustice is done to the railroads. The shareholders, the employees and the shippers all have interests that must be guarded. It is to the interest of all of them that no swindling stock speculation should be allowed and that there should be no improper issuance of securities.

The guiding intelligences necessary for the successful building and successful management of railroads should receive ample remuneration, but no man should be allowed to make money in connection with railroads out of fraudulent overcapitalization and kindred stock-gambling performances; there must be no defrauding of investors, oppression of the farmers and business men who ship freight or callous disregard of the rights and needs of the employees. In addition to this the interests of the shareholders, of the employees and of the shippers should all be guarded as against one another. To give any one of them undue and improper consideration is to do injustice to the others. Rates must be made as low as is compatible with giving proper returns to all the employees of the railroad, from the highest to the lowest, and proper returns to the shareholders, but they must not, for instance, be reduced in such fashion as to necessitate a cut in the wages of the employees or the abolition of the proper and legitimate profits of honest shareholders.

Telegraph and telephone companies engaged in interstate business should be put under the jurisdiction of the interstate-commerce commission.

It is very earnestly to be wished that our people, through their representatives, should act in this matter. It is hard to say whether most damage to the country at large would come from entire failure on the part of the public to supervise and control the actions of the great corporations or from the exercise of the necessary governmental power in a way which would do injustice and wrong to the corporations. Both the preachers of an unrestricted individualism and the preachers of an oppression which would deny to able men of business the just reward of their initiative and business sagacity are advocating policies that would be

fraught with the gravest harm to the whole country. To permit every lawless capitalist, every law-defying corporation, to take any action, no matter how iniquitous, in the effort to secure an improper profit and to build up privilege would be ruinous to the republic and would mark the abandonment of the effort to secure in the industrial world the spirit of democratic fair dealing. On the other hand, to attack these wrongs in that spirit of demagoguery which can see wrong only when committed by the man of wealth and is dumb and blind in the presence of wrong committed against men of property or by men of no property is exactly as evil as corruptly to defend the wrongdoing of men of wealth. The war we wage must be waged against misconduct, against wrongdoing, wherever it is found, and we must stand heartily for the rights of every decent man, whether he be a man of great wealth or a man who earns his livelihood as a wage worker or a tiller of the soil.

It is to the interest of all of us that there should be a premium put upon individual initiative and individual capacity and an ample reward for the great directing intelligences alone competent to manage the great business operations of to-day. It is well to keep in mind that exactly as the anarchist is the worst enemy of liberty and the reactionary the worst enemy of order, so the men who defend the rights of property have most to fear from the wrongdoers of great wealth, and the men who are championing popular rights have most to fear from the demagogues who in the name of popular rights would do wrong to and oppress honest business men, honest men of wealth, for the success of either type of wrongdoer necessarily invites a violent reaction against the cause the wrongdoer nominally upholds. In point of danger to the nation there is nothing to choose between on the one hand the corruptionist, the bribe giver, the bribe taker, the man who employs his great talent to swindle his fellow citizens on a large scale, and, on the other hand, the preacher of class hatred, the man who, whether from ignorance or from willingness to sacrifice his country to his ambition, persuades well-meaning but wrong-headed men to try to destroy the instruments upon which our prosperity mainly rests.

Let each group of men beware of and guard against the shortcomings to which that group is itself most liable. Too often we see the business community in a spirit of unhealthy class consciousness deplore the effort to hold to account under the law the wealthy men who in their management of great corporations, whether railroads, street railways or other industrial enterprises, have behaved in a way that revolts the conscience of the plain, decent people. Such an attitude cannot be condemned too severely, for men of property should recognize that they jeopardize the rights of property when they fail heartily to join in the effort to do away with the abuses of wealth. On the other hand, those who advocate proper control on behalf of the public, through the state, of these great corporations and of the wealth engaged on a giant scale in business operations must ever keep in mind that unless they do scrupulous justice to the corporation, unless they permit ample profit and cordially encourage capable men of business so long as they act with honesty, they are striking at the root of our national wellbeing; for in the long run, under the mere pressure of material distress, the people as a whole would probably go back to the reign of an unrestricted individualism rather than submit to a control by the state so drastic and so foolish, conceived in a spirit of such unreasonable and narrow hostility to wealth, as to prevent business operations from being profitable and therefore to bring ruin upon the entire business community, and ultimately upon the entire body of citizens.

APPEAL TO STATE'S RIGHTS.

The opposition to government control of these great corporations makes its most effective effort in the shape of an appeal to the old doctrine of state's rights. Of course there are many sincere men who now believe in unrestricted individualism in business, just as there were formerly many sincere men who believed in slavery—that is, in the unrestricted right of an individual to own another

individual. These men do not by themselves have great weight, however. The effective fight against adequate government control and supervision of individual and especially of corporate wealth engaged in interstate business is chiefly done under cover, and especially under cover of an appeal to state's rights. It is not at all infrequent to read in the same speech a denunciation of predatory wealth fostered by special privilege and defiant of both the public welfare and law of the land, and a denunciation of centralization in the central government of the power to deal with this centralized and organized wealth. Of course the policy set forth in such twin denunciations amounts to absolutely nothing, for the first half is nullified by the second half. The chief reason, among the many sound and compelling reasons, that led to the formation of the national government was the absolute need that the union and not the several states should deal with interstate and foreign commerce, and the power to deal with interstate commerce was granted absolutely and plenarily to the central government and was exercised completely as regards the only instruments of interstate commerce known in those days—the waterways, the high roads, as well as the partnerships of individuals who then conducted all of what business there was.

Interstate commerce is now chiefly conducted by railroads, and the great corporation has supplanted the mass of small partnerships or individuals. The proposal to make the national government supreme over and therefore to give it complete control over the railroads and other instruments of interstate commerce is merely a proposal to carry out to the letter one of the prime purposes, if not the prime purpose, for which the constitution was founded. It does not represent centralization. It represents merely the acknowledgment of the patent fact that centralization has already come in business. If this irresponsible outside business power is to be controlled in the interest of the general public it can only be controlled in one way—by giving adequate power of control to the one sovereignty capable of exercising such power, the national government.

Forty or fifty separate state governments cannot exercise that power over corporations doing business in most or all of them; first, because they absolutely lack the authority to deal with interstate business in any form, and, second, because of the inevitable conflict of authority sure to arise in the effort to enforce different kinds of state regulation, often inconsistent with one another and sometimes oppressive in themselves. Such divided authority cannot regulate commerce with wisdom and effect. The central government is the only power which, without oppression, can nevertheless thoroughly and adequately control and supervise the large corporations. To abandon the effort for national control means to abandon the effort for all adequate control and yet to render likely continual bursts of action by state legislatures, which cannot achieve the purpose sought for, but which can do a great deal of damage to the corporation without conferring any real benefit on the public.

I believe that the more farsighted corporations are themselves coming to recognize the unwisdom of the violent hostility they have displayed during the last few years to regulation and control by the national government of combinations engaged in interstate business. The truth is that we who believe in this movement of asserting and exercising a genuine control in the public interest over these great corporations have to contend against two sets of enemies, who, though nominally opposed to one another, are really allies in preventing a proper solution of the problem. There are, first, the big corporation men and the extreme individualists among business men, who genuinely believe in utterly unregulated business—that is, in the reign of plutocracy—and, second, the men who, being blind to the economic movements of the day, believe in a movement of repression rather than of regulation of corporations and who denounce both the power of the railroads and the exercise of the federal power which alone can really control the railroads. Those who believe in efficient national control, on the other hand, do not in the least object to combinations; do not in the least object to

concentration in business administration. On the contrary, they favor both, with the all-important proviso that there shall be such publicity about their workings and such thoroughgoing control over them as to insure their being in the interest and not against the interest of the general public.

We do not object to the concentration of wealth and administration, but we do believe in the distribution of the wealth in profits to the real owners and in securing to the public the full benefit of the concentrated administration. We believe that with concentration in administration there can come both the advantage of a larger ownership and of a more equitable distribution of profits and at the same time a better service to the commonwealth. We believe that the administration should be for the benefit of the many, and that greed and rascality practiced on a large scale should be punished as relentlessly as if practiced on a small scale.

We do not for a moment believe that the problem will be solved by any short and easy method. The solution will come only by pressing various concurrent remedies. Some of these remedies must lie outside the domain of all government. Some must lie outside the domain of the federal government. But there is legislation which the federal government alone can enact and which is absolutely vital in order to secure the attainment of our purpose. Many laws are needed. There should be regulation by the national government of the great interstate corporations, including a simple method of account keeping, publicity, supervision of the issue of securities, abolition of rebates and of special privileges. There should be short-time franchises for all corporations engaged in public business, including the corporations which get power from water rights. There should be national as well as state guardianship of mines and forests. The labor legislation hereinafter referred to should concurrently be enacted into law.

To accomplish this means of course a certain increase in the use of—not the creation of—power by the central government. The power already exists, it does not have to be created; the only question is whether it shall be used or left idle—and meanwhile the corporations over which the power ought to be exercised will not remain idle. Let those who object to this increase in the use of the only power available, the national power, be frank and admit openly that they propose to abandon any effort to control the great business corporations and to exercise supervision over the accumulation and distribution of wealth, for such supervision and control can only come through this particular kind of increase of power. We no more believe in that empiricism which demands absolutely unrestrained individualism than we do in that empiricism which clamors for a deadening socialism which would destroy all individual initiative and would ruin the country with a completeness that not even an unrestrained individualism itself could achieve.

The danger to American democracy lies not in the least in the concentration of administrative power in responsible and accountable hands. It lies in having the power insufficiently concentrated so that no one can be held responsible to the people for its use. Concentrated power is palpable, visible, responsible, easily reached, quickly held to account. Power scattered through many administrators, many legislators, many men who work behind and through legislators and administrators, is impalpable, is unseen, is irresponsible, cannot be reached, cannot be held to account. Democracy is in peril wherever the administration of political power is scattered among a variety of men who work in secret, whose very names are unknown to the common people. It is not in peril from any man who derives authority from the people, who exercises it in sight of the people and who is from time to time compelled to give an account of its exercise to the people.

STATUS OF WAGE WORKER.

There are many matters affecting labor and the status of the wage worker to which I should like to draw your attention, but an exhaustive discussion of the problem in all its aspects is not now necessary. This administration is nearing its end, and, moreover, under our form of government the

solution of the problem depends upon the action of the states as much as upon the action of the nation. Nevertheless, there are certain considerations which I wish to set before you, because I hope that our people will more and more keep them in mind. A blind and ignorant resistance to every effort for the reform of abuses and for the readjustment of society to modern industrial conditions represents not true conservatism but an incitement to the wildest radicalism, for wise radicalism and wise conservatism go hand in hand, one bent on progress, the other bent on seeing that no change is made unless in the right direction.

I believe in a steady effort, or perhaps it would be more accurate to say in steady efforts in many different directions, to bring about a condition of affairs under which the men who work with hand or with brain, the laborers, the superintendents, the men who produce for the market and the men who find a market for the articles produced, shall own a far greater share than at present of the wealth they produce and be enabled to invest it in the tools and instruments by which all work is carried on. As far as possible I hope to see a frank recognition of the advantages conferred by machinery, organization and division of labor, accompanied by an effort to bring about a larger share in the ownership by wage workers of railway, mill and factory. In farming this simply means that we wish to see the farmer own his own land; we do not wish to see the farms so large that they become the property of absentee landlords who farm them by tenants, nor yet so small that the farmer becomes like a European peasant. Again, the depositors in our savings banks now number over one-tenth of our entire population. These are all capitalists, who through the savings banks loan their money to the workers—that is, in many cases to themselves—to carry on their various industries. The more we increase their number, the more we introduce the principles of co-operation into our industry.

Every increase in the number of small stockholders in corporations is a good thing, for the same reasons, and where the employees are the stockholders the result is particularly good. Very much of this movement must be outside of anything that can be accomplished by legislation, but legislation can do a good deal. Postal savings banks will make it easy for the poorest to keep their savings in absolute safety. The regulation of the national highways must be such that they shall serve all people with equal justice. Corporate finances must be supervised so as to make it far safer than at present for the man of small means to invest his money in stocks. There must be prohibition of child labor, diminution of woman labor, shortening of hours of all mechanical labor, stock watering should be prohibited and stock gambling so far as is possible discouraged. There should be a progressive inheritance tax on large fortunes. Industrial education should be encouraged. As far as possible we should lighten the burden of taxation on the small man. We should put a premium upon thrift, hard work and business energy, but these qualities cease to be the main factors in accumulating a fortune long before that fortune reaches a point where it would be seriously affected by any inheritance tax, such as I propose. It is entirely right that the nation should fix the terms upon which the great fortunes are inherited. They rarely do good and they often do harm to those who inherit them in their entirety.

PROTECTION FOR TOILERS.

The above is the merest sketch, hardly even a sketch in outline, of the reforms for which we should work. But there is one matter with which the congress should deal at this session. There should no longer be any paltering with the question of taking care of the wage workers who, under our present industrial system, become crippled or worn out as part of the regular incidents of a given business. The majority of wage workers must have their rights secured for them by state action, but the national government should legislate in thoroughgoing and far-reaching fashion, not only for all employees of the national government but for all persons engaged in interstate commerce. The object sought for could be

achieved to a measurable degree, as far as those killed or crippled are concerned, by proper employers' liability laws. As far as concerns those who have been worn out, I call your attention to the fact that definite steps toward providing old-age pensions have been taken in many of our private industries. These may be indefinitely extended through voluntary association and contributory schemes, or through the agency of savings banks, as under the recent Massachusetts plan. To strengthen these practical measures should be our immediate duty; it is not at present necessary to consider the larger and more general governmental schemes that most European governments have found themselves obliged to adopt.

Our present system, or rather no system, works dreadful wrong, and is of benefit to only one class of people—the lawyers. When a workman is injured what he needs is not an expensive and doubtful lawsuit, but the certainty of relief through immediate administrative action. The number of accidents which result in the death or crippling of wage workers, in the union at large, is simply appalling; in a very few years it runs up a total far in excess of the aggregate of the dead and wounded in any modern war. No academic theory about "freedom of contract" or "constitutional liberty to contract" should be permitted to interfere with this and similar movements. Progress in civilization has everywhere meant a limitation and regulation of contract. I call your especial attention to the bulletin of the bureau of labor which gives a statement of the methods of treating the unemployed in European countries, as this is a subject which in Germany, for instance, is treated in connection with making provision for worn-out and crippled workmen.

Pending a thoroughgoing investigation and action there is certain legislation which should be enacted at once. The law, passed at the last session of the congress, granting compensation to certain classes of employees of the government should be extended to include all employees of the government and should be made more liberal in its terms. There is no good ground for the distinction made in the law between those engaged in hazardous occupations and those not so engaged. If a man is injured or killed in any line of work, it was hazardous in his case. Whether 1 per cent or 10 per cent of those following a given occupation actually suffer injury or death ought not to have any bearing on the question of their receiving compensation.

It is a grim logic which says to an injured employee or to the dependents of one killed that he or they are entitled to no compensation because very few people other than he have been injured or killed in that occupation. Perhaps one of the most striking omissions in the law is that it does not embrace peace officers and others whose lives may be sacrificed in enforcing the laws of the United States. The terms of the act providing compensation should be made more liberal than in the present act. A year's compensation is not adequate for a wage earner's family in the event of his death by accident in the course of his employment. And in the event of death occurring, say, ten or eleven months after the accident, the family would only receive as compensation the equivalent of one or two months' earnings. In this respect the generosity of the United States toward its employees compares most unfavorably with that of every country in Europe—even the poorest.

The terms of the act are also a hardship in prohibiting payment in cases where the accident is in any way due to the negligence of the employee. It is inevitable that daily familiarity with danger will lead men to take chances that can be construed into negligence. So well is this recognized that in practically all countries in the civilized world, except the United States, only a great degree of negligence acts as a bar to securing compensation. Probably in no other respect is our legislation, both state and national, so far behind practically the entire civilized world as in the matter of liability and compensation for accidents in industry. It is humiliating that at European international congresses on accidents

the United States should be singled out as the most belated among the nations in respect to employers' liability legislation. This government is itself a large employer of labor and in its dealings with its employees it should set a standard in this country which would place it on a par with the most progressive countries in Europe. The laws of the United States in this respect and the laws of European countries have been summarized in a recent bulletin of the bureau of labor and no American who reads this summary can fail to be struck by the great contrast between our practices and theirs—a contrast not in any sense to our credit.

The congress should without further delay pass a model employers' liability law for the District of Columbia. The employers' liability act recently declared unconstitutional, on account of apparently including in its provisions employees engaged in intrastate commerce as well as those engaged in interstate commerce, has been held by the local courts to be still in effect so far as its provisions apply to the District of Columbia. There should be no ambiguity on this point. If there is any doubt on the subject, the law should be re-enacted with special reference to the District of Columbia. This act, however, applies only to employees of common carriers. In all other occupations the liability law of the district is the old common law. The severity and injustice of the common law in this matter has been in some degree or another modified in the majority of our states and the only jurisdiction under the exclusive control of the congress should be ahead of and not behind the states of the union in this respect. A comprehensive employers' liability law should be passed for the District of Columbia.

I renew my recommendation made in a previous message that half holidays be granted during summer to all wage workers in government employ.

I also renew my recommendation that the principle of the eight-hour day should as rapidly and as far as practicable be extended to the entire work being carried on by the government; the present law should be amended to embrace contracts on those public works which the present wording of the act seems to exclude.

THE COURTS.

I most earnestly urge upon the congress the duty of increasing the totally inadequate salaries now given to our judges. On the whole there is no body of public servants who do as valuable work, nor whose moneyed reward is so inadequate compared to their work. Beginning with the Supreme court the judges should have their salaries doubled. It is not befitting the dignity of the nation that its most honored public servants should be paid sums so small compared to what they would earn in private life that the performance of public service by them implies an exceedingly heavy pecuniary sacrifice.

It is earnestly to be desired that some method should be devised for doing away with the long delays which now obtain in the administration of justice and which operate with peculiar severity against persons of small means and favor only the very criminals whom it is most desirable to punish. These long delays in the final decisions of cases make in the aggregate a crying evil and a remedy should be devised. Much of this intolerable delay is due to improper regard paid to technicalities which are a mere hindrance to justice. In some noted recent cases this over-regard for technicalities has resulted in a striking denial of justice and flagrant wrong to the body politic.

At the last election certain leaders of organized labor made a violent and sweeping attack upon the entire judiciary of the country, an attack couched in such terms as to include the most upright, honest and broad-minded judges, no less than those of narrower mind and more restricted outlook. It was the kind of attack admirably fitted to prevent any successful attempt to reform abuses of the judiciary, because it gave the champions of the unjust judge their eagerly desired opportunity to shift their ground into a championship of just judges who were unjustly assailed. Last year, before the house committee on the judiciary, these

same labor leaders formulated their demands, specifying the bill that contained them, refusing all compromise, stating they wished the principle of that bill or nothing. They insisted on a provision that in a labor dispute no injunction should issue except to protect a property right, and specifically provided that the right to carry on business should not be construed as a property right; and in a second provision their bill made legal in a labor dispute any act or agreement by or between two or more persons that would not have been unlawful if done by a single person. In other words, this bill legalized blacklisting and boycotting in every form, legalizing, for instance, those forms of the secondary boycott which the anthracite coal strike commission so unreservedly condemned; while the right to carry on a business was explicitly taken out from under that protection which the law throws over property. The demand was made that there should be trial by jury in contempt cases, thereby most seriously impairing the authority of the courts. All this represented a course of policy which, if carried out, would mean the enthronement of class privilege in its crudest and most brutal form and the destruction of one of the most essential functions of the judiciary in all civilized lands.

The violence of the crusade for this legislation and its complete failure illustrate two truths which it is essential our people should learn. In the first place, they ought to teach the workingman, the laborer, the wage worker, that by demanding what is improper and impossible he plays into the hands of his foes. Such a crude and vicious attack upon the courts, even if it were temporarily successful, would inevitably in the end cause a violent reaction and would band the great mass of citizens together, forcing them to stand by all the judges, competent and incompetent alike, rather than to see the wheels of justice stopped. A movement of this kind can ultimately result in nothing but damage to those in whose behalf it is nominally undertaken. This is a most healthy truth, which it is wise for all our people to learn. Any movement based on that "class hatred which at times assumes the name of 'class consciousness' is certain ultimately to fail, and if it temporarily succeeds, to do far-reaching damage. "Class consciousness," where it is merely another name for the odious vice of class selfishness, is equally noxious whether in an employer's association or in a workman's association. The movement in question was one in which the appeal was made to all workmen to vote primarily not as American citizens but as individuals of a certain class in society.

Such an appeal in the first place revolts the more high-minded and far-sighted among the persons to whom it is addressed and in the second place tends to arouse a strong antagonism among all other classes of citizens, whom it therefore tends to unite against the very organization on whose behalf it is issued. The result is therefore unfortunate from every standpoint. This healthy truth, by the way, will be learned by the socialists if they ever succeed in establishing in this country an important national party based on such class consciousness and selfish class interest.

The wage workers, the workmen, the laboring men of the country, by the way in which they repudiated the effort to get them to cast their votes in response to an appeal to class hatred, have emphasized their sound patriotism and Americanism. The whole country has cause to feel pride in this attitude of sturdy independence, in this uncompromising insistence upon acting simply as good citizens, as good Americans, without regard to favored-and-improper-class interests. Such an attitude is an object lesson in good citizenship to the entire nation.

But the extreme reactionaries, the persons who blind themselves to the wrongs now and then committed by the courts on laboring men, should also think seriously as to what such a movement as this portends. The judges who have shown themselves able and willing effectively to check the dishonest activity of the very rich man who works iniquity by the mismanagement of corporations, who have shown themselves alert to do justice to the wage worker and sympathetic with the needs

of the mass of our people so that the dweller in the tenement houses, the man who practices a dangerous trade, the man who is crushed by excessive hours of labor, feel that their needs are understood by the courts—these judges are the real bulwark of the courts; these judges, the judges of the stamp of the president-elect, who have been fearless in opposing labor when it has gone wrong, but fearless also in holding to strict account corporations that work iniquity, and far-sighted in seeing that the workman gets his rights, are the men of all others to whom we owe it that the appeal for such violent and mistaken legislation has fallen on deaf ears, that the agitation for its passage proved to be without substantial basis. The courts are jeopardized primarily by the action of these federal and state judges who show inability or unwillingness to put a stop to the wrongdoing of very rich men under modern industrial conditions and inability or unwillingness to give relief to men of small means or wage workers who are crushed down by these modern industrial conditions; who, in other words, fail to understand and apply the needed remedies for the new wrongs produced by the new and highly complex social and industrial civilization which has grown up in the last half-century.

The rapid changes in our social^a and industrial life which have attended this rapid growth have made it necessary that, in applying to concrete cases the great rule of right laid down in our constitution, there should be a full understanding and appreciation of the new conditions to which the rules are to be applied. What would have been an infringement upon liberty half a century ago may be the necessary safeguard of liberty today. What would have been an injury to property then may be necessary to the enjoyment of property now. Every judicial decision involves two terms—one, an interpretation of the law; the other, the understanding of the facts to which it is to be applied. The great mass of our judicial officers are, I believe, alive to these changes of conditions which so materially affect the performance of their judicial duties. Our judicial system is sound and effective at core, and it remains, and must ever be maintained, as the safeguard of those principles of liberty and justice which stand at the foundation of American institutions; for, as Burke finely said, when liberty and justice are separated, neither is safe.

There are, however, some members of the judicial body who have lagged behind in their understanding of these great and vital changes in the body politic, whose minds have never been opened to the new applications of the old principles made necessary by the new conditions. Judges of this stamp do lasting harm by their decisions, because they convince poor men in need of protection that the courts of the land are profoundly ignorant of and out of sympathy with their needs and profoundly indifferent or hostile to any proposed remedy. To such men it seems a cruel mockery to have any court decide against them on the ground that it desires to preserve "liberty" in a purely technical form by withholding liberty in any real and constructive sense. It is desirable that the legislative body should possess, and wherever necessary exercise, the power to determine whether in a given case employers and employees are not on an equal footing, so that the necessities of the latter compel them to submit to such exactions as to hours and conditions of labor as unduly to tax their strength; and only mischief can result when such determination is upset on the ground that there must be no "interference with the liberty to contract"—often a merely academic "liberty," the exercise of which is the negation of real liberty.

DETRIMENTAL DECISIONS.

There are certain decisions by various courts which have been exceedingly detrimental to the rights of wage workers. This is true of all the decisions that decide that men and women are, by the constitution, "guaranteed their liberty" to contract to enter a dangerous occupation, or to work an undesirable or improper number of hours, or to work in unhealthy surroundings; and therefore cannot recover damages when maimed in that

occupation and cannot be forbidden to work what the legislature decides is an excessive number of hours, or to carry on the work under conditions which the legislature decides to be unhealthy. The most dangerous occupations are often the poorest paid and those where the hours of work are longest; and in many cases those who go into them are driven by necessity so great that they have practically no alternative. Decisions such as those alluded to above nullify the legislative effort to protect the wage workers who most need protection from those employers who take advantage of their grinding need. They halt or hamper the movement for securing better and more equitable conditions of labor. The talk about preserving to the misery-hunted beings who make contracts for such service their "liberty" to make them is either to speak in a spirit of heartless irony or else to show an utter lack of knowledge of the conditions of life among the great masses of our fellow countrymen, a lack which unfits a judge to do good service, just as it would unfit any executive or legislative officer.

There is also, I think, ground for the belief that substantial injustice is often suffered by employees in consequence of the custom of courts issuing temporary injunctions without notice to them, and punishing them for contempt of court in instances where, as a matter of fact, they have no knowledge of any proceedings. Outside of organized labor there is a widespread feeling that this system often works great injustice to wage workers when their efforts to better their working condition result in industrial disputes. A temporary injunction procured ex parte may as a matter of fact have all the effect of a permanent injunction in causing disaster to the wage workers' side in such a dispute. Organized labor is chafing under the unjust restraint which comes from repeated resort to this plan of procedure. Its discontent has been unasily expressed, and often improperly expressed, but there is a sound basis for it. And the orderly and law-abiding people of a community would be in a far stronger position for upholding the courts if the undoubtedly existing abuses could be provided against.

Such proposals as those mentioned above as advocated by the extreme labor leaders contain the vital error of being class legislation of the most offensive kind and even if enacted into law I believe that the law would rightly be held unconstitutional. Moreover, the labor people are themselves now beginning to invoke the use of the power of injunction. During the last ten years and within my own knowledge at least fifty injunctions have been obtained by labor unions in New York city alone, most of them being to protect the union label (a "property right"), but some being obtained for other reasons against employers. The power of injunction is a great equitable remedy, which should on no account be destroyed. But safeguards should be erected against its abuse. I believe that some such provisions as those I advocated a year ago for checking the abuse of the issuance of temporary injunctions should be adopted. In substance, provision should be made that no injunction or temporary restraining order issue otherwise than on notice, except where irreparable injury would otherwise result; and in such case a hearing on the merits of the order should be had within a short fixed period, and, if not then continued after hearing, it should forthwith lapse. Decisions should be rendered immediately and the chance of delay minimized in every case. Moreover, I believe that the procedure should be sharply defined and the judge required minutely to state the particulars both of his action and of his reasons therefor, so that the congress can if it desires examine and investigate the same.

The chief lawmakers in our country may be, and often are, the judges, because they are the final seat of authority. Every time they interpret contract, property, vested rights, due process of law, liberty, they necessarily enact into law parts of a system of social philosophy; and as such interpretation is fundamental, they give direction to all lawmaking. The decisions of the courts on economic and social questions depend upon their economic and social philosophy; and for the peaceful progress of our people during the twentieth cen-

tury we shall owe most to those judges who hold to a twentieth century economic and social philosophy and not to a long outgrown philosophy which was itself the product of primitive economic conditions. Of course a judge's views on progressive social philosophy are entirely second in importance to his possession of a high and fine character; which means the possession of such elementary virtues as honesty, courage and fair-mindedness. The judge who owes his election to pandering to demagogic sentiments or class hatreds and prejudices and the judge who owes either his election or his appointment to the money or the favor of a great corporation are alike unworthy to sit on the bench, are alike traitors to the people; and no profundity of legal learning or correctness of abstract conviction on questions of public policy can serve as an offset to such shortcomings. But it is also true that judges, like executives and legislators, should hold sound views on the questions of public policy which are of vital interest to the people.

LEGISLATORS AND COURTS.

The legislators and executives are chosen to represent the people in enacting and administering the laws. The judges are not chosen to represent the people in this sense. Their function is to interpret the laws. The legislators are responsible for the laws, the judges for the spirit in which they interpret and enforce the laws. We stand aloof from the reckless agitators who would make the judges mere pliant tools of popular prejudice and passion, and we stand aloof from those equally unwise partisans of reaction and privilege who deny the proposition that, inasmuch as judges are chosen to serve the interests of the whole people, they should strive to find out what those interests are, and, so far as they conscientiously can, should strive to give effect to popular conviction when deliberately and duly expressed by the law-making body. The courts are to be highly commended and staunchly upheld when they set their faces against wrongdoing or tyranny by a majority; but they are to be blamed when they fail to recognize under a government like ours the deliberate judgment of the majority as to a matter of legitimate policy, when duly expressed by the legislature. Such lawfully expressed and deliberate judgment should be given effect by the courts, save in the extreme and exceptional cases where there has been a clear violation of a constitutional provision. Anything like frivolity or wantonness in upsetting such clearly taken governmental action is a grave offense against the republic.

To protest against tyranny, to protect minorities from oppression, to nullify an act committed in a spasm of popular fury, is to render a service to the republic. But for the courts to arrogate to themselves functions which properly belong to the legislative bodies is all wrong and in the end works mischief. The people should not be permitted to pardon evil and slither legislation on the theory that the court will set it right; they should be taught that the right way to get rid of a bad law is to have the legislature repeal it and not to have the courts by ingenious hairsplitting nullify it. A law may be unwise and improper, but it should not for these reasons be declared unconstitutional by a strained interpretation, for the result of such action is to take away from the people at large their sense of responsibility and ultimately to destroy their capacity for orderly self-restraint and self-government. Under such a popular government as ours, founded on the theory that in the long run the will of the people is supreme, the ultimate safety of the nation can only rest in training and guiding the people so that what they will shall be right and not in devising means to defeat their will by the technicalities of strained construction.

For many of the shortcomings of justice in our country our people as a whole are themselves to blame and the judges and juries merely bear their share together with the public as a whole. It is discreditable to us as a people that there should be difficulty in convicting murderers or in bringing to justice men who as public servants have been guilty of corruption or who have profited by the corruption of public servants. The result is

equally unfortunate, whether due to hairsplitting technicalities in the interpretation of law by judges, to sentimentality and class consciousness on the part of juries, or to hysteria and sensationalism in the daily press. For much of this failure of justice no responsibility whatever lies on rich men as such. We who make up the mass of the people cannot shift the responsibility from our own shoulders. But there is an important part of the failure which has specially to do with inability to hold to proper account men of wealth who behave badly.

The chief breakdown is in dealing with the new relations that arise from the mutualism, the interdependence of our time. Every new social relation begets a new type of wrongdoing—of sin, to use an old-fashioned word—and many years always elapse before society is able to turn this sin into crime which can be effectively punished at law. During the lifetime of the older men now alive the social relations have changed far more rapidly than in the preceding two centuries. The immense growth of corporations, of business done by associations and the extreme strain and pressure of modern life have produced conditions which render the public confused as to who its really dangerous foes are, and among the public servants who have not only shared this confusion but by some of their acts have increased it are certain judges. Marked inefficiency has been shown in dealing with corporations and in resetting the proper attitude to be taken by the public not only toward corporations but toward labor and toward the social questions arising out of the factory system and the enormous growth of our great cities.

The huge wealth that has been accumulated by a few individuals of recent years, in what has amounted to a social and industrial revolution, has been as regards some of these individuals made possible only by the improper use of the modern corporation. A certain type of modern corporation, with its officers and agents, its many issues of securities and its constant consolidation with allied undertakings, finally becomes an instrument so complex as to contain a greater number of elements that, under various judicial decisions, elude themselves to fraud and oppression than any device yet evolved in the human brain. Corporations are necessary instruments of modern business. They have been permitted to become a menace largely because the governmental representatives of the people have worked slowly in providing for adequate control over them.

The chief offender in any given case may be an executive, a legislature or a judge. Every executive head who advises violent, instead of gradual, action, or who advocates ill-considered and sweeping measures of reform (especially if they are tainted with vindictiveness and disregard for the rights of the minority) is particularly blameworthy. The several legislatures are responsible for the fact that our laws are often prepared with slovenly haste and lack of consideration. Moreover, they are often prepared, and still more frequently amended during passage, at the suggestion of the very parties against whom they are afterward enforced.

Our great clusters of corporations, huge trusts and fabulously wealthy multimillionaires employ the very best lawyers they can obtain to pick flaws in these statutes after their passage, but they also employ a class of secret agents who seek, under the advice of experts, to render hostile legislation innocuous by making it unconstitutional, often through the insertion of what appear on their face to be drastic and sweeping provisions against the interests of the parties inspiring them; while the demagogues, the corrupt creatures who introduce blackmailing schemes to "strike" corporations and all who demand extreme and undesirably radical measures show themselves to be the worst enemies of the very public whose loud-mouthed champions they profess to be. A very striking illustration of the consequences of carelessness in the preparation of a statute was the employers' liability law of 1906. In the cases arising under that law four out of six courts of first instance held it unconstitutional; six out

of nine justices of the Supreme court held that its subject matter was within the province of congressional action, and four of the nine justices held it valid. It was, however, adjudged unconstitutional by a bare majority of the court—five to four. It was surely a very slovenly piece of work to frame the legislation in such shape as to leave the question open at all.

Real damage has been done by the manifold and conflicting interpretations of the interstate-commerce law. Control over the great corporations doing interstate business can be effective only if it is vested with full power in an administrative department, a branch of the federal executive, carrying out a federal law; it can never be effective if a divided responsibility is left in both the states and the nation; it can never be effective if left in the hands of the courts to be decided by lawsuits.

The courts hold a place of peculiar and deserved sanctity under our form of government. Respect for the law is essential to the permanence of our institutions and respect for the law is largely conditioned upon respect for the courts. It is an offense against the republic to say anything which can weaken this respect, save for the gravest reason and in the most carefully guarded manner. Our judges should be held in peculiar honor and the duty of respectful and truthful comment and criticism, which should be binding when we speak of anybody, should be especially binding when we speak of them. On an average they stand above any other servants of the community and the greatest judges have reached the high level held by those few greatest patriots whom the whole country delights to honor. But we must face the fact that there are wise and unwise judges, just as there are wise and unwise executives and legislators. When a president or a governor behaves improperly or unwisely the remedy is easy, for his term is short; the same is true with the legislator, although not to the same degree, for he is one of many who belong to some given legislative body and it is therefore less easy to fix his personal responsibility and hold him accountable therefor. With a judge, who, being human, is also likely to err, but whose tenure is for life, there is no similar way of holding him to responsibility. Under ordinary conditions the only forms of pressure to which he is in any way amenable are public opinion and the action of his fellow judges. It is the last which is most immediately effective and to which we should look for the reform of abuses.

Any remedy applied from without is fraught with risk. It is far better, from every standpoint, that the remedy should come from within. In no other nation in the world do the courts wield such vast and far-reaching power as in the United States. All that is necessary is that the courts as a whole should exercise this power with the far-sighted wisdom already shown by those judges who scan the future while they act in the present. Let them exercise this great power not only honestly and bravely but with wise insight into the needs and fixed purposes of the people, so that they may do justice and work equity, so that they may protect all persons in their rights and yet break down the barriers of privilege, which is the foe of right.

PRESERVE THE FORESTS.

If there is any one duty which more than another we owe it to our children and our children's children to perform at once, it is to save the forests of this country, for they constitute the first and most important element in the conservation of the natural resources of the country. There are of course two kinds of natural resources. One is the kind which can only be used as part of a process of exhaustion; this is true of mines, natural oil and gas wells and the like. The other and of course ultimately by far the most important includes the resources which can be improved in the process of wise use; the soil, the rivers and the forests come under this head. Any really civilized nation will so use all of these three great national assets that the nation will have their benefit in the future. Just as a farmer after all his life making his living from his farm will, if he is an expert farmer, leave it as an asset of increased value to

his son, so we should leave our national domain to our children, increased in value and not worn out. There are small sections of our own country, in the east and in the west, in the Adirondacks, the White mountains and the Appalachians and in the Rocky mountains, where we can already see for ourselves the damage in the shape of permanent injury to the soil and the river systems which comes from reckless deforestation. It matters not whether this deforestation is due to the actual reckless cutting of timber, to the fires that inevitably follow such reckless cutting of timber or to reckless and uncontrolled grazing, especially by the great migratory bands of sheep, the unchecked wandering of which over the country means destruction to forests and disaster to the small homesteaders, the settlers of limited means.

Shortsighted persons or persons blinded to the future by desire to make money in every way out of the present sometimes speak as if no great damage would be done by the reckless destruction of our forests. It is difficult to have patience with the arguments of these persons. Thanks to our own recklessness in the use of our splendid forests, we have already crossed the verge of a timber famine in this country, and no measures that we now take can, at least for many years, undo the mischief that has already been done. But we can prevent further mischief being done, and it would be in the highest degree reprehensible to let any consideration of temporary convenience or temporary cost interfere with such action, especially as regards the national forests which the nation can now, at this very moment, control.

All serious students of the question are aware of the great damage that has been done in the Mediterranean countries of Europe, Asia and Africa by deforestation. The similar damage that has been done in eastern Asia is less well known. A recent investigation into conditions in North China by Mr. Frank N. Meyer of the bureau of plant industry of the United States department of agriculture has incidentally furnished in very striking fashion proof of the ruin that comes from reckless deforestation of mountains and of the further fact that the damage once done may prove practically irremediable. So important are these investigations that I herewith attach as an appendix to my message a photograph showing present conditions in China. They show in vivid fashion the appalling desolation, taking the shape of barren mountains and gravel and sand covered plains, which immediately follows and depends upon the deforestation of the mountains.

Not many centuries ago the country of northern China was one of the most fertile and beautiful spots in the entire world, and was heavily forested. We know this not only from the old Chinese records but from the accounts given by the traveler Marco Polo. He, for instance, mentions that in visiting the provinces of Shansi and Shensi he observed many plantations of mulberry trees. Now there is hardly a single mulberry tree in either of these provinces and the culture of the silkworm has moved farther south, to regions of atmospheric moisture. As an illustration of the complete change in the river, we may take Polo's statement that a certain river, the Hun Ho, was so large and deep that merchants ascended it from the sea with heavily laden boats: to-day this river is simply a broad sandy bed, with shallow, rapid currents wandering hither and thither across it, absolutely unnavigable. But we do not have to depend upon written records. The dry wells and the wells with water far below the former water mark bear testimony to the good days of the past and the evil days of the present. Wherever the native vegetation has been allowed to remain, as, for instance, here and there around a sacred temple or imperial burying ground, there are still huge trees and tangled jungle, fragments of the glorious ancient forests. The thick, matted forest growth formerly covered the mountains to their summits. All natural factors favored this dense forest growth, and as long as it was permitted to exist the plains at the foot of the mountains were among the most fertile on the globe and the whole country was a garden. Not the slightest effort was made, however, to prevent the unchecked cutting of the trees or to secure reforestation.

Doubtless for many centuries the tree cutting by the inhabitants of the mountains worked but slowly in bringing about the changes that have now come to pass, doubtless for generations the inroads were scarcely noticeable. But there came a time when the forest had shrunk sufficiently to make each year's cutting a serious matter, and from that time on the destruction proceeded with appalling rapidity, for of course each year of destruction rendered the forest less able to recuperate, less able to resist next year's inroad. Mr. Meyer describes the useless progress of the destruction even now, when there is so little left to destroy. Every morning men and boys go out armed with mattock or ax, scale the steepest mountain sides and cut down and grub out, root and branch, the small trees and shrubs still to be found. The big trees disappeared centuries ago, so that now one of these is never seen save in the neighborhood of temples, where they are artificially protected, and even here it takes all the watch and care of the tree-loving priests to prevent their destruction. Each family, each community, where there is no common care exercised in the interest of all of them to prevent deforestation, finds its profit in the immediate use of the fuel which would otherwise be used by some other family or some other community. In the total absence of regulation of the matter in the interest of the whole people, each small group is inevitably pushed into a policy of destruction which cannot afford to take thought for the morrow. This is just one of those matters which it is fatal to leave to unsupervised individual control. The forests can only be protected by the state, by the nation, and the liberty of action of individuals must be conditioned upon what the state or nation determines to be necessary for the common safety.

The lesson of deforestation in China is a lesson which mankind should have learned many times already from what has occurred in other places. Denudation leaves naked soil, then gullying cuts down to the bare rock, and meanwhile the rock waste buries the bottom lands. When the soil is gone men must go, and the process does not take long.

This ruthless destruction of the forests in northern China has brought about or has aided in bringing about desolation just as the destruction of the forests in central Asia aided in bringing ruin to the once rich central Asian cities, just as the destruction of the forests in northern Africa helped toward the ruin of a region that was a fertile granary in Roman days. Short-sighted man, whether barbaric, semicivilized or what he mistakenly regards as fully civilized, when he has destroyed the forests has rendered certain the ultimate destruction of the land itself. In northern China the mountains are now such as are shown by the accompanying photographs, absolutely barren peaks. Not only have the forests been destroyed but because of their destruction the soil has been washed off the naked rock. The terrible consequence is that it is impossible now to undo the damage that has been done. Many centuries would have to pass before soil would again collect or could be made to collect in sufficient quantity once more to support the old-time forest growth. In consequence the Mongol desert is practically extending eastward over northern China.

The climate has changed and is still changing. It has changed even within the last half-century, as the work of tree destruction has been consummated. The great masses of arboreal vegetation on the mountains formerly absorbed the heat of the sun and sent up currents of cool air which brought the moisture-laden clouds lower and forced them to precipitate in rain a part of their burden of water. Now that there is no vegetation, the barren mountains, scorched by the sun, send up currents of heated air which drive away instead of attracting the rain clouds and cause their moisture to be disseminated. In consequence, instead of the regular and plentiful rains which existed in these regions once when the forests were still, in evidence of the unfortunate inhabitants of the deforested lands now see their crops wither for lack of rainfall, while the seasons grow more and more irregular, and as the air becomes drier certain crops refuse longer to grow at all. That everything dries out faster than formerly is shown by the fact that the

level of the wells all over the land has sunk perceptibly, many of them having become totally dry. In addition to the resulting agricultural distress the water courses have changed. Formerly they were narrow and deep, with an abundance of clear water the year around, for the roots and humus of the forests caught the rain water and let it escape by slow, regular seepage. They have now become broad, shallow stream beds, in which muddy water trickles in slender currents during the dry seasons, while when it rains there are freshets and roaring muddy torrents come tearing down, bringing disaster and destruction everywhere.

Moreover, these floods and freshets, which diversify the general dryness, wash away from the mountain sides and either wash away or cover in the valleys the rich fertile soil which it took tens of thousands of years for nature to form, and it is lost forever, and until the forests grow again it cannot be replaced. The sand and stones from the mountain sides are washed loose and come rolling down to cover the arable lands, and in consequence, throughout this part of China, many formerly rich districts are now sandy wastes, useless for human cultivation and even for pasture. The cities have been of course seriously affected, for the streams have gradually ceased to be navigable. There is testimony that even within the memory of men now living there has been a serious diminution of the rainfall of northeastern China. The level of the Sungari river in northern Manchuria has been sensibly lowered during the last fifty years, at least partly as the result of the indiscriminate cutting of the forests forming its watershed. Almost all the rivers of northern China have become uncontrollable and very dangerous to the dwellers along their banks as a direct result of the destruction of the forests. The journey from Peking to Jehol shows in melancholy fashion how the soil has been washed away from whole valleys so that they have been converted into deserts.

In northern China this disastrous process has gone on so long and has proceeded so far that no complete remedy could be applied. There are certain mountains in China from which the soil is gone so utterly that only the slow action of the ages could again restore it, although of course much could be done to prevent the still further eastward extension of the Mongolian desert if the Chinese government would act at once. The accompanying cuts from photographs show the inconceivable desolation of the barren mountains in which certain of these rivers rise—mountains, be it remembered, which formerly supported dense forests of larches and firs, now unable to produce any wood, and because of their condition a source of danger to the whole country. The photographs also show the same rivers after they have passed through the mountains, the beds having become broad and sandy because of the deforestation of the mountains. One of the photographs shows a caravan passing through a valley. Formerly, when the mountains were forested, it was thickly peopled by prosperous peasants.

Now the floods have carried destruction all over the land and the valley is a stony desert. Another photograph shows a mountain road covered with the stones and rocks that are brought down in the rainy season from the mountains which have already been deforested by human hands. Another shows a pebbly river bed in southern Manchuria where what was once a great stream has dried up owing to the deforestation in the mountains. Only some scrub wood is left, which will disappear within a half-century. Yet another shows the effect of one of the washouts, destroying an arable mountain side, these washouts being due to the removal of all vegetation, yet in the photograph the foreground shows that reforestation is still a possibility in places.

What has thus happened in northern China, what has happened in central Asia, in Palestine, in north Africa, in parts of the Mediterranean countries of Europe, will surely happen in our country if we do not exercise that wise forethought which should be one of the chief marks of any people calling itself civilized. Nothing should be permitted to stand in the way of the preservation of the forests, and it is criminal to permit individuals to

purchase a little gain for themselves through the destruction of forests when this destruction is fatal to the wellbeing of the whole country in the future.

INLAND WATERWAYS.

Action should be begun forthwith, during the present session of the congress, for the improvement of our inland waterways—action which will result in giving us not only navigable but navigated rivers. We have spent hundreds of millions of dollars upon these waterways, yet the traffic on nearly all of them is steadily declining. This condition is the direct result of the absence of any comprehensive and far-seeing plan of waterway improvement. Obviously we cannot continue thus to expend the revenues of the government without return. It is poor business to spend money for inland navigation unless we get it.

Inquiry into the condition of the Mississippi and its principal tributaries reveals very many instances of the utter waste caused by the methods which have hitherto obtained for the so-called "improvement" of navigation. A striking instance is supplied by the "improvement" of the Ohio, which, begun in 1824, was continued under a single plan for half a century. In 1875 a new plan was adopted and followed for a quarter of a century. In 1902 still a different plan was adopted and has since been pursued at a rate which only promises a navigable river in from twenty to one hundred years longer.

Such short-sighted, vacillating and futile methods are accompanied by decreasing water-borne commerce and increasing traffic congestion on land, by increasing floods and by the waste of public money. The remedy lies in abandoning the methods which have so signally failed and adopting new ones in keeping with the needs and demands of our people.

In a report on a measure introduced at the first session of the present congress the secretary of war said: "The chief defect in the methods hitherto pursued lies in the absence of executive authority for originating comprehensive plans covering the country or natural divisions thereof." In this opinion I heartily concur. The present methods not only fail to give us inland navigation but they are injurious to the army as well. What is virtually a permanent detail of the corps of engineers to civilian duty necessarily impairs the efficiency of our military establishment. The military engineers have undoubtedly done efficient work in actual construction, but they are necessarily unsuited by their training and traditions to take the broad view and to gather and transmit to the congress the commercial and industrial information and forecasts upon which waterway improvements must always so largely rest.

Furthermore, they have failed to grasp the great underlying fact that every stream is a unit from its source to its mouth and that all its uses are interdependent. Prominent officers of the engineer corps have recently even gone so far as to assert in print that waterways are not dependent upon the conservation of the forests about their headwaters. This position is opposed to all the recent work of the scientific bureaus of the government and to the general experience of mankind. A physician who disbelieved in vaccination would not be the right man to handle an epidemic of small-pox, nor should we leave a doctor skeptical about the transmission of yellow fever by the stegomyia mosquito in charge of sanitation at Havana or Panama. So with the improvement of our great rivers; it is no longer wise or safe to leave this great work in the hands of men who fail to grasp the essential relations between navigation and general developments and to assimilate and use the central facts about our streams.

Until the work of river improvement is undertaken in a modern way it cannot have results that will meet the needs of this modern nation. These needs should be met without further dillydallying or delay. The plan which promises the best and quickest results is that of a permanent commission authorized to co-ordinate the work of all the government departments relating to waterways and to frame and supervise the execution of a comprehensive plan. Under such a commission the actual

work of construction might be entrusted to the reclamation service, or to the military engineers acting with a sufficient number of civilians to continue the work in time of war, or it might be divided between the reclamation service and the corps of engineers. Funds should be provided from current revenues if it is deemed wise—otherwise from the sale of bonds. The essential thing is that the work should go forward under the best possible plan and with the least possible delay. We should have a new type of work and a new organization for planning and directing it. The time for playing with our waterways is past. The country demands results.

I urge that all our national parks adjacent to national forests be placed completely under the control of the forest service of the agricultural department, instead of leaving them as they now are, under the interior department and policed by the army. The congress should provide for superintendents with adequate corps of first-class civilian scouts or rangers, and further, place the road construction under the superintendent instead of leaving it with the war department. Such a change in park management would result in economy and avoid the difficulties of administration which now arise from having the responsibility of care and protection divided between different departments. The need of this course is peculiarly great in the Yellowstone park. This, like the Yosemite, is a great wonderland and should be kept as a national playground. In both all wild things should be protected and the scenery kept wholly unmarred.

I am happy to say that I have been able to set aside in various parts of the country small, well-chosen tracts of ground to serve as sanctuaries and nurseries for wild creatures.

I had occasion in my message of May 4, 1906, to urge the passage of some law putting alcohol, used in the arts, industries and manufactures, upon the free list; that is, to provide for the withdrawal free of tax of alcohol which is to be denatured for those purposes. The law of June 7, 1906, and its amendment of March 2, 1907, accomplished what was desired in that respect and the use of denatured alcohol, as intended, is making a fair degree of progress and is entitled to further encouragement and support from the congress.

The pure-food legislation has already worked a benefit difficult to overestimate.

It has been my purpose from the beginning of my administration to take the Indian service completely out of the atmosphere of political activity and there has been steady progress toward that end. The last remaining stronghold of politics in that service was the agency system, which had seen its best days and was gradually falling to pieces from natural or purely evolutionary causes, but, like all such survivals, was decaying slowly in its later stages. It seems clear that its extinction had better be made final now, so that ground can be cleared for larger constructive work on behalf of the Indians, preparatory to their induction into the full measure of responsible citizenship. On Nov. 1 only eighteen agencies were left on the roster; with two exceptions, where some legal questions seemed to stand temporarily in the way, these have been changed to superintendencies and their heads brought into the classified civil service.

SECRET SERVICE.

Last year an amendment was incorporated in the measure providing for the secret service which provided that there should be no detail from the secret service and no transfer therefrom. It is not too much to say that this amendment has been of benefit only, and could be of benefit only, to the criminal classes. If deliberately introduced for the purpose of diminishing the effectiveness of war against crime it could not have been better devised to this end. It forbade the practices that had been followed to a greater or less extent by the executive heads of various departments for twenty years. To these practices we owe the securing of the evidence which enabled us to drive great lotteries out of business and secure a quarter of a million of dollars in

finances from their promoters. These practices have enabled us to discover some of the most outrageous frauds in connection with the theft of government land and government timber by great corporations and by individuals. These practices have enabled us to get some of the evidence indispensable in order to secure the conviction of the wealthiest and most formidable criminals with whom the government has to deal, both those operating in violation of the antitrust law and others.

The amendment in question was of benefit to no one excepting to these criminals and it seriously hampers the government in the detection of crime and the securing of justice. Moreover, it not only affects departments outside of the treasury, but it tends to hamper the secretary of the treasury himself in the effort to utilize the employees of his department so as to best meet the requirements of the public service. It forbids him from preventing frauds upon the customs service, from investigating irregularities in branch mints and assay offices and has seriously crippled him. It prevents the promotion of employees in the secret service and this further discourages good effort. In its present form the restriction operates only to the advantage of the criminal, of the wrongdoer. The chief argument in favor of the provision was that the congressmen did not themselves wish to be investigated by secret-service men.

Very little of such investigation has been done in the past, but it is true that the work of the secret-service agents was partly responsible for the indictment and conviction of a senator and a congressman for land frauds in Oregon. I do not believe that it is in the public interest to protect criminals in any branch of the public service, and exactly as we have again and again during the past seven years prosecuted and convicted such criminals who were in the executive branch of the government, so, in my belief, we should be given ample means to prosecute them if found in the legislative branch. But if this is not considered desirable a special exception could be made in the law prohibiting the use of the secret-service force in investigating members of the congress. It would be far better to do this than to do what actually was done and strive to prevent or at least to hamper effective action against criminals by the executive branch of the government.

POSTAL BANKS URGED.

I again renew my recommendation for postal savings banks, for depositing savings with the security of the government behind them. The object is to encourage thrift and economy in the wage earner and person of moderate means. In fourteen states the deposits in savings banks as reported to the comptroller of the currency amount to \$3,590,245,402, or 98.4 per cent of the entire deposits, while in the remaining 32 states there are only \$70,308,543 or 1.6 per cent, showing conclusively that there are many localities in the United States where sufficient opportunity is not given to the people to deposit their savings. The result is that money is kept in hiding and unemployed. It is believed that in the aggregate vast sums of money would be brought into circulation through the instrumentality of the postal savings banks. While there are only 1,453 savings banks reporting to the comptroller there are more than 61,000 postoffices, 40,000 of which are money-order offices. Postal savings banks are now in operation in practically all the great civilized countries with the exception of the United States.

In my last annual message I commended the postmaster-general's recommendation for an extension of the parcel post on the rural routes. The establishment of a local parcel post on rural routes would be to the mutual benefit of the farmer and the country storekeeper and it is desirable that the routes, serving more than 15,000,000 people, should be utilized to the fullest practicable extent. An amendment was proposed in the senate at the last session, at the suggestion of the postmaster-general, providing that, for the purpose of ascertaining the practicability of establishing a special local parcel-post system on the rural routes throughout the United States, the postmas-

ter-general be authorized and directed to experiment and report to the congress the result of such experiment by establishing a special local parcel-post system on rural delivery routes in not to exceed four counties in the United States for packages of fourth-class matter, originating on a rural route or at the distributing postoffice for delivery by rural carriers. It would seem only proper that such an experiment should be tried in order to demonstrate the practicability of the proposition, especially as the postmaster-general estimates that the revenue derived from the operation of such a system on all the rural routes would amount to many million dollars.

NATION AND EDUCATION.

The share that the national government should take in the broad work of education has not received the attention and the care it rightly deserves. The immediate responsibility for the support and improvement of our educational systems and institutions rests and should always rest with the people of the several states acting through their state and local governments, but the nation has an opportunity in educational work which must not be lost and a duty which should no longer be neglected.

The national bureau of education was established more than forty years ago. Its purpose is to collect and diffuse such information "as shall aid the people of the United States in the establishment and maintenance of efficient school systems and otherwise promote the cause of education throughout the country." This purpose in no way conflicts with the educational work of the states, but may be made of great advantage to the states by giving them the fullest, most accurate and hence the most helpful information and suggestion regarding the best educational systems. The nation, through its broader field of activities, its wider opportunity for obtaining information from all the states and from foreign countries, is able to do that which not even the richest states can do, and with the distinct additional advantage that the information thus obtained is used for the immediate benefit of all our people.

With the limited means hitherto provided, the bureau of education has rendered efficient service, but the congress has neglected to adequately supply the bureau with means to meet the educational growth of the country. The appropriations for the general work of the bureau, outside education in Alaska, for the year 1909 are but \$87,500—an amount less than they were ten years ago, and some of the important items in these appropriations are less than they were thirty years ago. It is an inexcusable waste of public money to appropriate an amount which is so inadequate as to make it impossible properly to do the work authorized and it is unfair to the great educational interests of the country to deprive them of the value of the results which can be obtained by proper appropriations.

I earnestly recommend that this unfortunate state of affairs as regards the national educational office be remedied by adequate appropriations. This recommendation is urged by the representatives of our common schools and great state universities and the leading educators, who all unite in requesting favorable consideration and action by the congress upon this subject.

I strongly urge that the request of the director of the census in connection with the decennial work so soon to be begun be complied with and that the appointments to the census force be placed under the civil-service law, waiving the geographical requirements as requested by the director of the census. The supervisors and enumerators should not be appointed under the civil-service law for the reasons given by the director. I commend to the congress the careful consideration of the admirable report of the director of the census and I trust that his recommendations will be adopted and immediate action thereon taken.

It is highly advisable that there should be intelligent action on the part of the nation on the question of preserving the health of the country. Through the practical extermination in San Fran-

cisco of disease-bearing rodents our country has thus far escaped the bubonic plague. This is but one of the many achievements of American health officers and it shows what can be accomplished with a better organization than at present exists.

The dangers to public health from food adulteration and from other sources, such as the menace to the physical, mental and moral development of children from child labor, should be met and overcome. There are numerous diseases which are now known to be preventable, which are, nevertheless, not prevented. The recent international congress on tuberculosis has made us painfully aware of the inadequacy of American public health legislation. This nation cannot afford to lag behind in the world-wide battle now being waged by all civilized people with the microscopic foes of mankind, nor ought we longer to ignore the reproach that this government takes more pains to protect the lives of hogs and of cattle than of human beings. The first legislative step to be taken is that for the concentration of the proper bureaus into one of the existing departments. I therefore urgently recommend the passage of a bill which shall authorize a redistribution of the bureaus which shall best accomplish this end.

I recommend that legislation be enacted placing under the jurisdiction of the department of commerce and labor the government printing office. At present this office is under the combined control, supervision and administrative direction of the president and of the joint committee on printing of the two houses of the congress. The advantage of having the 4,069 employees in this office and the expenditure of the \$5,761,377.57 appropriated therefor supervised by an executive department is obvious instead of the present combined supervision.

All soldiers' homes should be placed under the complete jurisdiction and control of the war department.

Economy and sound business policy require that all existing independent bureaus and commissions should be placed under the jurisdiction of appropriate executive departments. It is unwise from every standpoint and results only in mischief to have any executive work done save by the purely executive bodies, under the control of the president, and each such executive body should be under the immediate supervision of a cabinet minister.

I advocate the immediate admission of New Mexico and Arizona as states. This should be done at the present session of the congress. The people of the two territories have made it evident by their votes that they will not come in as one State. The only alternative is to admit them as two, and I trust that this will be done without delay.

INTERSTATE FISHERIES.

I call the attention of the congress to the importance of the problem of the fisheries in the interstate waters. On the great lakes we are now, under the very wise treaty of April 11 of this year, endeavoring to come to an international agreement for the preservation and satisfactory use of the fisheries of these waters which cannot otherwise be achieved. Lake Erie, for example, has the richest fresh-water fisheries in the world, but it is now controlled by the statutes of two nations, four states and one province, and in this province by different ordinances in different counties. All these political divisions work at cross purposes and in no case can they achieve protection to the fisheries on the one hand and justice to the localities and individuals on the other. The case is similar in Puget sound.

But the problem is quite as pressing in the interstate waters of the United States. The salmon fisheries of the Columbia river are now but a fraction of what they were twenty-five years ago and what they would be now if the United States government had taken complete charge of them by intervening between Oregon and Washington. During these twenty-five years the fishermen of each state have naturally tried to take all they could get, and the two legislatures have never been able to agree on joint action of any kind adequate in degree for the protection of the fisheries. At the moment the fishing on the Oregon side is practically closed while there is no limit on the Washington side of

any kind, and no one can tell what the courts will decide as to the very statutes under which this action and nonaction result. Meanwhile very few salmon reach the spawning grounds and probably four years hence the fisheries will amount to nothing, and this comes from a struggle between the associated or gill-net fishermen on the one hand and the owners of the fishing wheels up the river. The fisheries of the Mississippi, the Ohio and the Potomac are also in a bad way. For this there is no remedy except for the United States to control and legislate for the interstate fisheries as part of the business of interstate commerce. In this case the machinery for scientific investigation and for control already exists in the United States bureau of fisheries. In this as in similar problems the obvious and simple rule should be followed of having those matters which no particular state can manage taken in hand by the United States—problems which in the cessaw of conflicting state legislatures are absolutely unsolvable are easy enough for the congress to control.

The federal statute regulating interstate traffic in game should be extended to include fish. New federal fish hatcheries should be established. The administration of the Alaskan fur-seal service should be vested in the bureau of fisheries.

This nation's foreign policy is based on the theory that right must be done between nations precisely as between individuals, and in our actions for the last ten years we have in this matter proved our faith by our deeds. We have behaved and are behaving toward other nations as in private life an honorable man would behave toward his fellows.

The commercial and material progress of the twenty Latin American republics is worthy of the careful attention of the congress. No other section of the world has shown a greater proportionate development of its foreign trade during the last ten years and none other has more special claims on the interest of the United States. It offers to-day probably larger opportunities for the legitimate expansion of our commerce than any other group of countries. These countries will want our products in greatly increased quantities and we shall correspondingly need theirs. The international bureau of the American republics is doing a useful work in making these nations and their resources better known to us and in acquainting them not only with us as a people and with our purposes toward them, but with what we have to exchange for their goods. It is an international institution supported by all the governments of the two Americas.

The work on the Panama canal is being done with a speed, efficiency and entire devotion to duty which make it a model for all work of the kind. No task of such magnitude has ever before been undertaken by any nation, and no task of the kind has ever been better performed. The men on the isthmus, from Col. Goethals and his fellow commissioners through the entire list of employees who are faithfully doing their duty, have won their right to the ungrudging respect and gratitude of the American people.

I again recommend the extension of the ocean mail act of 1891 so that satisfactory American ocean mail lines to South America, Asia, the Philippines and Australasia may be established. The creation of such steamship lines should be the natural corollary of the voyage of the battle fleet. It should precede the opening of the Panama canal. Even under favorable conditions several years must elapse before such lines can be put into operation. Accordingly I urge that the congress act promptly where foresight already shows that action sooner or later will be inevitable.

I call particular attention to the territory of Hawaii. The importance of those islands is apparent and the need of improving their condition and developing their resources is urgent. In recent years industrial conditions upon the islands have radically changed. The importation of cool labor has practically ceased and there is now developing such a diversity in agricultural products as to make possible a change in the land conditions of the territory so that an opportunity may be given to the small land owner similar to that on the mainland. To aid these changes the national government must provide the necessary harbor improvements on each

island so that the agricultural products can be carried to the markets of the world. The coastwise shipping laws should be amended to meet the special needs of the islands and the alien contract labor law should be so modified in its application to Hawaii as to enable American and European labor to be brought thither.

We have begun to improve Pearl harbor for a naval base and to provide the necessary military fortifications for the protection of the islands, but I cannot too strongly emphasize the need of appropriations for these purposes of such an amount as will within the shortest possible time make those islands practically impregnable. It is useless to develop the industrial conditions of the islands and establish there bases of supply for our naval and merchant fleets unless we insure, as far as human ingenuity can, their safety from foreign seizure.

One thing to be remembered with all our fortifications is that it is almost useless to make them impregnable from the sea if they are left open to land attack. This is true even of our own coast, but it is doubly true of those insular possessions in Hawaii, for instance. It is worse than useless to establish a naval station unless we establish it behind fortifications so strong that no landing force can take them save by regular and long-continued siege operations.

THE PHILIPPINES.

Real progress toward self-government is being made in the Philippine islands. The gathering of a Philippine legislative body and Philippine assembly marks a process absolutely new in Asia, not only as regards Asiatic colonies of European powers, but as regards Asiatic possessions of other Asiatic powers, and, indeed, always excepting the striking and wonderful example afforded by the great empire of Japan, it opens an entirely new departure when compared with anything which has happened among Asiatic powers which are their own masters. Hitherto this Philippine legislature has acted with moderation and self-restraint and has seemed in practical fashion to realize the eternal truth that there must always be government and that the only way in which any body of individuals can escape the necessity of being governed by outsiders is to show that they are able to restrain themselves, to keep down wrongdoing and disorder. The Filipino people, through their officials, are therefore making real steps in the direction of self-government. I hope and believe that these steps mark the beginning of a course which will continue till the Filipinos become fit to decide for themselves whether they desire to be an independent nation. But it is well for them (and well also for those Americans who during the past decade have done so much damage to the Filipinos by agitation for an immediate independence for which they were totally unfit) to remember that self-government depends and must depend upon the Filipinos themselves.

All we can do is to give them the opportunity to develop the capacity for self-government. If we had followed the advice of the foolish doctrinaires who wished us at any time during the last ten years to turn the Filipino people adrift we should have shirked the plainest possible duty and have inflicted a lasting wrong upon the Filipino people. We have acted in exactly the opposite spirit. We have given the Filipinos constitutional government—a government based upon justice—and we have shown that we have governed them for their good and not for our aggrandizement. At the present time, as during the past ten years, the inexorable logic of facts shows that this government must be supplied by us and not by them. We must be wise and generous, we must help the Filipinos to master the difficult art of self-control, which is simply another name for self-government. But we cannot give them self-government save in the sense of governing them so that gradually they may, if they are able, learn to govern themselves.

Under the present system of just laws and sympathetic administration we have every reason to believe that they are gradually acquiring the character which lies at the basis of self-government and for which, if it be lacking, no system of laws,

no paper constitution, will in any wise serve as a substitute. Our people in the Philippines have achieved what may legitimately be called a marvelous success in giving to them a government which marks on the part of those in authority both the necessary understanding of the people and the necessary purpose to serve them disinterestedly and in good faith. I trust that within a generation the time will arrive when the Philippines can decide for themselves whether it is well for them to become independent or to continue under the protection of a strong and disinterested power, able to guarantee to the islands order at home and protection from foreign invasion. But no one can prophesy the exact date when it will be wise to consider independence as a fixed and definite policy. It would be worse than folly to try to set down such a date in advance, for it must depend upon the way in which the Philippine people themselves develop the power of self-mastery.

I again recommend that American citizenship be conferred upon the people of Porto Rico.

In Cuba our occupancy will cease in about two months' time; the Cubans have in orderly manner elected their own governmental authorities and the island will be turned over to them. Our occupation on this occasion has lasted a little over two years and Cuba has thriven and prospered under it. Our earnest hope and one desire is that the people of the island shall now govern themselves with justice, so that peace and order may be secure. We will gladly help them to this end, but I would solemnly warn them to remember the great truth that the only way a people can permanently avoid being governed from without is to show that they both can and will govern themselves from within.

JAPANESE EXPOSITION.

The Japanese government has postponed until 1917 the date of the great international exposition, the action being taken so as to insure ample time in which to prepare to make the exposition all that it should be made. The American commissioners have visited Japan and the postponement will merely give ampler opportunity for America to be represented at the exposition. Not since the first international exposition has there been one of greater importance than this will be, marking as it does the fiftieth anniversary of the ascension to the throne of the emperor of Japan. The extraordinary leap to a foremost place among the nations of the world made by Japan during this half-century is something unparalleled in all previous history. This exposition will fitly commemorate and signalize the giant progress that has been achieved. It is the first exposition of its kind that has ever been held in Asia. The United States, because of the ancient friendship between the two peoples, because each of us fronts on the Pacific and because of the growing commercial relations between this country and Asia, takes a peculiar interest in seeing the exposition made a success in every way.

I take this opportunity publicly to state my appreciation of the way in which in Japan, in Australia, in New Zealand and in all the states of South America, the battle fleet has been received on its practice voyage around the world. The American government cannot too strongly express its appreciation of the abounding and generous hospitality shown our ships in every port they visited.

THE ARMY.

As regards the army I call attention to the fact that while our junior officers and enlisted men stand very high, the present system of promotion by seniority results in bringing into the higher grades many men of mediocre capacity who have but a short time to serve. No man should regard it as his vested right to rise to the highest rank in the army any more than in any other profession. It is a curious and by no means creditable fact that there should be so often a failure on the part of the public and its representatives to understand the great need, from the standpoint of the service and the nation, of resisting to promote respectable, elderly incompetents. The higher places should be given to the most deserving men without regard to seniority—at least seniority should be treated as only one consideration. In

the stress of modern industrial competition no business firm could succeed if those responsible for its management were chosen simply on the ground that they were the oldest people in its employment; yet this is the course advocated as regards the army and regulated by law for all grades except those of general officer. As a matter of fact, all of the best officers in the highest ranks of the army are those who have attained their present position wholly or in part by a process of selection.

The scope of retiring boards should be extended so that they could consider general unfitness to command for any cause, in order to secure a far more rigid enforcement than at present in the elimination of officers for mental, physical or temperamental disabilities. But this plan is recommended only if the congress does not see fit to provide what in my judgment is far better; that is, for selection in promotion and for elimination for age. Officers who fail to attain a certain rank by a certain age should be retired—for instance, if a man should not attain field rank by the time he is 45 he should of course be placed on the retired list. General officers should be selected as at present and one-third of the other promotions should be made by selection, the selection to be made by the president or the secretary of war from a list of at least two candidates proposed for each vacancy by a board of officers from the arm of the service from which the promotion is to be made. A bill is now before the congress having for its object to secure the promotion of officers to various grades at reasonable ages through a process of selection, by boards of officers, of the least efficient for retirement with a percentage of their pay depending upon length of service. The bill, although not accomplishing all that should be done, is a long step in the right direction, and I earnestly recommend its passage, or that of a more completely effective measure.

The cavalry arm should be reorganized upon modern lines. This is an arm in which it is peculiarly necessary that the field officers should not be old. The cavalry is much more difficult to form than infantry and it should be kept up to the maximum, both in efficiency and in strength, for it cannot be made in a hurry. At present both infantry and artillery are too few in number for our needs. Especial attention should be paid to development of the machine gun. A general service corps should be established. As things are now the average soldier has far too much labor of a nonmilitary character to perform.

Now that the organized militia, the national guard, has been incorporated with the army as a part of the national forces, it behooves the government to do every reasonable thing in its power to perfect its efficiency. It should be assisted in its instruction and otherwise aided more liberally than heretofore. The continuous services of many well-trained regular officers will be essential in this connection. Such officers must be specially trained at service schools best to qualify them as instructors of the national guard. But the detaching of officers for training at the service schools and for duty with the national guard entails detaching them from their regiments, which are already greatly depleted by detachment of officers for assignment to duties prescribed by acts of the congress.

A bill is now pending before the congress creating a number of extra officers in the army, which if passed, as it ought to be, will enable more officers to be trained as instructors of national guard and assigned to that duty. In case of war it will be of the utmost importance to have a large number of trained officers to use for turning raw levies into good troops.

There should be legislation to provide a complete plan for organizing the great body of volunteers behind the regular army and national guard when war has come. Congressional assistance should be given those who are endeavoring to promote rifle practice so that our men, in the services or out of them, may know how to use the rifle. While teams representing the United States won the rifle and revolver championships of

the world against all comers in England this year, it is unfortunately true that the great body of our citizens shoot less and less as time goes on. To meet this we should encourage rifle practice among schoolboys and indeed among all classes, as well as in the military services, by every means in our power. Thus, and not otherwise, may we be able to assist in preserving the peace of the world. Fit to hold our own against the strong nations of the earth, our voice for peace will carry to the ends of the earth. Unprepared, and therefore unfit, we must sit dumb and helpless to defend ourselves, protect others or preserve peace. The first step—in the direction of preparation to avert war if possible and to be fit for war if it should come—is to teach our men to shoot.

FOR A BIGGER NAVY.

I approve the recommendations of the general board for the increase of the navy, calling especial attention to the need of additional destroyers and colliers and, above all, of the four battle ships. It is desirable to complete as soon as possible a squadron of eight battle ships of the best existing type. The North Dakota, Delaware, Florida and Utah will form the first division of this squadron. The four vessels proposed will form the second division. It will be an improvement on the first, the ships being of the heavy, single caliber, all big gun type. All the vessels should have the same tactical qualities, that is, speed and turning circle, and as near as possible these tactical qualities should be the same as in the four vessels before named now being built.

I most earnestly recommend that the general board be by law turned into a general staff. There is literally no excuse whatever for continuing the present bureau organization of the navy. The navy should be treated as a purely military organization and everything should be subordinated to the one object of securing military efficiency. Such military efficiency can only be guaranteed in time of war if there is the most thorough previous preparation in time of peace—a preparation, I may add, which will in all probability prevent any need of war. The secretary must be supreme, and he should have as his official advisers a body of line officers who should themselves have the power to pass upon and co-ordinate all the work and all the proposals of the several bureaus. A system of promotion by merit, either by selection or by exclusion, or by both processes, should be introduced. It is out of the question, if the present principle of promotion by mere seniority is kept, to expect to get the best results from the higher officers. Our men come

too old and stay for too short a time in the high command positions.

Two hospital ships should be provided. The actual experience of the hospital ship with the fleet in the Pacific has shown the invaluable work which such a ship does and has also proved that it is well to have it kept under the command of a medical officer. As was to be expected, all of the anticipations of trouble from such a command have proved completely baseless. It is as absurd to put a hospital ship under a line officer as it would be to put a hospital on shore under such a command. This ought to have been realized before and there is no excuse for failure to realize it now.

Nothing better for the navy from every standpoint has ever occurred than the cruise of the battle fleet around the world. The improvement of the ships in every way has been extraordinary and they have gained far more experience in battle tactics than they would have gained if they had stayed in the Atlantic waters. The American people have cause for profound gratification, both in view of the excellent condition of the fleet as shown by this cruise and in view of the improvement the cruise has worked in this already high condition. I do not believe that there is any other service in the world in which the average of character and efficiency in the enlisted men is as high as is now the case in our own. I believe that the same statement can be made as to our officers, taken as a whole; but there must be a reservation made in regard to those in the highest ranks—as to which I have already spoken—and in regard to those who have just entered the service; because we do not now get full benefit from our excellent naval school at Annapolis.

It is absurd not to graduate the midshipmen as ensigns; to keep them for two years in such an anomalous position as at present the law requires is detrimental to them and to the service. In the academy itself every first classman should be required in turn to serve as petty officer and officer; his ability to discharge his duties as such should be a prerequisite to his going into the line and his success in commanding should largely determine his standing at graduation. The board of visitors should be appointed in January and each member should be required to give at least six days' service, only from one to three days' to be performed during June week, which is the least desirable time for the board to be at Annapolis so far as benefiting the navy by their observations is concerned.

PRESIDENTIAL ELECTION IN CUBA.

Gen. Jose Miguel Gomez, liberal, was elected president and Alfredo Zayas vice-president of Cuba Nov. 14, 1908. The conservative candidate for president was Gen. Mario Menocal. The liberals carried every

province in the island by large majorities. The American occupation of Cuba, which began in September, 1906, was according to the understanding arrived at in 1908 to cease Jan. 23, 1909.

AMERICAN-JAPANESE AGREEMENT.

Following is the text of an agreement between the governments of the United States and Japan, made public Dec. 1, 1903:

"1. It is the wish of the two governments to encourage the free and peaceful development of their commerce on the Pacific ocean.

"2. The policy of both governments, uninfluenced by any aggressive tendencies, is directed to the maintenance of the existing status quo in the region mentioned, and to the defense of the principle of equal opportunity for commerce and industry in China.

"3. They are accordingly firmly resolved recipro-

cally to respect the territorial possessions belonging to each other in said region.

"4. They also are determined to preserve the common interests of all powers in China by supporting by all pacific means at their disposal the independence and integrity of China and the principle of equal opportunity for commerce and industry of all nations in that empire.

"5. Should any event occur threatening the status quo as described or the principle of equal opportunity as above defined, it remains for the two governments to communicate with each other in order to arrive at an understanding as to what measures they may consider it useful to take."

ALASKA-YUKON-PACIFIC EXPOSITION.

There will be held from June 1 to Oct. 15, 1909, at Seattle, Wash., an international exposition to be known as the Alaska-Yukon-Pacific exposition. The cost is estimated at approximately \$10,000,000. Some 250 acres of the campus of the University

of Washington have been selected as the site for the eleven principal exhibition buildings and other structures of the fair. The primary purpose is to exploit the resources of the Alaska and Yukon territories in the United States and Canada.

GREAT FOREST FIRES IN 1908.

Owing to long-continued droughts in the summer and early fall of 1908 forest fires, extremely destructive to life and property, occurred in Minnesota, Michigan, Wisconsin, New York and British Columbia. They continued throughout the greater part of August and September and it was officially estimated in Washington that the aggregate daily loss was \$1,000,000. In Michigan alone the loss was estimated by Prof. F. Roth, the state forester, at \$400,000,000. In the other states named and in British Columbia a very large amount of property was destroyed, but no estimates of the aggregate losses were made. Even more appalling than the destruction of property was the loss of human life. In Fernie, B. C., and vicinity nearly 200 persons were burned to death in the early part of August, while in Alpena, Presque Isle and Montmorency counties, Michigan, more than fifty lives were lost. Fifteen were burned to death on a relief train while being taken away from the village of Metz. The greatest destruction in Michigan was in the northern part of the southern peninsula. In Wisconsin the most damage was done along the line of the Soo railroad. The towns of Gagen and Woodboro were burned Sept. 20 and Rhineland was only saved by a change in the direction of the wind. Large districts in the northwestern part of the state were swept by flames.

In Minnesota, Chisholm, a town of 4,000 inhabitants, was destroyed Sept. 5, and Hibbing had a narrow escape. Many smaller places were destroyed in the northeastern part of the state in the vicinity of Duluth, the counties of Louis, Carleton and Itasca being the greatest sufferers. No fewer than 12,000 persons were made homeless and the property loss in Chisholm alone was nearly \$2,000,000. On the north shore of Lake Superior \$3,000,000 worth of timber was burned.

In New York the forest fires were confined to the Adirondack region, but large areas were swept. The village of Long Lake West was wiped out, the inhabitants barely escaping with their lives. Several other small towns were also destroyed.

In British Columbia the towns of Fernie, Elko, Michel, Hosmer, Coal Creek and Morrissey, each having from 100 to 6,000 inhabitants, were burned the first week in August. Some 6,000 persons were made homeless and the property loss was \$5,000,000.

THE JOHN R. WALSH CASE.

Dec. 18, 1905, the Chicago National bank, of which John R. Walsh was president, closed its doors. Jan. 18, 1907, Walsh was indicted by the federal grand jury on the charge of misapplying the funds of the bank with intent to defraud. The trial began before Judge A. B. Anderson of the United States District court, in Chicago, Nov. 12, 1907, and went to the jury Jan. 16, 1908. Two days later a verdict of guilty on fifty-four counts was returned. March 13 Judge Anderson overruled a motion for a new trial and sentenced Walsh to serve five years in the United States prison at Leavenworth, Kas.

*Based on the annual average of divorce for the five-year period of which the census year is the median year.

†All laws permitting divorce were repealed in 1878. ‡Organized from part of Dakota territory Nov. 2, 1889. Divorces granted in the counties then composing Dakota territory are distributed between North Dakota and South Dakota according as the counties are now located in one or the other of these states.

The total number of marriages recorded during the twenty years from 1887 to 1906 inclusive was 12,832,044. The number annually reported increased from 483,069 in the year 1887 to 853,290 in the year 1906. The marriage rate in the United States in the year 1900 was 93 per 10,000 population. The total number of divorces reported for the twenty years, 1887 to 1906, inclusive, was 945,625. For the earlier investigation covering the twenty years 1867

to 1886, inclusive, the number reported was 328,716, or hardly more than one-third of the number recorded in the second twenty years. At the beginning of the forty-year period covered by the two investigations divorces occurred at the rate of 10,000 a year; at the end of that period the annual number was about 65,000. This increase, however, must be considered in connection with the increase in population.

An increase of 30 per cent in population between the years 1870 to 1880 was accompanied by an increase of 79 per cent in the number of divorces granted. In the next decade, 1880 to 1890, the population increased 25 per cent and divorces 70 per cent, and in the following decade, 1890 to 1900, an increase of 21 per cent in population was accompanied by an increase of 66 per cent in the number of divorces. In the six years from 1900 to 1906, population, as estimated, increased 10.5 per cent and divorces 29.3 per cent.

It thus appears that at the end of the forty-year period divorces were increasing about three times as fast as population, while in the first decade (1870 to 1880) they increased only about two and two-thirds as fast.

The divorce rate per 100,000 population increased from twenty-nine in 1870 to eighty-two in 1905. In the former year there was one divorce for every 3,441 persons and in the latter year one for every 1,213. Since it is only married people who can become divorced a more significant divorce rate is that which is based not upon total population but upon the total married population. The rate per 100,000 married population was eighty-one in the year 1870 and 200 in the year 1900. This comparison indicates that divorce is at present two and one-half times as common, compared with married population, as it was forty years ago. A divorce rate of 200 per 100,000 married population is equivalent to two per 1,000 married population. Assuming that 1,000 married people represent 500 married couples, it follows that in each year four married couples out of every 1,000 secure a divorce.

This does not mean that only four marriages out of 1,000 are terminated by divorce. The rate, it will be noted, is an annual rate, continuously operative, and comes far short of measuring the probability of ultimate divorce. The available data indicate, however, that not less than one marriage in twelve is ultimately terminated by divorce.

Divorce rates appear to be much higher in the United States than in any of the foreign countries for which statistics relating to this subject have been obtained.

The most common single ground for divorce is desertion. This accounts for 38.9 per cent of all divorces (period 1887 to 1906); 49.4 per cent, or almost one-half, of those granted to the husband, and 33.5 per cent, or one-third, of those granted to the wife.

NOBEL PRIZE AWARDS FOR 1908.

The Nobel prize awards for 1908 were as follows: Literature, Prof. Rudolf Eucken of the Jena university; physics, Prof. Gabriel Lippmann of the University of Paris; chemistry, Prof. Ernest Rutherford of the University of Manchester; England; medicine, divided between Dr. Paul Ehrlich of Berlin and Prof. Elie Metchnikoff of the Pasteur Institute, Paris; peace, to K. P. Arnoldson of Sweden and M. F. Bajer of Denmark.

DEATH OF REAR-ADMIRAL COGHLAN.

Rear-Admiral Joseph Bullock Coghlan, U. S. N., died in New Rochelle, N. Y., Dec. 5, after a brief illness. He was born in Frankfort, Ky., and graduated from the naval academy in 1863. At the battle of Manila bay he commanded the cruiser Raleigh and was promoted for his conspicuous services on that occasion.

EMPEROR WILLIAM'S INTERVIEWS.

Emperor William's personal intervention in the foreign affairs of Germany and certain statements made by him in an interview published in the London Telegraph in October, 1908, caused much resentment and criticism in the fatherland. Chancellor Bulow felt compelled to offer his resignation, but this was not accepted by the kaiser. The matter was made the subject of an interpellation in the reichstag Nov. 10, when many speeches severely arraigning the kaiser and the foreign affairs department were made. Prince Bulow defended himself and his sovereign to the best of his ability, but the impression produced was not altogether favorable. It was generally felt that some method must be adopted to prevent similar occurrences in the future. The upshot of the matter was that, following an interview between Prince Bulow and Emperor William at Potsdam, Nov. 17, a formal note was published in the Reichsanzeiger to this effect:

"During to-day's audience granted to the impe-

rial chancellor his majesty the emperor listened for several hours to a report by Prince von Bulow. The imperial chancellor described the feeling and its causes among the German people in connection with the article published in the Daily Telegraph. He also explained the position he had taken during the course of the debates and interpellations on this subject in the reichstag. His majesty the emperor received the statements and explanations with great earnestness and then expressed his will as follows:

"'Headless of the exaggeration of public criticisms, which are regarded by him as incorrect, his majesty perceives that his principal imperial task is to insure the stability of the policies of the empire, under the guardianship of constitutional responsibilities, in conformity therewith his majesty the emperor approves the chancellor's utterances in the reichstag and assures Prince von Bulow of his continued confidence.'"

HOLLAND AND VENEZUELA.

In May, 1908, President Castro of Venezuela ordered that ships from the Dutch island of Curacao should be excluded from the harbors of Venezuela and that workmen from the island should not be allowed to enter the republic. In July the Netherlands minister, M. de Reuss, was told to leave Venezuela because he had written a letter criticising the commercial and political conditions in the South American state. July 29 the exequaturs of

the Dutch consul and vice-consuls were withdrawn by President Castro and all relations between the two countries ceased. Holland sent several warships to patrol Venezuelan waters and at the time this edition of The Daily News Almanac and Year-Book went to press was seizing Venezuelan ships and virtually blockading the Venezuelan ports. President Castro landed at Bordeaux, France, Dec. 10, having come to Europe for medical attendance.

RAILROAD GAUGES.

The standard railroad gauge is 4 feet 8½ inches (1.435 meters), and was first used in 1830 in the construction of the Liverpool and Manchester railway in England. At various times over twenty different gauges have been used from 7 feet down to 2 feet. At the present time the broadest gauge in use is 5 feet 6 inches, of which there are about 33,000 miles, about one-half in India, one-fourth in Spain and Portugal and one-fourth in Argentina,

Chile and Paraguay. By continental divisions the gauges are:

MILLIONS FOR LIFE INSURANCE.

There are seven men in the United States who carry \$1,000,000 and more insurance on their lives; two who carry \$1,500,000 and one who carries \$4,000,000. The latter is Rodman Wanamaker of Philadelphia, who is the most heavily insured man in the world. James B. Colgate, a stock broker, carries more insurance than any other resident of New York, his policies aggregating \$1,500,000. The mil-

lionaires and multimillionaires of Philadelphia, in proportion to their number, go in for life insurance more heavily than those of any other city. Statistics gathered by the insurance press show that 184 residents of Philadelphia are insured for \$33,000,000, while New York, with four times as many millionaires, has 491 residents insured for \$57,000,000. Chicago has 185 millionaires insured for \$24,000,000.

REVOLUTION IN HAITI.

Dissatisfaction with the rule of Gen. Nord Alexis, president of Haiti, led to a revolution which ended in his deposition and enforced flight from the island Dec. 2, 1908. Some rioting followed his departure from the capital, Port au Prince, in

which a dozen persons were killed, but order was restored by Gen. Antoine Simon, leader of the revolutionary troops, who entered the city a few days later and was proclaimed president.

COSTA RICA'S INTEROCEANIC RAILWAY

With the completion of the Pacific railway between San Jose and Punta Arenas, the remaining twelve miles of which have been contracted for and whose completion is scheduled for the latter

part of 1909, Costa Rica will have an interoceanic line of transit 170 miles in length. This road will greatly facilitate the delivery of native products at the seaboard.

COMMISSIONER OF IMMIGRATION.

Daniel J. Keefe was appointed commissioner of immigration by President Roosevelt Dec. 1, 1908, to succeed Frank P. Sargent, who died Sept. 4.

NEW PUBLIC PRINTER.

Simon B. Donnelly was appointed public printer by President Roosevelt in November, 1908, to succeed J. S. Leech, resigned. The change took effect Dec. 1.

LOSS OF THE CRUISER YANKEE.

The auxiliary cruiser Yankee of the United States navy ran on a reef at the entrance to Buzzard's bay early in the fall of 1908. Efforts were made to float the vessel and these were successful Dec. 5,

but while it was being towed to New Bedford, Mass., it sunk off Penikese island. The crew of 150 men escaped.

NEW JUDGE FOR SHANGHAI COURT.

Rufus Thayer of the District of Columbia was appointed judge of the United States court at

Shanghai, China, Dec. 7, 1908, to succeed Judge I. Wildley, resigned.

GOVERNMENT OF ILLINOIS.

Legislative power is vested in a general assembly, consisting of a senate and house of representatives, both elected by the people. The state is divided into fifty-one senatorial districts, each of which elects a senator and three representatives. The general assembly makes laws and appropriates money for the government of the state, elects United States senators to represent the state and in general stands in the same relation to the state as congress does to all the states as a whole. The powers and duties of the chief executive officers are as follows:

Governor—The governor is vested with the chief executive power of the state. He is the commander in chief of the military and naval forces and may call out the militia to maintain the peace. He is required to inform the general assembly, by message, of the condition of affairs of the state and to recommend needed legislation. He may, by proclamation, call a special session of the assembly or adjourn it in case of disagreement between the two houses. He has the power to appoint certain officers and during a recess of the senate may fill vacancies or remove certain officers and may call special elections to fill vacancies in certain offices. He may make requisitions upon the governors of other states for the return of fugitives from justice or offer rewards for the arrest of offenders against the laws of the state. He exercises a general supervision over the penitentiaries and may grant reprieves, commutations and pardons and may restore the rights of citizenship to ex-convicts. He may approve acts of the legislature and exercise the veto power.

Lieutenant-Governor—This officer is ex-officio president of the senate and has the power to cast the deciding vote in case of a tie. In case of the death, conviction on impeachment, failure to qualify, resignation, absence from the state or other disability on the part of the governor, the lieutenant-governor succeeds to the office to the close of the term.

Secretary of State—The secretary of state is charged with the safekeeping of the original laws and resolutions of the general assembly; with all books, bills and documents deposited with him by either house, and with all bonds, records and papers filed in his office. He keeps a record of the official acts of the governor, furnishes certified copies of the same to the assembly on request and certified copies of any of the records of his office on the payment of the statutory fees. He

countersigns and affixes the seal of the state to all proclamations and commissions issued by the governor; issues licenses for incorporations and certificates of organization to cities and villages and incorporated towns. He has charge of most of the buildings and grounds belonging to the state in Springfield, furnishes supplies for the general assembly and supervises the printing and distribution of all the public documents of the state. He calls the house of representatives to order at the beginning of each general assembly and presides over the same until the election of a speaker. He is the keeper of the great seal of the state and is the custodian and sealer of weights and measures.

Auditor—The auditor is required to keep all the accounts of the state; to audit the accounts of all officers or other persons authorized to receive moneys from the state treasury; to personally sign all warrants drawn on the treasury; to institute suits wherein the state is a plaintiff, and to make a biennial report of the business of his office to the governor. With the governor and treasurer he determines the state tax rate. He exercises a general supervision over state banks, building, loan and homestead associations.

State Treasurer—The state treasurer is custodian of the revenues and public moneys of the state. He must make monthly settlements with the auditor and a biennial report to the governor.

Superintendent of Public Instruction—The superintendent exercises a general supervision over all the public schools of the state. He is the general and legal adviser of the county superintendents and must report biennially to the governor the general condition of all the schools of the state, the amount raised by taxation for school purposes and the manner of its expenditure and the general condition of all the school funds. He may grant state certificates to teachers or cause them to be withheld and must visit charitable institutions which are educational in character.

Attorney-General—It is the duty of the attorney-general to represent the state in the Supreme court in all cases in which the state is interested; to act as counsel for all state officials; to be the legal adviser of the governor and other state officers in matters relating to their official duties, and, on request, to furnish them, as well as either branch of the general assembly, with written opinions upon constitutional or legal questions.

MINE DISASTER AT MARIANNA PA.

One hundred and thirty-eight miners were killed in the Rachel coal mine at Marianna, Pa., Nov. 23, 1908, by an explosion of gas. The Marianna mines were considered models of their kind and the shaft

in which the disaster occurred had just been carefully inspected without revealing any sign of danger.

ILLINOIS LEGISLATION IN 1907-1908.

Summary of important laws passed by the 45th general assembly at the adjourned session beginning Oct. 8, 1907, and ending May 23, 1908:

INTEREST ON STATE MONEYS.

The state treasurer shall deposit all moneys received by him on account of the state within five days in such banks in the cities of the state as are secure and which shall pay the highest rate of interest for such deposits. The money shall be placed to the account of the state treasurer, who shall be allowed \$5,000 or so much as may be necessary to pay the premium on the bonds given by him as treasurer. (Approved March 7, 1908.)

NAVIGABILITY OF RIVERS.

The Des Plaines and Illinois rivers from and below the water-power plant of the main channel of the sanitary district of Chicago at Lockport are declared to be navigable streams, and it is made the special duty of the governor and the attorney-general to prevent the erection of any structure in or across these rivers without authority from the general assembly. The same officials are empowered to take legal action to remove any existing obstructions in the rivers named. (Approved Dec. 6, 1907.)

INTERNAL IMPROVEMENT COMMISSION.

Amendment to sections 1 and 2 of the internal improvement commission act of 1905: There shall be appointed by the governor a commission to be known as the internal improvement commission of Illinois, to be composed of three persons of high business qualifications. The duties of this commission shall be to investigate the various problems associated with a projected deep waterway from Lake Michigan to the Gulf of Mexico and to report thereon to the next general assembly. The commission will receive no compensation for its services other than the necessary expenses. (Approved Dec. 24, 1907.)

STATE TREE AND STATE FLOWER.

The native oak tree is recognized and declared to be the native state tree of Illinois and the native violet the state flower. (Approved Feb. 21, 1908.)

VOTER'S LEAVE OF ABSENCE.

The act providing that a voter may absent himself from his employment for two hours in order to vote is amended so as to include special as well as general elections. (Approved June 1, 1908.)

COMPENSATION OF ASSEMBLYMEN.

Members of the general assembly hereafter elected shall receive for their services \$1,000 per annum, payable annually; 10 cents per mile for each mile necessarily traveled in going to and returning from the seat of government at each session, and \$50 for stationery, newspapers, postage and all other incidentals and perquisites. The mileage allowed to each member shall be entered upon the journals and published at the close of the session. (Approved Dec. 6, 1907.)

POWER TO REGULATE VEHICLES.

The act of 1872 relating to the incorporation of cities and villages is amended by adding to section 1, which defines the powers of city councils and village boards, the following item (No. 96): To direct, license and control all wagons and other vehicles conveying loads within the city, or any particular class of such wagons and other vehicles, and prescribe the width of tire of the same; the license fee when collected to be kept as a separate fund and used only for paying the cost and expense of street and alley improvement or repair. (Approved Dec. 31, 1907.)

SALE OF COCAINE AND EUCAINE.

The act regulating the practice of pharmacy is amended so as to make it unlawful for any druggist or other person to sell or give away any cocaine, alpha or beta eucaine, or any compounds thereof except upon the written prescription of a duly registered physician, which prescription shall contain the name and address of the person for whom prescribed and shall be kept on file. It shall be unlawful for any physician or other person to prescribe, sell or give away cocaine or eucaine to

any habitual user of these drugs. Any person violating the provisions of this law shall be fined for the first offense not more than \$1,000 or imprisoned in the county jail not more than one year, or both. For the second and each succeeding offense the punishment is a fine of not less than \$200 nor more than \$1,000 and imprisonment for not less than three months nor more than twelve months, or both, and if the offender has a license it shall be revoked. (Approved Jan. 17, 1908.)

COMPENSATION OF ALDERMEN.

The act providing for the incorporation of cities and villages is amended so as to make section 14 read: The aldermen and trustees may receive such compensation for their services as shall be fixed by the ordinances: Provided, however, that in cities of less than 350,000 inhabitants such compensation shall not exceed the sum of \$3 to each alderman for each meeting of the city council or board of trustees actually attended by him; in cities of more than 350,000 inhabitants [Chicago] such compensation shall not exceed the sum of \$3,500 per annum for each alderman, and in villages the compensation to trustees shall not exceed the sum of \$1.50 for each meeting of trustees actually attended by such trustee. No other salary or compensation shall be allowed any alderman or trustee: Provided, further, That this act shall apply to all cities, towns and villages in this state whether incorporated under a general or special law, and that in all such villages and incorporated towns the trustees thereof shall receive compensation for not more than one meeting in each week. (Approved June 2, 1908.)

PUBLIC TUBERCULOSIS SANITARIUMS.

City councils and boards of trustees of villages shall have the power to establish and maintain a public sanitarium for the treatment and care of persons in such cities or villages who are afflicted with tuberculosis and may levy a tax not to exceed 4 mills on the dollar, such tax to be known as the "tuberculosis sanitarium fund." The question of establishing a tuberculosis sanitarium shall be submitted to the voters of any city or village upon the petition of 100 voters. Each sanitarium is to be managed by a board of directors appointed by the mayor or president of the board of trustees, as the case may be, one of whom shall be a member of the local board of health and the other two citizens. Every sanitarium established under the act shall be free for the benefit of the inhabitants of such city or village who may be afflicted with tuberculosis, but persons residing outside the city or village may be admitted upon such terms as the board may prescribe. The board is authorized to receive donations for the maintenance of the sanitarium. All reputable physicians shall have equal privileges in treating patients in such sanitariums. (Approved March 7, 1908.)

LOCAL IMPROVEMENTS.

Amendment to section 6 of the act concerning local improvements in force July 1, 1897: In cities having a population of 100,000 or more there is created a board of local improvements consisting of five members; such members shall be appointed by the mayor and confirmed by the council, and no one of whom shall be the head of any department of the government of such city or hold any office or position therein. The board shall elect from its members a president, vice-president and an assistant secretary. The superintendent of special assessments shall be ex officio secretary of the board. The board shall hold daily sessions for the transaction of business in rooms accessible to the public. In cities of more than 50,000 and less than 100,000 population there shall be a board of public improvements consisting of five members, of which the commissioner of public works shall be president. The other members shall be the superintendents of streets, sewers and special assessments and the city engineer. In cities, villages and incorporated towns of less than 50,000 inhabitants the board of local improvements shall consist of the mayor, or

village president, who shall be president of such board, the public engineer and the superintendent of streets, where such officers are provided for; otherwise the city council or board of trustees may designate two or more of its members to constitute with the mayor or president such board of public improvements. (Approved May 25, 1908.)

ILLINOIS PRIMARY-ELECTION LAW.

(Approved Feb. 21 and effective July 1, 1908.)

Section 1 provides that the nomination of all candidates for all elective state, congressional, senatorial, county, city and village (including officers of the Municipal court of Chicago), town and judicial offices, members of the state board of equalization, clerks of the Appellate courts, trustees of sanitary districts and for the election of precinct, senatorial and state central committeemen, by all political parties shall be made in the manner provided in the act and not otherwise. The act, however, does not apply to candidates for electors of president and vice-president of the United States, trustees of the University of Illinois or to township and school elections.

Sec. 2. Political parties which at the general election next preceding a primary polled more than 2 per cent of the entire vote cast within the state, congressional or senatorial district, county, city, village, town or other political subdivision, are declared to be political parties within such divisions and shall nominate all candidates provided for in the act under the provisions thereof.

Sec. 3. In determining the total vote of a party the test shall be the total vote cast for its candidate receiving the greatest number of votes.

Sec. 4. This section specifies how certain words and phrases shall be construed.

Sec. 5. The primary shall be held at the regular polling places established for the purpose of a general election.

DATES OF PRIMARIES.

Sec. 6. A primary shall be held on the second Tuesday in April in every year (except in 1908) in which officers are to be voted for on the first Tuesday after the first Monday in November of such year, for the nomination of candidates for such offices as are to be voted for at such election.

A primary shall be held on the second Tuesday in April in any year in which judges of the Supreme court, Circuit court and Superior court of Cook county are to be elected on the first Monday in June, for the nomination of candidates for such offices respectively.

A primary shall be held on the last Tuesday in February in each year for the nomination of such officers as are to be voted for on the first Tuesday in April of such year.

A primary shall be held on the second Tuesday in March in each year for the nomination of such officers as are to be voted for on the third Tuesday in April of such year.

A primary for the nomination of all other officers, nominations for which are required to be made under the provisions of the act, shall be held three weeks preceding the date of the general election for such offices respectively.

The polls shall be open from 6 a. m. to 5 p. m.

Sec. 7. Any person entitled to vote at such primary shall be entitled to absent himself from his work or employment for two hours between the opening and closing of the polls without incurring the loss of salary or wages, provided application for leave of absence shall have been made on the day preceding the primary. The employer may specify the hours.

COMMITTEES.

Sec. 8. The following committees shall constitute the central or managing committees of each political party: A state central committee, a congressional committee for each congressional district, a senatorial committee for each senatorial district, a county central committee for each county, a city central committee for each city or village and a precinct committee for each precinct. A political party may, however, elect or appoint other committees in accordance with its practice.

Sec. 9. The state central committee shall be composed of one member from each congressional district and shall be elected as follows: At the August

primary in 1908 and at the April primary held every two years thereafter, each primary elector may vote for one candidate of his party for member of the state central committee for the congressional district in which he resides. The members of the state central committee shall, within thirty days after their election, meet in Springfield and organize by electing a chairman and such other officers as they may deem necessary. The outgoing chairman shall give ten days' notice to each member elected at the primary of the time and place of such meeting.

At the primary held in August, 1908, and at the April primary held every two years thereafter, each primary elector may write or attach in the space left on the primary ballot for that purpose the name of one qualified primary elector of his party in the precinct for member of his political party precinct committee. The one having the highest number of votes shall be such committeeman of such party for such precinct. In case of a tie the primary judges shall cast lots. The official returns of the judges shall show the name and address of the committeeman of each party.

The county central committee of each political party shall consist of the chairmen of the various precinct committees of such party in the county.

The senatorial committee of each party shall be elected as follows:

(a) In senatorial districts composed of three or more counties, the committee shall be composed of one member elected from each county of such senatorial district.

(b) In senatorial districts composed of two counties the senatorial committee shall be composed of three members, two of whom shall be elected from the county in which such party, at the general election for state and county officers then next preceding a primary, polled the larger number of votes in such senatorial district.

At the August primary in 1908 and at the April primary held every two years thereafter each primary elector residing in a county in which such political party at the general election for state and county officers then next preceding a primary polled the larger number of votes in such senatorial district, may vote for two candidates of his party, residing in his county, for members of the senatorial committee of his party, and at each primary in the other county of such district each primary elector may vote for one candidate for member of the senatorial committee.

(c) In senatorial districts composed of one county and in senatorial districts wholly within the territorial limits of one county or partly within the limits of one county and partly within the limits of another county, the senatorial committee shall be composed of three members elected from such senatorial district, and each primary elector may vote for three candidates of his party for members of the committee.

Within thirty days after its election the senatorial committee shall meet and organize by electing from among its own number a chairman, and either from among its own number or otherwise such other officers as said committee may deem necessary. The outgoing chairman shall give notice of such meeting.

The congressional committee of each political party shall be composed of the chairmen of the county central committees of the counties composing the congressional district, excepting that in congressional districts wholly within the limits of one county, or partly within the limits of one county and partly within the limits of another county, then the members of the precinct committee of the party residing within the limits of the congressional district shall compose the congressional committee.

The city central committee of each political party shall be composed of the precinct committeemen of such party residing in such city.

Each committee and its officers shall have the powers usually exercised by such committees not inconsistent with the provisions of the primary act. The several committees shall not have power to delegate any of their powers or functions to any other person, officer or committee.

CONVENTIONS.

Sec. 10 (a). On the second Wednesday next succeeding the April primary, the county central committee of each political party shall meet at the county seat of the proper county and organize by electing from its own number a chairman, and, either from its own number or otherwise, such other officers as may be necessary. Such meeting shall be known as the county convention. The county convention shall choose delegates to the senatorial, congressional and state convention: Provided, only precinct committeemen residing within the limits of a senatorial or congressional district shall participate in the selection of delegates to senatorial and congressional conventions respectively: And, provided further, That in the county convention each delegate shall have one vote and one additional vote for each fifty or major fraction thereof of his party as cast in his precinct at the last general election.

(b) All senatorial conventions shall be held on the third Wednesday next succeeding the April primary.

(c) All congressional conventions shall be held on the fourth Wednesday next succeeding the April primary. The congressional convention shall have power to choose and select delegates and alternate delegates to national nominating conventions and to recommend to the state convention of its party the nomination of candidate or candidates from such congressional district for elector or electors of president and vice-president of the United States.

(d) All state conventions shall be held on the fifth Wednesday next succeeding the April primary. The state convention of each political party shall have power to make nominations of candidates for the electors of president and vice-president of the United States, and for trustees of the University of Illinois, and to adopt any party platform and to choose delegates and alternate delegates to the national nominating conventions.

(e) Each convention may perform all other functions inherent to such political organization and not inconsistent with this act.

(f) At least thirty-three days before the April primary the state, congressional and senatorial committee, respectively, of each political party shall file in the office of the county clerk a call for the state, congressional and senatorial conventions, stating the time and place where they are to be held and the total number of delegates to each.

ASSEMBLY NOMINATIONS.

Sec. 11. At least thirty-three days prior to the date of the April primary the senatorial committee shall meet and, by resolution, the number of candidates to be nominated by their party at the primary for representatives in the general assembly. A copy of the resolution shall within five days thereafter be filed in the office of the secretary of state and in the office of the county clerk of each county in the senatorial district. In all primaries for the nomination of candidates for representatives in the general assembly, each elector may cast one vote for each of as many candidates as are to be nominated by his party and the candidates highest in votes shall be declared nominated.

ALDERMANIC NOMINATIONS.

Sec. 12. In cities having minority representation in the council, the city central committee shall, at least thirty days prior to the date of the primary, by resolution, fix the number of candidates for alderman in each of the wards to be nominated, a copy of which resolutions shall be filed with the city clerk within two days. In all primaries for the nomination of candidates for aldermen under minority representation, each elector may cast as many votes for one candidate as there are candidates to be nominated, or may distribute the same, or equal parts thereof, among the candidates for nomination as he shall see fit and the candidate highest in votes shall be declared nominated.

Sec. 13. At least twenty days before each primary the county clerk or the city, village, town or other clerk whose duty it is to give notice of general elections, shall prepare a notice of such primary, giving the time and place, the hours when the polls are open, the offices for which candidates will be nominated and the political parties entitled

to participate therein. Such notices shall be posted at least fifteen days prior to the primary.

ELECTION JUDGES AND CLERKS.

Sec. 14. The judges of general elections are constituted judges of primary elections.

Sec. 15. It is made the duty of judges of general elections to act as judges of primary elections until their successors are appointed.

Sec. 16. If one of the primary judges is absent the other judges shall appoint some qualified elector to act in his place; if two judges are absent, the judge present shall fill the vacancies in the same manner, and if all three of the primary judges are absent the primary electors present shall select three of their number to act.

Sec. 17. The primary judges in each precinct, except in cities having a board of election commissioners, shall select three qualified primary electors to act as primary clerks, not more than two of whom shall belong to the same political party. In cities having election commissioners the regularly appointed clerks of election shall act as primary clerks.

Sec. 18. The form of oath to be taken by the primary judges and clerks is prescribed and they are declared to be officers of the county court, liable to punishment as such for any misbehavior.

Sec. 19. In the absence of a justice of the peace or notary public the primary judges may administer the oath to each other and to the clerks.

Sec. 20. The primary judges and clerks, except as otherwise provided, shall perform the same duties, have the same powers and be subject to the same penalties as judges and clerks of general elections.

Sec. 21. Primary judges and clerks shall receive the same pay as judges and clerks under the state election laws.

CHALLENGERS.

Sec. 22. The precinct committeeman of each party may appoint in writing two party agents or representatives, with an alternate for each, who shall act as challengers for their respective parties. Such challengers shall be protected in the discharge of their duties by the primary judges and peace officers and shall be permitted to remain within the polling place in such position as will enable them to see each person as he offers to vote. They may remain until the vote has been canvassed and the returns have been signed. The challengers must be electors in the precinct. Their powers are the same as those of challengers at general elections.

POLLING PLACES AND BOOTHS.

Sec. 23. The officers who provide polling places for general elections shall provide in each of such polling places a sufficient number of booths for such primary election; which booths shall be provided with shelves, supplies and pencils and in which voters may prepare their ballots screened from all observation as to the manner in which they do so, and the guard rail shall be so placed that only such persons as are inside the rail can approach within six feet of the ballot box and the voting booths. The arrangement shall be such that the voting booths can only be reached by passing within the rail. The booths shall be within plain view of the election officers and both they and the ballot boxes shall be within plain view of those outside the guard rail. The number of voting booths shall be not less than one to every seventy-five voters or fraction thereof, who voted at the last preceding election in the precinct.

No person shall do any electioneering or soliciting of votes on primary day within any polling place or within 100 feet of any polling place.

Sec. 24. Primary ballot boxes shall be of the same kind and furnished by the same authorities as those furnished at general elections.

POLL BOOKS.

Sec. 25. All the necessary primary poll books, tally sheets, return blanks and other supplies shall be furnished by the same authorities as at general elections.

Sec. 26. The expenses necessarily incurred in the preparation for and conducting of primaries shall be paid by the same authorities and in the same manner as in general elections.

Sec. 27. This section prescribes the form of poll book to be used at primaries. It must show the name, address and party affiliation of each voter and be certified by the clerks and judges in the usual form.

Sec. 28. This prescribes the form of the tally sheets for each political party. The names of the candidates for nomination and for committeemen shall be placed on the tally sheets of each political party by the primary clerks in the order in which they appear on the primary ballot.

PETITIONS.

Sec. 29. Any candidate for United States senator may have his name printed upon the primary ballot of his political party by filing in the office of the secretary of state, not less than thirty days prior to the April primary in any year, a petition signed by not less than 3,000 nor more than 5,000 electors affiliated with and members of his party. The vote upon candidates for United States senators shall be for the sole purpose of ascertaining the sentiment of the voters.

Sec. 30. The name of no candidate for nomination for state central committeeman or senatorial committeeman shall be printed upon the primary ballot unless a petition for nomination shall have been filed on his behalf in substantially the following form:

We, the undersigned, members of and affiliated with the.....party and qualified electors of saidparty, in the.....of.....in the county of.....and state of Illinois, do hereby petition that the following named person or persons shall be a candidate or candidates for the office or offices hereinafter specified, to be voted for at the primary election held on the.....day of.....A. I,, do hereby certify that I am upward of the age of 21 years, that I reside at No.street, in the.....of.....county of.....and state of Illinois, and that the signatures on this sheet were signed in my presence and are genuine, and that to the best of my knowledge and belief the persons so signing were at the time of signing said petitions qualified voters and that their respective residences are correctly stated as above set forth.

Subscribed and sworn to before me this.....day of.....A. D. 190....

The petitions shall consist of sheets of uniform size and each sheet shall contain above the space for signatures an appropriate heading, giving the information as to name of candidate or candidates in whose behalf such petition is signed, the office, the political party represented, place of residence and such other information or wording as is required to make the same valid. The petitions shall be signed by the electors in their own persons only. At the bottom of each sheet shall be added a statement, signed by an adult resident of the political division for which the candidate is seeking a nomination, certifying that the signatures on that sheet were signed in his presence and are genuine, and that to the best of his belief the signers are qualified voters of the party for which a nomination is sought. Such statement is then to be sworn to. The sheets are to be fastened together in book form and not fastened end to end. Forging names of signers will be punished. Petitions of candidates for nomination for offices herein specified, to be filed with the same officer, may contain the names of two or more candidates of the same political party for the same or different offices. Such petitions for nomination shall be signed:

(a) If for a state office, by not less than 1,000 nor more than 2,000 primary electors of his party;

(b) If for a congressional or senatorial office, by at least one-half of 1 per cent of the qualified pri-

mary electors of his party in his congressional or senatorial district, as the case may be;

(c) If for a judicial office, by at least one-half of 1 per cent of the qualified primary electors of his party in the district or division for which the nomination is made;

(d) If for a county office, by at least one-half of 1 per cent of the qualified primary electors of his party cast at the last preceding general election in his county; provided, that if for the nomination for county commissioner of Cook county, then by at least one-half of 1 per cent of the qualified primary electors of his party in his county in the district or division in which such person is a candidate for nomination;

(e) If for a city or village office, to be filled by the electors of the entire city or village, by at least one-half of 1 per cent of the qualified primary electors of his party in his city or village; if for alderman, by at least one-half of 1 per cent of the voters of his party of his ward;

(f) If for state central committeeman, by at least 100 of the primary electors of his party of his congressional district;

(g) If for a senatorial committeeman, by at least ten of the primary electors of his party of the county where the senatorial district is coextensive with one county or is composed of more than one county; but in case the district is wholly within the limits of one county or partly within the limits of one county and partly within the limits of another county, then such petition shall be signed by at least ten of the primary electors of his party of his senatorial district;

(h) If for a candidate for trustee of a sanitary district, by at least one-half of 1 per cent of the primary electors of his party from such sanitary district;

(i) If for a candidate for clerk of the Appellate court, by at least one-half of 1 per cent of the primary electors of his party of the district;

(j) If for any other office, by at least ten primary electors of the party of the district or division for which nomination is made.

Sec. 31. Petitions for nomination shall be filed as follows: Where the nomination is to be made for an office to be filled by the electors of the entire state or any division or district greater than a county, including congressional, senatorial and judicial offices, the petition shall be filed with the secretary of state not more than sixty nor less than thirty days prior to the date of the primary.

Where the nomination is to be made for an office to be filled by the electors of an entire county, and for the commissioners of Cook county, except senatorial offices, the petitions shall be filed with the county clerk not more than sixty nor less than thirty days prior to the date of the primary.

Where the nomination is to be made for an office to be filled by the electors of an entire city or village, including aldermen, the petitions shall be filed with the city or village clerk not more than thirty nor less than fifteen days prior to the primary.

Where the nomination is to be made for an office to be filled by the electors of a town, such petition shall be filed with the town clerk not more than thirty nor less than fifteen days prior to the primary.

Petitions of candidates for state central committeemen shall be filed with the secretary of state not more than sixty nor less than thirty days prior to the primary.

Petitions of candidates for senatorial committeemen shall be filed with the county clerk not more than sixty nor less than thirty days prior to the primary.

Sec. 32. Not less than twenty days prior to the date of the primary the secretary of state shall certify to the clerk of each county the names of all candidates for United States senator, members of the state central committee and for all offices, as specified in the petitions on file in his office, which are to be voted for in each county, stating in such certificate the political affiliation of each candidate, giving the names in the order in which the petitions shall have been filed in his office.

PRIMARY BALLOTS.

Sec. 33. The county clerk of each county and in cities, villages and towns the clerk thereof, as the case may be, shall prepare and cause to be printed the primary ballot of each political party in his respective county, city, village or town.

Sec. 34. It is made the duty of the county clerk to have printed upon the primary ballot of each party for each precinct the name of each candidate whose petition for nomination has been filed in his office or certified to him by the secretary of state and in the order so certified. It shall be the duty of the city or village or town clerk, as the case may be, to cause to be printed upon the primary ballot of each party the name of each candidate for nomination whose petition has been filed in his office.

Sec. 35. The primary ballot of each political party shall be separately printed upon paper of uniform quality, but the primary ballot of no two political parties shall be of the same color or tint. The clerk whose duty it is to look after the printing of the primary ballot shall, at least fifteen days prior to the primary, post in a conspicuous place in his office an announcement of the color of the primary ballots of the respective parties, and in the case of the county clerk shall also publish such announcement for at least one week in at least three newspapers of general circulation in the county. In the case of the city clerk, such publication shall be made at least one week in three newspapers in the city, if there be three newspapers published in said city.

Sec. 36. The primary ballot of each political party for each precinct shall be arranged and printed substantially in the manner following:

1. At the top of the ballot shall be printed in large capital letters words designating the ballot—if a republican ballot, the designating words shall be "REPUBLICAN PRIMARY BALLOT"; if a democratic ballot, the designating words shall be "DEMOCRATIC PRIMARY BALLOT," and in like manner for each political party.

2. Beginning not less than one inch below the designating words, the name of each office to be filled shall be printed in capital letters and in the following order: United States senator, state offices, congressional offices, senatorial offices, judicial offices, clerks of the Appellate courts, members of the state central committee, members of the senatorial committee, trustees of sanitary districts, county offices, city and village offices, town offices or of such of said offices as candidates are to be nominated for at such primary, and precinct committeeman. Below the name of each office shall be printed in small letters the directions to the voters: "Vote for one," "Vote for two," "Vote for three," or a spelled number designating how many persons under that head are to be voted for. Below the name of each office shall be printed in capital letters the names of all candidates (arranged in the order in which their petitions for nominations were filed) for the nomination for said offices which are entitled to be placed upon the respective party primary ballot. The names shall all be printed in type of uniform size and the names shall be printed in a column. Immediately opposite and in front of the name of each candidate shall be printed a square and all squares upon the ballot shall be of uniform size. Spaces between the names of candidates under each office shall be uniform and sufficient spaces shall separate the names of candidates for one office from the names of candidates for another office, to avoid confusion. At the bottom of the primary ballot and under the heading "For precinct committeeman" a space sufficiently large shall be left in which the primary elector may write or attach the name of one primary elector of his party in the precinct as his choice for precinct committeeman. No square need be printed in front of the name of the person voted for for precinct committeeman.

Sec. 37. On the back or outside of the primary ballot of each precinct, so as to appear when folded, shall be printed the words "primary ballot," followed by the designation of the precinct, the date of the primary and a facsimile of the signature of the clerk who furnished the ballots.

Sec. 38. Five days prior to the primary specimen

ballots of each political party shall be delivered to the primary judges, who shall post not less than five of each, one to be posted at the polling place. These specimen ballots shall be printed on paper of a different texture and color from the official ballot.

Sec. 39. There shall be delivered to the primary judges of each precinct not less than twelve hours before the opening of the polls the official primary ballot of each party, and the number for each party in each precinct shall be 100 for each fifty votes cast in the precinct at the last preceding election.

Sec. 40. The official ballots shall be put in separate sealed packages with marks on the outside designating the precinct for which they are intended and the number inclosed for each party. A receipt therefor shall be given by the primary judge to whom the ballots are given.

Sec. 41. The officer charged with the printing of the ballots shall have on hand an extra supply for each party in each precinct in case the regular supply shall be lost, destroyed or exhausted, and shall furnish them upon the written request of the primary judges.

METHOD OF VOTING.

Sec. 42. Upon the opening of the polls one of the judges shall make proclamation of the same. At least thirty minutes before the closing of the polls proclamation shall be made in like manner that the polls will be closed in half an hour.

Sec. 43. Before voting begins the ballot box shall be emptied and it shall be opened and shown to those present to be empty, after which it shall be locked and the key delivered to one of the primary judges. The ballot box shall not be then removed from public view until after the close of the polls.

Sec. 44. No person shall vote at a primary unless he shall be a legally qualified voter under the general election laws of this state and unless he declares his party affiliation, as required by this act, and in all cases where no marks are required at regular elections only registered voters shall be entitled to vote at such primary. It is provided, however, that any legal voter who is not registered shall be entitled to vote upon filing with the primary judges an affidavit stating the time he moved into the precinct, the length of his legal residence in the precinct, county and state and that he has moved into the precinct since the last registration and that he is a legal voter of such precinct. This affidavit is to be supported by another from a registered voter and householder of the precinct that he knows such voter, that his statements are correct and that such person is a legal voter in the precinct. No person shall be allowed to vote at a primary who shall have signed the petition for nomination of a candidate of any party he does not affiliate with, when such candidate is to be voted for at the primary. No person shall be allowed to vote who shall have signed the nominating papers of an independent candidate for any office for which office candidates are to be voted at the primary, or if he shall have voted at a primary of another political party within a period of two years next preceding such primary: Provided, participation by an elector in a primary of a political party which is a political party within a city, village or town only and entitled hereunder to make nominations of candidates for city, village or town offices only, and for no other office or offices, shall not disqualify such elector from participating in other primaries of his party when at such city, village or town primary no candidate or candidates of the political party with which the primary elector declares himself affiliated had their name or names printed on the primary ballot of their party.

Sec. 45. Any person desiring to vote at a primary shall state his name, residence and party affiliation to the primary judges, one of whom shall announce the same in a distinct tone of voice sufficiently loud to be heard by all the persons in the polling place. If the person desiring to vote is not challenged, one of the primary judges shall give him one, and only one, primary ballot of the political party with which he declares himself to be affiliated, on the back of which the judge shall indorse his initials in such manner that they may be seen when the ballot is properly folded. If the person desiring to vote is challenged he shall not receive a ballot until he shall have established his

right to vote as provided in section 46. No person who refuses to state his party affiliation shall be allowed to vote at a primary.

Sec. 46. Whenever a person offering to vote at a primary is challenged he shall make an affidavit in the following form:

State of Illinois, } ss.:
County of.....

I,, do solemnly swear (or affirm) that I am a citizen of the United States, of the age of 21 or over, and am qualified to vote under and by virtue of the constitution and laws of the state of Illinois, and am a legally qualified voter of this precinct; that I now reside at.....in this precinct and am a member of and affiliated with the.....party; that I have not voted at a primary of any other political party within a period of two years prior to this date, and that I voted at the.....city, village or town primary with the.....political party at the.....election held in.....A. D.which said.....political party was entitled at said primary to make nominations of candidates for city, village or town offices only and for no other offices, and that the name or names of no candidate or candidates of the.....political party (the party with which the elector declares himself affiliated) were, at such city, village or town primary, printed on the primary ballot; that I have not signed the nominating papers of an independent candidate for any office for which office candidates for nominations are voted for at this primary.

Subscribed and sworn to before me this.....day of.....A. D., 190....

Judge of Primary.

In addition to such affidavit the person so challenged shall produce the affidavit of one householder of the precinct who shall be a qualified voter at such primary, and who shall be personally known or proved to the judges to be a householder in the precinct, which affidavit shall be in the following form:

State of Illinois, } ss.:
County of.....

I,, do solemnly swear (or affirm) that I am a householder of this precinct and entitled to vote at this primary; that I am acquainted with vote.....(name of party challenged), whose right to vote.....this primary has been challenged; that I know him to be an actual bona fide resident of this precinct and that he has resided herein thirty days and I verily believe he has resided in this county ninety days and in this state one year next preceding this primary; that I verily believe he is a member of and affiliated with the.....party.

Subscribed and sworn to before me this.....day of.....A. D., 190....

Judge of Primary.

Sec. 47. On receiving from the judges a ballot of his party the elector shall forthwith and without leaving the polling place retire alone to one of the voting booths and prepare such primary ballot by marking a cross in the square in front of and opposite the name of each candidate of his choice for each office to be filled. At the primary at which a precinct committeeman is to be elected the elector may write or attach at the bottom of his ballot the name of his choice for committeeman. Any primary elector may, instead of voting for any candidate for nomination or for committeeman whose name is printed on the ballot, write in the name of any other person affiliated with such party as a candidate for the nomination for any office or for committeeman by placing to the left of and opposite the name thus written a square and by placing in the square a cross.

Sec. 48. Before leaving the booth the elector shall fold his ballot in such manner as to conceal the marks thereon. Such voter shall then vote forthwith by handing the primary judge the ballot received by such voter. Thereupon the judge shall deposit the ballot in the ballot box. The primary clerk shall thereupon enter in the primary poll book the name of the primary elector, his residence and his party affiliation.

Sec. 49. Any primary elector who may declare upon oath that he cannot read the English lan-

guage or that by reason of any physical disability he is unable to mark his ballot shall upon request be assisted in marking his ballot in the same manner as provided by the general election laws of this state.

Sec. 50. After the opening of the polls at a primary no adjournment or recess shall be taken until the canvass of all the votes is completed and the returns carefully enveloped and sealed.

CANVASSING THE VOTES.

Sec. 51. The votes shall be canvassed in the place where the primary is held and the judges shall not allow the ballot box, ballots, primary poll book or tally sheets to be removed until the canvass is completed and the returns enveloped and sealed.

Sec. 52. If the elector marks more names on the ballot than there are persons to be nominated or if for any reason it is impossible to determine his choice his ballot shall not be counted. No ballot without the indorsement of the judges' initials thereon shall be counted. Any judge willfully omitting to indorse his initials on a primary ballot is punishable by a fine not exceeding \$100 for each offense. Primary ballots not counted shall be marked "defective." Ballots to which objections shall have been made shall be marked "objected to" and a memorandum signed by the judges stating how it was counted shall be written on the back of each ballot so marked. All ballots marked "defective" or "objected to" shall be inclosed in an envelope and securely sealed.

Sec. 53. Immediately upon closing the polls the primary judges shall proceed to canvass the vote in the following manner:

1. They shall separate and count the ballots of each political party.

2. Then shall then proceed to ascertain the number of names entered on the primary poll books under each party affiliation.

3. If the primary ballots of any party exceed the names of voters of such party entered in the poll books, the ballots shall be folded and replaced in the ballot box, the box closed, well shaken and again opened and one of the judges, who shall be blindfolded, shall draw out and destroy as many of the ballots as shall be equal to the excess.

4. The primary judges shall then proceed to count the ballots of each party separately, and as the judges shall open and read the ballots each clerk shall correctly mark upon the tally sheets the votes which each candidate has received in a separate column for that purpose, with the name of such candidate, the name of his party and the name of the office for which he is a candidate at the head of such column.

Sec. 54. As soon as the ballots of a party shall have been read and the votes counted, the primary clerks shall foot up the tally sheets so as to show the total number of votes cast for each candidate of the party and certify the same to be correct. Thereupon the judges shall set down in the primary poll books, under the name of the party, the name of each candidate voted for on the ballot, written at full length, the name of the office for which he is a candidate, the total number of votes which the candidate received and the judges shall certify the same to be correct. The entry in the poll books shall be made substantially as follows:

..... Party.
At the primary election held in this precinct on the.....day of.....A. D. 19...., the respective candidates whose names were written or printed on the primary ballot of said.....party, received respectively the following votes:
Name of Candidate. Title of office. Number of votes.
John Jones.....Governor.....100
Sam Smith.....Governor.....70
Frank Martin.....Attorney-general.....150
Tom Johnson.....State senator.....74

And so for each candidate.

We hereby certify the above and foregoing to be true and correct. Dated this.....day of.....A. D. 190....

Judges of Primary.

Sec. 55. After the votes of a party have been counted and set down and the tally sheets footed

and the entry made in the poll books, all the ballots of the party except those marked "defective" or "objected to" shall be strung upon a strong thread or twine separately for each party in the order in which the ballots have been read and shall thereupon be carefully sealed in an envelope, which envelope shall be indorsed as follows:

Primary ballots of the.....party of the.....precinct of the county of.....and state of Illinois.

Below each indorsement each primary judge shall write his name.

Sec. 56. The primary poll books and the tally sheets together with the envelopes containing the ballots shall be carefully enveloped and sealed up together, properly indorsed and put into the hands of the primary judges, who shall, within forty-eight hours thereafter, deliver the same to the clerk from whom the ballots were obtained, which clerk shall safely keep the same for three months.

Sec. 57. As soon as the complete returns are delivered to the proper clerk, the returns shall be canvassed as follows:

1. In the case of the nomination of candidates for city offices, by the mayor, city attorney and city clerk.

2. In the case of the nomination of candidates for village offices, by the president of the board of trustees, one member of the board of trustees and the village clerk.

3. The officers who are charged by the law with the duty of canvassing returns of general elections made to the county clerk shall also open and canvass the returns of a primary made to such county clerk. Upon the completion of the canvass by the county canvassing board the board shall make a tabulated statement of the returns for each party separately, stating in appropriate columns and under proper headings the total number of votes cast in the county for each candidate for nomination by the party, including candidates for United States senator and state central committeemen. Within two days after the completion of the canvass by the board the county clerk shall mail to the secretary of state a certified copy of the tabulated statement of returns: Provided, however, That the number of votes cast for the nomination for offices the certificates of election for which offices under the general election laws are issued by the county clerk shall not be included in such certified copy.

4. In the case of the nomination of candidates for state offices, including United States senator and state central committeemen, the returns shall be canvassed by the governor, secretary of state and state treasurer.

5. Where, in cities and villages which have a board of election commissioners, the returns of a primary are made to that board, the returns shall be canvassed by the board and, excepting in the case of the nomination of candidates for any city or town office in such city, tabulated statements of the returns of such primary shall be made to the county clerk.

§ CERTIFICATES OF NOMINATION.

Sec. 58. Each of the canvassing boards shall upon completion of the canvassing of the returns make proclamation of the result of the primary for each political party and shall make a certificate and, unless a notice of contest shall have been filed, ten days after the completion of the canvass shall file such certificate with the secretary of state or with the clerk whose duty it is to print the official ballot for the election for which the nomination is made, as the case may be, stating therein the name of each candidate of each party so nominated, as shown by the returns, together with the name of the office for which he is nominated, including in the case of the state primary canvassing board candidates for state central committeemen. In case a notice of contest shall be filed the canvassing board shall withhold its certificate until a certified copy of the decree of the court hearing such contest shall have been filed with the board. The board shall within one day after receiving such decree proceed to finish the canvass as corrected by the decree and make proclamation accordingly. Upon the filing of the certificate with the secretary of state or the proper clerk, the secretary or the

clerk, as the case may be, shall within one day thereafter issue a certificate of nomination to each of the candidates so proclaimed nominated, except United States senator. The secretary of state shall also issue a certificate of election to each of the persons shown to have been elected state central committeemen. The county canvassing board or the board of election commissioners, as the case may be, shall issue a certificate of election to the requisite number of persons of each political party shown to be elected members of the senatorial committee.

Sec. 59. The person receiving the highest number of votes at a primary as a candidate of a party for the nomination for an office shall be the candidate of that party for such office and his name as such candidate shall be placed on the official ballot at the election next ensuing, provided that where there are two or more persons to be nominated for the same office or board, the requisite number of persons receiving the highest number of votes shall be nominated.

In the case of candidates for nomination for members of the board of assessors, where five are to be elected, four of whom are to be elected from any one city, and the city has the requisite number, then the candidate for nomination living outside the city having the highest number of votes of his party shall be nominated and his name placed on the official ballot.

The person receiving the highest number of votes of his party for state central committeeman of his congressional district shall be declared elected.

The requisite number of persons receiving the highest number of votes as candidates of their party in any county or senatorial district, as the case may be, for senatorial committeemen shall be declared elected.

When two or more persons receive an equal and the highest number of votes for the nomination for the same office or for committeeman of the same party, or where more than one person of the same political party is to be nominated a candidate for office or committeeman if it appears that more than the number of persons to be so nominated have the highest and an equal number of votes, the board by which the returns are canvassed shall decide by lot which of such persons shall be nominated or elected, as the case may be. Notice of the tie shall be given and of the time and place where such nomination or election shall be so determined.

Sec. 60. When the nomination is made for an office to be filled by the electors of an entire county and where it is the duty of the county clerk to prepare the official ballot for the election, it shall be the duty of the county clerk, under this act, to place upon the official ballot to be voted at the election the names of all candidates nominated for office as shown by the certificate of the canvassing board on file in his office.

When the nomination is made for an office to be filled by the electors of an entire city or village, including alderman, and where it is the duty of the city or village clerk to prepare the official ballot for the election, it shall be the duty of the city or village clerk, under this act, to place upon the official ballot to be voted at the election the names of all candidates nominated for office as shown by the certificate of the canvassing board on file in his office.

When the nomination is made for an office to be filled by the electors of an entire town and where it is the duty of the town clerk to prepare the official ballot for the election, it shall be the duty of the town clerk, under this act, to place upon the official ballot to be voted at the election the names of all candidates nominated for office as shown by the certificate of the canvassing board on file in his office.

Not less than fifteen days before an election to fill any office the secretary of state shall certify to the county clerk of each county within which any of the electors may, by law, vote for such candidates for office the name and description of each person nominated for such office as shown by the certificate of the canvassing board on file in his office.

Sec. 61. Whenever a special election shall be necessary the provisions of this act shall be applicable to such election. The officer or board whose duty it is under the general election laws of this state to call an election shall fix a date for the pri-

mary for the nomination of candidates to be voted for at such special election. At least fifteen days' notice of such primary shall be given.

In case a candidate who has been nominated shall die before election or decline the nomination, or should the nomination for any other reason become vacant, the managing committee of the respective parties for the district in which such vacancy occurs shall nominate a candidate or candidates to fill such vacancy on the ticket.

Sec. 62. In cities having a board of election commissioners the duties herein imposed upon the county, city or village clerk, as the case may be, shall be discharged by the commissioners in the same manner, as near as may be, that the similar duties are discharged by the county, city or village clerk, as the case may be, and the ballots for the nomination of all candidates to be voted for in such city shall be printed by the board of election commissioners and the returns of the primary shall be made to such commissioners.

CONTESTS.

Sec. 63. Any candidate whose name appears upon the primary ballot of any political party in any precinct may contest the election of the candidates nominated by his party upon the face of the returns, if he so desires, by filing a petition setting forth the grounds of contest with the clerk of the County court or of the clerk of the Circuit court, according to the office involved, which petition shall be verified by affidavit and be filed within five days after the completion of the canvass. Notice must

be given to the proper canvassing board of the pendency of the contest. Authority and jurisdiction are vested in the County court or the Circuit court or in the judges thereof to hear and determine contests. The judgment of the court shall be final.

Sec. 64. Nothing in the act shall be construed to prevent the nomination of independent candidates by petition as is now or may hereafter be provided by law.

SALOONS TO BE CLOSED.

Sec. 65. No spirituous, malt, vinous or intoxicating liquor shall be sold or given away, nor shall any saloon, barroom or place where such liquor is sold or given away be open during the holding of any primary. Whoever violates the provisions of this section shall be fined not less than \$25 nor more than \$100. It shall be the duty of the sheriff, constable, coroner and other officers of the county and the magistrates and mayors of cities to see that the provisions of this section are enforced.

Secs. 66 to 79, inclusive, provide for the punishment of persons guilty of violating the primary election law by doing anything prohibited therein or failing to do what is required. In general the penalties are the same as those provided for in the general election law.

Sec. 80. This section repeals all acts or parts of acts in conflict with the present primary law.

Sec. 81 provides that the invalidity of any portion of this act shall not affect the validity of any other portion which can be given effect without such invalid part.

GARNISHMENT LAW OF ILLINOIS.

Section 14 of the act of 1872 as amended in 1897 and 1901 declares: "The wages for services of a wage earner who is the head of a family and residing with the same, to the amount of fifteen (15) dollars per week, shall be exempt from garnishment. All above the sum of fifteen (15)

dollars per week shall be liable to garnishment."

Employers are obliged to pay wages amounting to \$15 or less, notwithstanding the service of a writ of garnishment, providing the person to whom wages are due makes affidavit that he is the head of a family and is living with the same.

JURISDICTION.

1. All actions on contracts when the amount claimed by the plaintiff exceeds \$1,000; all actions for the recovery of personal property the value of which exceeds \$1,000; all actions for the recovery of damages for the conversion of personal property when the amount sought to be recovered exceeds \$1,000.

2. All cases which may be transferred to it by the Circuit and Superior courts of Cook county.

3. All criminal cases in which the punishment is by fine or imprisonment otherwise than in the penitentiary and all criminal cases which may be prosecuted otherwise than by indictment by a grand jury.

4. All civil actions, quasi-criminal actions excepted, for the recovery of money only, where the amount does not exceed \$1,000; all actions for the recovery of personal property the value of which does not exceed \$1,000; all actions of forcible detainer and all actions and proceedings of which justices of the peace were formerly given jurisdiction where the amount sought to be recovered does not exceed \$1,000.

5. Quasi-criminal actions.

6. Proceedings for the prevention of crime; proceedings for the arrest, examination and commitment of persons charged with criminal offenses and proceedings pertaining to search warrants.

COSTS IN CIVIL CASES.

1. In cases of the first class the plaintiff shall pay \$8 to the clerk when suit is begun and \$8 more if he asks for a jury trial.

2. In cases of the second class the plaintiff at the time of the bringing of the transcript of the record to the Municipal court shall pay \$1 and \$8 more if he files a demand for a jury.

3. In cases of the first class the defendant at the time of the filing of his appearance shall pay to the clerk \$5 and if he asks for a jury \$6 additional.

4. In any case of the fourth class the plaintiff at the time of beginning suit shall pay to the clerk of the court \$2 when the amount claimed does not exceed \$200; \$5 if the amount exceeds \$500 and does not exceed \$1,000, and \$2 in a case of forcible entry and detainer. If a jury is asked \$6 additional must be paid.

5. In any case of the fourth class the defendant at the time of his appearance shall pay to the clerk \$2 if the amount claimed by the plaintiff exceeds \$200 and the further sum of \$6 if he (the defendant) asks for a jury.

6. The costs to be paid for the services of the bailiffs, sheriffs and coroners shall be \$1.75 for each person upon whom service is made and in cases where any levy is to be made \$1.75 additional; other costs shall be the same as in the Circuit court.

7. In any case of the fourth class the party delivering to the bailiff any paper to be served shall pay him \$1 for each defendant named upon whom service is to be made, and in cases of writs of attachment, replevin or execution the further sum of \$1 when any levy is made, and shall also pay for the actual expense of seizing and caring for property.

8. In any case the party securing any certified copy of the record shall pay to the clerk the same fees as are paid to the clerk of the Circuit court for similar services.

9. In any case of the fourth class the bailiff, as commissions on moneys realized by execution, shall collect from the defendant in the execution 5 per cent upon the money realized if it does not exceed \$100, but if it exceeds \$100 the amount shall be 5 per cent on the first \$100 and 3 per cent upon the excess over \$100.

10. All other costs not specified shall be the same as in the Circuit court.

COSTS IN CRIMINAL CASES.

Costs in criminal and quasi-criminal cases and proceedings in the Municipal court instituted in the name of the people or of any state or county officers shall be:

1. Clerk's fees for all services rendered by him, \$6.
 2. Bailiff's fees the same as those which may now or hereafter be fixed by law for the sheriff in counties of the third class for similar services.

CHICAGO STREET GRADES.

The grade of the streets in the central portion of Chicago has been raised three times. In 1855 it was raised from 2½ to 3 feet above the then existing surface, and it was again raised by about

the same amount in 1857 and 1872, making the present level fourteen feet above "city datum," which is the low-water mark of the lake in 1847.

LINCOLN PARK.

Commissioners—Leo Austrian, F. H. Gansberger, Bryan Lathrop, Amos Pettibone, Francis T. Simmons, Frederick L. Wilk, Charles H. Wilson. **Officers**—Francis T. Simmons, president; Frederick L. Wilk, auditor; Theodore Freeman, treasurer; Myron H. West, superintendent and secretary; C. A. Churan, attorney.

Office—In Academy of Sciences, Lincoln park; Clark and Center streets.

The Lincoln park district consists of the towns of North Chicago and Lake View, with Fullerton avenue as the dividing line, and is bounded on the north by Devon avenue, on the south by the Chicago river and extends from Lake Michigan on the east to the north branch of the river on the west.

The area of the Lincoln park district is 15,875 square miles and the population about 431,000. The total area of the parks and boulevards is 679.94 acres, with 9.33 miles of boulevard.

Lincoln Park—Lincoln park, previously known as Lake park, began its history under its present name by resolution passed by the common council of Chicago under date of June 5, 1865. The park proper is 317 acres in extent and extends from Diversey boulevard to Oak street along the lake front. To this 235 acres of land is being added by filling in Lake Michigan north of Diversey boulevard. This extension will contain a seventy-acre yacht harbor and will have bathing facilities.

The park contains a large floral department, also an extensive zoological garden containing about 1,200 animals. Boating and bathing facilities are furnished and the park lagoon—one mile in length—gives an admirable course for racing. The Academy of Sciences is located in the park at the foot of Center street. This building was erected in 1893 and contains about 250,000 specimens. It is noted for its collection of local natural history specimens and for its complete collection of mollusks.

The park has provided facilities for outdoor games during both the winter and summer seasons.

Seward Park—At Elm, Sedgwick and Orleans streets; area 5 acres.

Lake Shore Playground—Area 1.160 acres; is situated between Pearson street and Chicago avenue, extending from the Chicago avenue pumping works to the lake. This park is fitted up as a playground, containing a shelter house, refectory, with outdoor gymnasium apparatus.

Elm Street Playground—Contains 1.73 acres; is fitted with outdoor and indoor gymnasium and has a fieldhouse which contains reading rooms, assembly hall, clubrooms, restaurant, a branch of the public library and facilities for gymnastic work and aquatic sports.

CHICAGO TELEPHONE ORDINANCE AND RATES.

Passed by city council Nov. 6, 1907.

The Chicago Telephone company is authorized to operate its telephone wires in the city until Jan. 2, 1929. Its books and records are to be open for examination by the city comptroller and its accounts may be audited for the purpose of verifying the statement of gross receipts, of which 3 per cent is to be paid into the city treasury as compensation for the franchise. The city is to have free telephone service. The city reserves to itself the right to change the rates or tolls from time to time and to modify the rules and regulations. It is provided, however, that such changes shall not be made to continue for a period of more than or of less than five years. The company shall not make any rate agreements or division of territory with any other company. The right to purchase the plant of the company on Jan. 1, 1919, or Jan. 1, 1924, is reserved to the city, the price to be fixed by appraisers. The maximum rates fixed by the ordinance are as follows:

BUSINESS TELEPHONES.

FLAT RATE.

For a single-party line with the right to the unlimited use of the same, \$125 a year.

MEASURED RATE.

For a single-party line, including 1,200 outgoing conversations or messages, \$60 a year.

For the next 2,400 outgoing messages, or any part thereof, during the year, 3 cents each.

For all outgoing messages in excess of 3,600 during the year, 2 cents each.

Every subscriber who will contract to pay for 7,200 outgoing messages a year at the above rates shall be furnished with a second single-party line without extra charge, and every subscriber shall be furnished with an additional single-party line without extra charge for each 6,000 outgoing messages he will contract to pay for, in addition to the 7,200 during the year at the rate of 2 cents each.

A single-party line or lines, including the right to transmit outgoing messages without limit and without any charge per message, shall be furnished at \$1 per day each. Subscribers to single-party lines at this rate shall be deemed subscribers to measured service. Every subscriber to measured service shall also be furnished with as many single-party lines as he may demand at the rate of \$6 per quarter for each line.

RESIDENCE TELEPHONES.

For a single-party line, including all outgoing messages, \$18 per quarter.

For a two-party line, \$14 per quarter.

NICKEL PREPAID SERVICE.

Nickel prepayment service with outgoing messages at 5 cents each, as follows:

One-party line, at a guaranty of 20 cents a day, including four messages.

Two-party line, at a guaranty of 12½ cents a day, including two and a half messages.

Two-party line, for residences only, at a guaranty of 10 cents a day, including two messages.

Four-party line, for residences only, at a guaranty of 5 cents per day, including one message.

PUBLIC TELEPHONE SERVICE.

The charge for a single conversation or message from any telephone in Chicago to any other telephone in the city shall not exceed 5 cents.

NEIGHBORHOOD EXCHANGE SERVICE.

The company may maintain local or neighborhood exchanges and shall establish them wherever the city council may direct. Any subscriber in any such exchange may communicate with any telephone within the city limits outside the neighborhood district, for which a charge of 5 cents may be made for each period of 5 minutes or fraction thereof. The rates per month for local exchange service, including all outgoing messages under yearly contracts, shall not exceed the following:

Line.	Business.	Residence.
One-party	\$4.00	\$3.00
Two-party	3.00	2.00
Four-party	2.00	1.50

TOLL SERVICE.

The company shall not charge more than 10 cents for each conversation or message up to three minutes (and not more than 5 cents for each additional minute), transmitted from any telephone in Chicago to any other telephone outside the city but within fifteen miles of the present city hall, or within one mile of the city limits and within the state of Illinois.

METERS.

The company shall install in connection with each measured-service line of its subscribers a meter which shall prove effective in actual use for accurately recording the number of outgoing messages over the line.

CHICAGO'S FREE PUBLIC BATHS.

[From report of Secretary E. R. Pritchard.]

Names and locations of baths:
Carter H. Harrison—192 Mather street.
Martin B. Madden—3825 Wentworth avenue.
William Mavor—4647 Gross avenue.
Robert A. Waller—80 South Peoria street.
Kosciuszko—703 Holt avenue.
John Wentworth—2838 South Halsted street.
William B. Ogden—3646 Emerald avenue.
Theodore T. Gurney—247 West Chicago avenue.
Joseph Medill—759 Grand avenue.
DeWitt C. Creger—193 Gault court.
Thomas Gahan—4226 Wallace street.

Free baths are given at the 14th and 22d street pumping stations and at several lake beaches, but special buildings have not been provided at these

points. The Carter H. Harrison bath, which was opened in January, 1894, is said to have been the first free public bath in the United States, if not in the world. Similar baths in Vienna charged a fee of 2 cents and those in New York 5 cents. The Madden bath was opened in April, 1897; the Mavor bath in May, 1900; the Waller bath in February, 1901; the Kosciuszko bath in April, 1904; the Wentworth in December, 1905; the Gurney in May, 1906; the Medill in September, 1906; the Ogden in July, 1906, and the Thomas Gahan Nov. 7, 1907. The average cost of each plant has been between \$15,000 and \$20,000, and the average annual cost of maintenance \$4,000. Total free baths furnished in 1907, 709,826.

ATTEMPT TO KILL CHIEF OF POLICE SHIPPY.

Chief of Police George M. Shippy of Chicago was called to the door of his residence, at 31 Lincoln place Monday morning, March 2, 1908, by a young man who pretended to have a note to deliver. The visitor was admitted to the hall of the house, but his actions aroused the chief's suspicions. Seizing him by the wrists Mr. Shippy called to his wife to search the man's pockets for weapons. She found a revolver but was unable to take it from him. In the struggle that followed the man drew a knife and stabbed the chief in the arm and, getting his revolver out, shot Mr. Shippy's young son, Henry, who had come down stairs to his father's rescue, through the breast. Mr. Shippy and his driver, James Foley, who had also come upon the scene, then shot and instantly killed the man be-

fore he could do any more harm. The body of the would-be assassin was taken to an undertaker's establishment, where it was later identified as that of Lazarus Averbuch, a Russian Jew and anarchist. The man was 20 years old and had lived at 218 Washburne avenue with his sister, who a few months previously had sent money to enable him to come to Chicago from Galicia. He came originally from Kishinev in Russia, but after the massacre there had gone to Austria. In Chicago he identified himself with the anarchists and much anarchist literature was found in his room by the police. Chief Shippy, his son and the driver all recovered from their wounds. At the inquest, held March 24, the jury declared that the killing of Averbuch was justified and exonerated Mr. Shippy from all blame.

CHICAGO ACADEMY OF FINE ARTS.

No. 6 Madison street.

President—Carl N. Wernitz.
 Vice-president—M. M. Newman.
 Secretary—E. M. Ashcraft, Jr.
 The Chicago Academy of Fine Arts was founded in October, 1902. Its object is to popularize art and art education through the more practical channels of illustration, cartooning, commercial illustration, design, normal art training, crafts, miniature, etc. It was the first school to teach commercial art, crafts work, miniature and cartooning in exclusive classes; also the first school to give its students training in business ethics and selling systems. The average attendance is

700 pupils per year, with twenty instructors, the faculty including some of the best-known local artists. There are day and evening classes and the rates of tuition are as follows:

Afternoons only—\$16 for 3 months.
 Mornings only—\$26 for 3 months.
 All-day classes—\$100 per season of 9 months.
 Evening classes—\$22 for 9 months, 3 nights weekly.
 Sunday class—\$20 for 9 months.
 Saturday classes for school teachers, children and others—\$5 for 3 months.
 Classes all limited.

FIELD MUSEUM OF NATURAL HISTORY.

President—Harlow N. Higinbotham.
Vice-Presidents—Martin A. Ryerson, Stanley Field
Secretary and Director—Frederick J. V. Skiff.
Treasurer—Byron L. Smith.
Auditor—D. C. Davies.

The Field museum of natural history, established in 1894 at the close of the World's Columbian exposition of 1893, occupies the temporary building erected for fine arts in Jackson park, the exposition site. The founding of a scientific institution of this character in Chicago was made possible by the gift of \$1,000,000 by Marshall Field, who on his death (Jan. 16, 1906) bequeathed the institution a further \$8,000,000, \$4,000,000 for the erection of a permanent building and \$4,000,000 for endowment. In addition \$500,000 has been donated by other individuals and there is an annual income from other sources than endowment of about \$25,000. The citizens of Chicago have confirmed legislative provision for the levy of a tax for the maintenance of the museum when a new building shall have been erected, which it is estimated will eventually produce approximately \$100,000 per annum.

The nucleus of the exhibition material was gathered by gift and purchase at the World's Columbian exposition. Most of this material, however, has since been rearranged, readapted or discarded. Several departments created at the organization have been abandoned, until, after the lapse of eleven years and the expenditure of over \$2,000,000, the museum is now divided into four departments—namely, anthropology, botany, geology and zoology. Many expeditions for the purpose of obtain-

ing study, exhibition and exchange material and data have been dispatched to all parts of North America and to different countries. The results of these expeditions, investigations and researches have been published by the museum from time to time, which publications have been distributed to kindred societies and institutions both at home and abroad. Two courses of free lectures are given annually. The museum has a working library of about 50,000 titles, an extensive exchange system, fully equipped departmental laboratories, a herbarium of 260,000 sheets, study collections in mammals and birds reaching many thousand specimens, a large two-story taxidermy section, a well-equipped printing shop, illustration studios and assaying and lapidary rooms. In North American ethnology, in the world's mineralogy, in economic botany the museum is particularly prominent, while its series of mounted mammals furnish examples of advanced museum methods. The present main building covers nine acres and is open to the public on all days except Christmas and Thanksgiving. An admission fee of 25 cents is charged except on Saturdays and Sundays, when admission is free to all. Students, scholars and teachers are admitted free at all times.

The museum is incorporated under state law and the administrative control rests in a board of trustees with president, secretary, etc. The executive of the museum is the director, under whom there are four head curators with divisional assistant curators, preparators, etc. The entire museum records, the accessions system, the historical files, publications and supplies are in charge of a recorder.

The original town of Chicago in 1835 extended from Chicago avenue on the north to 12th street on the south and from Halsted street on the west to Lake Michigan on the east. When the city was incorporated in 1837 the city limits were as follows: From Lake Michigan west along Center street to North Clark street, south to North ave-

nue, west to Wood street, south to 22d street and east to the lake. Extensions made from time to time since 1837 are shown on the accompanying map. The largest addition to the area of the city was made in 1889, when Lake View, Jefferson, Hyde Park and Lake were annexed.

ENGINEERS AND CONTRACTORS FOR PUBLIC WORKS

TACOMA BUILDING, Cor. LaSalle and Madison-sts., CHICAGO

Telephones—Office, Main 1966; Yards, Canal 1178

Dredging, Docking, Pile Driving

Foundations, Piers, Bridges, Etc.

THE FITZ SIMONS & CONNELL COMPANY has been engaged in the contracting business since 1872. The firm, originally known as Fitz Simons & Connell, was formed by the late Gen. Charles Fitz Simons and Charles J. Connell in 1872, and later incorporated as THE FITZ SIMONS & CONNELL COMPANY, is the oldest Dredging, Docking and Public Works concern doing business on the Great Lakes.

For thirty-six years this company has been engaged in the building of canals, tunnels, bridge substructures, breakwaters, docks and pile foundations. Among the notable works

constructed by this company may be mentioned the following: The Fullerton-av. Conduit; the Lake View, Four Mile and Carter H. Harrison Cribbs; a section of the North-West Tunnel; the North-East Lake Tunnel; substructures for seventeen swing and seven lift bridges now spanning the Chicago river and many other public works, equally important.

THE FITZ SIMONS & CONNELL COMPANY maintain a large plant fully equipped for both marine and shore work in their line. At present they are engaged in dredging the Chicago river and have carried to a successful issue many Government dredging contracts for improving various harbors of the Great Lakes.

HORNBLOWER & WEEKS

are bankers and brokers with offices on the third floor of the Central Trust Building, 152 Monroe-st., Chicago. They are members of all the principal stock exchanges and sell high-grade bonds and investment securities, negotiate collateral loans and buy and sell bonds and stocks as brokers either for cash or on margin. They were established in Boston, Aug. 6, 1888, and succeeded to the business of Hornblower & Page. Their business has grown so that the firm now has nine offices and is composed of seven members, viz: Henry Hornblower, Vice-President of the Boston Stock Exchange; Honorable John W. Weeks, First Vice-President of the First National Bank of Boston, member of Congress, where he is on the Banking and Currency Committee, a member of the National Monetary Commission; James J. Phelan, Vice-President of the Federal Trust Co., Director of the Peoples' National Bank, Trustee of the Union Institution for Savings and Director and Chairman of the Finance Committee of the Massachusetts Bonding

and Insurance Co.; Edward L. Geary and Andrew S. Woods, all of Boston; James H. Wainwright, member of the New York Stock Exchange, and John W. Prentiss, both of New York City.

The Home office at 60 Congress-st., Boston, is a six-story building with as complete banking and brokerage offices as there are in this country. The head New York office is in the Equitable Building, 120 Broadway, and there is a branch at 28 W. 43d Street, New York. Other offices are in Providence, Hartford, New Haven, Newport, Detroit and Chicago, and all offices are connected by direct exclusive private wires. The firm also has wire connections across the continent.

The Chicago office was opened Feb. 1, 1907, by Edward Clifford, its present manager. He was a practicing corporation lawyer and is prominent among younger Chicagoans, being a member of the Union League and University Clubs and on the Ways and Means Committee of the Chicago Association of Commerce.

One of the Oldest Manufacturing Industries in the City
is that of the

J. W. REEDY ELEVATOR MFG. CO.

LOCATED AT 83-91 ILLINOIS STREET.

In 1864 this Company started in business manufacturing the crude types of elevators then in use. An elevator in those days was an almost unheard-of luxury in a building, but after the great Chicago fire in 1871 a new era in building began. Instead of the old style two and three story buildings, owners began to appreciate the value of ground space and started in to make Chicago the "home of sky-scrapers", by building five, six and seven story structures. These buildings were made possible only through the use of elevators. It was only natural that the Reedy Company, being well established, should receive the bulk of this business, and many of the machines in-

stalled in those days are still in operation. But there was a vast difference in the standard of elevators then and to-day. The old, slow and expensively operated hydraulic machines have given place to the High Speed Electric Elevators, with Full Magnet Control, as safe as years of experience, modern skill and ingenuity can make them.

The Reedy Elevator Co. can point with pride to some 5,000 machines they have installed in Chicago alone since they started in business. The machines they are manufacturing to-day are the acme of perfection and they respectfully solicit the patronage which they merit on their record of 44 years of honest dealing with their customers.

The Old Established Banking House of Greenebaum Sons

Corner Clark and Randolph Streets

has every department of a general banking business. Since its organization in 1877 its history has been one of continuous growth and stability.

The members of this banking firm are: Henry Everett Greenebaum, Moses Ernst Greenebaum and James Eugene Greenebaum—all Chicago born—and sons of our esteemed old citizen and banker, Mr. Elias Greenebaum. The latter was connected with this banking house until 1898, when he retired from active business after a successful career of half a century in the investment and real estate mortgage loan business in Chicago, after having been largely instrumental in the building and development of our city since 1848 in attracting capital to the growing city; its great future and safety of loan investments properly placed he foresaw long before the present generation of business men reached commercial life. His advice regarding investments is still sought by many of our citizens and always cheerfully given. His sons had the advantages of study and experience in banking institutions here, in the East and in Europe.

Largely increased by the enterprise and continued careful conservatism of the sons the investment and mortgage business is one of the chief activities of the Greenebaum Sons bank, controlling ample capital to underwrite large issues of safe investment securities. At the same time it maintains a department for loans on improved real estate and building loans on moderate sized residences, flats and business buildings.

The banking departments are similar to

those in any well-equipped institution in a metropolitan city and transact a general banking business.

The foreign department is one of the oldest in the west. Well known in all parts of the world Greenebaum Sons are agents and correspondents of banks and bankers in all five continents. Their letters of credit and drafts are honored in all parts of the civilized world and often serve as a valuable introduction to their holders in cities and towns abroad. They also maintain a foreign collection and legal department in charge of expert foreign attorneys acquainted with the laws and legal requirements of other nations regarding estates, inheritances, claims, collections, foreign securities, etc.

Among those in charge of divisions are as follows:

WALTER J. GREENEBaum, Manager Investment Department.

M. E. FALKER, Auditor Building Loans.

C. H. HEFTER, Insurance.

GEO. J. HARRISON, Conveyancing.

L. O. THIEME, Foreign Exchange.

RUD MUELLER, Chief Clerk.

A. HANSEN, Auditor.

Some of the larger loans for the erection of new buildings in course of construction negotiated recently by Greenebaum Sons are the Steele-Wedeles Co.'s Fire Proof Wholesale Grocery and Warehouse; Stein, Hirsh & Co.'s Warehouses and Factory; Pruyne Building and the Drexel Square Buildings.

THE FIRM OF

ROBERT F. SHANKLIN & COMPANY

is the successor to the firm of Goudy, Shanklin & Company, which was established in 1892. The firm consisted of the late William J. Goudy and Robert F. Shanklin. On the death of Mr. Goudy, Mr. Garfield King entered the partnership, and the firm then became known as Shanklin & King. Mr. King retired from the business after four years, and it has since been and is now conducted by Mr. Shanklin under the firm name of Robert F. Shanklin & Company. This firm does a large general real estate business, dealing in the selling of property on commission; the negotiating of first mortgage loans on Chicago properties, and also manages many of the larger apartment buildings in the various parts of the city. They have negotiated loans of considerably over a million dollars in small mortgages, usually from \$10,000 down. In their sales department they recently negotiated the sale of the vacant property at the corner of the Lake Shore Drive and North Avenue, opposite Lincoln Park, at a price per foot said to be the largest yet paid in Chicago for residence property. In their renting department they are equipped to give the utmost satisfaction to both owners and tenants in handling and managing residence properties, especially the better grade of apartment buildings. They refer by permission to several of Chicago's best known citizens and largest banks as to their responsibility. They have been located for many years at 107 Dearborn-st., Corner of Washington-st.

FEATURE OF CHICAGO

"the Great Central Market," is the immense manufacturing plant of the **E. L. Mansure Company**, now occupying the spacious eight-story building at the corner of Michigan Avenue and Lake Street, where they have all the best and latest facilities in their numerous departments to manufacture everything conceivable in the line of upholstery and drapery trimming that the trade could wish for. . . The unlimited number of power looms and machines for spinning, knotting, twisting, cutting and embroidering makes it the best equipped mill in America. . . E. L. Mansure is the founder of this firm, which was established in Chicago in 1890 and succeeded in growing rapidly. . . The careful attention manifested for the interest of their customers and the ability to please the trade generally has won for E. L. Mansure Company a world-wide reputation as manufacturers of "standard goods."

Every well-posted buyer knows E. L. Mansure Company's famous trademark, which is a familiar figure from coast to coast, and he also knows it represents a line of goods that cannot be surpassed in this country.

AMERICAN FENCE

A sound, substantial, enduring fence, built on the elastic, hinged-joint principle—the most scientific, practical and perfect fence principle known—it yields to great and sudden pressure but returns again to the original shape. Thoroughly galvanized and protected against weather.

ELLWOOD FENCE

We guarantee Ellwood Fence because we know how it is made. All the resources of the greatest steel and wire mills in the world are brought to bear in getting as near perfection as it is possible.

ROYAL FENCE

It is made of heavy, hard, stiff steel wire, the strongest and best possible to produce for fencing purposes. It is fully guaranteed as to workmanship and efficiency and is all and more than represented. Royal Fence is not an experiment but a thoroughly tested article already bearing an enviable reputation and holding a strong position as the choice of thousands of the best fence users in the world.

STAINED GLASS MEMORIAL WINDOWS

designed and executed by our artists, display the highest standard of ecclesiastical art. One such window will flood a somber old church with lovely mellow color effects and prove of permanent decorative value. Entirely practicable even with congregations of limited means if movement is started by leading members. We submit color designs and estimates and refer you to examples of our work on request. Write for free printed matter. Highest Award—Grand Prize Louisiana Purchase Exposition and Medals and Honors at Columbian, Californian, Midwinter, Trans-Mississippi Expositions.

GREAT LAKES DREDGE & DOCK CO.

CHICAGO
 DULUTH CLEVELAND BUFFALO
 DETROIT SAULT STE. MARIE

Starting in 1891, in a very modest way, as Lydon & Drews, with but a very small plant and operating only locally, the growth of Great Lakes Dredge & Dock Company has been both rapid and steady, until at the present time its operations cover the entire Great Lakes and tributary waters, necessitating the establishment of branch offices successively at Cleveland, Detroit, Soo, Duluth and Buffalo; the employing of 1,500 to 1,600 men in the operation of its 35 dredges, 20 pile drivers, 35 tugs, 7 submarine rock drills, and some 200 dump scows, deck scows, carpenter scows, etc., used in connection therewith, and machine shops and yards at Chicago, South Chicago, Cleveland, Duluth and Sault Ste. Marie.

The main offices are in Chicago, 1315-1322 Chamber of Commerce, and the executive officers of the company all Chicagoans:

W. A. LYDON, Pres., M. Am. S. C. E.
 T. C. LUTZ, 1st Vice-Pres. & Gen. Man.
 WALTER CAHILL, 2d Vice-Pres., M. Am. S. C. E.

H. C. WILD, Treasurer.

WM. J. MCCARTHY, Secretary.

GEORGE H. JACKSON, Asst. Sec. & Asst. Treas.

D. MCCARTHY, Gen'l Superintendent.

The operations of the company embrace work of any submarine character, bridge foundations, tunnels, caissons, breakwaters, submarine rock excava-

tion, dredging, lighthouses, pile driving, dock building, etc., etc., and amongst the more important contracts on which it is at present engaged are:

Complete Harbor and Turning Basin, Gary, Ind., for U. S. Steel Corporation.

The Evolution of a Banking House

Peabody, Houghteling & Company is the oldest private banking house in Chicago. It was established in 1865, just after war times, and has been doing business continuously and successfully ever since.

The late Francis B. Peabody, the founder of the house, was a prominent citizen of Chicago for over fifty years. He was a lawyer by profession, having studied for the bar in Concord, N. H., in the office of Franklin Pierce, afterward President of the United States. Up to the time of his coming to Chicago in 1857, Mr. Peabody had taken a very active place in law and political circles in his native state, being a member of the Governor's staff, and at one time representing his district on the Democratic State Committee. Among the well-known men who were associated with him at this time was William E. Chandler—afterward Secretary of the Navy and Senator from New Hampshire—who during this period served as a law clerk in his office. In 1857 Mr. Peabody came to Chicago and began the practice of law here. His first partnership was the distinguished one of Scates, McAllister, Jewett & Peabody, and he was later associated with Judge Arrington. It was at this time that Mr. Peabody was closely associated with Abraham Lincoln in several law cases, and Mr. Lincoln frequently made his headquarters in the office of the above-mentioned law firm when in Chicago.

After his arrival in Chicago, Mr. Peabody was frequently commissioned by friends and clients in the East to invest money for them in mortgages on Chicago Real Estate. This demand grew to such an extent that in 1865 the firm of Gallup & Peabody was organized to carry on this line of business. The activity and strong financial backing of this firm contributed largely to the building up of Chicago in the time of great growth after the war, and to the rebuilding of the city after the great fire of 1871.

Upon Mr. Gallup's retirement in 1875, the business was continued by Mr. Peabody under the firm name of Francis B. Peabody & Company.

In 1885 Mr. James L. Houghteling, his son-in-law, entered the firm, and the present name was adopted; Mr. Houghteling had already proved his executive and initiative ability as officer in several corporations, and had demonstrated his public spirit by long service as president and treasurer of the Chicago Y.M.C.A. and as an officer of the Municipal Voters' League and other civic and philanthropic societies.

In 1897 Mr. William R. Stirling, for many years Vice-President of the Illinois Steel Company, joined the firm, and in 1902 Mr. Augustus S. Peabody, a son of the senior partner, was admitted. Mr. F. B. Peabody, after fifty years, still continued active in the business up to within a few weeks of his death, which occurred on January 2, 1908, in the eighty-first year of his age. The presence in the office for some years past of two grandsons of Mr. Peabody, sons of Mr. Houghteling, has presented the unusual spectacle of three generations active in the same business.

Although the business of the house has been so developed that it includes the handling of almost every kind of Investment Security, the large Mortgage Loan Department, established by Mr. Peabody, still continues an important factor in the success of the business. This was Mr. Peabody's special field from the first. His

wide legal experience was very valuable in the reading of Abstracts and rendering of Opinions of Title, and during the forty-three years of his work in this line no Title passed upon by him was ever attacked successfully. As the business developed, the natural corollary to the Mortgage Loan Department was a Real Estate and Renting Department to manage properties which clients placed in the hands of the firm.

The development of the Bond end of the Company's business dates to the time when modern steel construction buildings began to make their appearance in Chicago. Owners wished to make building loans to complete the construction work on their properties, and such loans were too large to be sold to individual clients. They were therefore divided into first mortgage bonds. Many local manufacturing concerns found it advantageous to bond their real estate and plants in this city, and came to Peabody, Houghteling & Company for mortgage loans. At the same time, the modern apartment building became popular, and mortgages and bond issues on this class of security soon proved to be a most desirable form of investment.

The firm was now achieving a wide reputation. In 1897 the advent of Mr. William R. Stirling, who brought with him from the Vice-Presidency of the Illinois Steel Company a long experience in the management of iron and steel plants, was a large factor in opening a new field for the financing of manufacturing concerns and industries of all kinds in every part of the country. The policy of the firm of either owning outright or controlling all the securities which it offers for sale has been maintained, with few exceptions, even in the wide-spread development of the past dozen years.

One particular development of the business of this firm, which deserves special mention on account of its remarkable success and the general favor with which it has been received both by investors and by other bond houses, is the use of the Serial Plan. Under this plan a substantial part of the principal of a mortgage or bond issue is paid off each year without any portion of the security being released. These payments are usually of such amount as may readily be met out of the net income from the property. The plan is useful because it protects the investor against any possible depreciation or change in condition of his security, and also makes it possible for the investor to make a short or long-term investment, as he may choose, in the same security; it moreover helps the borrower to reduce his obligation steadily, and does not burden him with a large mortgage debt falling due at a given time. The general adoption of this plan marked an epoch in the history of Peabody, Houghteling & Company, and the members of the firm have been heard to speak of it as a leading factor in obtaining the remarkable results which they have had in assuring the safety of their investors' interests.

The management of the firm is at present in the hands of the above-named three partners; Messrs. Alexander Smith and James L. Houghteling, Jr., long associated with the business, enter the firm January 1, 1909; associated with them and in charge of the various departments are Messrs. Burton Thoms, Levering Moore, F. K. Root, and F. W. Burlingham, the three former having been connected with the business for many years past.

LAKES-TO-GULF DEEP WATERWAY PROJECT.

ACTION TAKEN BY ILLINOIS.

Practical steps looking to the construction of a fourteen-foot waterway from Chicago to the Gulf of Mexico were taken in 1907 both by Illinois and by the representatives of many other states. The estimated cost of the whole undertaking is \$100,000,000, of which \$31,000,000 would be for that part of the canal from the terminus of the Chicago drainage district canal to St. Louis. In March President Roosevelt appointed an inland-waterways commission to consider the whole subject of inland waterways, especially in relation to the conservation of all the great permanent natural resources of the country.

At a special session of the Illinois legislature the following joint resolution was passed Oct. 16, 1907:

"Resolved, by the senate, the house of representatives concurring herein, That there shall be submitted to the electors of this state at the next election of members of the general assembly a proposition to amend the constitution of this state, to wit:

"Resolved, That the separate section of the constitution of this state relating to the canal be amended to read as follows:

"The Illinois and Michigan canal, or other canal or waterway owned by the state, shall never be sold or leased until the specific proposition for the sale or lease thereof shall first have been submitted to a vote of the people of the state at a general election and have been approved by a majority of all the votes polled at such election. The general assembly shall never loan the credit of the state or make appropriations from the treasury thereof in aid of railroads or canals;

"Provided, That any surplus earnings of any canal, waterway or water power may be appropriated or pledged for its enlargement, maintenance or extension; and,

"Provided, further, That the general assembly may, by suitable legislation, provide for the construction of a deep waterway or canal from the present water-power plant of the sanitary district of Chicago, at or near Lockport, in the township of Lockport, in the county of Will, to a point in the Illinois river at or near Utica, which may be practical for a general plan and scheme of deep waterway along a route which may be deemed most advantageous for such plan of deep waterway, and for the erection, equipment and maintenance of power plants, locks, bridges, dams and appliances suitable for the development and utilization of the water power thereof, and authorize the issue, from time to time, of bonds of this state in a total amount not to exceed \$20,000,000, which shall draw interest, payable semiannually, at a rate not to exceed 4 per cent per annum, the proceeds whereof may be applied as the general assembly may provide, in the construction of said waterway and in the erection, equipment and maintenance of said power plants, locks, bridges, dams and appliances.

"All power developed from said waterway may be leased in part or in whole as the general assembly may by law provide, but in the event of any

lease being so executed, the rental specified therein for water power shall be subject to a revaluation each ten years of the term created, and the income therefrom shall be paid into the treasury of the state."

At the general election held Nov. 3, 1908, the electors of the state gave their approval to the proposed amendment of the constitution, a majority of all the votes cast being in its favor. (See election returns.) It is expected that action on the matter will be taken by the legislature in 1909.

THE WESTERN STONE CO.

WAS INCORPORATED OCT. 18, 1889,

and is the successor of the Singer & Talcott Stone Co., the Excelsior Stone Co., the Chicago & Lemont Stone Co., the Corneau Stone Co., the Bodenschatz & Earnshaw Stone Co., the Lockport Stone Co., the Crescent Stone Co., and the Joliet Stone Co., their quarries being at Lockport, Ill., Lemont, Ill., and Joliet, Ill., and their yards at the corner of 23d and Archer-av., Hawthorne-av. and Rees-st., and Belmont-av. bridge, besides a number of other yards located in different sections of the city along the various lines of railway.

The officers of the company are:

MARTIN B. MADDEN, President.

GEORGE H. MONROE, Vice-President.

THEODORE A. HEINEMAN, Secretary.

DANIEL FOLEY, Treasurer.

The offices of the company are located at 320 Chamber of Commerce Building.

The company deals in rough, sawed, machine dressed and crushed stone.

Material has been furnished by the company to some of the handsomest buildings in the city.

The company has belt line connections with all railways entering Chicago. It has a large number of canal boats, tugs and steam barges in constant use.

The company occupies a place of prominence in its particular line of business. Its constant efforts to please its patrons have made the company esteemed and respected. Its large corps of assistants are trained in the art of meeting people and transacting business on a large scale.

The company exercises great care in its efforts to serve its patrons and maintains pleasant relations with the general public.

Mr. Madden, the president of the company, has been engaged in the business all his life. He was identified with the Joliet Stone Co. prior to the organization of the Western Stone Co. He has devoted his entire time to its management.

The company has become one of the most important branches of the building industry.

Mr. Monroe, Mr. Heineman and Mr. Foley are all gentlemen of long experience in the stone business. Their activities have done much to make the company what it is to-day.

In the point of ability to serve the trade the facilities of the company are unsurpassed.

RULES OF THE ROAD FOR AUTOMOBILES.

The rules and regulations established by the south and other park commissioners in Chicago conform to the provisions of the state law regarding the use of automobiles. In addition they establish certain "rules of the road" with which drivers of automobiles should be familiar. These rules, as published by the south park commissioners, are as follows:

No mechanically propelled vehicle shall be operated at a rate of speed exceeding twelve miles an hour in any park or on any boulevard.

No person upon turning the corner of any boulevard or crossing the intersection of any street or boulevard shall operate any vehicle at a greater rate of speed than four miles an hour.

Animals and vehicles shall keep to the right and as near the right-hand curb as possible.

Animals and vehicles meeting shall pass each other to the right.

Animals and vehicles overtaking others shall, in passing, keep to the left.

The driver or person having charge of any animal or vehicle, before turning the corner of any boulevard or driveway or turning out or starting from or stopping at the curb line of any boulevard or driveway, shall first see that there is sufficient space free so that such turn, stop or start may be safely made and shall then give a plainly visible or audible signal.

An animal or vehicle turning to the right into any boulevard or driveway shall turn the corner as near to the curb as practicable.

An animal or vehicle turning to the left into another boulevard or driveway shall pass to the

right of and beyond the center of the intersection of said boulevard or driveway before turning.

An animal or vehicle crossing from one side of the street to another shall do so by turning to the left so as to head in the same direction as the travel on that side of the boulevard or driveway.

No animal or vehicle shall stop with its left side to the curb.

In no case shall a vehicle remain backed up to the curb except when actually loading or unloading.

Unless in an emergency or to allow a pedestrian or vehicle to cross its path no animal or vehicle shall stop in any boulevard or driveway except close to the curb lines.

No animal or vehicle shall stop or stand within the intersection of any boulevard, driveway or street nor within ten feet of the corner thereof.

In slowing up or stopping a signal shall always be given to those behind by raising the whip or hand vertically.

Vehicles moving slowly shall keep as close as possible to the curb line on the right so as to allow faster moving vehicles free passage on the left.

Every person riding or driving any animal or vehicle shall immediately come to a full stop when any police officer by raising his hand gives the signal for him to do so.

No person under the age of 16 years shall ride or drive any animal or propel any vehicle on any boulevard or in any park unless provided with a permit therefor.

Any person violating any clause or provision of this section shall be fined not less than \$5 for each offense.

UNION STOCK YARDS, CHICAGO.

"The Live-Stock Market of the World."

The Chicago Union Stock Yards is the greatest market of any kind in the world. It consists of about 500 acres covered with pens, viaducts, buildings, railroad tracks, etc., the whole paved with brick and divided into blocks and streets like a city, and providing all necessary facilities for doing an enormous business in receiving, unloading, yarding, feeding, watering, buying, selling, weighing, delivering and shipping live animals. It is supplied by twenty-two states of the union. There were received and sold on this market last year 15,248,500 animals for the stupendous sum of \$319,202,239.

Chicago's great meat-packing district, familiarly known as "Packingtown," is located back of and adjoining the Union Stock Yards proper, and consists of a nearly equal territory covered with immense brick buildings and a maze of railway tracks, all devoted to the slaughter, refrigeration, manufacture and distribution in refrigerator cars of meat products and by-products for consumption throughout the world. There are also a number of independent packing plants located outside of "Packingtown."

These two districts, one embracing the live-stock market and the other the meat-packing interests, while in a large measure interdependent, are controlled and operated under entirely separate management and ownerships. More than 45,000 men are employed in and about the Stock Yards and packing houses, and the daily volume of transactions reaches into the millions.

All stock reaching Chicago is sold, generally on day of arrival. None is forwarded in first hands. All sales are for cash on day of sale, followed by immediate delivery of the property sold. A considerable portion of the daily receipts is sold for shipment alive, mainly to eastern slaughtering points and to the seaboard for export. Eastern buyers constantly compete with the large packers for the daily offerings, thus furnishing at all times abundant healthy competition among buyers. Over 100 established commission firms and corporations are engaged in selling live stock on the market regularly for nonresident shippers and producers.

Since 1900 there has been marketed and sold in Chicago a yearly average of over 16,000,000 animals, exceeding \$300,000,000 in value, or about one-half the total combined receipts of the six principal live-stock markets of the United States, which means that a daily average of over 1,000 carloads of live stock, of an average value exceeding \$1,000 per carload, or an average of more than \$1,000,000 worth of animals, are disposed of every business day of the year on the Chicago live-stock market.

FIGURES SHOW ENORMOUS BUSINESS.

The Chicago Union Stock Yards was the first great centralized live-stock market, and since its establishment in 1866 has handled the following number of animals:

CHICAGO'S BRIDGE SYSTEM.

The first ferry across the river was established in 1829, where the Lake street bridge now is. In 1833 a floating bridge of logs was in operation just north of the present Randolph street bridge. A foot bridge over the north branch was built in 1832 at Kinzie street. The first drawbridge over the main branch of the river was placed at Dearborn street in 1834. In 1854 a pivot bridge was built at Clark street. These and other bridges of that time were built by the persons most directly benefited by them. It was not until 1857 that a bridge was built entirely at the city's expense. This was the structure over the south branch at Madison street. It cost \$30,000. Until 1872 the swing bridges were turned by hand, but in the year named steam power

was installed on the Dearborn street structure and later on most of the other bridges in the downtown section were similarly equipped. In 1895 the Rush, Lake and Van Buren street bridges were operated by electric motors. The last named structure, which was opened for traffic in that year, was the first of the Scherzer rolling type. The Halsted street lift bridge, the first and only one of its kind, was opened in 1894 and was operated by steam. It cost the city \$242,880.

There are at the present time in Chicago ninety-one bridges over the river, of which sixty-nine are maintained by the city and twenty-two by railroad companies. There are thirty-four viaducts of various kinds in the city.

TAXATION IN CHICAGO.

List of the eleven boards making annual levies within the city limits.

1. **STATE TAX**—For state purposes. The governor, auditor and treasurer constitute the board which ascertains the rate per cent required to produce the amount of taxes levied by the general assembly.
"The state school tax" is levied in the same manner. The rate for all state purposes varies from 50 to 60 cents on the \$100 assessed valuation.
2. **COUNTY TAX**—The county board levies the taxes for all county purposes, the aggregate of which is limited to 75 cents on the \$100.
3. **CITY TAX**—The city council, acting with the mayor, levies the taxes for all city purposes, which is limited to \$2 on the \$100.
4. **SCHOOL TAX**—The city council and the mayor make a separate levy for this purpose, which is limited to \$2.50 on the \$100.
5. **LIBRARY TAX**—The city council and the mayor make a separate levy for this purpose. The levy is 10 cents on the \$100.
6. **SANITARY DISTRICT**—The tax is levied by the board of trustees.
7. **SOUTH PARK SYSTEM**—The south park commissioners levy for park purposes in the towns of South Chicago, Hyde Park and Lake.
8. **WEST PARK SYSTEM**—The West Chicago park commissioners levy for park purposes in the town of West Chicago.
9. **LINCOLN PARK**—The Lincoln park commissioners are not "corporate authorities," the Lincoln park act not having been adopted by popular vote. The levy for Lincoln park is made by the county treasurer, acting as ex officio supervisor.
10. **RIDGE PARK**—A small park district in Rogers Park, organized under the law providing for local park districts by popular vote. The board of five commissioners levies for the district.
11. **THE NORTH SHORE PARK DISTRICT**—Organized the same as Ridge Park.

By an act of the legislature approved May 11, 1901, and by the vote of the people at the spring election in 1902 the townships lying within the limits of Chicago were consolidated and the powers of the town boards transferred to the city council. This reduced the taxing boards in Chicago from eighteen to eleven as above.

The Elgin National Watch Co.

LADY ELGIN.

Founded in 1864. Delivered their first watch, grade B. W. Raymond, serial number 101, in April, 1867. From this beginning the Company has grown to enormous proportions, producing during the intervening years (1867 to 1908) more than 14,000,000 watches, 400 grades and 10 different sizes, ranging from the largest, the Veritas Model, 1 8-10 inches in diameter, to the smallest, the Lady Elgin, the size of a nickel five-cent piece. The output includes styles to suit every taste and vocation; whether the purchaser is an engineer with the responsibilities of many lives or a person of leisure, all can be accommodated. The output of the Elgin National Watch Company is 3,300 watches daily.

The factory buildings occupy 13 acres and the floor space is approximately 1,800,000 square feet. The buildings are steel and fire-proof construction of the most modern design both in conveniences and sanitation. The Company conducts an up-to-date Hotel

The Art Institute of Chicago was incorporated May 24, 1879, for the "founding and maintenance of schools of art and design, the formation and exhibition of collections of objects of art and the cultivation and extension of the arts of design by any appropriate means." The museum building upon the lake front, first occupied in 1893, has never been closed for a day. It is open to the public every week day from 9 to 5, Sundays from 1 to 5. Admission is free to members and their families at all times, and free to all upon Wednesdays, Saturdays, Sundays and legal holidays. Upon other days the entrance fee is 25 cents.

All friends of art are invited to become members. Annual members pay a fee of \$10 a year. Life members pay \$100 and are thenceforth exempt from dues. Governing members pay \$100 upon election and \$25 a year thereafter. Upon the payment of \$400 governing members become governing life members and are thenceforth exempt from dues. All receipts from life memberships are invested and the income only expended. All members are entitled, with their families and visiting friends, to admission to all exhibitions, receptions, public lectures and entertainments given by the Art Institute and to the use of the Ryerson reference library upon art.

MUSEUM.

The Art museum now ranks among the first three or four in the country. It contains excellent examples of the old masters and of the modern painters. There is also a large and comprehensive collection of sculptures; this contains reproductions of the work of the greatest sculptors, ancient and modern. There is an extensive collection of architectural casts. The museum possesses an admirable collection of original drawings for illustration. There is also a collection of etchings and steel engravings. There is a constant succession of passing exhibitions of the best modern art, twenty or more in a year. All students enjoy the full use of the collections and the library. The advantage of having

these great collections located in the same building cannot be overestimated. The number of visitors to the art galleries during the year ending June 1, 1908, was 550,289.

SCHOOL.

The school of instruction in the practice and theory of art includes departments of painting, sculpture, decorative design, illustration, architecture and normal instruction. There are day and evening classes for beginners and for advanced pupils. Special classes on Saturdays. The instructors number about 70 and the pupils will average about 3,000 a year. The principle upon which the school is founded is to maintain in the highest efficiency the severe practice of academic drawing and painting, from life, from the antique and from objects, and around this practice, as a living stem, to group the various departments of art education.

The school is conducted upon the most modern methods. The classes are organized upon the French "atelier and concours" system. Constant communication and interchange are kept up with European art centers, and a ready hearing is given to all new methods and theories. Students may enter at any time. The tuition rates are as follows:

Day School—Full time for full term of twelve weeks, \$30; four weeks, \$12; four days a week, full term, \$27; four weeks, \$11; three days a week, full term, \$24; four weeks, \$9; two days a week, full term, \$18; four weeks, \$7; one day a week, full term, \$12; four weeks, \$5.

THE SCULLY STEEL & IRON CO.

A STORY OF REMARKABLE GROWTH

The Scully business is the outgrowth of an idea.

The idea was the outgrowth of years of experience as a salesman of iron and steel products.

The man with the idea was Alex. B. Scully, trained in the school of hard knocks with the old iron house of W. S. Mallory & Co., and later with Joseph T. Ryerson & Son.

The idea was the practical application of the trained salesman's attitude toward his customer.

It was that a merchant was in business to *serve* his customers rather than merely to induce them to exchange their money for his goods. With this idea and a small cash capital, Mr. Scully started into business on his own account in May, 1891, at 64 S. Canal-st. Small as his cash capital was, he had other assets quite as valuable as money—he had friends, hosts of friends, among the buyers of iron and steel products, as well as among the mills that made these products.

These friends stood by him and his little business grew to a big business, so big that two years later he removed to a big new warehouse at 136 to 156 Fulton-st.

It kept on growing, so that in 1900, only nine years after it was established,

it occupied the whole block bounded by Fulton, Halsted and Wayman-sts. and the C. & N.-W. right of way, ranking even then second among the iron and steel jobbing interests in the U. S.

Then came the master stroke in 1908, when the Scully Steel & Iron Co. acquired the vast interests, stocks and good will of the old-established house of Kelley, Maus & Co., making the Scully firm the largest iron and steel supply house in the world.

To the solid block of warehouses on Fulton-st. are now being added a vast plant 250x1,400 feet along the Chicago river, between 24th and 28th-sts., a quarter of a mile of land lying between Ashland-av. and the river docks, on which are being erected steel buildings equipped with every appliance for handling and fabricating heavy iron and steel. The line of iron and steel merchandise carried by the Scully firm is now complete, including structural steel, plates, black and galvanized sheets, boiler tubes, rivets and bolts, bars, hoops, bands, boiler shop and railroad supplies, sheet-iron workers' supplies, electrical steel, corrugated sheets, roofing and siding, iron workers' machinery and tools, wagon, carriage and blacksmithing tools and supplies, machinists' supplies, hardware, etc.

THE CHICAGO CITY RAILWAY COMPANY

PROCEEDING on the theory that the public interest and the interest of a public-service corporation are by no fatal necessity at variance, and that what helps one will help the other, the management of the Chicago City Railway company is endeavoring to make its partnership ordinance obtained from the city of Chicago a practical, co-operative agreement, the observance of whose covenants will mean mutual profit and their violation mutual loss.

In pursuing this policy, the company has met with much encouragement, for instead of being compelled to prosecute its work of rehabilitation in the face of a hostile public, it has been permitted to enjoy the first fruits of public confidence and co-operation.

The Chicago City Railway company is operating under an ordinance which was passed by the council of the city of Chicago on Feb. 11, 1907, and which became effective Feb. 1 of that year. The ordinance was hailed as a "traction settlement" measure, and was approved by the electors of the city on April 2, 1907. Although many traction problems survive, operation under the ordinance has confirmed the purpose of its proponents in that it has been effective in quieting popular agitation of ten years' duration and in giving the public an improved and improving service.

The election of April 2, 1907, confirming the action of the city council, undoubtedly had the effect of "settling" the legal status of the company and fixing its relationship with the city.

The relations between city and company under the new ordinance have been characterized by sustained cordiality and a strong co-operative spirit, with the result that improvements running into millions of dollars have been made with a minimum of discomfort to the traveling public and without agitation or controversy. Rehabilitation has been carried on in a businesslike manner, and rapid progress made by the company has furnished the public with executed guarantees of good faith. The fact that the company has been enabled to push its work of reconstruction far beyond its ordinance requirements and that this progress has been made without baiting or muck-raking attests the practical value of traction peace when accompanied by bonafide co-operation between public-service corporations and public officials.

It was manifest from the outset that the Chicago City Railway company's ordinance was not one under which either city or company could obtain satisfactory results automatically, and that its efficacy would depend largely upon the degree of moral support which supplemented and re-enforced it. Liberal and careful management on the part of both principals is and will continue to be the variable factor, and, although experience shows that the ordinance contains some defects which could be corrected with advantage to both parties, a review of twenty-two months' operation thereunder indicates that it not only has been the means of securing to city and company many advantages, but that it affords the basis for the best street-railway system in the world.

The Chicago City Railway company conceives traffic to be the paramount problem of local transportation, the first step in the solution of which will have been taken when its right of way, tracks, cars, car houses, substations and other physical equipment have been reconstructed and delivered for service. The prevention of accidents and overcrowding, and the distribution, maintenance, ventilation, cleaning and heating of cars conformably to legal requirements and public necessities, will constitute the second and more important step. Questions of traffic, not being essentially financial ones, cannot be settled by the mere expenditure of money. With reconstruction and rehabilitation the general public has little to do, but no transportation company can keep abreast with the legitimate needs of its patrons and the general public without their support. The Chicago City Railway company has made and is making a frank and undisguised bid for this support and its ambition to lead the world in progressive street-railway service rests upon its expectation of winning and retaining public confidence.

BASIS OF PARTNERSHIP WITH THE CITY.

The original valuation of the property of the Chicago City Railway company, described in an appraisal inventory made by traction experts under city supervision, and the value of all franchise rights and claims of every description, was fixed in the ordinance of Feb. 11, 1907, for the purpose of city purchase at \$21,000,000. To this valuation was added \$1,816,853.19, which amount covered additional

TYPICAL CAR HOUSE OF THE CHICAGO CITY RAILWAY COMPANY, 38TH-ST. AND COTTAGE GROVE-AV.

property acquired by the company between June, 1906, and February, 1907, these dates marking the interval between the time of the original valuation and the time when the ordinance became effective.

Under its grant from the city, which grant is for a period of twenty years, the company's business is placed under the constant supervision of a board of supervising engineers and the city comptroller, the latter being the direct representative of the city in all matters relating to accounting. The company is required to make sworn annual reports to the city, and its books and accounts are kept according to forms approved by the city comptroller, to whose inspection they are open at all times.

Under the ordinance provisions relating to the board of supervising engineers, which consists of three members when Chicago City Railway matters are directly considered, the company never is in position to control the board as against the city. The name of the chairman of the board and its chief engineer, Mr. Bion J. Arnold, was written into the ordinance itself. A special representative of the city and the company's representative are the other members of this body, for the purpose of considering questions directly affecting the Chicago City Railway company.

The net profits from operation of the company are divided between the city and the company in the ratio of 55 per cent to the city and 45 per cent to the company. The ordinance is water-proof and the capital or real value of the company's property, exception being made only for such intangible values as are incident to good will and good management, are written into the records by officials whom the company does not control. Moreover, net profits are determined by deducting from gross earnings charges and expenses particularly set forth in the ordinance, the board of supervising engineers deciding what expenditures shall be charged to capital account and what expenditures shall be charged to operating expenses.

PERFORMANCES VERSUS PROMISES.

Exhibit B of the ordinance of Feb. 11, 1907, outlines a plan for "immediate rehabilitation" of the company's system of street railways. Such rehabilitation, it is provided, shall be completed within three years from the date of actual acceptance of the ordinance by the company (April 15, 1907). The specifications under rehabilitation are generally stated in the ordinance as follows:

1—To remove from the streets all of its (the company's) present cable tracks, slots and conduits, and substitute therefor electric tracks of the character and type as hereinafter described.

2—To rebuild at least 60 miles (single track) of the present electric track of the company with track of the character and type hereinafter described.

3—To construct and equip the necessary system of distribution and substations, as may be determined upon by said company with the approval of the board of supervising engineers, to transmit and transform whatever electric power may be required to enable the company at all times to operate its street railways efficiently and continuously.

4—To rebuild and re-equip its car houses so as to enable it to properly clean and maintain its cars.

5—To increase as rapidly as possible the number of double-truck cars of the character and type as hereinafter described until there shall be in operation on its street-railway system at least eight hundred (800) such cars.

As against these requirements, the Chicago City Railway company was able to show on Nov. 1, 1908, an average completion of work done of 74 per cent. On that date the company had reconstructed 74.39 miles of a total of 95 miles of track required by ordinance to be rehabilitated within three years. That is to say, the company on Nov. 1, 1908, had completed more than 78 per cent of its track work and an average of 74 per cent of all work required under the "immediate rehabilitation" provisions of its ordinance in 53 per cent of the time allotted thereunder.

The company also has in operation nearly all the double-truck cars required under its ordinance.

A recapitulation of the rehabilitation work of the company as of Nov. 1, 1908, with comparative ordinance requirements, is shown in the following table:

	Percentage completed.
1st. To remove from the street all (35 miles) cable tracks, etc.: removed	30.38 miles have been removed
2d. To rebuild at least 60 miles electric (single) track: constructed	44.01 miles have been reconstructed

DETAILS OF REHABILITATION.

1—All cable track has been removed and 87 per cent of the old cable right of way has been reconstructed with electric track. The Cottage Grove avenue division has been rehabilitated throughout with new roadbed, track, cars, car house and electrical equipment. This is the first street railway line in Chicago to be reconstructed according to the provisions of the new ordinance.

2—The company has reconstructed 44.01 miles of electric track, and, since the acceptance of its ordinance, has built ten or twelve miles of new track, bringing its total mileage to approximately 250. In connection with track reconstruction, approximately 255,343 square yards of street paving had been laid by the company at the end of the first eighteen months of operation under the ordinance of Feb. 11, 1907. This work was done at great disadvantage owing to a scarcity of granite blocks of the high quality required.

3—(a) TROLLEY WIRE—Of the 200 miles of trolley wire required, 95.63 miles have been completed. This work has followed as closely as was possible the reconstruction of tracks. New poles have been installed on all streets where new pavement has been laid by the city.

(b) CONDUIT—Of 420 miles of conduit required, 395.90 miles have been installed. This work has been pushed ahead of track reconstruction and street paving.

(c) UNDERGROUND FEEDERS—Of a total of 145 miles of cable required, 97.95 miles have been reconstructed, insulated lead-covered distribution feeders in underground conduits being substituted for overhead feeders in the district prescribed by ordinance.

(d) AUXILIARY RETURNS—Of 79 miles of cable required, 54.18 miles have been constructed. Negative auxiliary bare copper is used to conduct the return current back to the various power houses and substations. The principal purposes served by the negative auxiliary are: (1) The conservation of electrical energy and (2) the prevention of electrolysis (a) in the rails and their metallic connections and (b) in water, gas and other mains within the zone of conductivity of the electric current.

(e) SUBSTATIONS—Five substations are required with a total capacity of 44,900 K.W., this being the estimate necessary to supply electric current for the rehabilitated system. Four substations are in service, and the fifth, located at 48th and Honore streets, will be completed early in 1909. The four substations now in use have a total capacity of 30,400 K.W., distributed as follows:

Location.	Capacity.
20th and Dearborn streets.....	11,000 K.W.
42d street and Wabash avenue.....	8,000 K.W.
63d street and Wentworth avenue.....	9,000 K.W.
Plymouth court and Harrison street.....	2,400 K.W.
Total	30,400 K.W.

The company also is installing a storage battery at Plymouth court and Harrison street, with a capacity of 2,500 K.W., and another at 78th street and Vincennes Road, with a capacity of 800 K.W. These batteries will be used to reduce the "peak" load, or load during hours of maximum service, on the generating system and for emergency purposes. The battery installed at Plymouth court is ca-

pable of carrying the entire load in the downtown district for a period of fifteen minutes. The company entered into a ten-year contract, dated June 1, 1908, with the Commonwealth Edison company to furnish all the current required for the operation of its street-railway system.

4—To properly clean and maintain its cars, the company will require four modern car houses with a total capacity of 1,051 cars. Two of these car houses have been completed, one at 77th street and Vincennes Road (capacity 450 cars) and one at 38th street and Cottage Grove avenue (capacity 225 cars). The car houses under construction are located at Archer avenue and South Rockwell street (capacity 210 cars) and at 69th street and Ashland avenue (capacity 191 cars). These car houses, when completed, will give the company a total capacity of 1,076 cars as against a requirement of 1,051 cars. Land owned by the company will permit of the enlargement of its car-house equipment so as to increase their combined capacity to 1,276 cars. In addition to the foregoing, the company has a car house at 69th street and Emerald avenue (capacity 200 single-truck cars) which will be used for the storage of single-truck open car bodies in the winter and single-truck closed car bodies in the summer, so long as the use of single-truck equipment is continued.

5—The company has practically complied with its "immediate rehabilitation" requirements as to cars. It has 785 double-truck cars out of a total of 800 specified in its ordinance. This equipment includes 300 pay-as-you-enter cars purchased in 1907. It is the purpose of the company to remodel all its double-truck cars to conform to this type of construction.

Cars are being reconstructed at the company's shops, 77th street and Vincennes road, as rapidly as their withdrawal from service will permit.

MISCELLANEOUS EQUIPMENT.

CAR SHOPS—The Chicago City Railway company has one of the best equipped car shops in the world. Since the acceptance of its new ordinance, the company has installed at its shops a high pressure water pipe system for fire protection, a storage house for coal and coke, a rock-crusher plant, dry kiln, sand dryer plant and pipe house. It also has installed traveling cranes in its new car houses. Under its plan of rehabilitation, a car house is provided for each division of the service and each car house is equipped with a repair bay where damaged cars may be given prompt attention.

SPRINKLING CARS—The company has built, and now has in service, twelve M.C.B. double-truck sprinkling cars of its own design. This car is considered by experts to be the most efficient car of its kind extant. It consists of a steel tank, having a capacity of 4,000 gallons, mounted on a steel frame and equipped with four 40-horse-power motors; weight approximately 32 tons.

ELECTRIC LOCOMOTIVES—Two 40-ton electric locomotives, built at its shops, are used by the Chicago City Railway company for switching purposes at the car shops and in the material yards at 38th and Halsted streets. These locomotives are designed to haul trains of from 400 to 500 tons at a rate of speed not exceeding 7 miles an hour.

SHOP TOOLS AND MACHINERY—New and important tools and machines have been installed in the various shops of the company, all of which will materially assist in keeping up equipment and in producing economical results in operation. Among these are: Direct motor-driven wheel lathe for turning down car wheels, a direct motor-driven sanding machine, one large pipe-cutting and threading machine, and a new printing shop, in which has been installed a direct motor-driven transfer press. Drill presses, lathe and other small tools have been installed in the various division car houses for use in connection with minor repair work.

IMPROVEMENTS IN OPERATION.

CAR DISPATCHING—The Chicago City Railway company has developed a complete system of dispatching which is in operation on its lines. This system is designed to secure greater flexibility in the movement of cars so as to reduce delays and interruptions to traffic to a minimum and to govern the movement of cars as nearly as possible in accordance with the actual demands of traffic from day to day. By means of telephonic messages communicated to operatives at signal boxes installed along the company's right of way, division inspectors are brought into close touch with terminals and specified points along the various lines, and are enabled at all times to direct supervisors, starters and trainmen as to the handling of cars.

The general plan also provides for charts upon which are graphically shown

the number of cars in service, their seating capacity and maximum loads, and the load for every hour of the day. The dispatching system not only will enable the supervisors to notify the dispatcher and receive instructions from him in case of trouble or delay, but also will enable the dispatcher to call by signal one or all of the supervisors to the signal telephone located upon the street, thus bringing the whole movement of the cars under the government of a master mind. The plan makes possible the calling out of extra cars on short notice at times of heavy or unexpected travel and the respacing of cars upon any line to permit of their proper insertion.

PAY-AS-YOU-ENTER CARS—The Chicago City Railway company was the first corporation in the United States to adopt the pay-as-you-enter car, a type of street railway coach which is considered by experts to be best adapted to congested traffic and the best equipped to prevent accidents. The pay-as-you-enter cars were installed on Wabash and Cottage Grove avenues on Nov. 24, 1907. Subsequently the company placed the same equipment upon Indiana avenue, State street, 63d street and the Wallace-Center line. As operated by the company, the pay-as-you-enter car met with the almost spontaneous approval of its patrons and within a year this type of car construction was adopted in many of the larger cities of the country.

Under the old system, the conductor was permitted to collect fares at his convenience. After taking on and letting off passengers, he frequently gave the go-ahead signal while standing in the middle of a crowded car. He was often unable to command a view of either platform. Whether it was safe to start the car was a question upon which he merely ventured a guess. There is no guesswork under the pay-as-you-enter operation. Passengers are permitted to enter the car at the rear platform only. The conductor takes his post inside the railing which divides the rear platform into "entrance" and "exit" passageways. As they enter, passengers tender their fares to the conductor, who commands full view of the only entrance to his car. The motorman does not open the door of the forward vestibule for the exit of passengers until his car is stopped and the car is not put in motion until the forward door is closed and until the motorman receives the go-ahead signal from the conductor. The forward platform is used for exit purposes only.

This system has resulted in a material decrease in the number of fatal and nonfatal accidents. The remedy offered is scientific and radical, and is bound to give satisfactory results. Moreover, the pay-as-you-enter car has reduced overcrowding, making possible wider and more comfortable seats, and saving passengers who have secured seats the annoyance of frequent jostling and confusion formerly due to the passing of the conductor through the car.

ACCIDENTS—There is little doubt that the pay-as-you-enter car, under adequate operation, will prove to be the greatest factor in the prevention of personal injuries due to street railway operation ever introduced into the local transportation system, its value in this respect consisting in immediate control given trainmen over traffic and in the fact that the car itself is "hitch-on" proof.

Statistics for the first six months of operation in the fiscal year ending Jan. 31, 1909, show one fatality on the lines of the Chicago City Railway company to every 4,172,727 passengers carried as against one to every 2,593,519 passengers carried in the same period in 1907.

The 37th annual report of the Illinois railroad and warehouse commission for the year ending July 30, 1907, shows that upon the lines of electric, elevated and surface companies operating in Illinois, there was one fatality to every 2,602,399 passengers carried and that upon 147 steam railways there was one fatality to every 600,407 passengers carried.

Accidents (other than fatal) on the lines of the Chicago City Railway company show a decrease of 5.4 per cent of passengers carried in the first six months of the present (1908) fiscal year as compared with the corresponding period in 1907, the pay-as-you-enter cars showing a decrease of 16.2, with almost the entire elimination of that class of accidents sustained in boarding or leaving cars at the front platform.

FIRE INSURANCE—The premium paid by the company on fire insurance is, by the provisions of its ordinance, charged as an operating expense. The insurance now carried protects the company against 100 per cent loss on \$9,775,000 worth of property at a premium of 60 cents per \$100, this low rate being the direct result of fire-proof construction of buildings and improved inspection of the company's property. The significance of this low rate may be best shown by the following comparison with the premium rate for insurance upon the company's property for three years:

Year.	Insurable property.	Insurance carried.	Rate.	Premium.
July, 1905.	\$5,300,000.00	\$2,300,000.00	2.22	\$51,060.00

THE TRAIL OF THE TROLLEY

MONDAY TO LYONS

For a bargain ride, one in which the tourist gets the most for his money, the trip to Lyons cannot be surpassed. It is one of the longest trolley rides from the heart of the city for the price and it would be hardly stretching a point to say it is the most attractive, bar none, of all the trolley street car rides about Chicago and the suburbs.

Starting from downtown, the Ogden avenue car, by means of which the first lap of the journey is accomplished, soon emerges upon

archist riots, and is surprised to find the landmark has been removed to Union park.

At 12th street Ogden avenue broadens and takes on a more or less boulevard appearance, and at Western avenue, or just above it, it enters Douglas park, cutting the latter in two. As the car speeds on there is a good view of the park, with its glittering lake, broad lawns and old trees to the north, while in the more recently improved section to the southeast fountains spout, and over to the southwest corner appears the children's playground, forming a pleasing diversion to the inmates of the Jewish old people's home, across the street. Douglas is one of the most beautiful of the parks which make Chicago's vast system one of the most renowned in all the world.

At 40th avenue the change to the Lyons car is accomplished. The scene changes from here on and, after a brief ride, the tall chimneys and immense buildings of the Western Electric company come upon the sight. The sight-seer discovers that this gigantic plant is located at Hawthorne, for near the plant is a little red depot bearing that name.

The Lyons branch of the street-car line follows the line of the Chicago, Burlington & Quincy in a desultory way, at no time being far from it and much of the time within a stone's throw and even going under it. A little beyond Hawthorne the "real" country begins. There are vast hay fields dotted all over with mammoth stacks, some erected in beehive fashion, while others are of the longer variety. In the midst of this great field, absolutely isolated but not far removed from the village of Clyde, stands the township high school, to which students of a number of the Cicero towns and settlements are tributary. It is a large building and its size is augmented by its isolation, with nothing but waving meadows in the early summer all about it and later the great haystacks for neighbors.

LaVergne is passed and then Berwyn and the car line just skirts Riverside. One or two of the winding driveways here are observable, but for the most part Riverside, as viewed from the Lyons car window, looks like a tangled wilderness.

Then there is the beautiful Des Plaines river, which winds in and out and is to be seen at several of its curves before the end of the route is reached and the conductor switches the backs of the car seats preparatory to the journey home.

THE TRAIL OF THE TROLLEY

TUESDAY TO MAYWOOD

The trip over Madison street to 40th avenue is the least interesting part of this journey, the way lying through a more or less congested district of the west side for a considerable distance, with stores on each side until Kedzie avenue is reached. But after the change to the Maywood car is made the scene lies through more interesting localities, several pretty suburbs being encountered as the car proceeds and some charming scenery invaded.

The outlook along the right of way of the Madison street line is not wholly without interest, however. There is the usual attraction

some old residents still persist in calling it in spite of the change long since made.

Not long after the Maywood car is boarded the delightful suburb of Austin comes into view, and Oak Park takes its place in due course, with its scores of artistic homes, well-kept lawns and tidy streets. Forest Park is adjacent to Oak Park, and from here it is not a far cry to Altenheim, where aged Germans dwell together as one great family.

The building is not in plain view, though glimpses of it may be caught as the car whirls along, set away back from the street, with a shaded avenue leading directly down to

that belongs to life as it is depicted along any business street which is a main artery for traffic, as is Madison street, and there are glimpses of attractive residence streets, notably Ashland boulevard, and still more to the point, there is Garfield park—Central park, as

its entrance and broad lawns with wooded spots here and there. Then there is Concordia avenue and from here on the land is wooded down to the Des Plaines river, flowing between its high banks all fringed with twisted trees and a wild growth of willows. This region is a great place for picnics and more than one grove in the vicinity is inclosed for this very purpose, while there is open country in plenty where a cold luncheon, spread temptingly forth under broad branches, might be enjoyed.

The Des Plaines valley, indeed, is noted more or less for its beautiful scenery and the coolness of its sylvan retreats.

When Maywood is reached the car turns into 5th avenue, past pretty homes, many of them set in large grounds, on by the village hall which stands at the edge of a public park. Near at hand is the Maywood Union hospital and in another direction close by stand the fire station and waterworks. Maywood also boasts a few factories of some importance, which might interest the visitor of practical bent.

POINTERS FOR THE TOURIST—Time: One hour and fifteen minutes. Distance: Twelve miles each way. Fare: Ten cents the round trip. What to see: Pretty residence districts, popular suburbs, the Des Plaines river. Directions: Madison street car at State and Madison streets to end of line at 40th avenue, then take car on Chicago Consolidated Traction company line for Maywood.

THE TRAIL OF THE TROLLEY

WEDNESDAY TO DUNNING

Two routes may be pursued in the trip to Dunning and return. One is via the Milwaukee avenue and Irving Park boulevard lines, while the other begins on the North Clark street line, a limits car being chosen for the start, with a change to the Irving Park car at the barns. The Milwaukee avenue route is the most direct, and supposing the objective point of the trip to be the Cook county infirmary and hospital for the insane, it is the better one. One may roam the grounds of the Cook county institutions at Dunning indefinitely without exhausting all the points of interest, as the grounds cover an immense area—over a quarter of a section—and more than 100 acres of this are in the form of one of the finest gardens that was ever planted, while the balance is devoted to building sites and parks.

The trip along Milwaukee avenue is much the

they have their duties to perform), while those who are not to be trusted have the freedom of porches so inclosed and protected as to render them absolutely safe.

Including patients in the asylum and inmates of the infirmary, together with the employees, the family at Dunning numbers over 4,000 all told. Between 300 and 400 of these are attendants, office employees, etc.

Tuesday is visitors' day and on these occasions the public is taken through the buildings in squads, under the direction of a guide. However, friends of the demented and other inmates of the place are permitted to visit the institution on any day they choose and the public generally is allowed to roam the grounds at will, though they are not accommodated with the services of a guide excepting on the regular "visitors' day."

same as that in any of the business streets outside the heart of the city. As the car nears the end of the line, however, there are many open stretches, and along Irving Park the way leads to more open land, some of which is planted to "truck," while other is uncultivated and bears huge signs announcing it for sale.

The buildings of the county institutions are to be seen long before the grounds are reached, as they are large structures, several stories high. The grounds are pleasant throughout and the original building, which is now devoted entirely to the insane, faces a park filled with stately trees of venerable age. Directly in front of the entrance a fountain plays.

The patients whom it is deemed safe to allow their liberty are privileged to sit and lie about on the grass, when not otherwise engaged (for

It is an interesting sight to visit the kitchen when the preparation of a meal is under way, and when the baking of bread is in progress.

To one who has never seen it, it is quite impossible to imagine the quantities in which the food is prepared and the great size of the utensils required in cooking it. On Saturdays several thousand loaves of bread are baked, for Saturday's baking includes the bread that is used on Sunday as well as on Saturday.

POINTERS FOR THE TOURIST—Time: One hour and fifteen minutes each way. Distance: Thirteen miles each way. Fare: Ten cents the round trip. How to get there: Milwaukee avenue car from downtown, transfer to Irving Park boulevard car and go to the end of line; or Clark street limits car from downtown and transfer to Dunning.

THE TRAIL OF THE TROLLEY

THURSDAY TO EVANSTON

The journey from downtown to Evanston and North Evanston is one of real delight. North Clark street for the most of its length is a prepossessing thoroughfare, and after the business portion becomes less congested and the boarding-house district is passed, the outlook is most attractive. In the first place on many of the abutting streets are located the homes of people in more than comfortable circumstances, and in many instances the houses to be seen from the car windows possess artistic lines. Then, too, if there is a chance in Chicago to be cool it is on this journey, with the lake at no point any considerable distance away and for much of the trip only a couple of blocks or so to the eastward.

Features of the North Side.

Soon after leaving the river comes Washington square into view, backed up by the

buildings of Northwestern university, one of the most famed institutions in the west. The car moves swiftly along broad avenues, with every now and then a Greek letter fraternity house, with its ancient characters in view, to remind the stranger within its gates that he is in a college town. Further on, as North Evanston is approached, appears a sign, directing the traveler's attention to the fact that the football field is a half-mile farther north, and in due time the field itself comes into view, with its double grand stand facing the gridiron from two directions and all kept in the pink of condition.

What Makes It "Classic."

Besides the well-kept lawns, the clean streets and sidewalks and the air of culture in Evanston, the character of the houses as the "classic city" is approached changes materially from the majority of those noted in other

VIEW ON DAVIS STREET.

classic contour of the Newberry library building. Lincoln park follows soon with the Academy of Sciences facing Center street. For some distance the park frontage is traversed, and after this is left behind there are cool lawns and attractive homes in plenty. Evanston avenue leads past stately apartment blocks almost at its inception, some of these taking rank with the finest structures of their kind that this city affords.

A most beautiful spot is Buena Park. It has every advantage of physical attraction for the location of homes. The trees are stately and luxuriant of foliage, the lawns and gardens are well kept. But the car speeds on through Buena Park, through Sheridan Park, through lovely Edgewater, then Rogers Park, past Calvary cemetery and on into Evanston.

There is a real air of culture in this old college town. To the east are to be seen the

sections. Many of the new houses all through this section are built of plaster, with half-timber effects. Houses of such design are of course to be found in other locations than along the entire length of the north shore. But in other rides about the city one notices them less often. Here they are almost the rule in the case of houses put up within the last few years. Many of the porches are screened, which adds to the appearance of comfort in these homes.

POINTERS FOR THE TOURIST—Time: One hour and thirty minutes to North Evanston. Distance: Fifteen miles to North Evanston from downtown. Fare: Ten cents each way. How to get there: North Clark street and Evanston avenue cars to Devon avenue and transfer to Evanston car, or North Clark limits car and transfer to Evanston car at end of line. These cars run over the same lines downtown.

THE TRAIL OF THE TROLLEY

FRIDAY TO FOREST PARK

From Chicago to Forest Park, via 12th street, is one of the many interesting and delightful trolley trips with which this city abounds. The car is boarded at Dearborn and Adams streets and traverses most of the journey, until 12th street is reached, over 5th avenue. After the noisy loop district is left behind, the car speeds past an interminable succession of freight houses adjacent to Grand Central station, whose grim facade is conspicuous early in the jaunt. The end of these signals the approach of the historic 12th Street viaduct, the longest superstructure or series of superstructures of its kind in Chicago. This viaduct begins at Wabash avenue and ends at Canal, spanning the tracks of numerous trunk lines which find their terminus in Chicago, and a branch of the Chicago River

But it is not necessary for the tourist to leave the car to get an insight into the characteristics of this locality. Many of the stores bear the ancient and quaint Hebrew characters to advertise their wares and the frequency of the fish markets and the co-tuning of the inhabitants, the Israelitish beards of the men, all give their coloring to this spot. And even before the last of the Ghetto is seen loom the great structures of Holy Family church and St. Ignatius college, a vast pile altogether, the church the largest in the city. This is between May street and Blue Island avenue. At Ashland 12th street broadens into a boulevard to form the connecting link between Douglas park and the great system of boulevards that links Chicago's unparalleled park series. Douglas park itself

as well. The termination of the viaduct plunges one almost into the heart of the Ghetto. Twelfth street itself is not so typically a Ghetto thoroughfare as are the streets abutting, but the latter are quite distinctive and if one has the time, one is well repaid for a stop-over to make a sortie into Jefferson street, preferably southward, or down any of the highways and byways that honeycomb the famed "Maxwell street district." In the summer, of nights, the streets are filled with the sleeping figures of inmates of the hovels and tenements that form the abode for the sweatshop workers, wagon peddlers and others in the various lines of trade and occupation peculiar to the race. On unusually hot nights the pedestrian has fairly to pick his way in order not to stumble over the sleeping forms.

is soon passed. An object of interest before the change is made at 40th avenue are the mammoth storehouses of the Sears-Roebuck company, which rise to the north when Turner avenue is reached. At 40th avenue a transfer is taken to another 12th street car and this conveys the tourist as far west as Desplaines avenue and lands the jaunter at the gates of beautiful Forest Park. The Desplaines river is near at hand, just a few blocks west of Desplaines avenue.

POINTERS FOR THE TOURIST—Time, two hours and fifteen minutes the round trip. Distance, ten miles each way. Fare, the round trip, 10c. Directions: Twelfth street car at Adams and Dearborn streets. Transfer at 40th street to car going west on 12th.

THE TRAIL OF THE TROLLEY

SATURDAY TO NORTHWEST SIDE

Tourists who like to visit old landmarks will find it to their interest to take a trip of an hour on the Elston avenue line running over the northwestern side of the city and traversing along one angle of the once notorious Goose Island, finally landing its passengers before the main entrance of the National Bohemian Cemetery.

The Bohemian cemetery is just $8\frac{1}{2}$ miles from the center of the city, making the round trip 17 miles, all of which can be traveled for the small sum of one dime. The Elston avenue car can be taken at State and Randolph streets. Speeding down Lake street to Milwaukee avenue the car turns north to Elston avenue, a region of numerous factories, tiny

the Ogden Canal touching each side of the bend, the water of the river and the canal forming a triangle around the land. But Goose Island is no longer Goose Island in the sense the name implied long years ago, when its inhabitants, chiefly foreigners of the lower as well as the poorer element, enlivened the scene with boxing bouts premeditated and impromptu, cock fights and dog fights and many other entertainments more or less disturbing to the peace of the city. The shanties are about all gone now and in their place are lumber and coal yards, factories and tanneries and here and there a grain and feed store.

But the trolley is whirling on past this stretch of a mile of island into less busy and

ALONG THE NORTH BRANCH.

homes and shops and great gas plants, via Milwaukee avenue. At Canal street may be seen the great work of the C. & N.-W. Railway company, where \$20,000,000 is being invested in new terminals and a new passenger station. At Halsted street may be seen, night and morning, one of the busiest street crossings in town, right in the heart of the Italian district, frequently called "Little Sicily". Turning off Milwaukee avenue into Elston avenue one comes to a glove and mitten manufactory and a tannery and stretching out a mile on the left from Chicago avenue to North avenue lies Goose Island, a bonafide island right in Chicago, made so by a crook in the North branch of the Chicago river, and

less settled quarters. It leaves Elston road at North 40th avenue and presently, crossing the river, arrives at the National Bohemian cemetery, a garden spot of rest, after the busy factories and other evidences of toil and grime and sordidness. A walk in the cemetery beneath the trees and among the blossoms of hundreds of commemorative gardens and the tourist is ready to make the homeward journey of just 59 minutes into town.

POINTERS FOR THE TOURIST—Time, 59 minutes each way. Distance, $8\frac{1}{2}$ miles each way. Fare, 10 cents the round trip. How to get there: Elston avenue car from Randolph and State to end of line. What to see: Goose Island, Bohemian Cemetery and many manufacturing industries.

THE TRAIL OF THE TROLLEY

SUNDAY TO BOWMANVILLE OR ROSE HILL

A pleasant north side trip is one which begins via the Lincoln avenue branch of the Clark street line and whose destination may be either Bowmanville or Rosehill cemetery. Starting at Monroe and Dearborn streets, the journey to Bowmanville, if that is chosen as the objective point, a distance of eight miles, may be made in a trifle less than one hour and without change of cars, the place being located at the end of the Lincoln avenue line just northwest of Ravenswood. The big attraction at Bowmanville is what is known as Budlong's pickle farm, though the cucumbers have long since ceased to be the principal crop, owing to a "disease" that has appeared among these vegetables.

The trip is made down Clark street past Lincoln park and then down Lincoln avenue, which is one of the most enterprising of the

Chicago to Winnetka became one of the regions affected for the past eight years, therefore the crop has been changed to every variety of garden truck the soil will grow. And the most of the green stuff goes to supply Chicago tables, though crops are shipped to all parts of the United States and numerous Canadian markets. In the busy season there are no less than 2,000 persons on the pay roll of this Chicago farm.

In taking the Rosehill trip, which, by the way, ends within walking distance of the Budlong pickle farm, the Lincoln avenue car is left at Robey street, where a transfer to the Robey street car brings the passenger to his destination. Rosehill is one of the most beautiful as well as one of the oldest burial grounds about the city, having been established in 1859. Many soldiers have found their last resting place in the grounds, the spot marked

outlying business streets. Here in the evening the shops show gorgeous window displays and the big illumination of much of the avenue with arc and incandescent lights, an every-day affair with these shopkeepers, gives the air of a perpetual holiday.

Out toward Bowmanville the shops are smaller and more scattered, but the farm's the thing in this locality and visitors are welcome to stroll through as far as feet will endure at any and all times of the day. The Budlong farm has been in existence since 1859, so it may be said to be something of a pioneer in this region, and time was when 100,000 bushels of so-called "pickles" were turned out of the place. But that was in the good old days before pickles took to having diseases like humankind, and this particular district from the lake to Milwaukee avenue and from

with a towering monumental figure directly ahead as the entrance is reached.

On the way to Rosehill one must not fail to observe to the left in Robey street, shortly before reaching the cemetery, the big greenhouses with their many acres of roses, carnations and lilies. Visitors are always welcome here among the blossoms under the 2,000,000 feet of glass. The establishment is said to be the largest acreage under glass in the United States.

POINTERS FOR THE TOURIST—Time: To Bowmanville, 50 minutes each way. To Rosehill, 45 minutes each way. Distance to Bowmanville, seven miles; to Rosehill, seven miles. Fare to either place, 10 cents the round trip. How to get there: Lincoln avenue car from Monroe and Dearborn streets to Bowmanville. Same car to Rosehill with transfer at Robey street to Robey car.

THE TRAIL OF THE TROLLEY

ANY DAY—ALL AROUND TOWN

This is a "loop the loop" trip, starting from Clark and Randolph streets. The route is via Clark street, past Lincoln Park to Belmont avenue. Transfer can be procured for the Belmont car, which makes a bee line for Milwaukee avenue, its terminal, eight miles from the center of town and 65 minutes' ride. At this point take a southbound car to Western avenue. Paying another fare and securing a transfer for Western avenue, take the Western avenue car to 26th street, where a second transfer to a Blue Island avenue car will lead to the center of town, Adams and Dearborn-sts.

This "loop the loop" trip will be found attractive from an educational standpoint, and there are several pretty views, along Belmont and Milwaukee avenues, notably the glimpses

large stone quarry, a soap factory and several churches. Many factories line the way and four elevated roads are passed by means of subways.

To the west, at Madison street, is Garfield park, one of the most beautiful in the city and well worth a special trip at any time.

Farther south is the big roundhouse of the Chicago, Burlington & Quincy railroad amid a vast number of tracks. Nearing 26th street the bridge over the big Drainage canal can be seen over to the south a few blocks away, while straight ahead rise the buildings of the International Harvester Company, one of the greatest farm implement manufactories in the world. Here also is located the McCormick Evening Technical school for those workmen with ambition to rise above the labor requiring only brawn. Then there is a men's club for

A NEW GARFIELD PARK VIEW.

of Riverview Park by the side of the north branch of the river, which winds in and out here like a real country rivulet. But the features of this trip are not the beauties of scenery, but places of interest in the way of amusement, industry and education.

Passing Lincoln Park, about the first really interesting place is Riverview Park, where, amid the trees and shrubs, can be seen quite plainly the various alluring devices for the amusement of the pleasure seeker.

Avondale consists of rows upon rows of workmen's houses, all alike, with a stone quarry to the east. It is on the home trip that most of the interesting sights are observed. Taking the Milwaukee avenue car and passing through a district of shopkeepers, out of which appears Logan Square, with its patch of green and trees, the passenger reaches Western avenue, transferring on Western avenue to 26th street. This car passes a

the benefit of employes socially and educationally. A short distance west is Douglas boulevard, and the John Worthy school for boys, a large fine edifice. The finish of the loop is made by taking the Blue Island avenue car past the lumber yard district and other evidences of Chicago's industries, and finally into town by way of Dearborn street to Adams.

POINTERS FOR THE TOURIST—Time, two hours and forty-five minutes, the round trip. Fare, ten cents the round trip. What to see: Riverview Park, saw factory and many other factories, McCormick Reaper Works, John Worthy school, churches. Directions: Clark street car at Randolph and Clark streets to Belmont; Belmont car to Milwaukee avenue; Milwaukee avenue car to Western avenue; Western avenue car to 26th street, Blue Island avenue car to Adams and Dearborn.
